# Where do you go to find...?

**Y**ou're crazy, you must be crazy. Where do you go to find . . . WHAT? I never lost anything!

Now, think about it. Where do you go to find . . . ?

*What? Where? I don't know what you're talking about!*

OK, let's make this as simple as possible. Take the lost shoe approach.

*Whatever you say.*

Now, when you lose a shoe, the first thing you establish is whether or not it is really lost.

*True.*

The next thing you do is retrace your steps and decide on the most logical place to find the shoe.

*OK.*

Then you INVESTIGATE!

*Terrific. I've decided I'm confused.*

It's so simple; if you're looking for something, you just have to find the right place! That's how this book works.

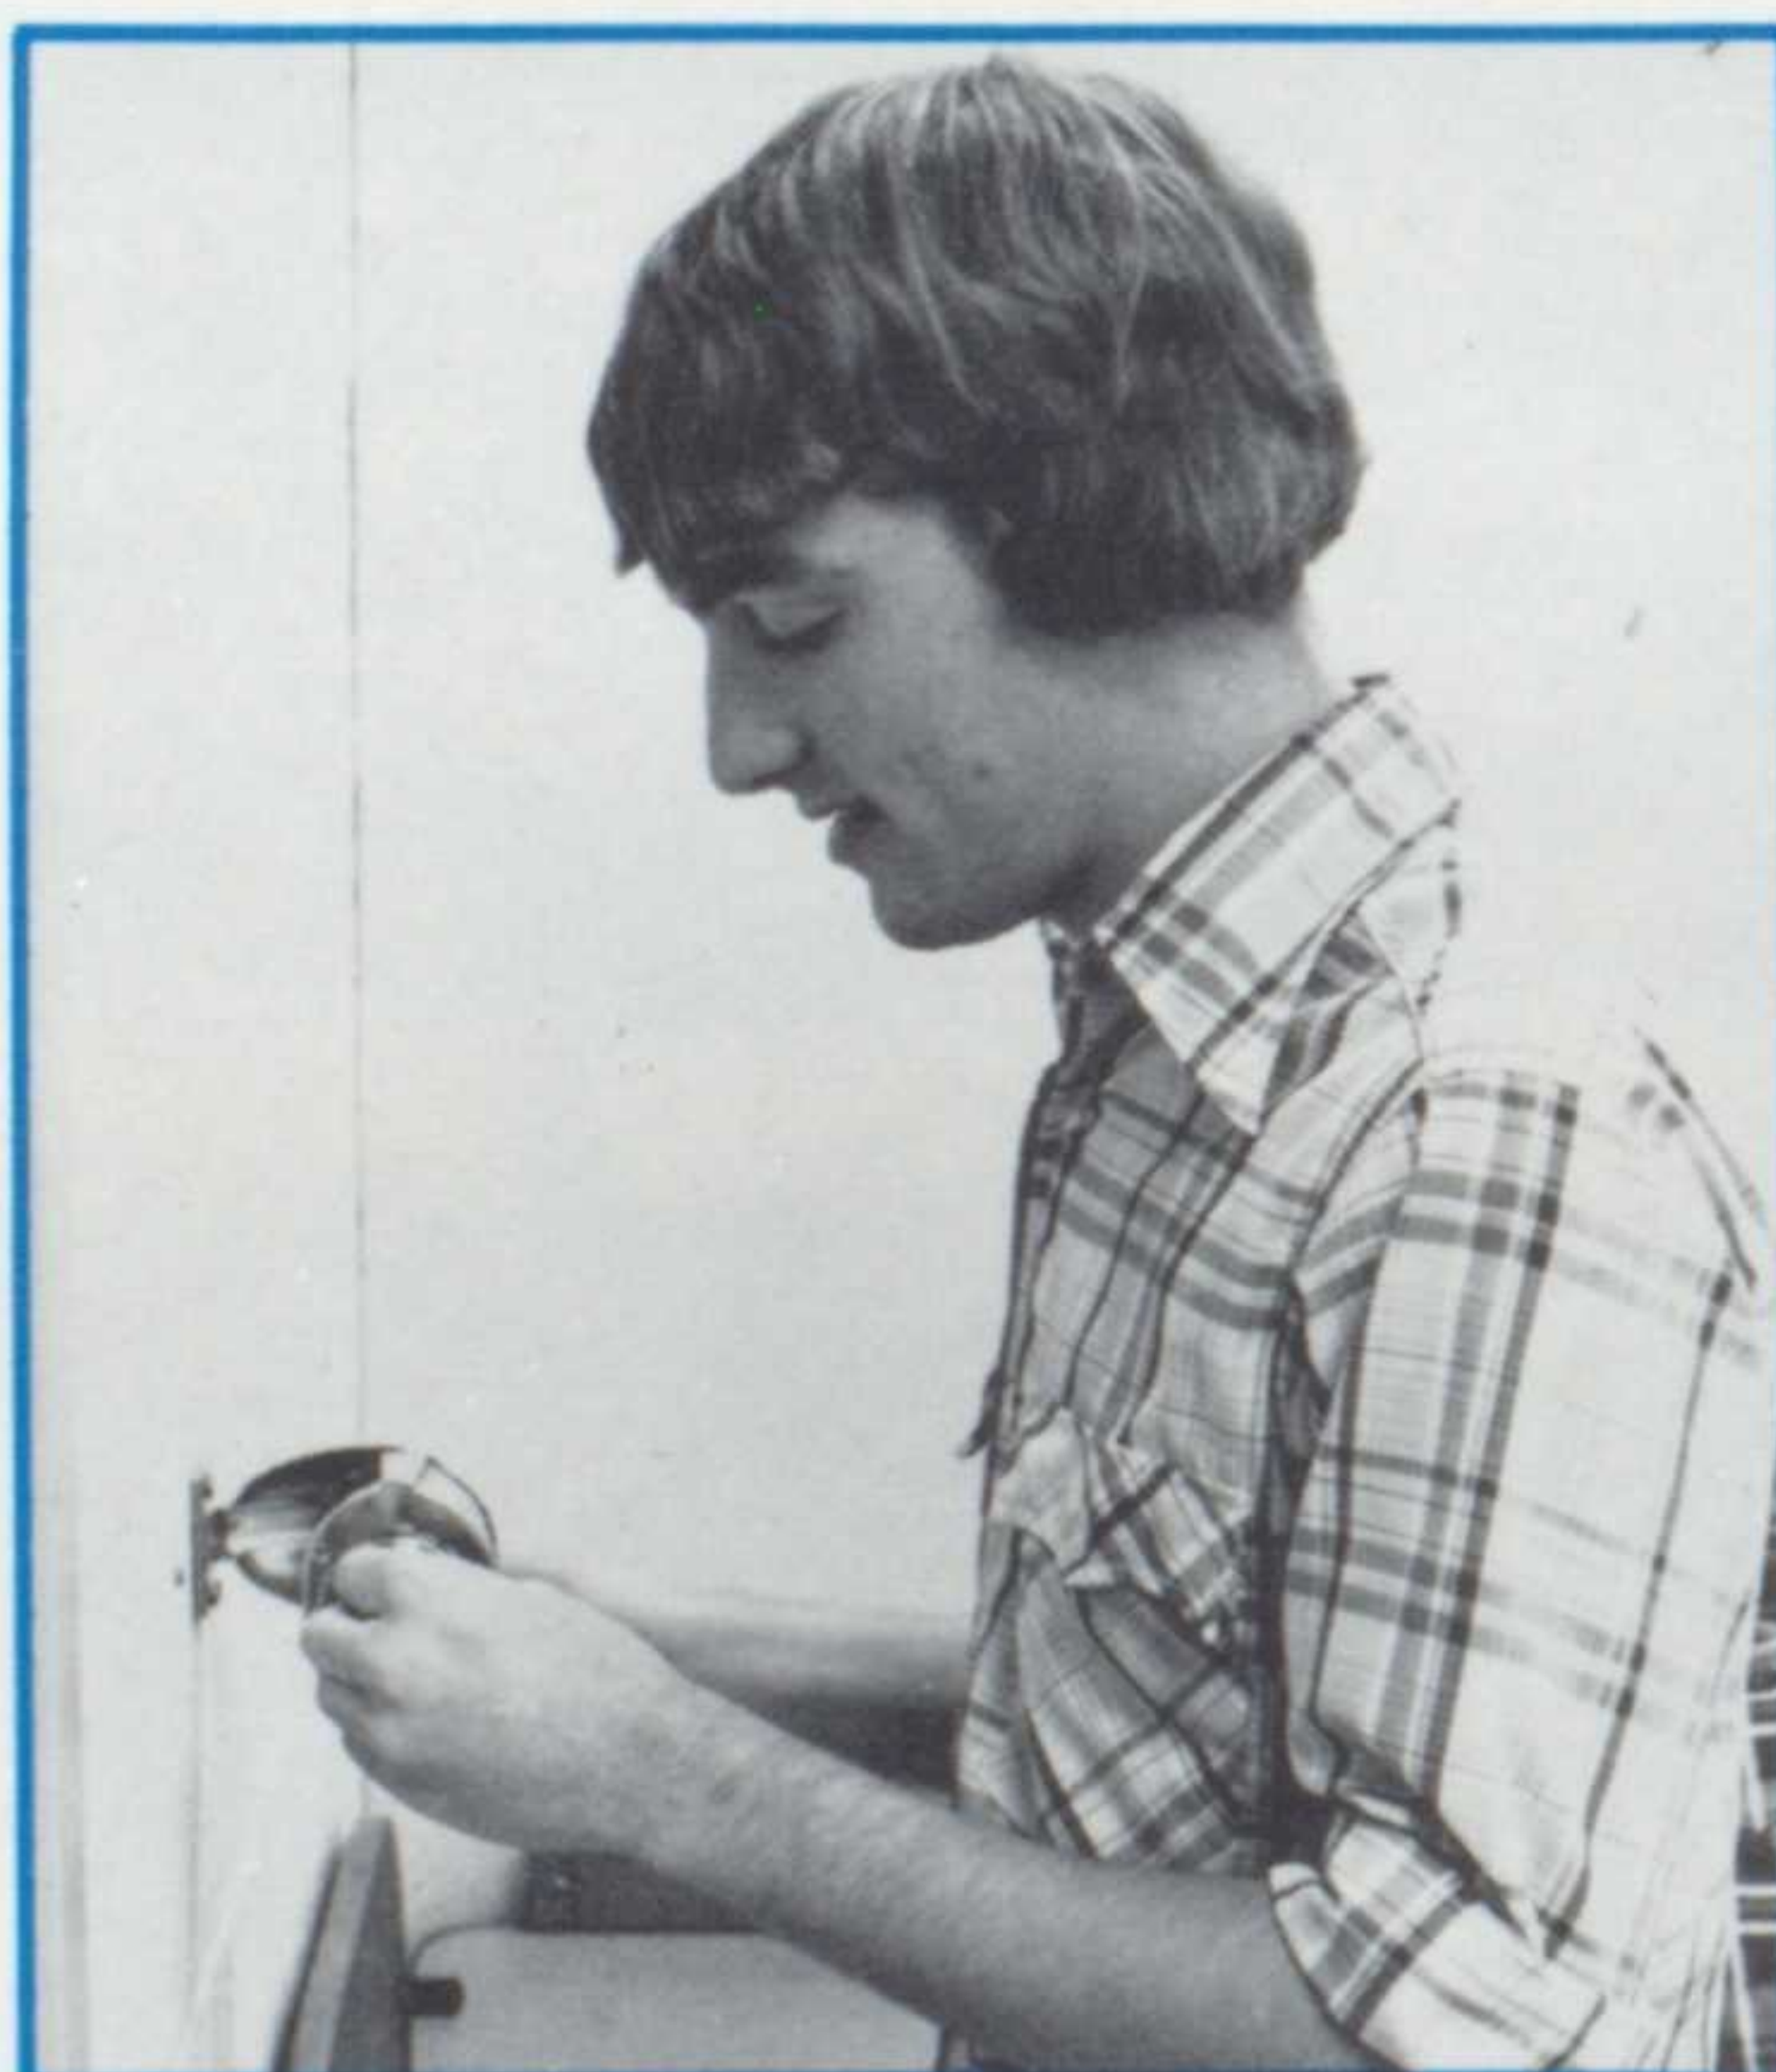

*Wait a minute. Will you please tell me what I'm looking for!*

Where do you go to find . . . ?

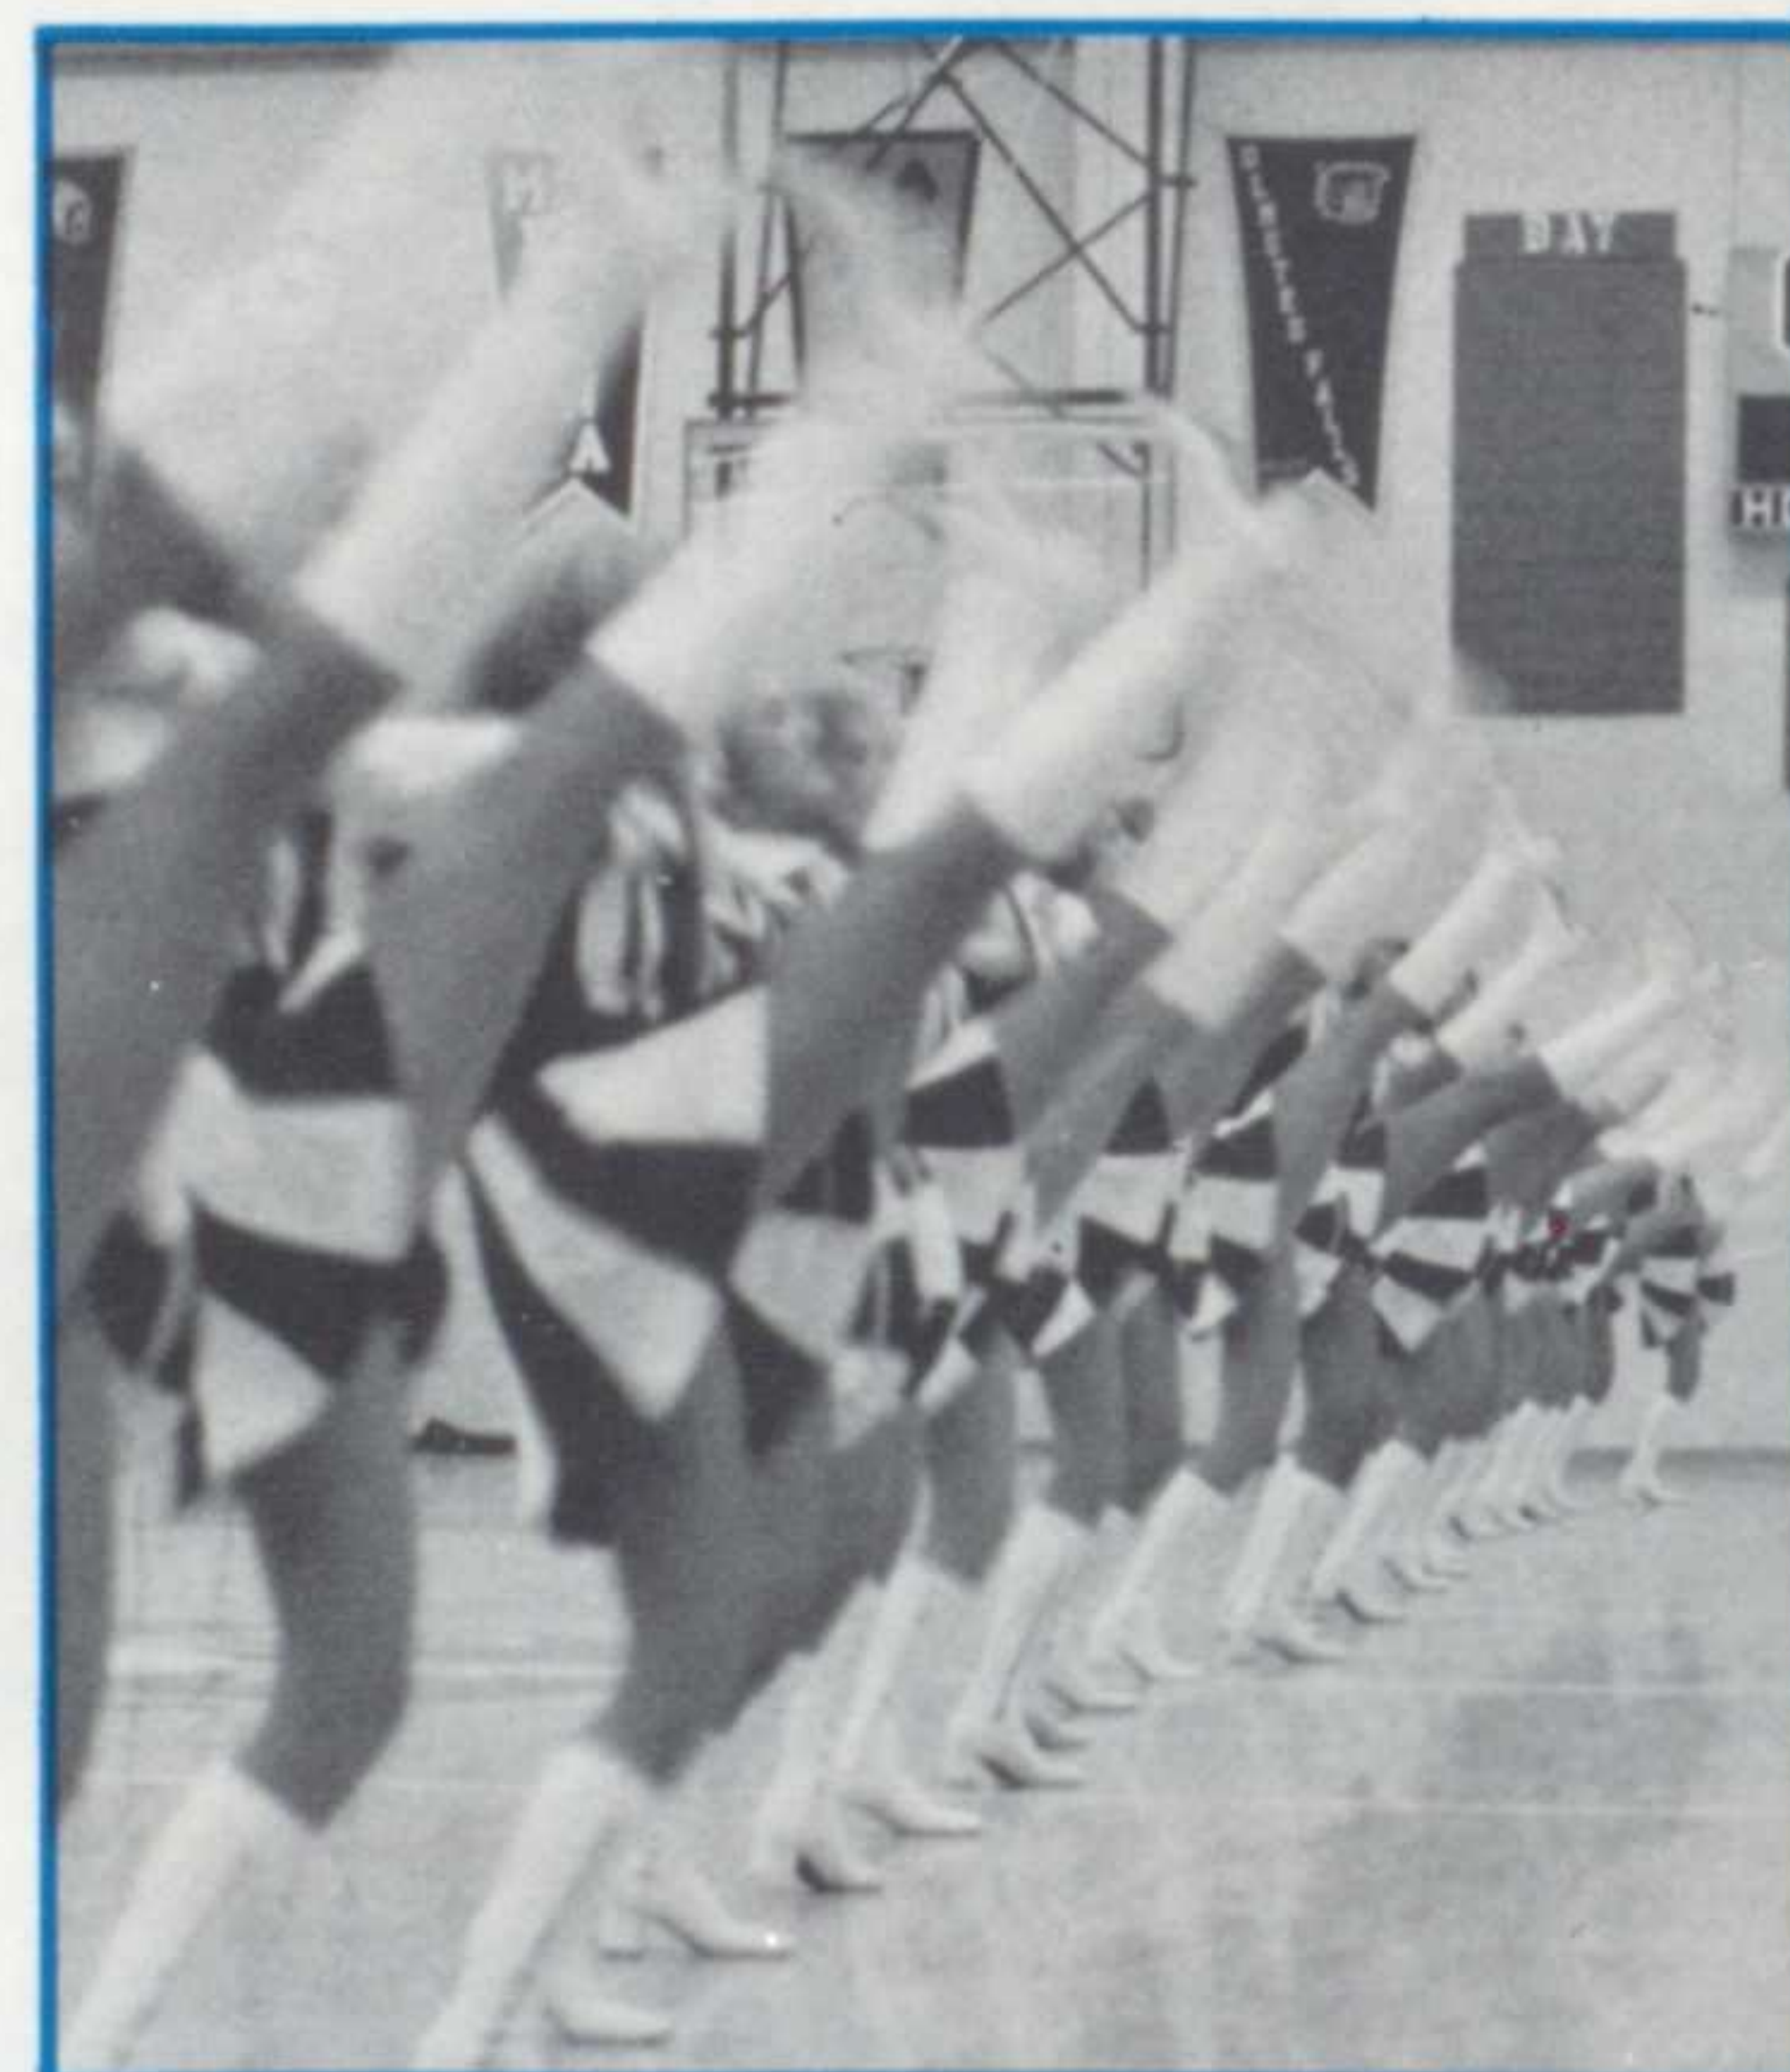

—J. Heiser

Lorraine Dorsey in *Guys and Dolls*, and

—J. Heiser

Todd Buerger's best pencil sharpener, and

—J. Heiser

the Rockettes in unison, and

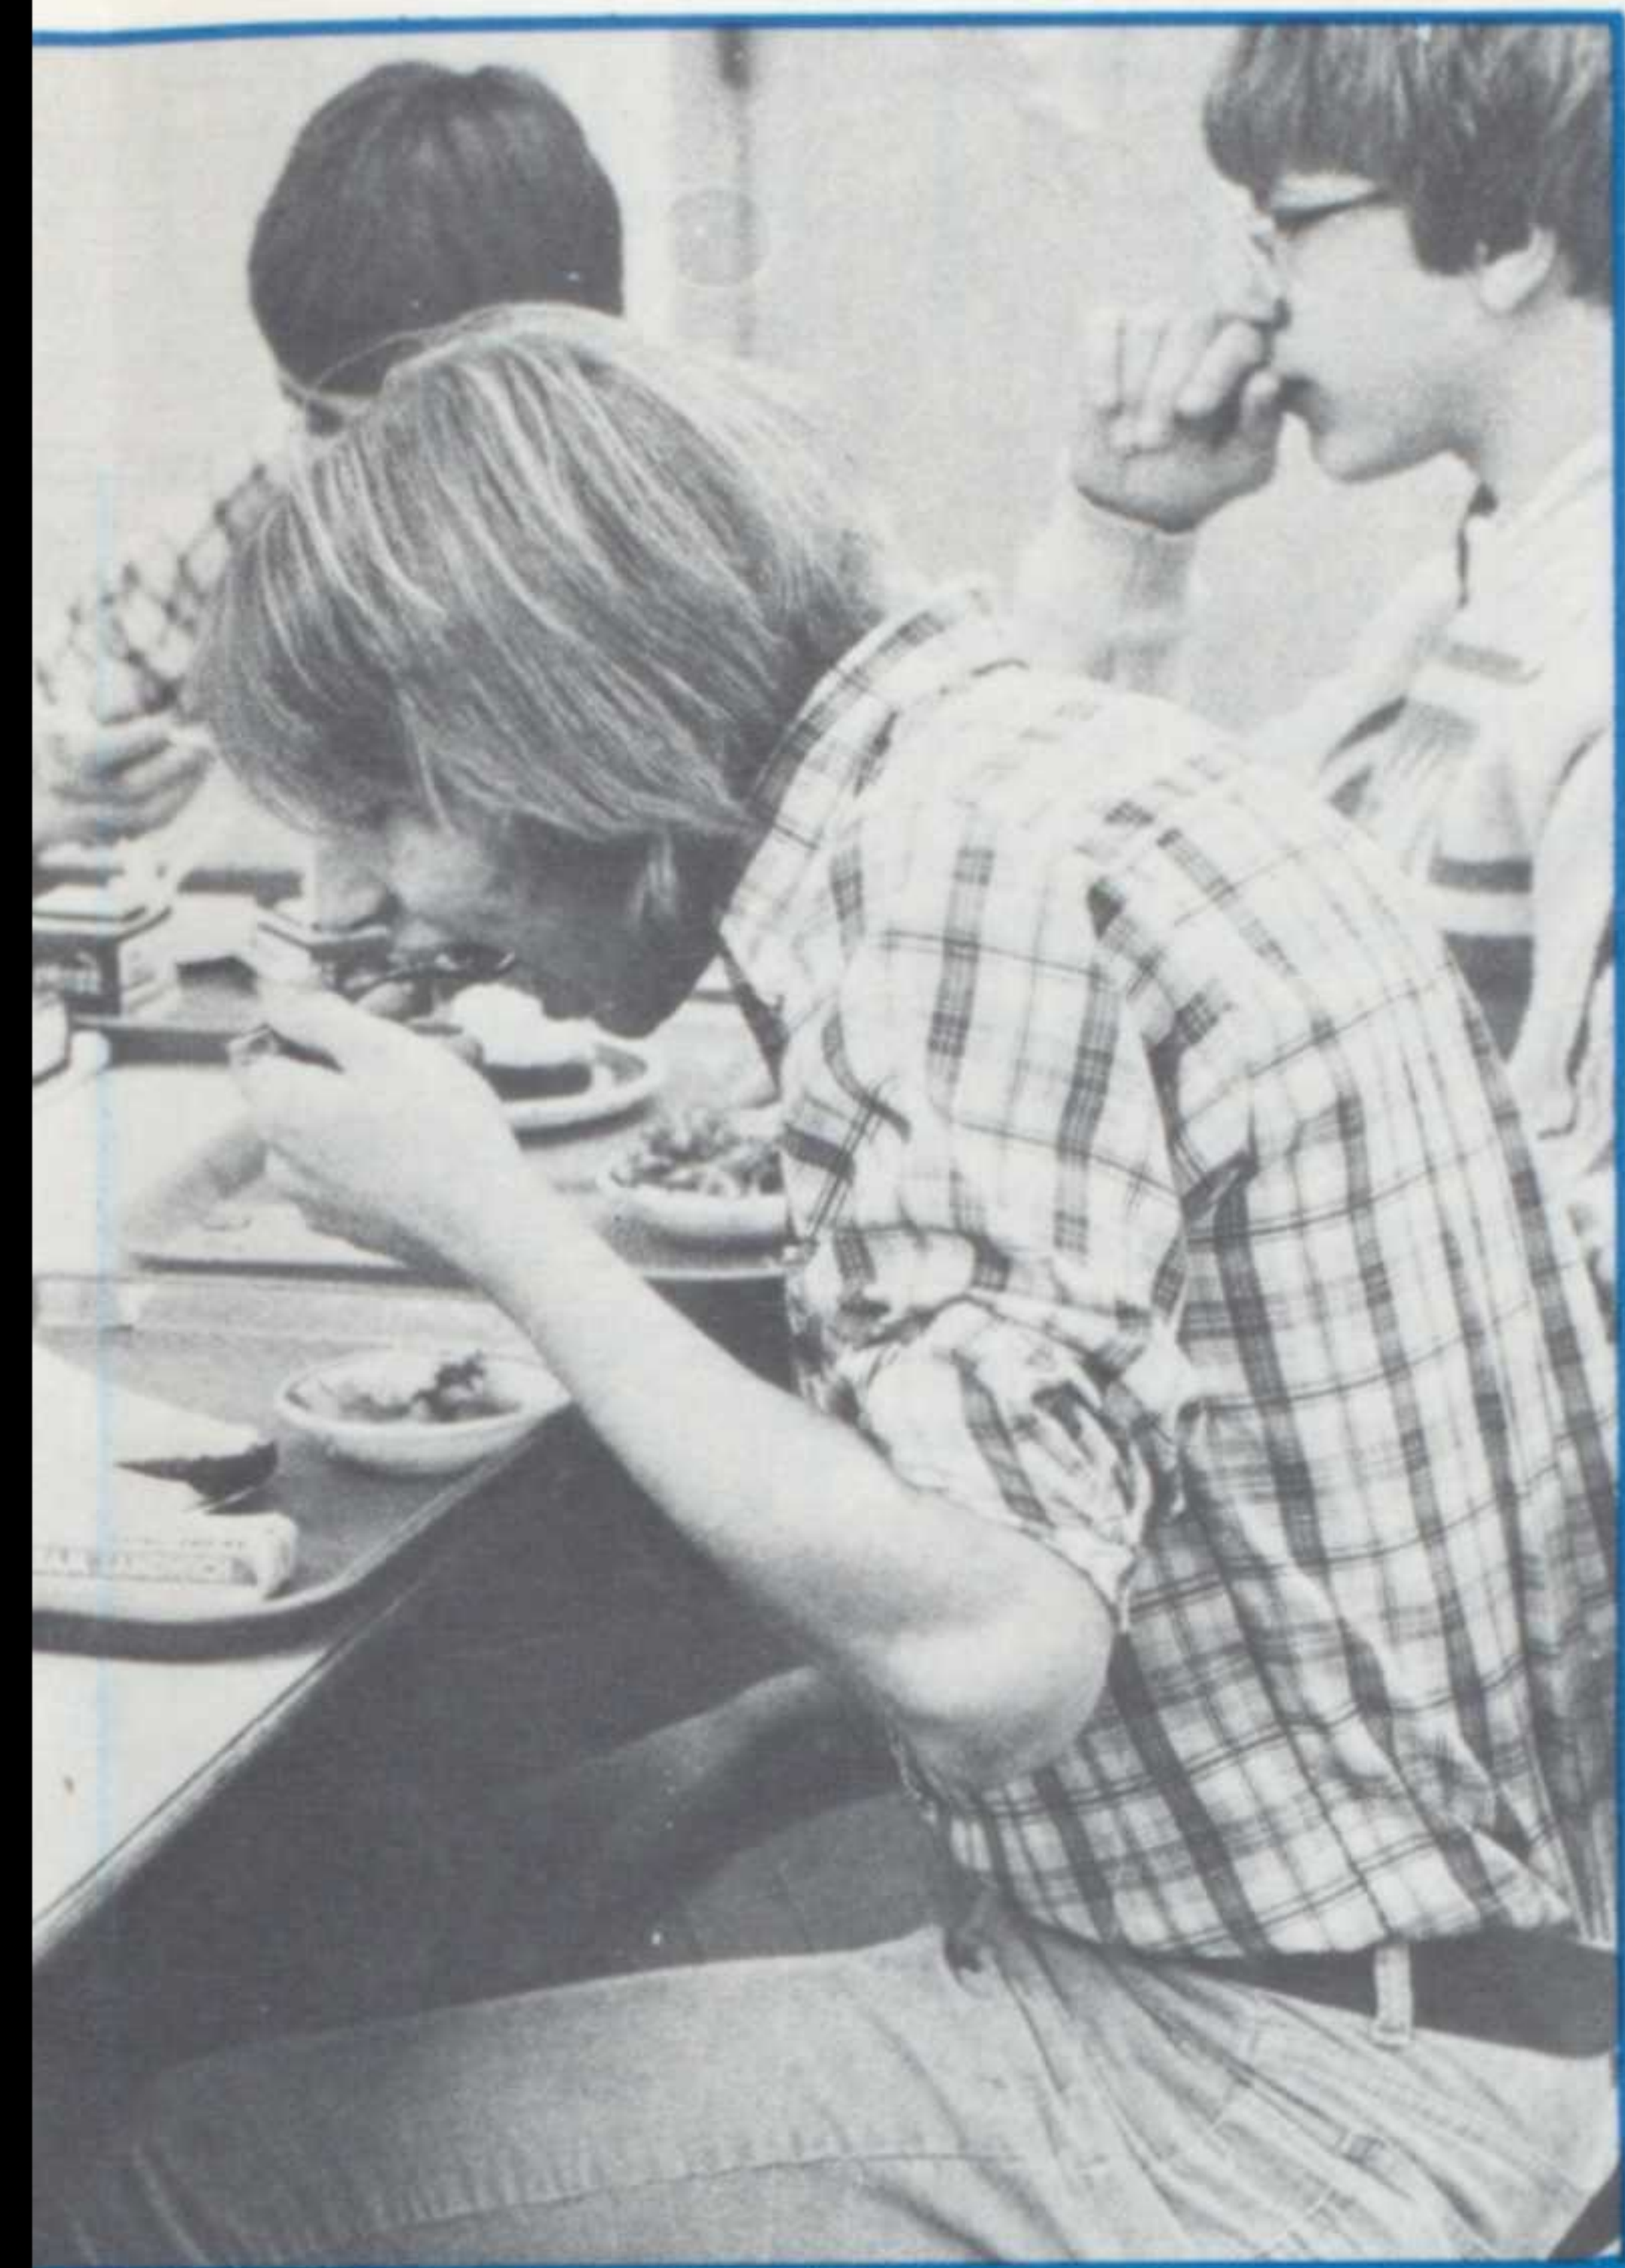

—J. Heiser

—J. Heiser

the Buckeye Biscuits in concert, and

—B. Calmus

a tossed salad for lunch, and

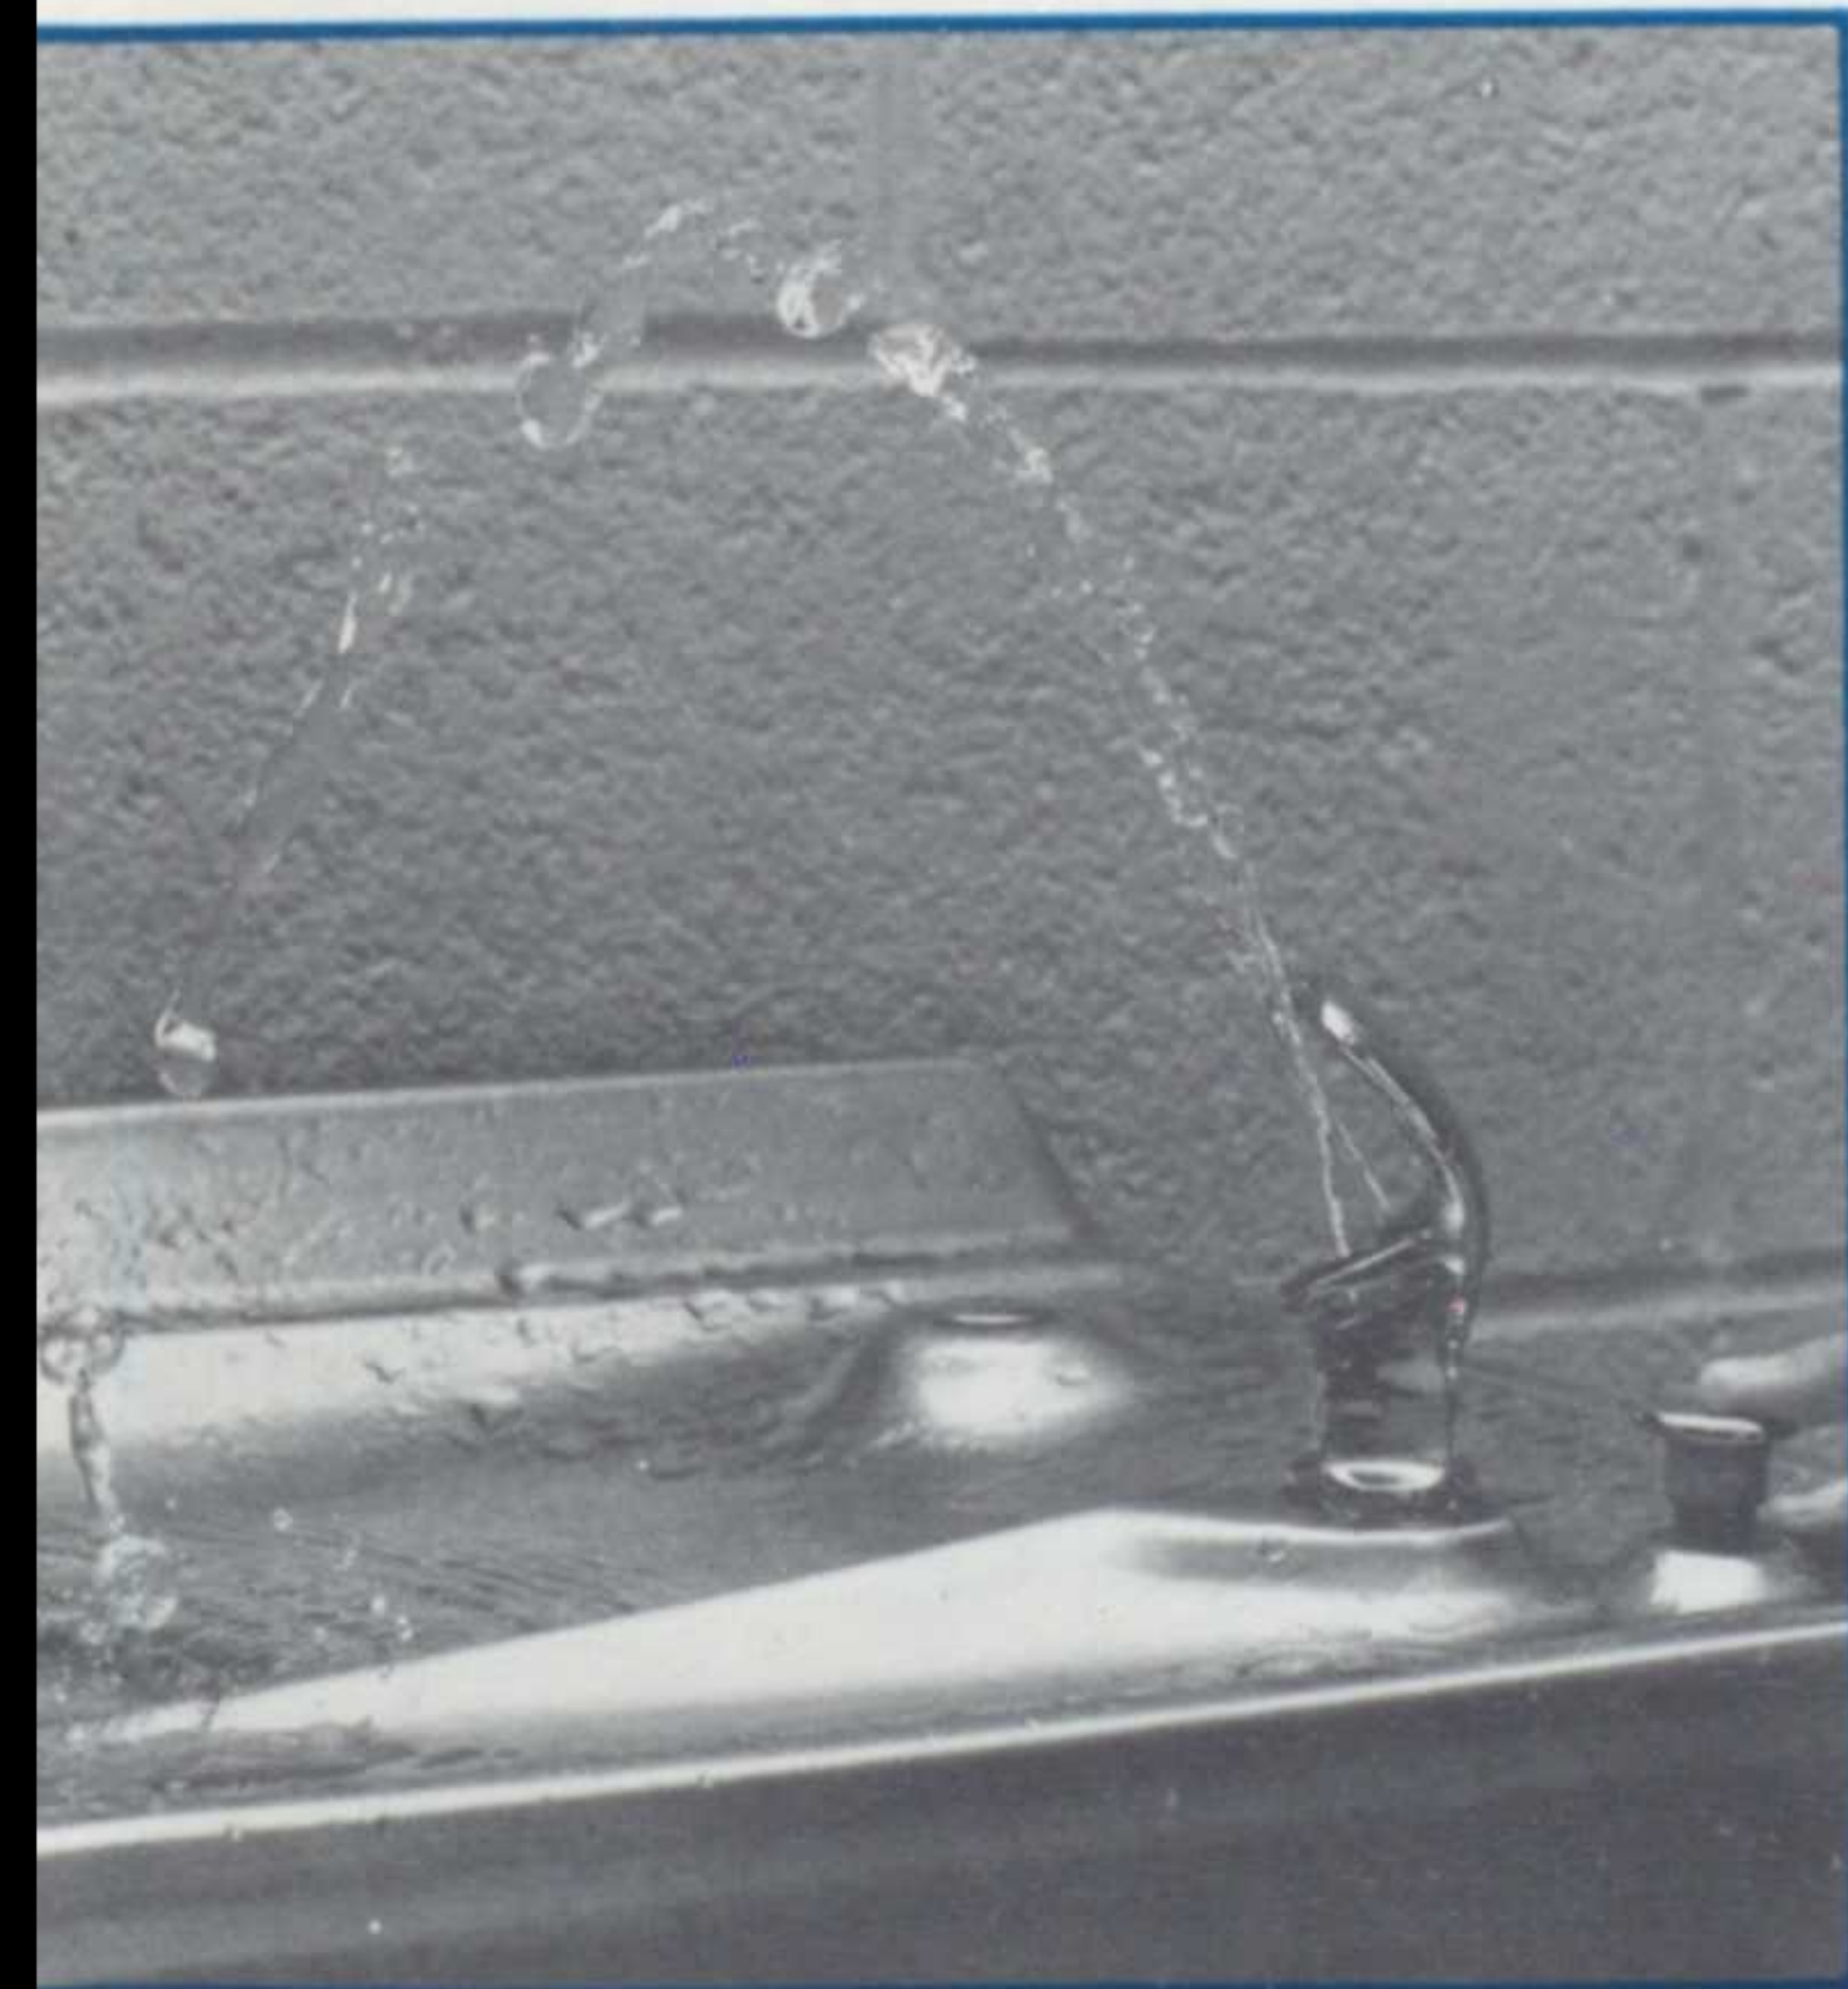

—J. Heiser

the Mike Deanna Wrestling Trophy, and

—J. Heiser

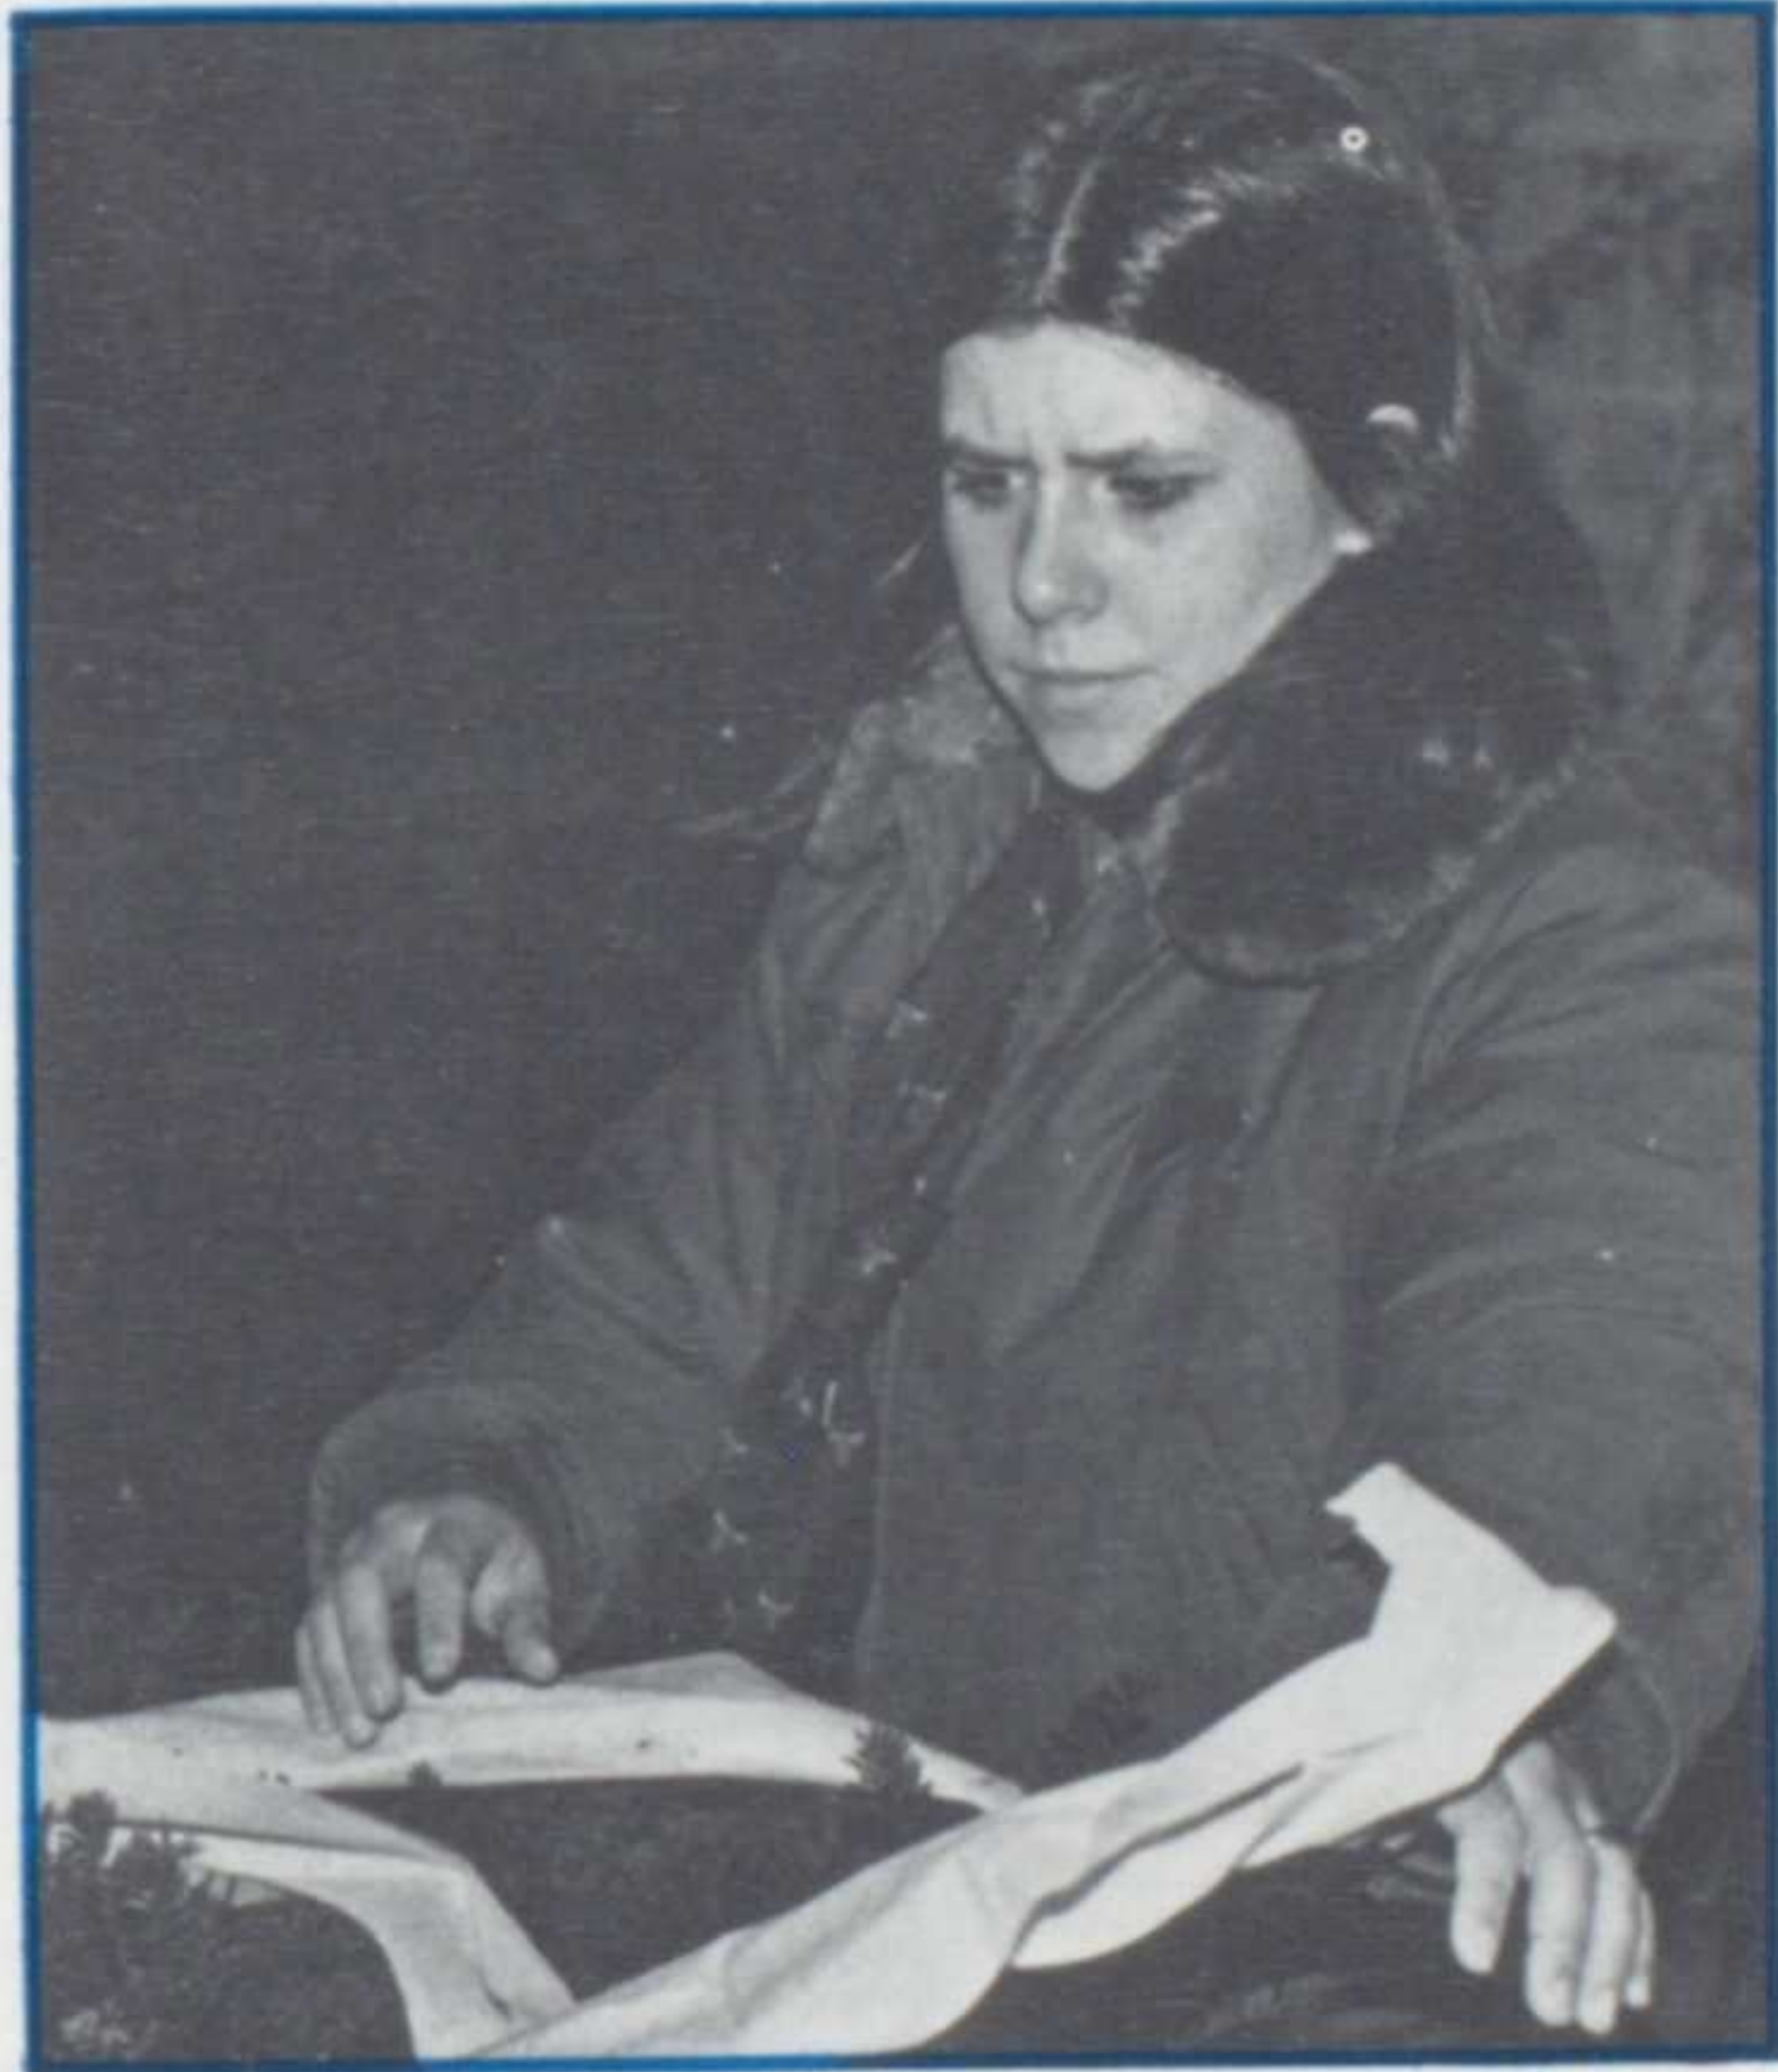

Jay Heiser's saxophone, and

—J. Heiser

a really cold drinking fountain, and  
three slightly used soccer balls, and

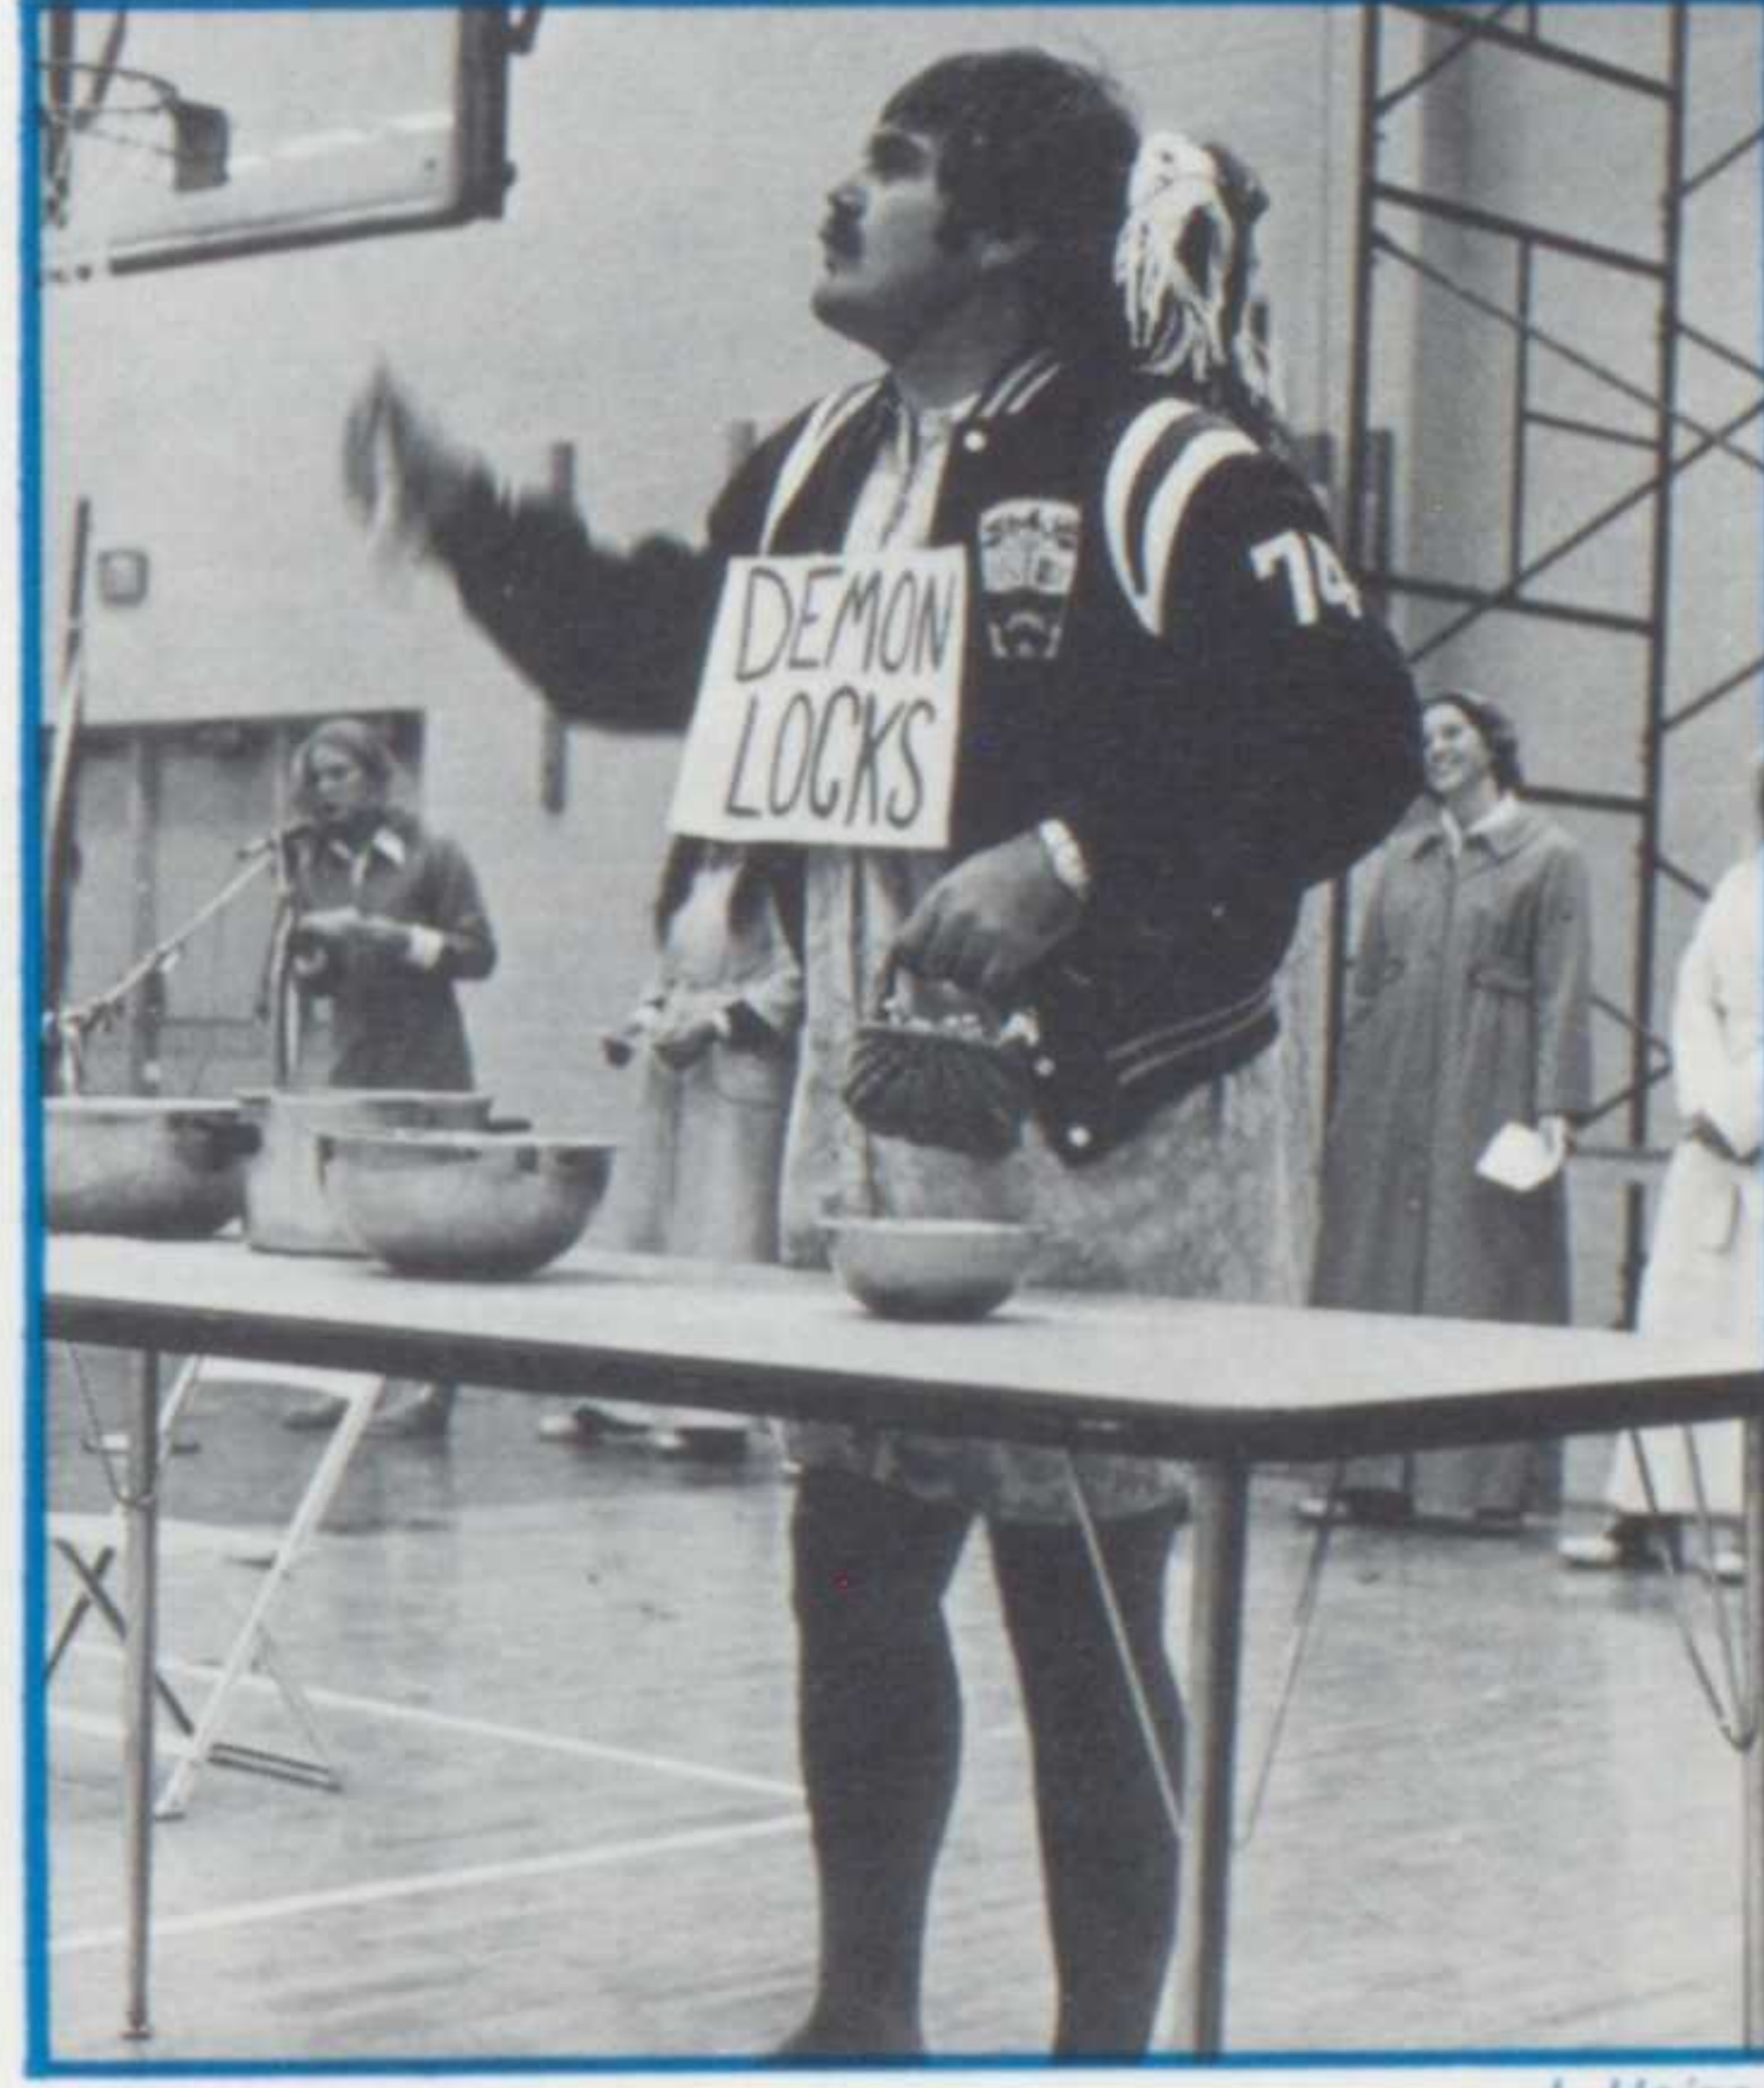

—J. Heiser

—J. Heiser

Sue Smith decorating houses, and  
an ancient Egyptian mural.

—J. Heiser

—J. Heiser

Mr. Herron displaying spirit, and

*OK, OK, OK, already, I get the message. Are you sure you aren't crazy?*

*That's beside the point.*

*All right? Just one incidental point. Now that we know what we're looking for, where do we go from here?*

*We are going to find... *

# EVERYTHING TOGETHER!

Believe it or not, all those little things and even some bigger things fit together and they all belong in a pretty incredible place.

*I find this whole conversation to be rather incredible.*

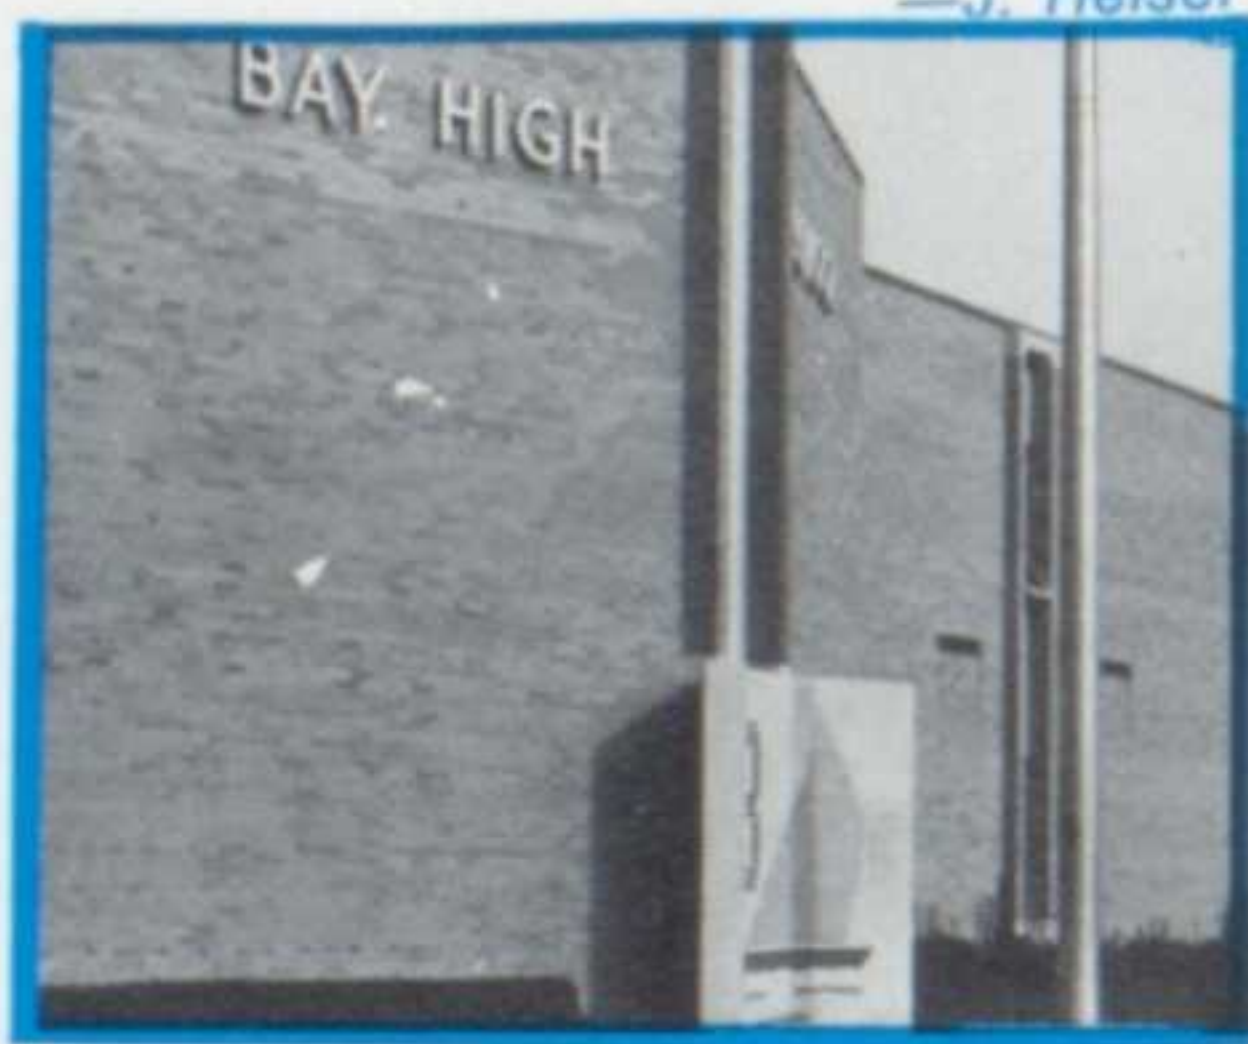

Now, granted this place might not offer everything to everybody, but in this case, close counts.

*I think I'm lost.*

Consider this: where else can you find a whole, working community that surrounds 1,481 Bay students?

*Maybe Westlake?*

I'll pretend I didn't hear that. The only logical place is Bay High.

—J. Heiser

*OK, so we've established where we are and why we are looking for things, but how do we go about finding these things?*

Well, remember the lost shoe approach?

*Yeah.*

Apply it to this: Where would you go to find a football game?

—J. Heiser

*That's obvious, in the stadium.*

Exactly. Now, add a little abstract thinking to this problem. Where would you go to find Chris Fox and Lynda Bell in trouble; in fact, in danger of instant banishment?

—J. Heiser

*Where is talking a social crime? HA, I've got it, the library! This is pretty funny.*

—J. Heiser

See, just add a little imagination and you shouldn't have any problems at all. Both the concrete and abstract fit into the system.

*HOLD IT! You've done it again. WHAT SYSTEM?*

Still don't understand? You don't get it yet?

*About the only thing I've gotten is more confused. Please explain. WHAT SYSTEM?*

Why, a geographical format, of course.

*I should have known.*

It isn't that difficult. See this map?

*Yeah.*

And see the arrows wandering through it?

*Yeah.*

That's the path the book is following. Just keep that geographical plan in mind when you're using your logic system.

*But why just the school? Why not the entire area?*

We're not using just the school; areas on the outside are included too. But the school makes an easy reference point. It's someplace we know well. Everything branches out from there.

*Doesn't that make it sort of difficult to find things?*

Not really, watch. The system conveniently falls into three sections. If it happens, it's in Action. If it's alive, it's in People. If it's for sale, it's in Ads.

Chris Crowe • Kate Elliott •

HGM Bay Superette • Victor

Chess Club • World H

bert Moore • Rosema

Station • The Wayside

# Action

—J. Heiser

Tim Wilmot's offense, and

—J. Heiser

the Great Pie Eat-Off, and

—B. Calmus

Kathy Poltorak at halftime.

story • The best running shoes • Tree houses • Marchi  
 y Gibbons • Brad Svenson • Ms. Ghezzi • Dennis Pontius  
 Shop • Quen's Cleaners • Grebe's • Daniel's Funeral

Ah, you mean all the sports, clubs, organizations, student life, activities, and even academics?

**Yup, and one more thing. All the things you do and experience during the year are included in this section.**

Great, let's go find some Action!

**Control yourself.**

**With his experience** in the Ohio University Marching Band to help him out, Mr. Day critically observes problems in the show he has arranged.

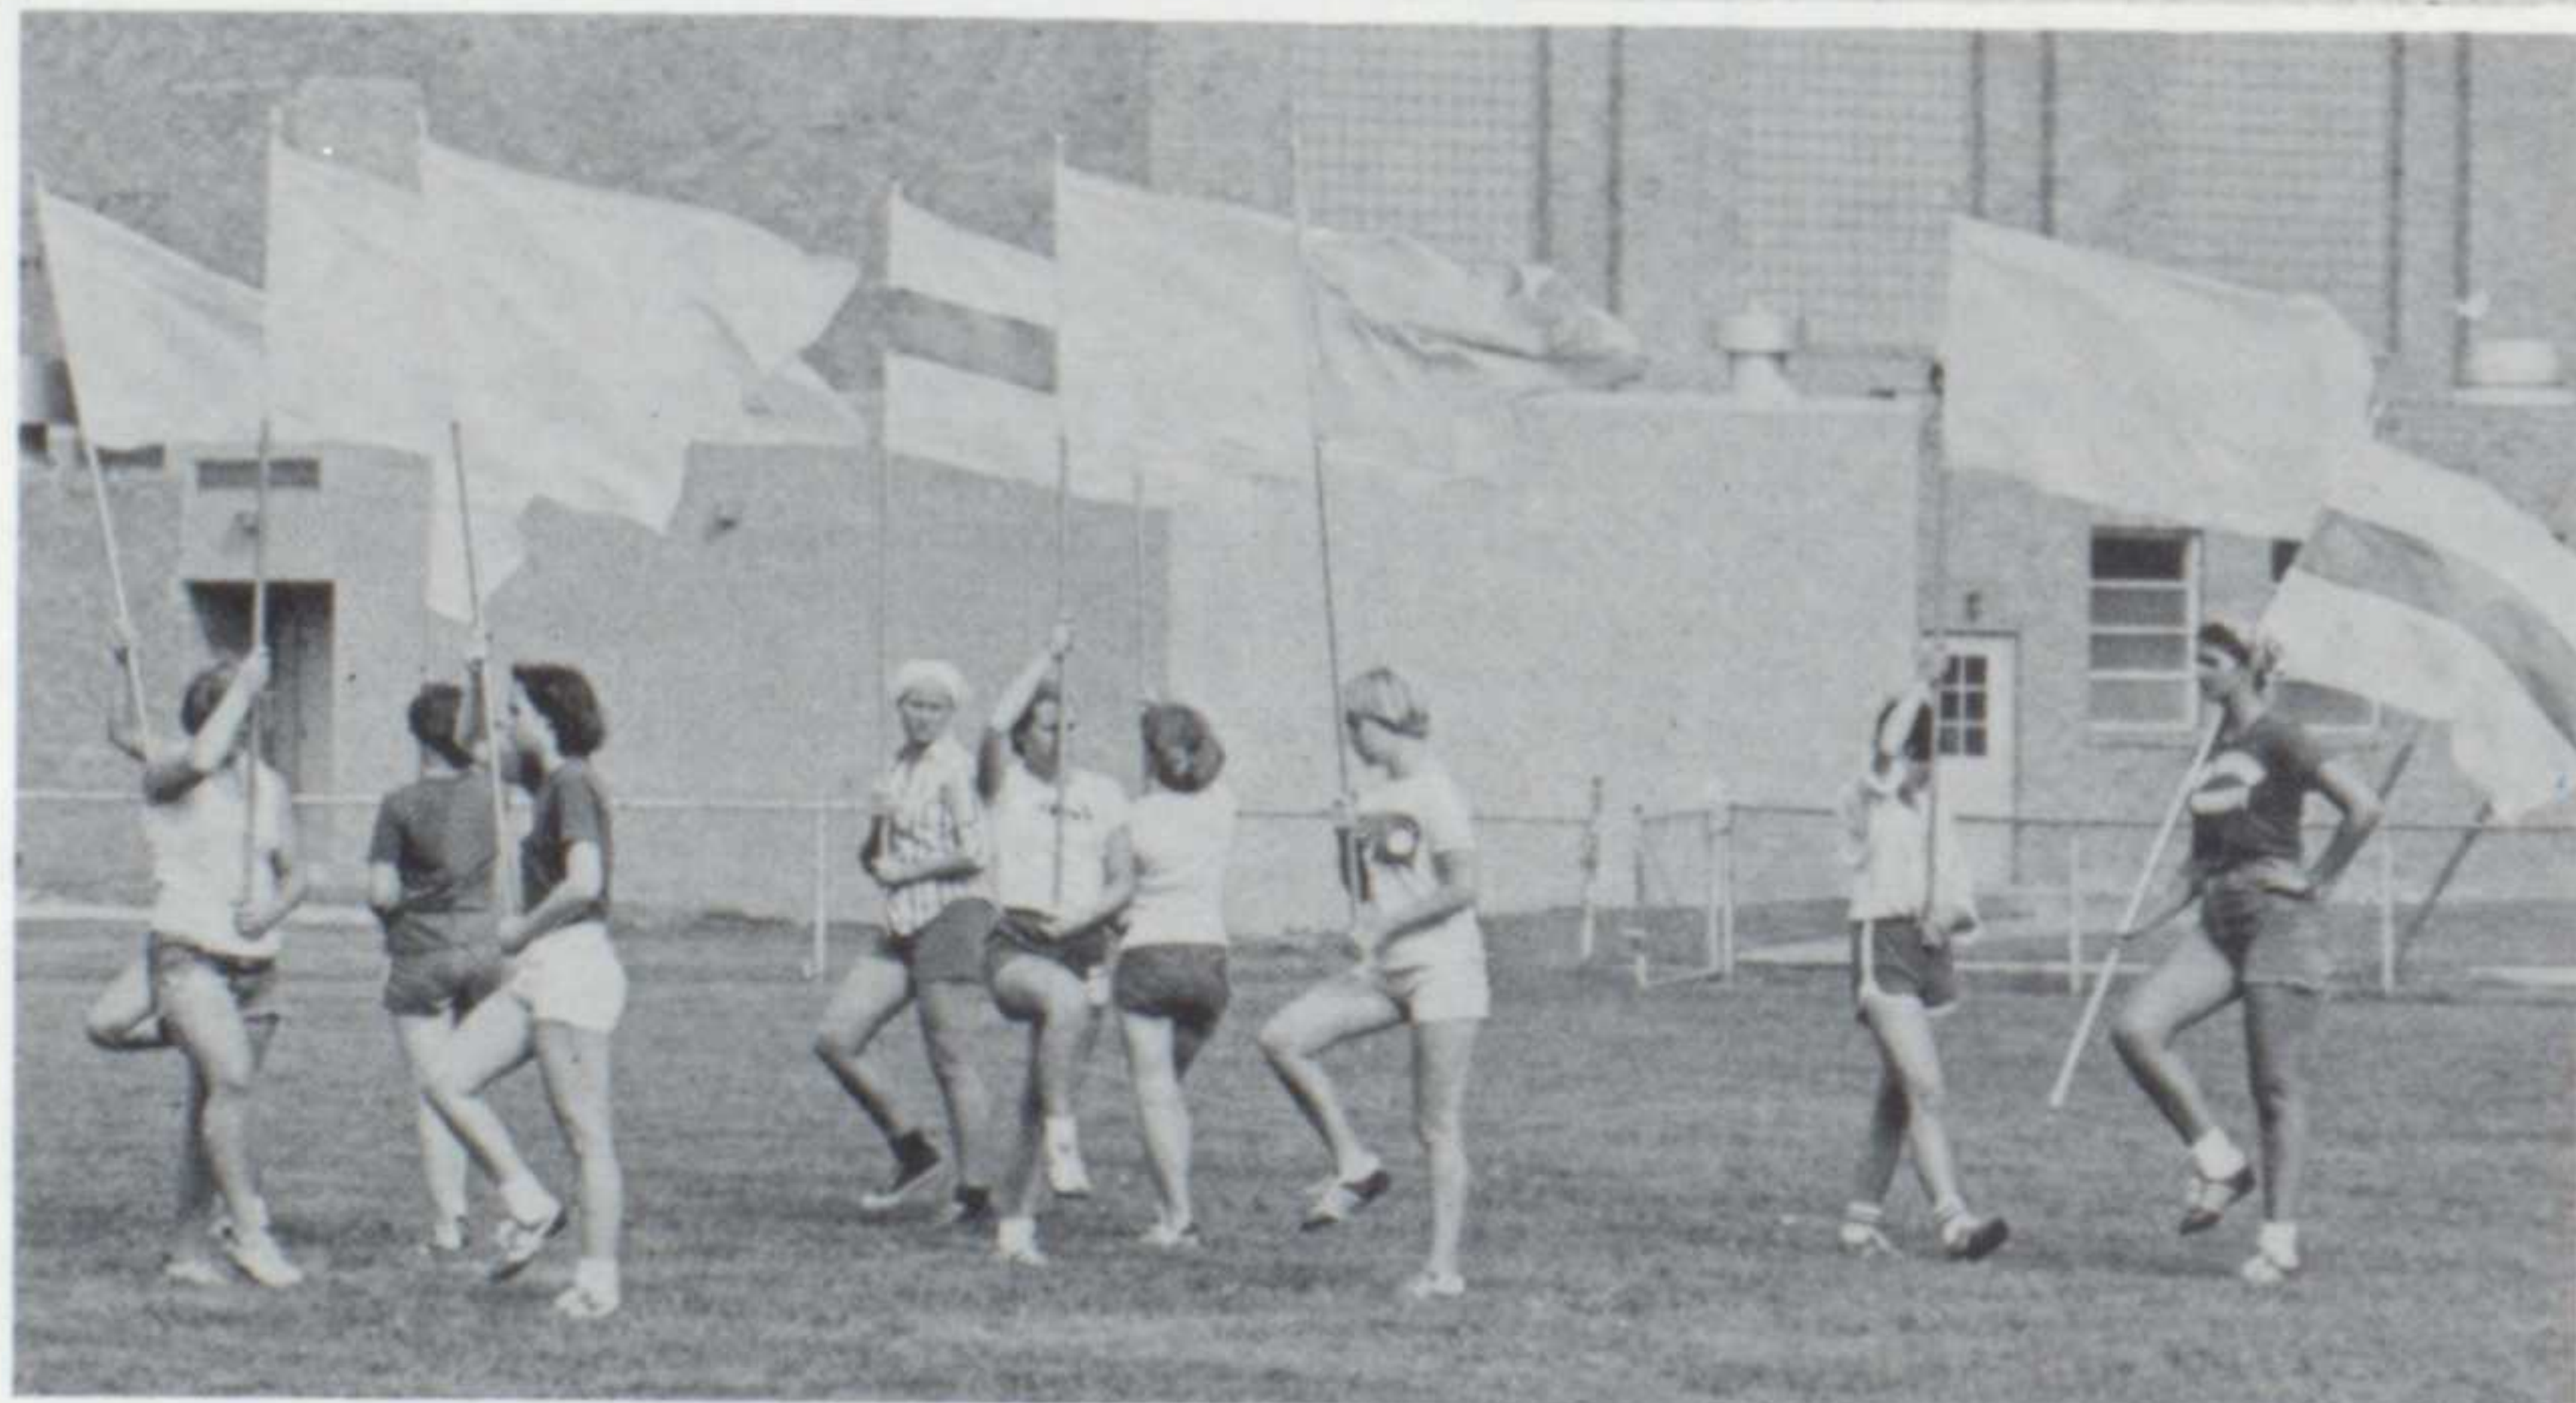

—D. Khyrn

**In a more secluded atmosphere** at the Middle School, individual squads rehearse music composed by director Doug Day.

—D. Khyrn

**As they practice getting to their spots** in their feature "December 63," the Flag Corps demonstrates the "right shoulder arms" position.

—D. Khyrn

**Even in the broiling, end of August heat,** the class of '78 paints madly to finish the red, white and blue concession stand roof by the first day of school.

To help pay for the band's and the Rockettes' new uniforms, Pam Palmer volunteers some of her time to work at the Band Boosters' dunking booth.

—S. Teschner

—S. Teschner

## Those lazy days of summer?

**S**ummer: the three months after school lets out when a student can relax and forget all about educational experiences.

Ha! Likely story! Most students spend a majority of their "vacation time" staying involved with school activities.

Summer classes keep a number of students busy even after school ends. Why on earth would anyone want homework in the summer? Mike Farhart, a junior, explains. "I took American History so I wouldn't have to take it in the fall.

Money-earning projects concerned several organizations, and

Student Congress, The Bay Window, and Bay Band Boosters all set up booths at Bayday.

Other groups such as cheerleaders, Rockettes, and marching band attended summer camps to improve their skills. Drum major Ed Begnaud was pleased with the results of band camp. "It helped a great deal. Everyone got a head start on shows and music."

Fall sports also began their practices during the summer, usually sometime in August.

Most students remain involved with the school year-round. And as Becky Rothfusz states, "At least I'm never bored!"

Community  
but unique

# Bay Village:

## Retaining its own style and flavor

**T**hink about Bay Village. There is much more to it than just the high school. Although sometimes it seems far removed from high school life, the city of Bay Village and its laws, people, and location are just as vital a factor to the operation of the school as any other element.

Being the most western suburb of Cleveland and Cuyahoga County tends to isolate us and set us apart from the rest. This is certainly reflected in the high school with its innovative programs, closed campus, and higher level of academic, athletic, and musical superiority.

Bay, unlike every surrounding community, has allowed no major industry to infiltrate its boundaries. These same citizen-made zoning laws also prohibit fast food places, movie theatres, and any other form of entertainment that can be thought of.

Just last year, a builder tried to change these laws to be able to build a condominium. Once again, Bay voters refused change, and the builder ended up constructing the Bay Club, a conglomeration of eight similar but detached houses. Quite plainly, Bay citi-

zens know what they want, and they will strive to keep it isolated.

Although Bay is almost 100% residential, only five per cent of the total land is undeveloped. This gives the feeling of "closing in" to some residents. Even the Board of Education got into the act last year by selling some high school property to developers. Students have watched the building of several high-income houses on the same ground where they once took a break from classes.

Because for most students the only link to downtown Cleveland is the Regional Transit Authority (RTA) bus lines, Bay teenagers can lead a very secluded life. They go on in life without ever seeing such cultural and civic pleasures as the art museum, Little Italy, or even Garfield's Tomb. Senior Donna Shore has lived in several examples of middle-class suburbia. Speaking of Bay, she philosophized, "It's secluded from the real world."

This seclusion can lead to a distinct social attitude supposed to accompany each Bay High Student.

—B. Calmus

Changed from Dover Township to Bay Village in 1810, Bay developed its own unique atmosphere 168 years ago.

—B. Calmus

—B. Calmus

—B. Calmus

**Center of bureaucratic activity,** City Hall, built in 1914, houses the mayor, his staff, and the police department.

**Captained by English teacher** Carl Assenheimer's son Chris, a team of elementary students practices next to the newly built houses in back of the school.

**During the hourly wait** between departures of the 55C, freshman Mike Davis awaits an infrequent excursion downtown.

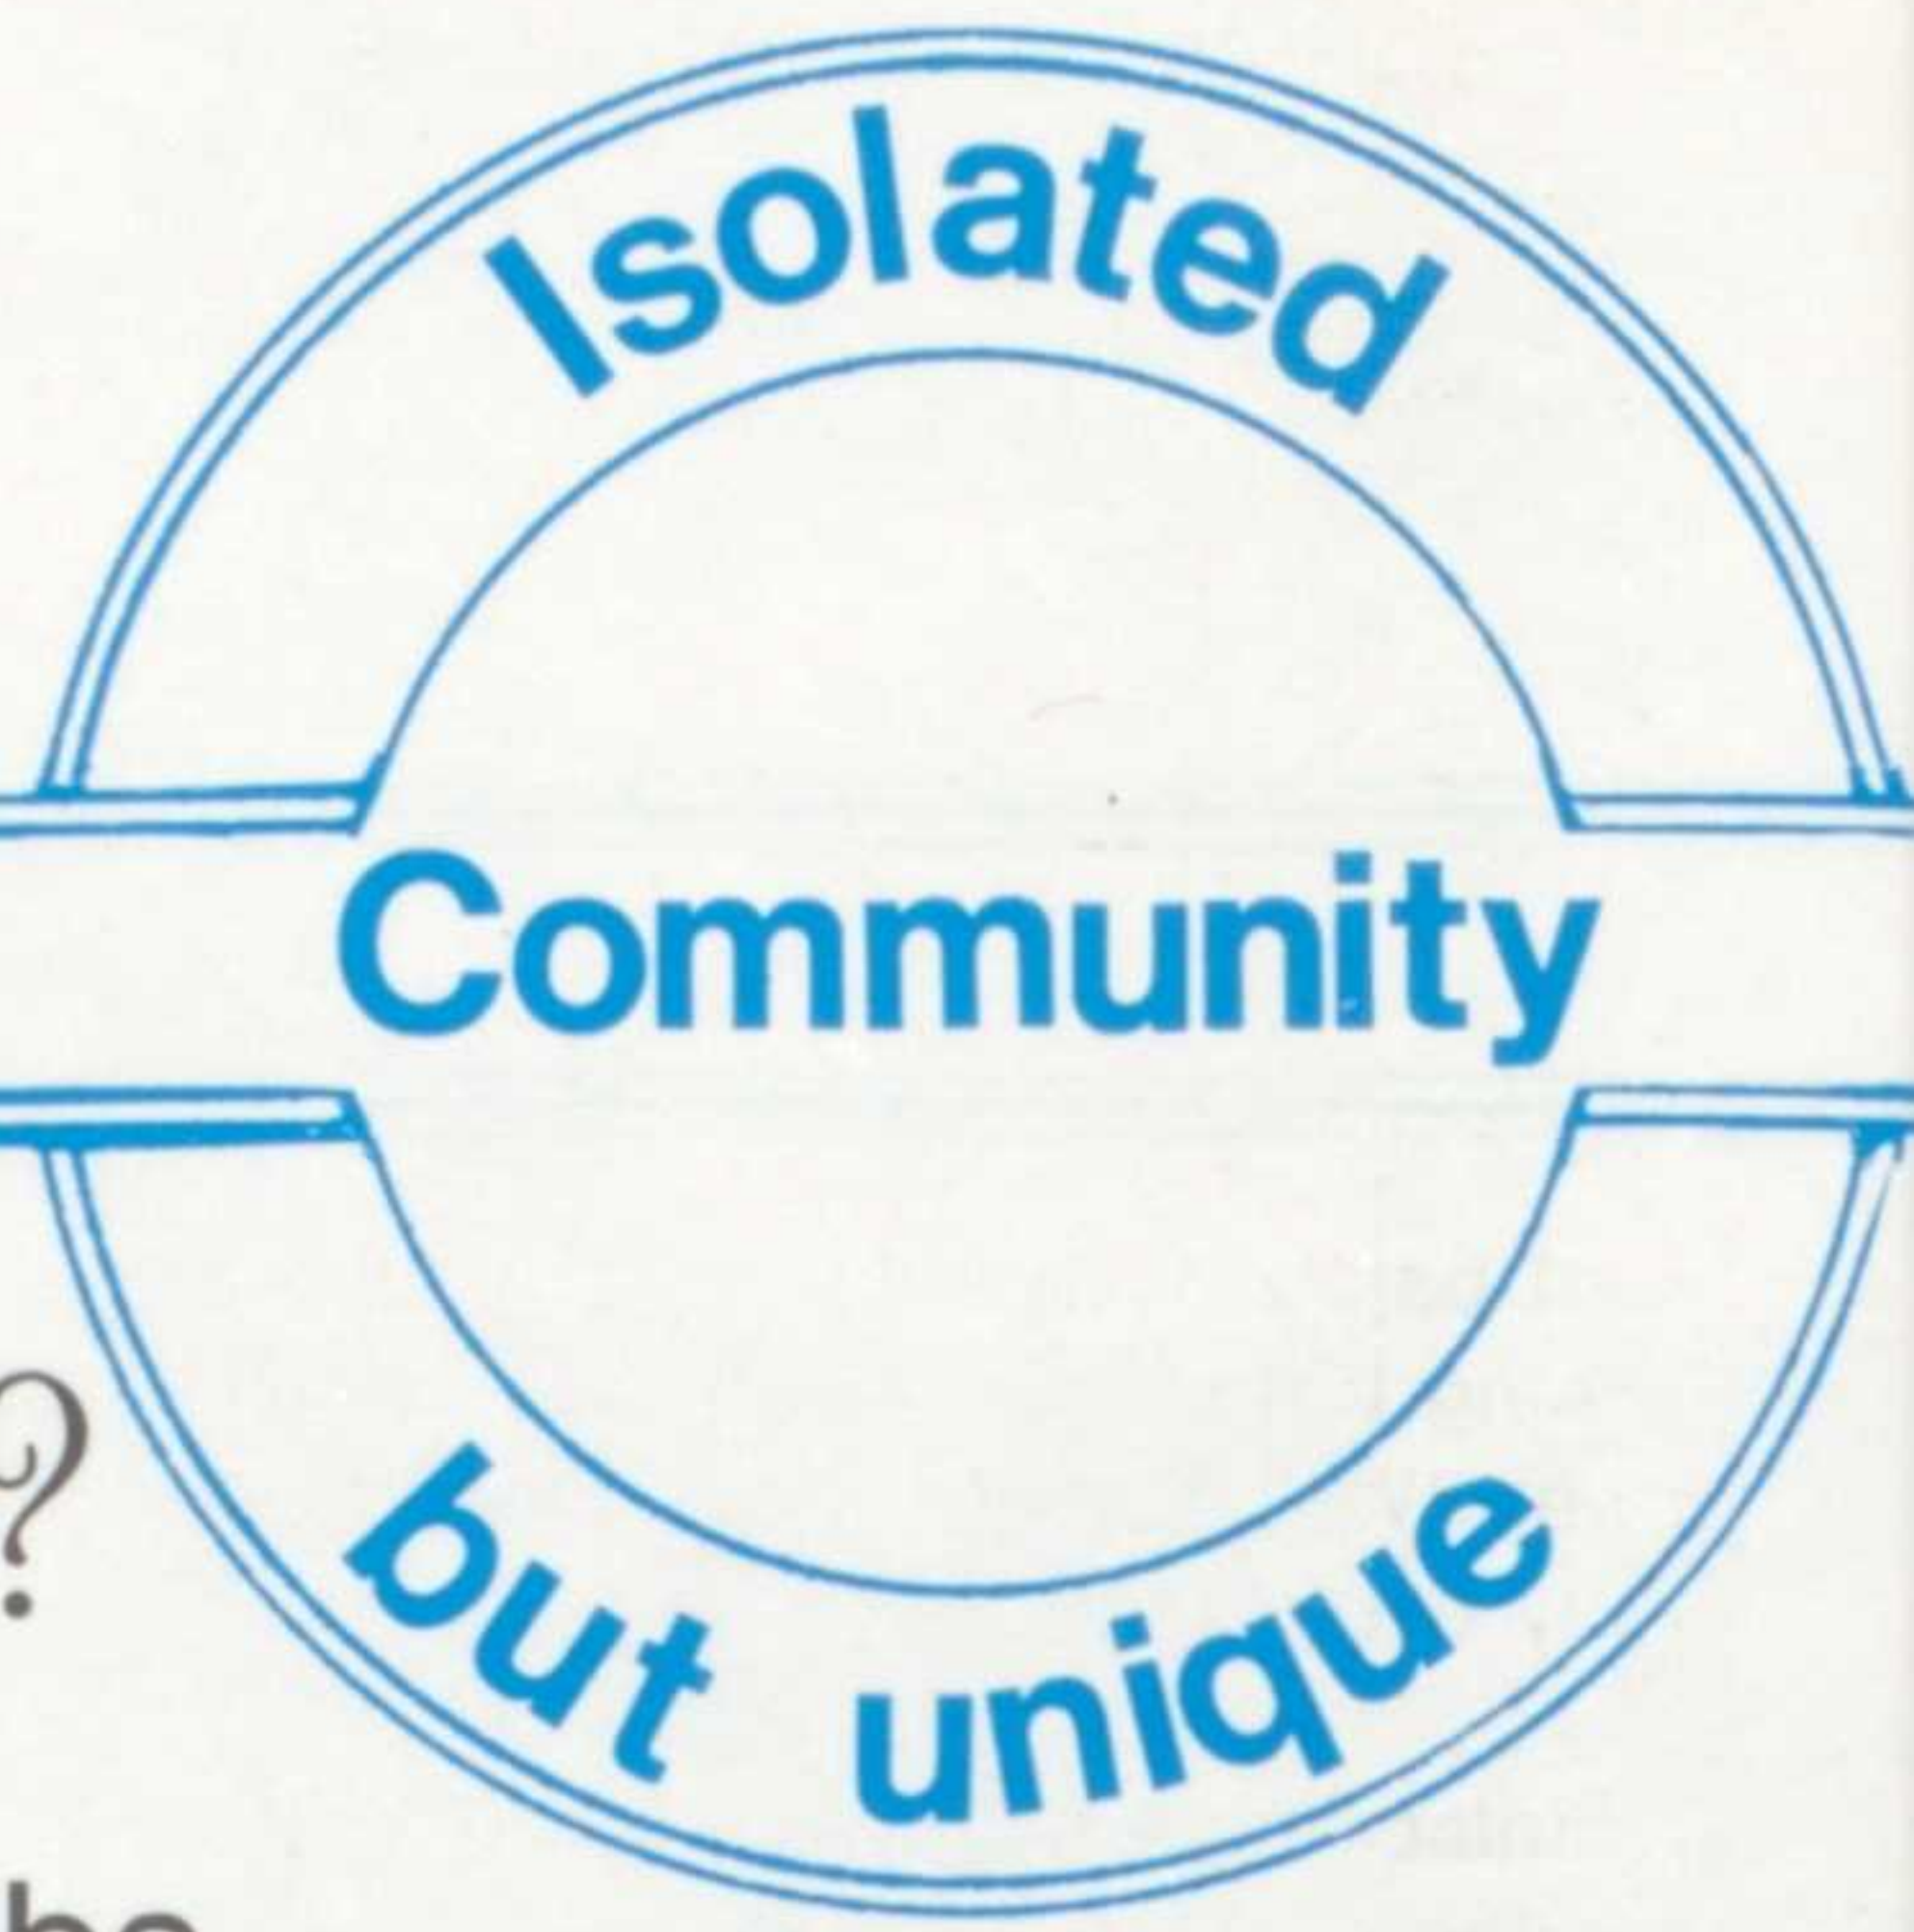

—B. Calmus

**Modern in appearance,** the first two Bay Club homes received several second glances from citizens who protested the destruction of a century home.

continued

# What's everyone got against Bay?

## Other communities stereotype Bayites as snobs

Bay was put on the national map in 1954 when the Sam Sheppard murder trial took place. Ever since, the delusion has arisen that all Bay residents are rich doctors that drive sports cars, live in mansions, and lead promiscuous lives.

Consequently, surrounding high schools have fought an undeclared war against their "rich" neighbors. Probably the best person to understand this problem is someone who has lived elsewhere for a period of time.

Senior Derek Fuller lived in Bay for one year four years ago; he just moved back this year. He traces the problem to athletics. "We've got really super teams. It's such a challenge to beat a team like Bay," he explained.

Derek disagrees with the snob image. He maintains that kids go out of their way to make friends. "They seem a lot different," he commented.

Another senior, Donna Montgomery, lived in Bay during her sophomore year. After spending one year in Florida, she returned to Bay. Commenting, she said, "Kids are more welcome at Bay."

Whether it's negative or positive, it always seems that Bay is uniquely different. Geographically, this also holds true.

To build the eight houses that form the Bay Club it was necessary to demolish three other houses. Explaining all this excitement was this sign.

—B. Calmus

—B. Calmus

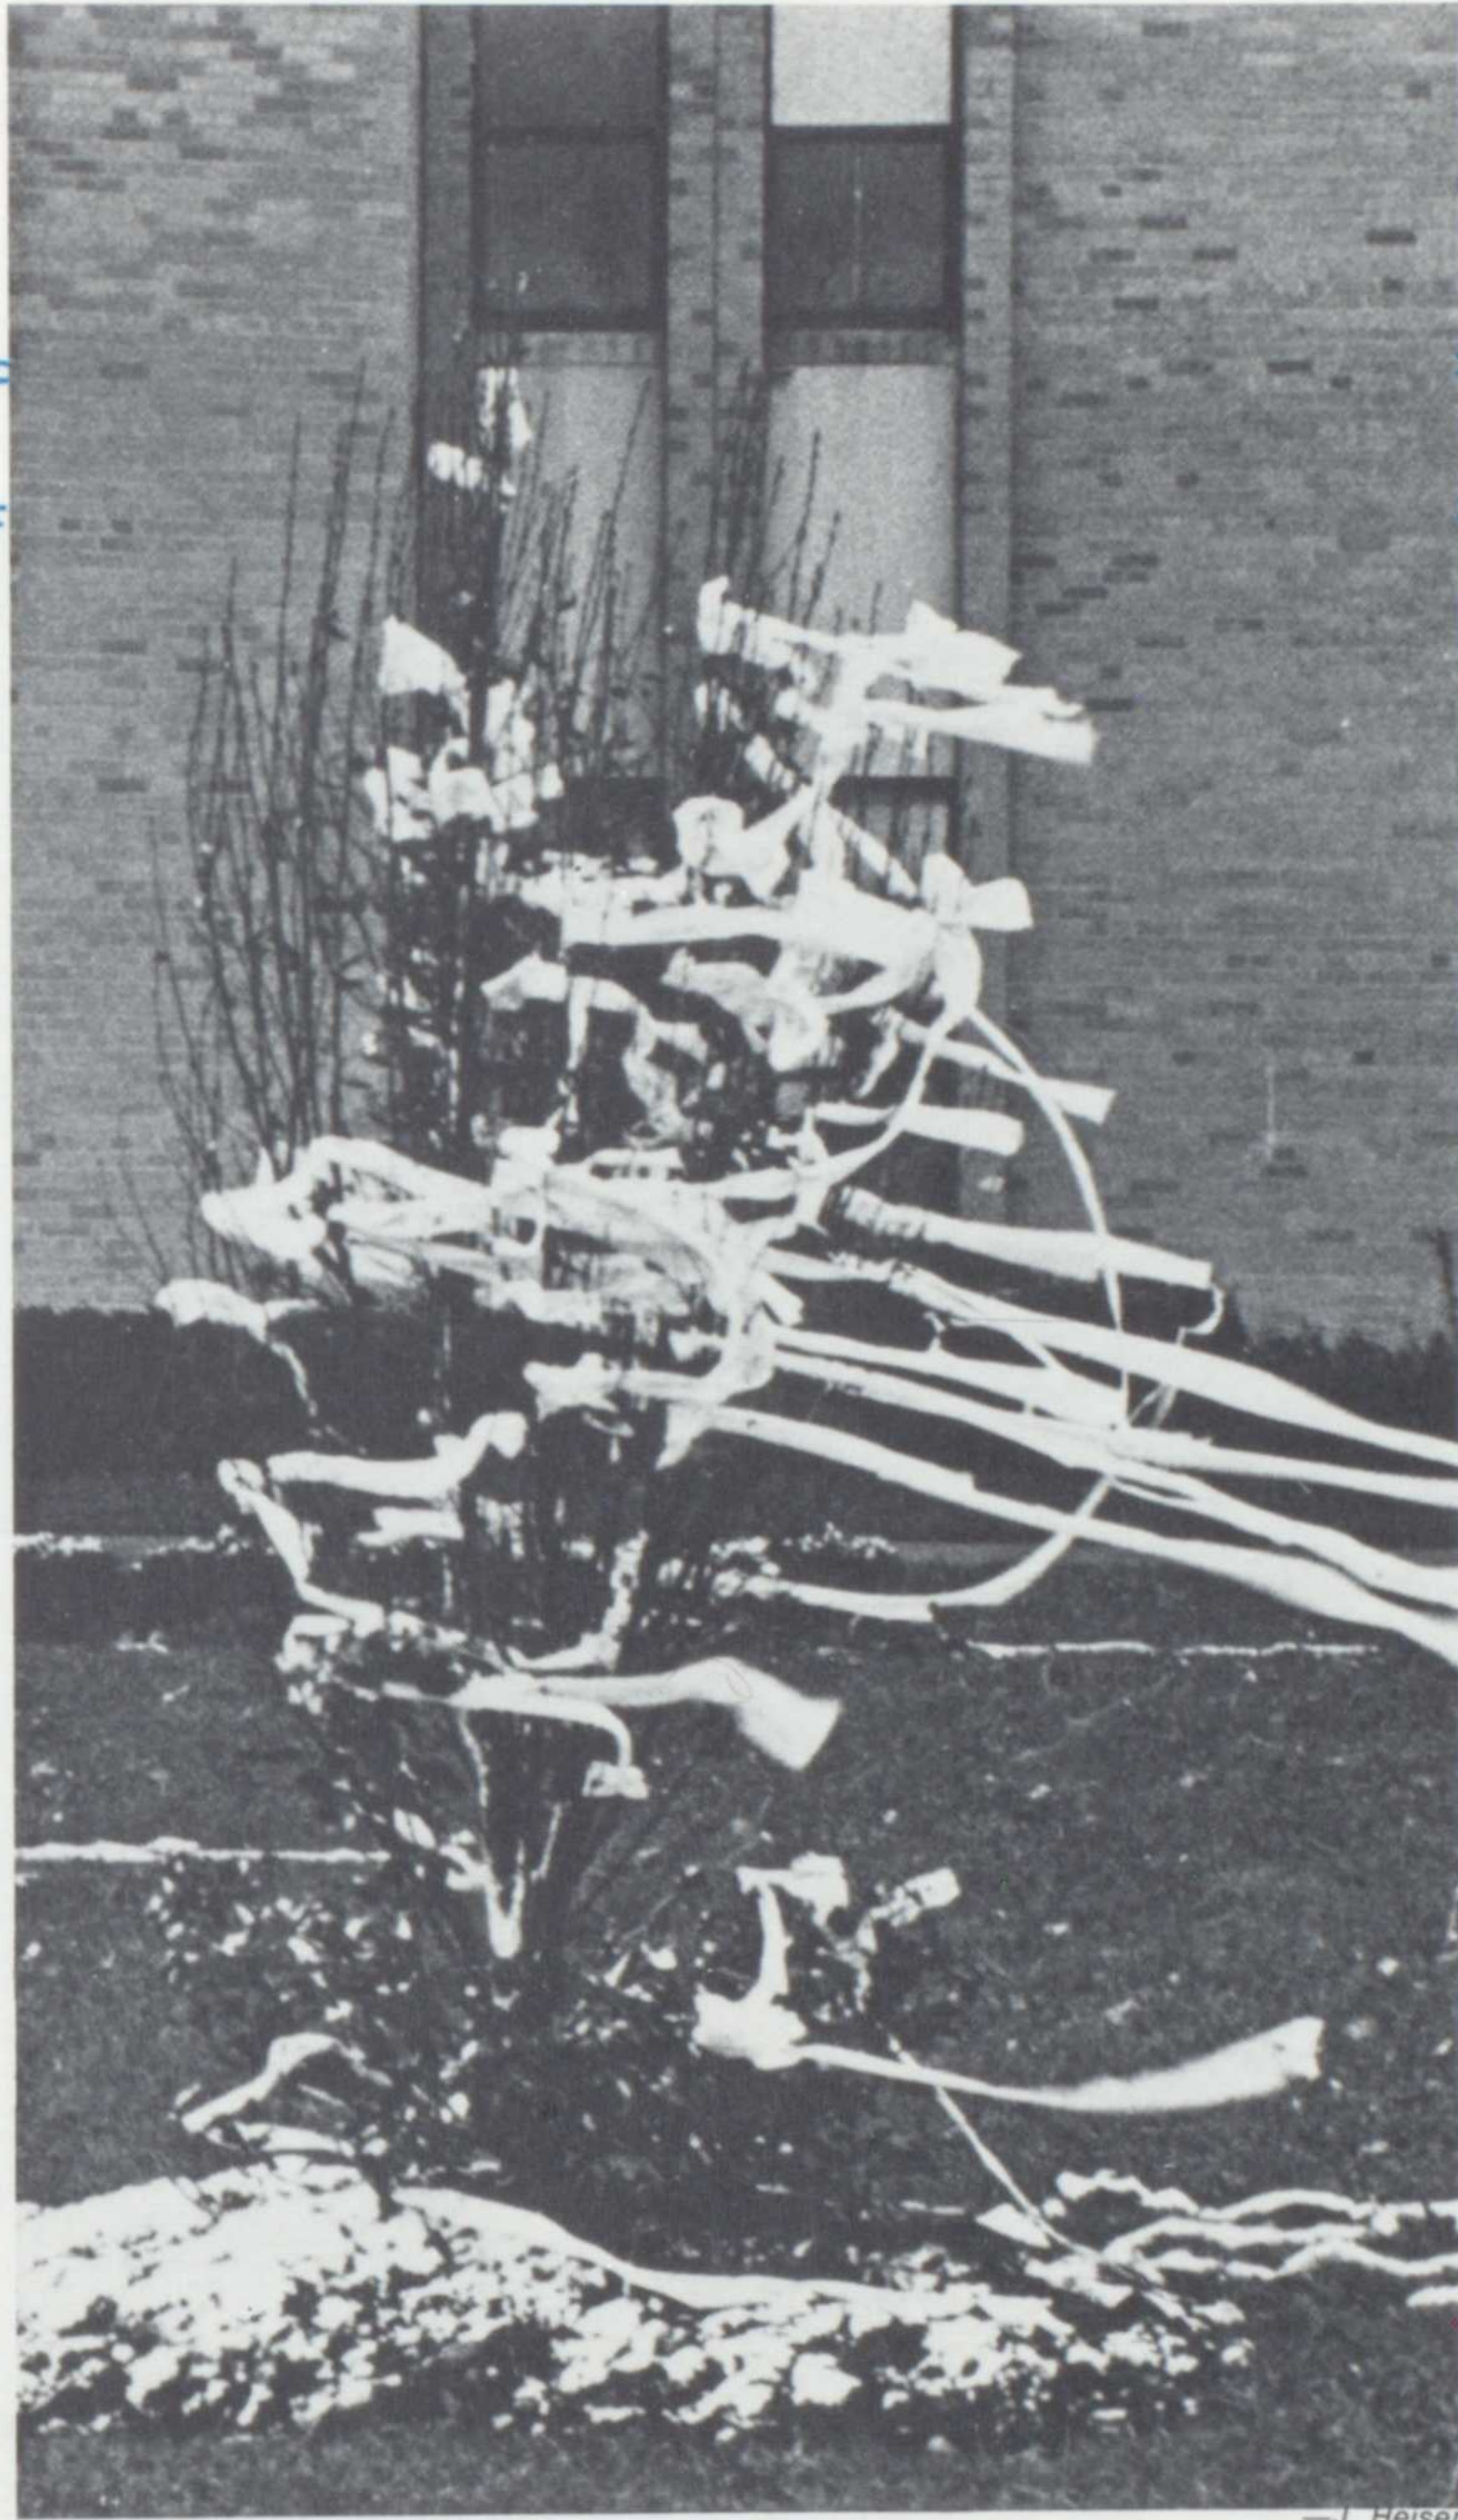

**Bay Club**

**Eight Single-Family Homes**  
**881-5566** Zaremba Building Company

**Tollet paper flutters** in the breeze the morning before the Westlake football game. SWC schools "decorated" Bay High nearly every Friday.

**Reminiscent of past wealth**, the old Washington Lawrence Mansion, now the Bay View Hospital, was closely linked to the Sam Sheppard case.

—J. Heiser

**Playing upon the proverbial Bay image**, senior Steph Ershek sports an original tee-shirt accompanied by her dog, Miscellaneous.

**Does every kid in Bay** own his/her own car? Sometimes the full parking lot gives this impression to visitors to Bay High.

—B. Calmus

—B. Calmus

# Discover the great outdoors inside Bay Village

## Location augments recreational life

Ever bored in Bay? Why not try something new? Have a picnic in one of our five parks, or take a walk on the beach and study Lake Erie.

Bay is blessed with more parks per total acreage than any other west side suburb. Boasting a total of 216 acres of recreational parks, there are also five creeks spread throughout the streets and avenues: Cahoon, Huntington (Porter), Sperry, Tuttle, and Wischmeyer creeks.

Bay makes full use of its parks by planning such activities as Barefoot in the Park and Stay-in-Bay Day. Bay High students play an active part in both of these holidays.

Also a part of the park system is, of course, the lake. Taken for granted by most Bayites, this body of water that once covered Bay Village is an important factor to the community.

"I'll usually want to go and see the beach in the spring," said junior Missy Staley.

Sophomore Tom Lake remembered, "Sometimes I fished off the little pier in the summer."

Lakefront property owners know that it can be very hazardous to the shoreline. Each year more and more land is lost because of erosion. Also, the beach is receding little by little every year. Senior Dani Alteri, 29934 Lake Rd., lives on the lake shore. Even with the help of beam supports, "We lost about two feet."

Community efforts to keep the beach area clean are usually successful, because people care about Bay's number one recreational asset. Water-skiing and swimming are high on the list of lake activities. Lake Erie, along with a number of other items in Bay help bring the high school and the community together.

# Bridging the generation gap:

## Students and homeowners take interest in each other

Every action has an equal and opposite reaction. e.g. Bay residents got more involved with the school, and Bay High kids grew more interested in community affairs.

Three established parent booster organizations, the Bay Band Boosters, Senior Parents Association, and the Bay Rockets Association played an active role in the high school.

The Band Boosters raised money for new instruments and music equipment by having a membership drive and a poinsettia sale. All of Bay's band and orchestra students benefited from their lucrative efforts.

Flag corps member Laurie Meeks commented about the Band Boosters, "The parents were always around to help kids get in their uniforms, and they sure helped Mr. Day."

Planning After Prom, After Grad, and Senior Parents Night were just some of the worries of the Senior Parents Association. Coordinating these and other senior activities kept them busy.

Finally, the Bay Rockets Association was the backbone of the middle school and high school athletic programs. Ticket sales, program sales, and a membership drive provided the funds to augment the athletic department.

Pointing the arrow in the other direction, students played a very active role in the November elections.

Two seniors, Tom Cowles and Shirley Shepherd, had fathers running for mayor (James H. Cowles and John B. Shepherd). Also running was Ronald Gogul, a younger man than the other two.

It was a close battle down to the wire, and both students campaigned fiercely. On November 8, all Bay High 18 yr. olds cast their votes. The results came in, and Cowles, a policeman, had beaten Shepherd by a slim margin, with Gogul following a distant third. One of Bay's closest mayoral races was over.

However the year turned out, one thing was certain: the community and the high school worked together for the benefit of both. ■

**Agendas in hand**, the parents of Greg Hayes, Chris Lowry, and Steve Mensen formulate plans for the first mass meeting of the Senior Parent's Association.

**On election night**, senior Shirley Shepherd campaigns at Forestview School for her father. She stayed at her post from 6:00 a.m. to 7:30 p.m.

## We found:

### The best tree house in Bay

—B. Calmus

Up a tree? Five-year-old Bobby Corna spends much of his time surrounded by branches.

His father, architect Robert Corna, built him a custom-made, solid redwood tree house to match their large 31031 Huntington Woods Pkwy. home.

"It took about three weekends to make," said Mr. Corna. It even has a plastic dome roof similar to a tower in the Corna home.

"He's got ladders that he can climb around on and a table to play on," related Mr. Corna.

How do Bobby's friends like it?

"All the kids in the neighborhood come over."

So if you want to view a model tree house, check out Bobby Corna's. You won't find one any better.

**Anxious to receive** her black belt, Diane Sweet practices a kupehaigi side kick. She takes lessons at Kim's Judo & Karate School.

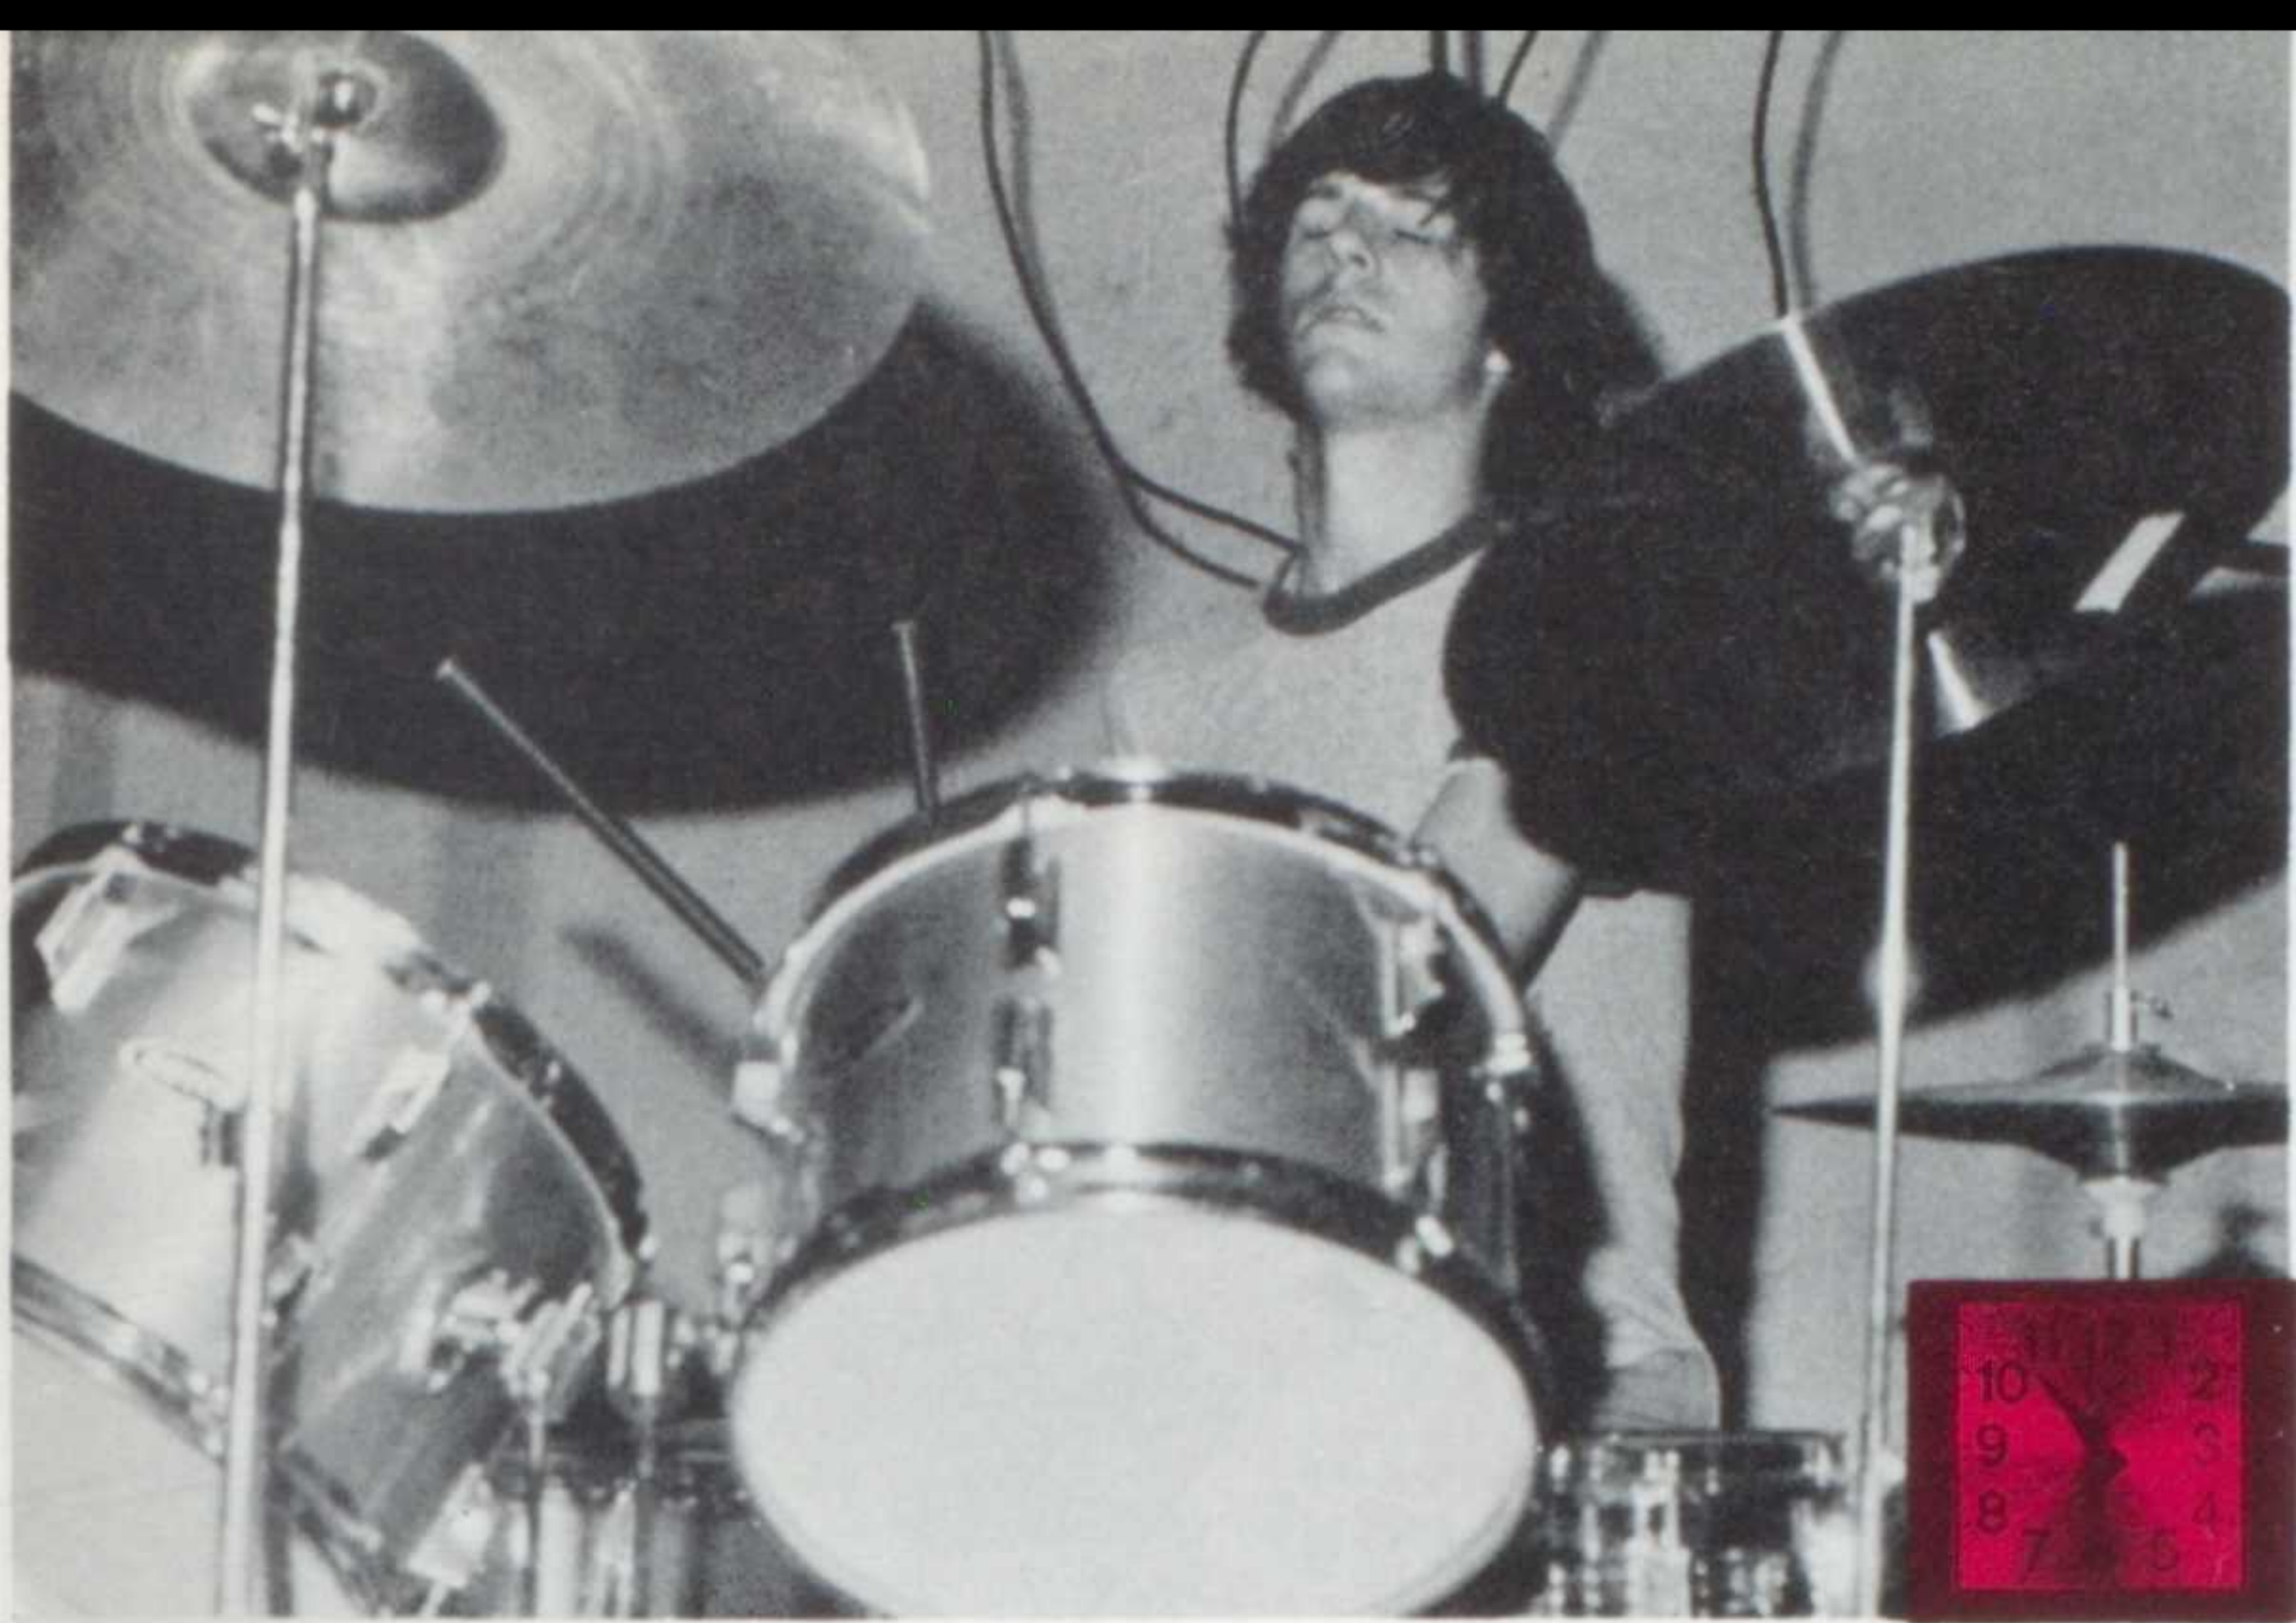

—B. Calmus

—D. Khym

**Exhausted** because of a long Friday night, Tom Hill catches a few winks before getting up to do his 5:30 a.m. Plain Dealer paper route.

**Vocalist and drummer** for the group "Ecstasy", junior Mike Farhart plays "Blinded by the Light" at a yearbook-sponsored dance.

—B. Calmus

## Time for rest and recreation . . .

**S**ince there are so many different kinds of students involved in so many different activities, it's hard to describe weekends in Bay. So here's a chance for you to evaluate your own weekend!

### FRIDAY 6:30-8:00

A few hours after school lets out, you get the weekend started by:

- a) watching/playing football, basketball, or wrestling.
- b) going to a movie and/or munching out at Mac's.
- c) filling a gas tank or wrestling a little kid into bed.
- d) sitting home watching "Donny and Marie."
- e) dozing off.

### 10:30-1:00

Since the night is still young, you choose to end the evening by:

- a) watching a high school game on Channel 25.
- b) attending a dance or party.
- c) ringing up a sale on the cash register.
- d) popping popcorn in anticipation of "Big Chuck and Hoolihan" at 11:30.
- e) retiring for the night.

### SATURDAY 8:00

Groan! After a long (?) night's rest, you're ready to begin your day. Your favorite way to do this is to:

- a) jog from Bay to North Ridgeville and back.
- b) get your much-needed beauty rest.
- c) take a college board exam.
- d) vegetate (eat King Vitamin as you watch "The Pink Panther.")
- e) catch a few more winks.

### 12:00-5:00

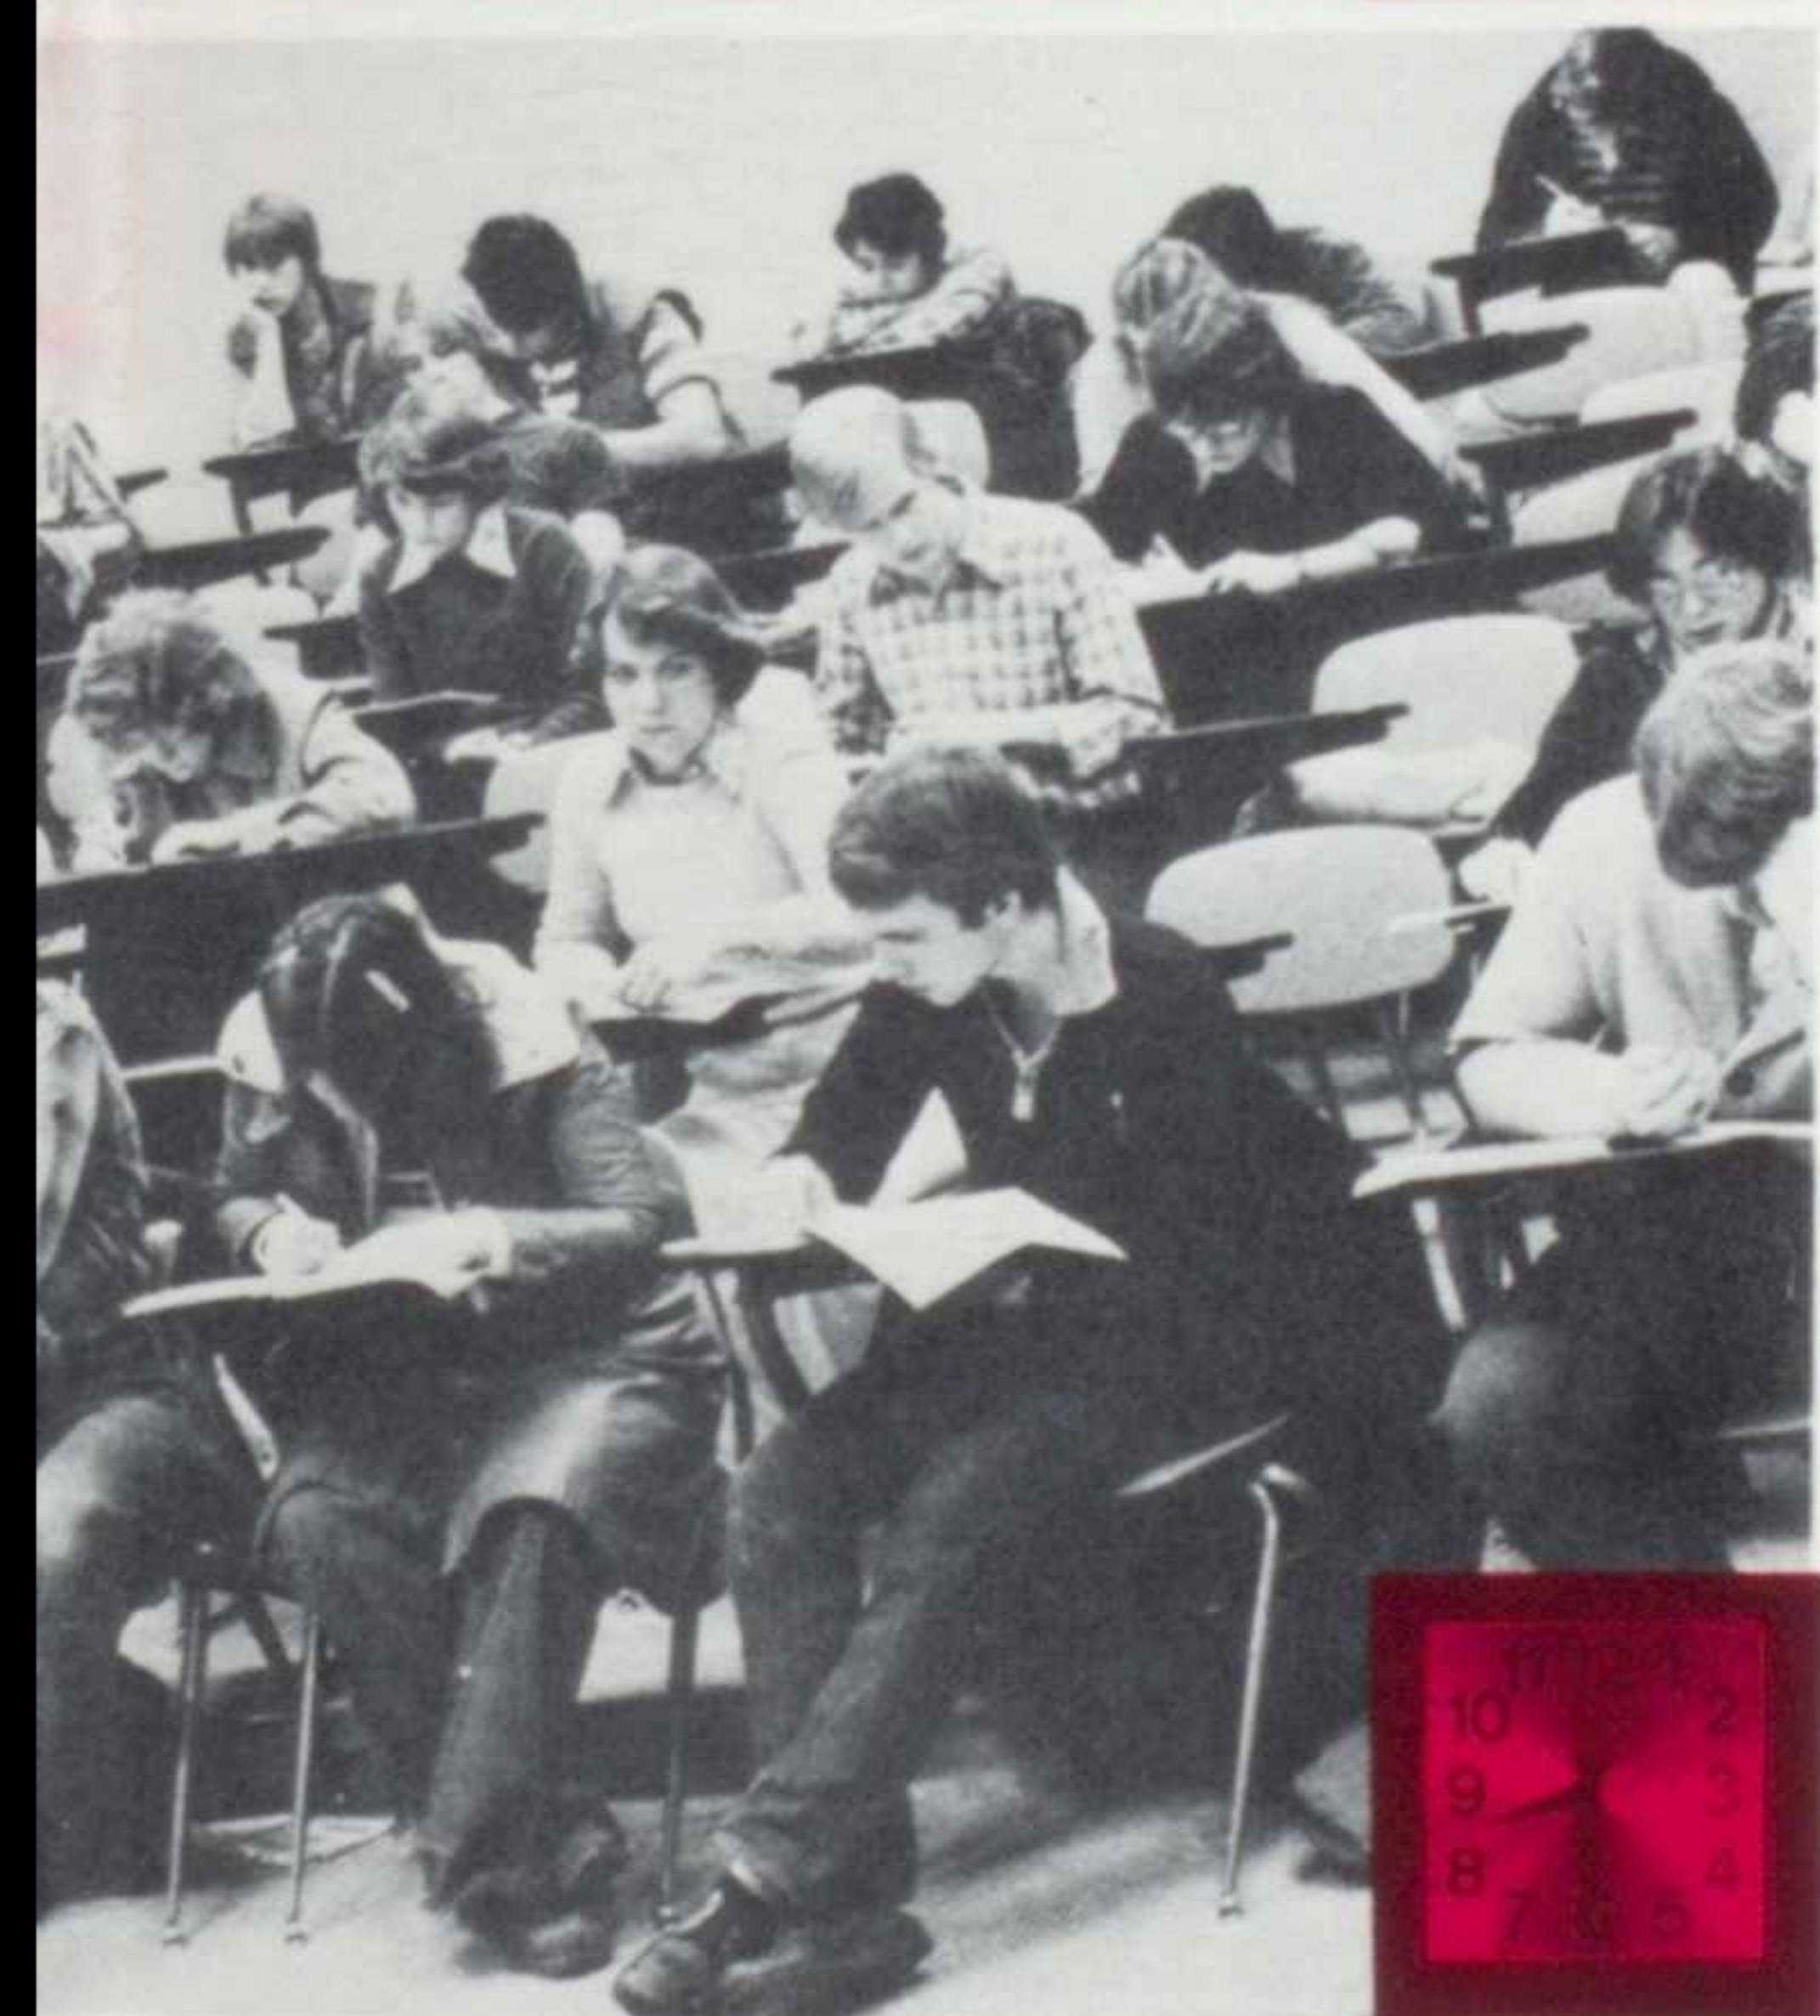

As the day drags on, so do you. Your fun-filled Saturday afternoon is most often spent:

- a) watching the game of the weekend and "Wide World of Sports."
- b) practicing swimming or music lessons.
- c) doing housework or homework.
- d) perching on the edge of your chair, thoroughly entranced in the horrors of the giant spider on "Super Host's" movie.
- e) napping.

### 7:00-?

Tonight is the time you choose for the most exciting activity of the weekend. You are most likely found:

- a) watching/playing soccer or hockey.
- b) at another party.
- c) patiently helping a customer who walks in five minutes before closing.
- d) suffering from acute eye strain after seeing "Academic Challenge."
- e) giving up and going to bed.

**Five minutes off route 2**, Winterhurst enables the Icers to have a nearby home rink. Sue Mercurio, Gail Nolte, Jon Osborne, and Marji Brown talk about the Padua game.

—J. Heiser

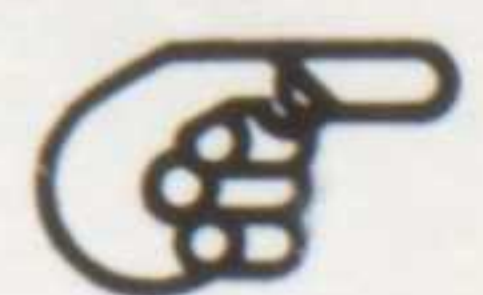

**On a cold snowy December 3**, students from Bay and other suburbs concentrate on challenging English and math problems during the SAT.

—B. Calmus

**Able to relate to kids**, Barb Stewart loves to babysit. She shows her next door neighbors, Tracy and Kelly, how to play Pass-on.

—D. Khym

# WEEKEND UPDATE

—B. Calmus

"Ice-breaking", a unique game to get to know others, occupies the pre-meeting time period before a Sunday night Bay Presbyterian Youth Group meeting.

**Peasant dresses**, one of the latest fashions, catch the eye of Nancy Schuster. She must pay between \$40 and \$75 if she wants to buy one.

—B. Calmus

—B. Calmus

**Behind the counter**, Becky Johnson takes Patty Kossin's order for a hot buttered steak sandwich at Mr. Hero, found across from Loew's West.

**At Bay Methodist Church**, Jane Groeneweg helps teachers watch over the pre-school church class during the 11:00 service.

## ... time for religion and recovery

continued

### Sunday 9:00-12:00

Today is the last day for you to enjoy yourself. When the alarm goes off, you:

- a) get up and play football or tennis with your buddies.
- b) throw the clock on the floor and sleep in (to recover from the effects of the night before.)
- c) take a shower and go to church.
- d) pop out of bed early to catch "Popeye" and "Daniel Boone."
- e) stay in bed.

### 1:00-5:00

Now that you're up, you decide to do something constructive. Your worthwhile activity is:

- a) watching a golf tournament.
- b) shopping with your pals.
- c) doing homework or cleaning your room.
- d) chuckling at cute little Shirley Temple in one of her first flicks.
- 3) sleeping.

### 7:00-11:00

Since you have to drag yourself out of bed for school the next

morning, you decide to make an early evening of it. So, you can most likely be found:

- a) ice skating or bowling.
- b) going out for pizza with friends.
- c) at a meeting of the Bay Presbyterian Youth Group.
- d) watching the "Six Million Dollar Man" and "Sixty Minutes."
- e) in bed.

How did you do? If you got all A's, you're an incurable jock. All of your time is spent in sports-related activities. You are a fun-loving person who can't stand ho-hum days if your answers were all B's. If you got all C's, relax before you have a nervous breakdown; your system can't take all that tension! (You might want to get together with a D person for awhile.) If D's were all of your choices, you're an incurable bum who will probably go blind by age twenty. You either have mono-nucleosis or you are a total loser if you chose all E's. It's not too late to get help if you fall into one of these categories; see your psycho-anlyst today for suggestions.

## WEEKEND UPDATE

**La Vozlo's Pizza Parlow** requires a one dollar minimum per person, and therefore Diane Veres chooses to carry out her pepperoni pizza.

For a mere 50¢, David Kossin enjoys hours of skating at the North Olmsted Rec Center, located on Lorain Rd.

—B. Calmus

—H. Briggs

—B. Calmus

## We found: The best pizza

Are you tired of going out for pizza and getting a cold greasy model that looks like it's three weeks old? For those of you with similar

—B. Calmus

problems, follow our handy guide to pizzas. Several stores in the area were tested out and rated, and we found:

**Dominic's Pizza** (\$1.55) A bland pizza with lots of tomato sauce and a thin crust; greasy.

**Village Pizza** (\$1.50) Fat, chewy crust although no crust around the edges; lots of good tomato sauce and plenty of cheese.

**La-Vozlo's** (\$1.85) Quite different; they overdid it with the spices and didn't use much tomato sauce; uses provolone cheese but too much of it.

**Trlo's Pizza** (\$2.10) Has a good crust but is overspiced and greasy; more cheese than tomato sauce.

**Stella's** (\$2.10) Good appearance; nice crust but bland flavor; sauce and cheese are equally distributed.

**Frankle's** (\$1.85) The Best. Nice crust, tasty tomato sauce (not too spicy), just the right amount of cheese. Overall very appetizing.

# FOOTBALL EXTRAVAGANZA

It's been 13  
years since we lost  
to Rocky River, BUT it's been  
4 years since we beat Avon Lake

**T**he season was full of highs and lows. A big victory over defending SWC champs highlighted the season while losses to North Olmsted and Rocky River hurt the morale of the team. "The potential was there," stated co-captain Chris Lowry, "but we didn't get the breaks." Chris along with seniors Chris Macri and Steve Mensen were named to the all SWC first team.

The team utilized agility and quickness to realize its victories. Practices led to many sore muscles and tired bodies. Wind-sprints, calisthenics, and miles of running got the Rocket grid-men in top physical condition. "I was surprised at the number of people who showed up at practices this year. They were more dedicated this year than ever before," stated quarterback Rick Naumann.

"The last second loss to North Olmsted was a letdown, it was our first Conference loss and we felt

we should of won," reflected senior Chris Macri.

"The victory over Medina caused much controversy because the game was stopped in the last minutes," senior Dennis Pontius said. "They were very frustrated because we were outplaying them very badly. The referees called the game because they felt it was getting out of control, and the players would be endangered if play was resumed."

Coach Chadwick had an interest in each player; he tried to help the individual player reach his goals through hard work. He also emphasized team accomplishments to attain a team unit.

A unified, highly motivated team with an intense desire to win led the Rockets to another winning season.

**With possession of the ball,** Pat Griffin runs past Ed O'Neil to attempt a touchdown against Rocky River.

—J. Heiser

After the 14-7 victory over Avon Lake, Coach Cook congratulates Chris Lowry for an excellent performance in the game.

—J. Sohl

After the snap of the ball from Rick Naumann, Tom Cowles charges on to elude Rocky River's defensive line.

—J. Heiser

For the first time in four years, Bay beats Avon Lake. Tom Cowles grits his teeth with satisfaction over the win.

**Varsity Football—Front Row:** Craft Carter (manager), Chris Lowry (co-captain), Tom Cowles (co-captain), Mike Crook (manager), Craig Little (manager). **Second Row:** Coach Cook, Jay Boykin, Bill Crummer, Mark Von Duhn, Scott Saccany, Dave Mowery, Jim Joyce, Wayne Barker, Jay Sobe, Lee Rohlke, Pete Dillon, Greg Hayes, Chris Macri, Dave Hurrel, John Milloy, Coach Herron. **Third Row:** Coach Chadwick, Ken Markovich, Bill Davis,

Steve Mensen, Ed O'Neil, Dave Hamman, Dennis Pontius, Chris Fox, Dave Urbanowicz, Rick Naumann, Mark Shepard, Scott Totten, Stan Walker, Jon Osborne, Coach Assenheimer. **Back Row:** Jeff Field, Ron Duperow, Colin Tillo, Bruce Wiebush, Brian Pontius, Jack Griffiths, Jeff Geuther, Matt Altieri, Pat Griffin, Jim Mackey, Rick Voiers, Kirk Kresge, Dane Allphin.

## Fans feel football experience

Without one important element, the varsity football games would be exceedingly boring.

What is it?

The fans of course!

On a cool night, under the lights, the emotion of the average number of 4000 people packed in the stands can almost be touched. Yelling, cheering, watching, sighing, and crying are all part of the football experience.

Why do people come?

"I like to watch the guys play, plus all my friends go. It's almost tradition," answered junior Kelly Reynolds.

A Friday night football game is more than just football to most fans. Tom Alten sees other possibilities. He said, "To get rowdy and socialize is fun, and usually you're with about 15 friends."

Directly in front of all these fans, are 10 of the loudest spectators of all: the cheerleaders.

Picked from 39 that tried out, these girls knew around 15 cheers

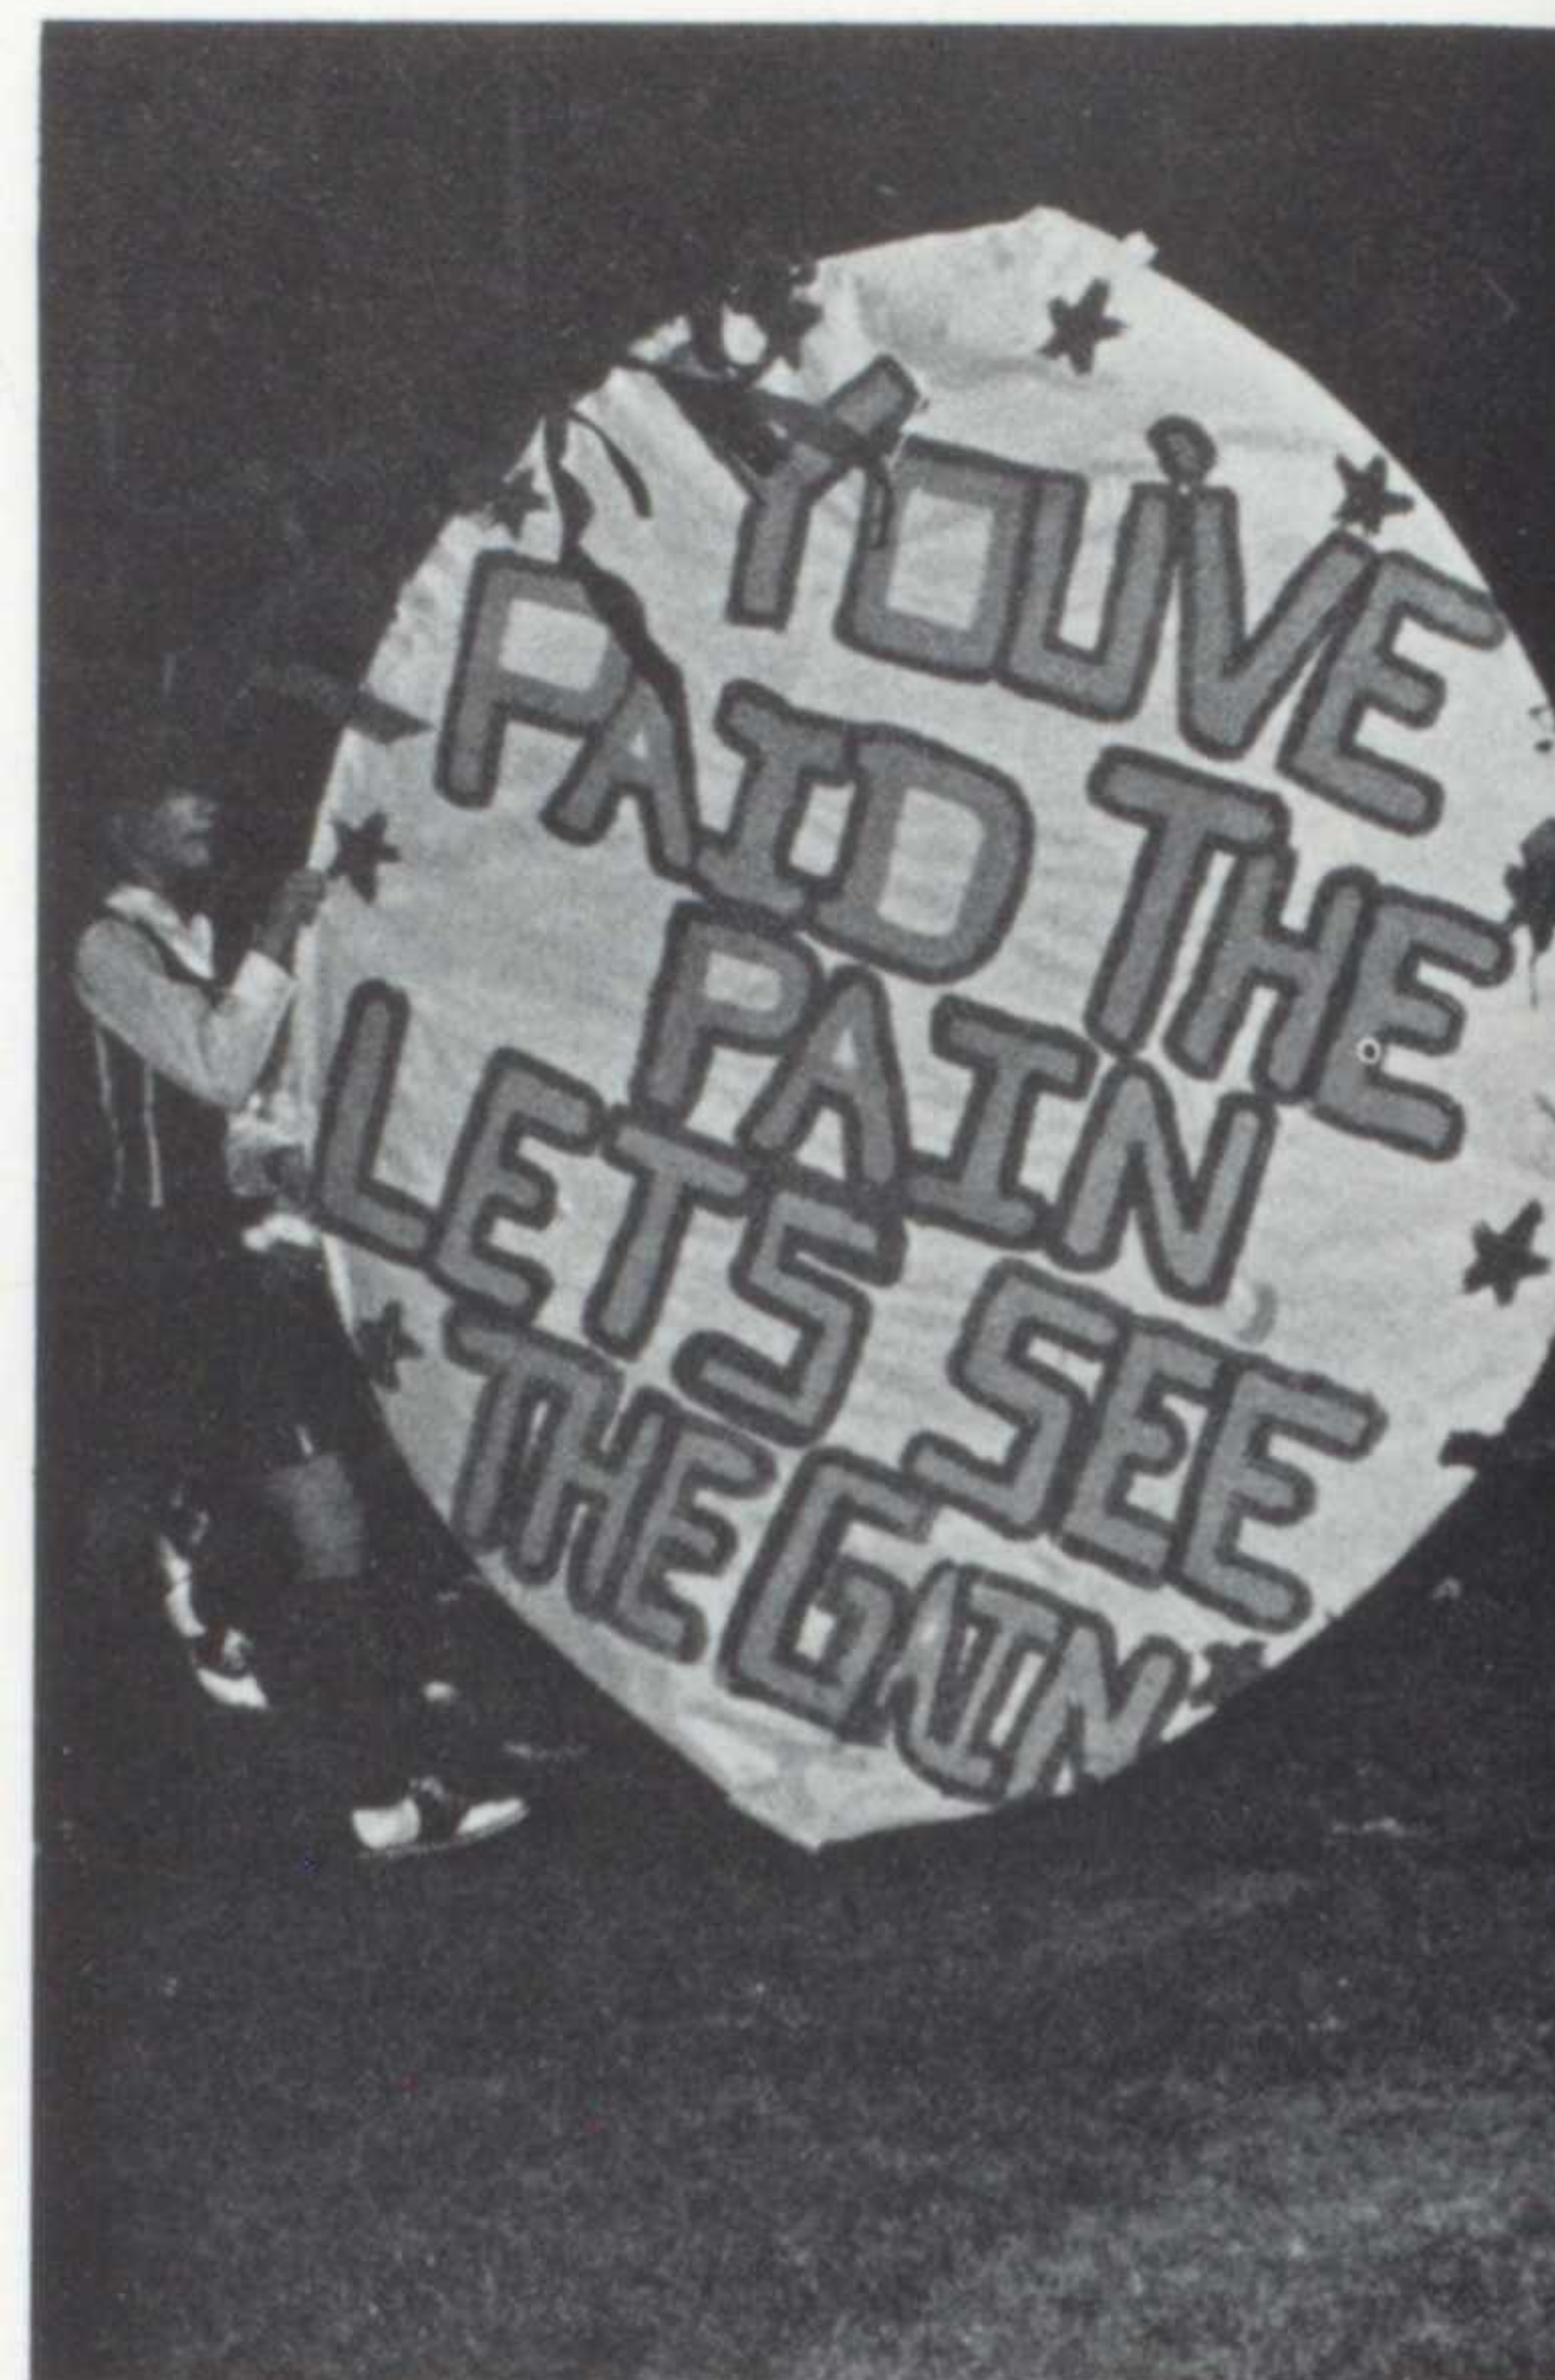

for each football game. They started their learning at a workshop at Ohio Wesleyan College. "Learning the cheers and doing them right every time," was the hard part for Julie Schumm.

Getting the crowd to participate is also difficult. "It depends on the team and the rivalry," explained Lisa Hellebreakers.

The cheerleaders get only one break in the game. It comes at half time. Then, it's another group's turn to impress the fans.

**In anticipation of the first game**, varsity cheerleaders carry the hoop onto the field. One of the hardest tasked proved keeping the hoop intact.

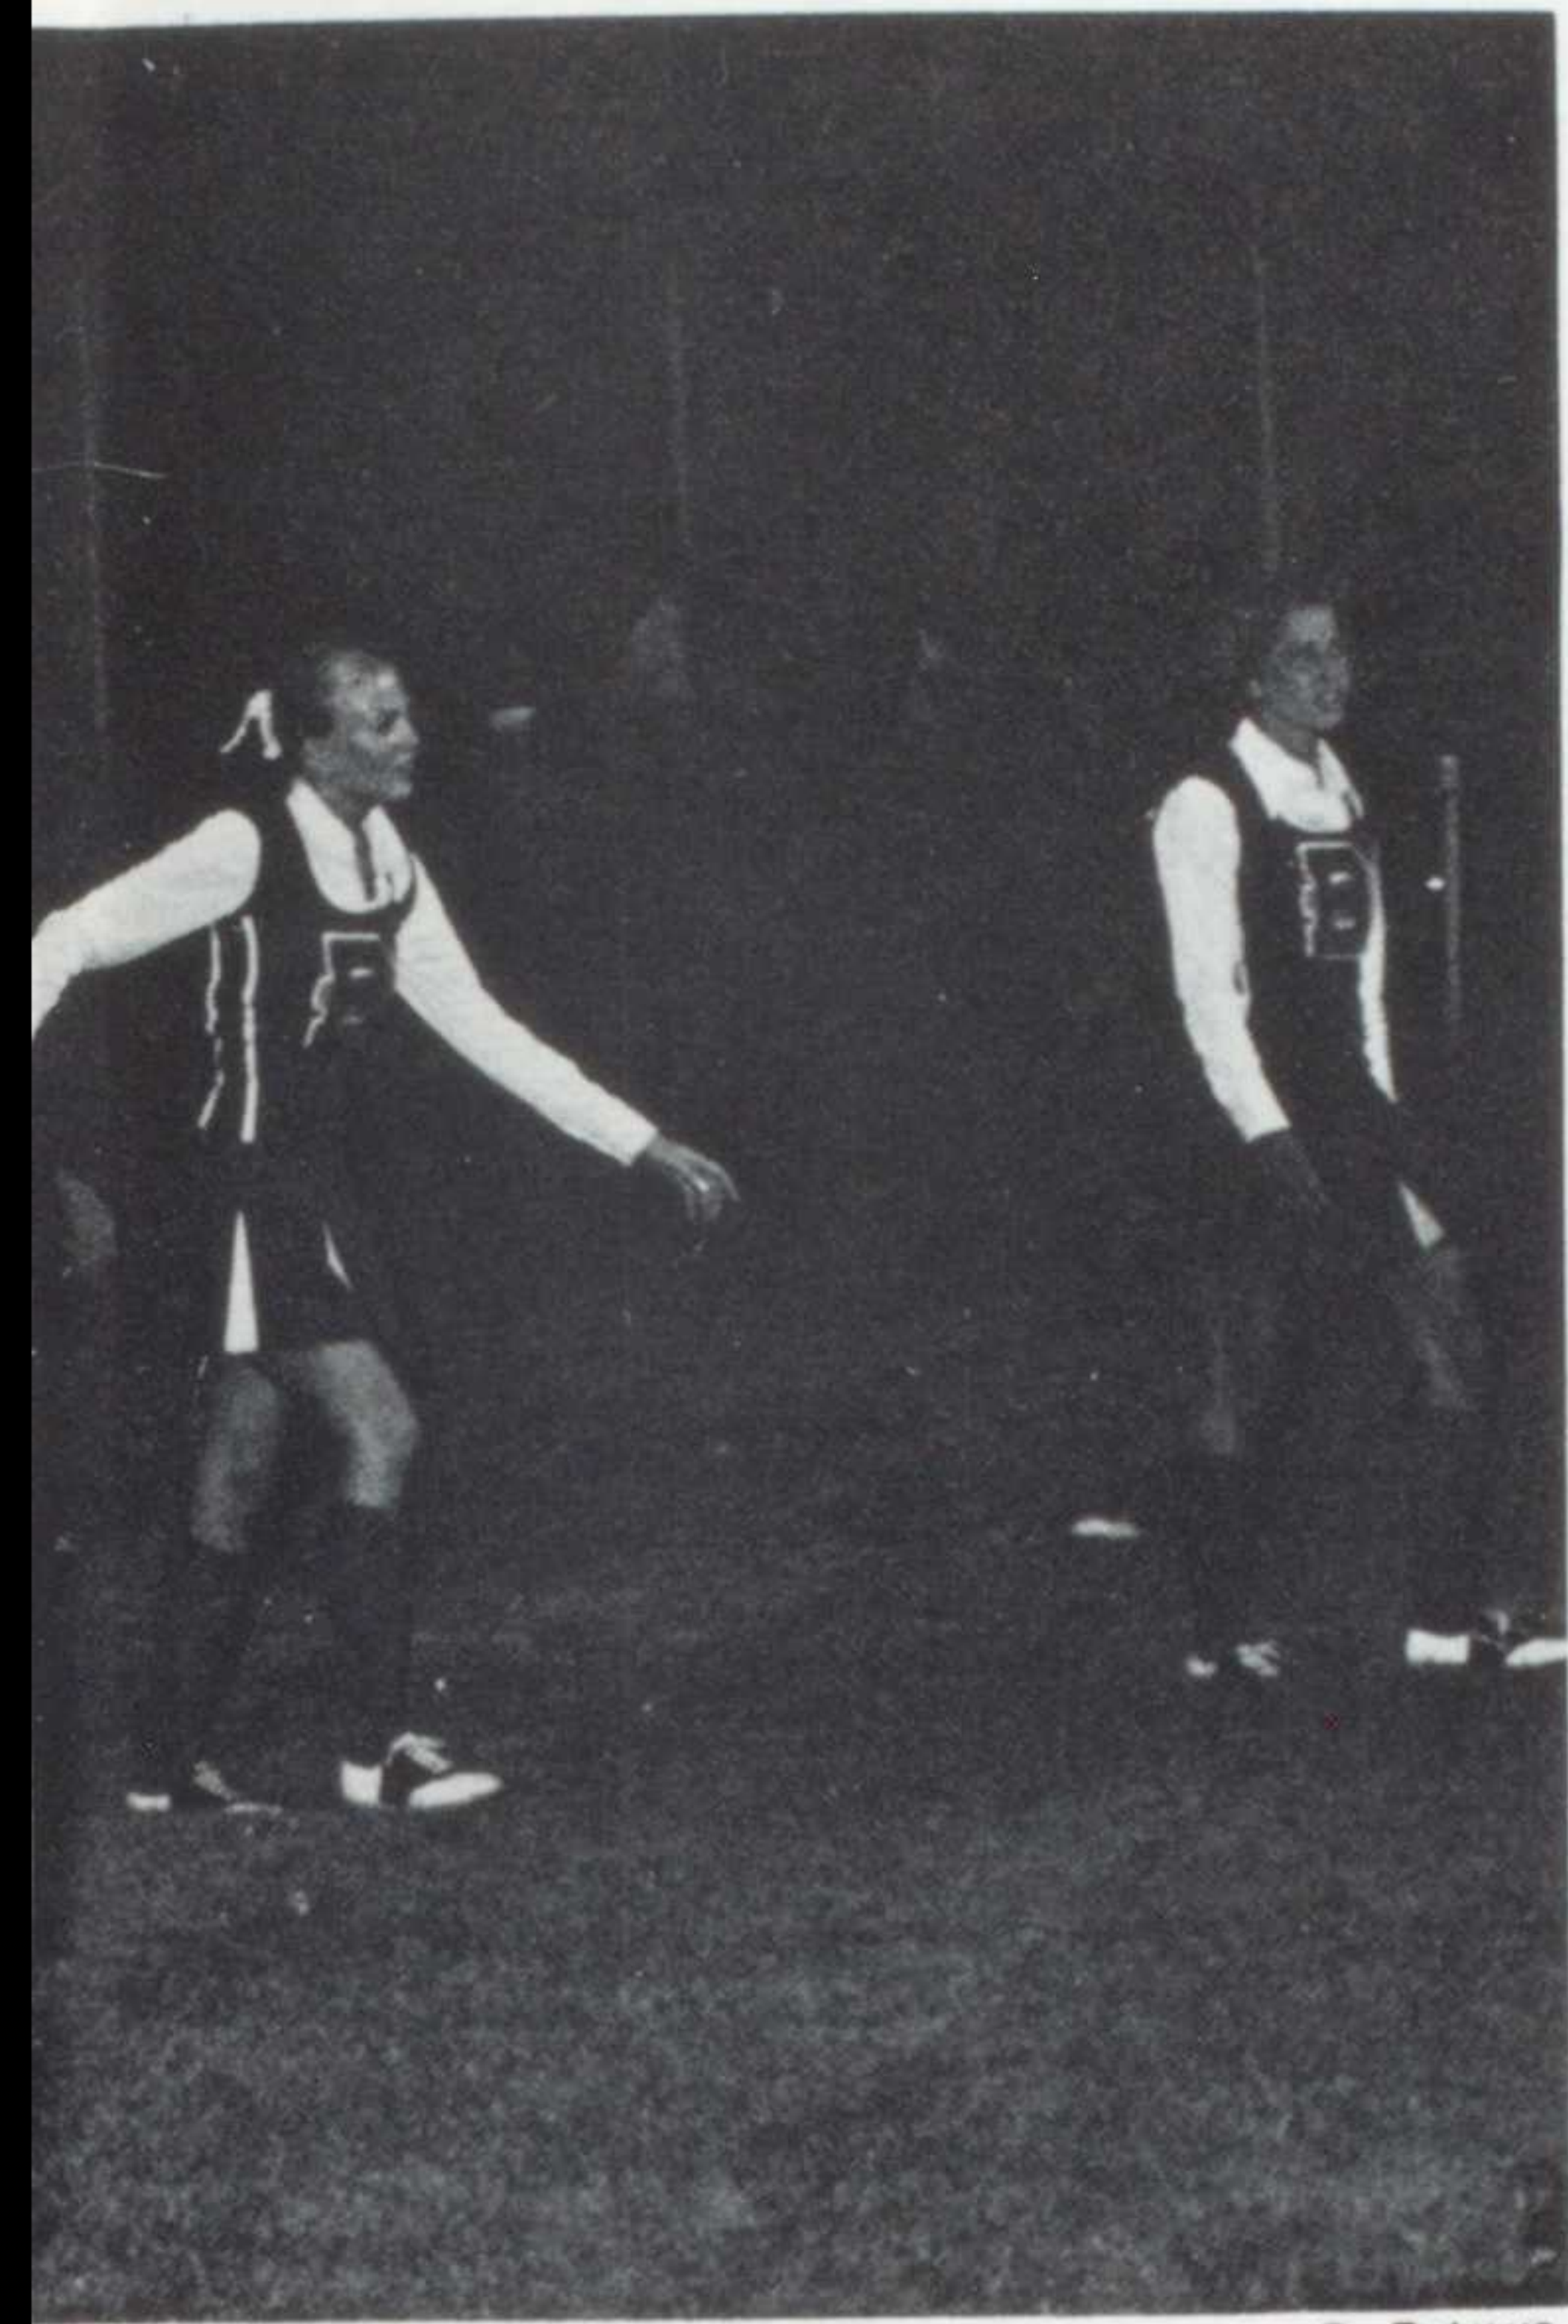

—D. Khym

**Court attending**, an unusual occupation of the cheerleaders, places Julie Schumm in the spotlight while she gives the crown to Lance Hamilton on the 50 yd. line.

**With the band performing** in the background, Jodee Janda and Amy Fritz rest during their halftime break at the River game.

## New uniforms and director spark marching band to spectacular season

"Wow, the band really looks great this year!"

So commented a fan at the first football game. What made the difference?

The spectacular new uniforms, of course. This factor and others like a new director, Mr. Doug Day, psyched up the marching band's 88-member block to a flashy and different season.

Two competitions, one festival, 10 games, one concert, and numerous pep band and charity appearances kept the band awfully busy.

Beginning August 1, the daily ordeal of three hour practices occupied the members' time. The first week was spent reviewing basics and teaching the unusually large amount of freshmen the rudimentary aspects of marching. "My problem was learning how to march drum corps style," admitted Andrea Parks.

Band camp was next circled on the bandsmen's calendars. Between August 7 and 12, the entire band lived at

Mt. Union College eating, breathing, and sleeping marching band. Typefying the average player, freshman John André stated, "The best part of the whole season had to be band camp."

Three weeks later, everyone showed up for the first Friday of school in their new marching band tee shirts ready for the first performance.

It all paid off when the band, after dazzling the home crowd, received two third places at the Wadsworth competition. Senior Betsy Nagy thought the win accomplished another goal. "It brought us closer together with us all striving for one goal," she said.

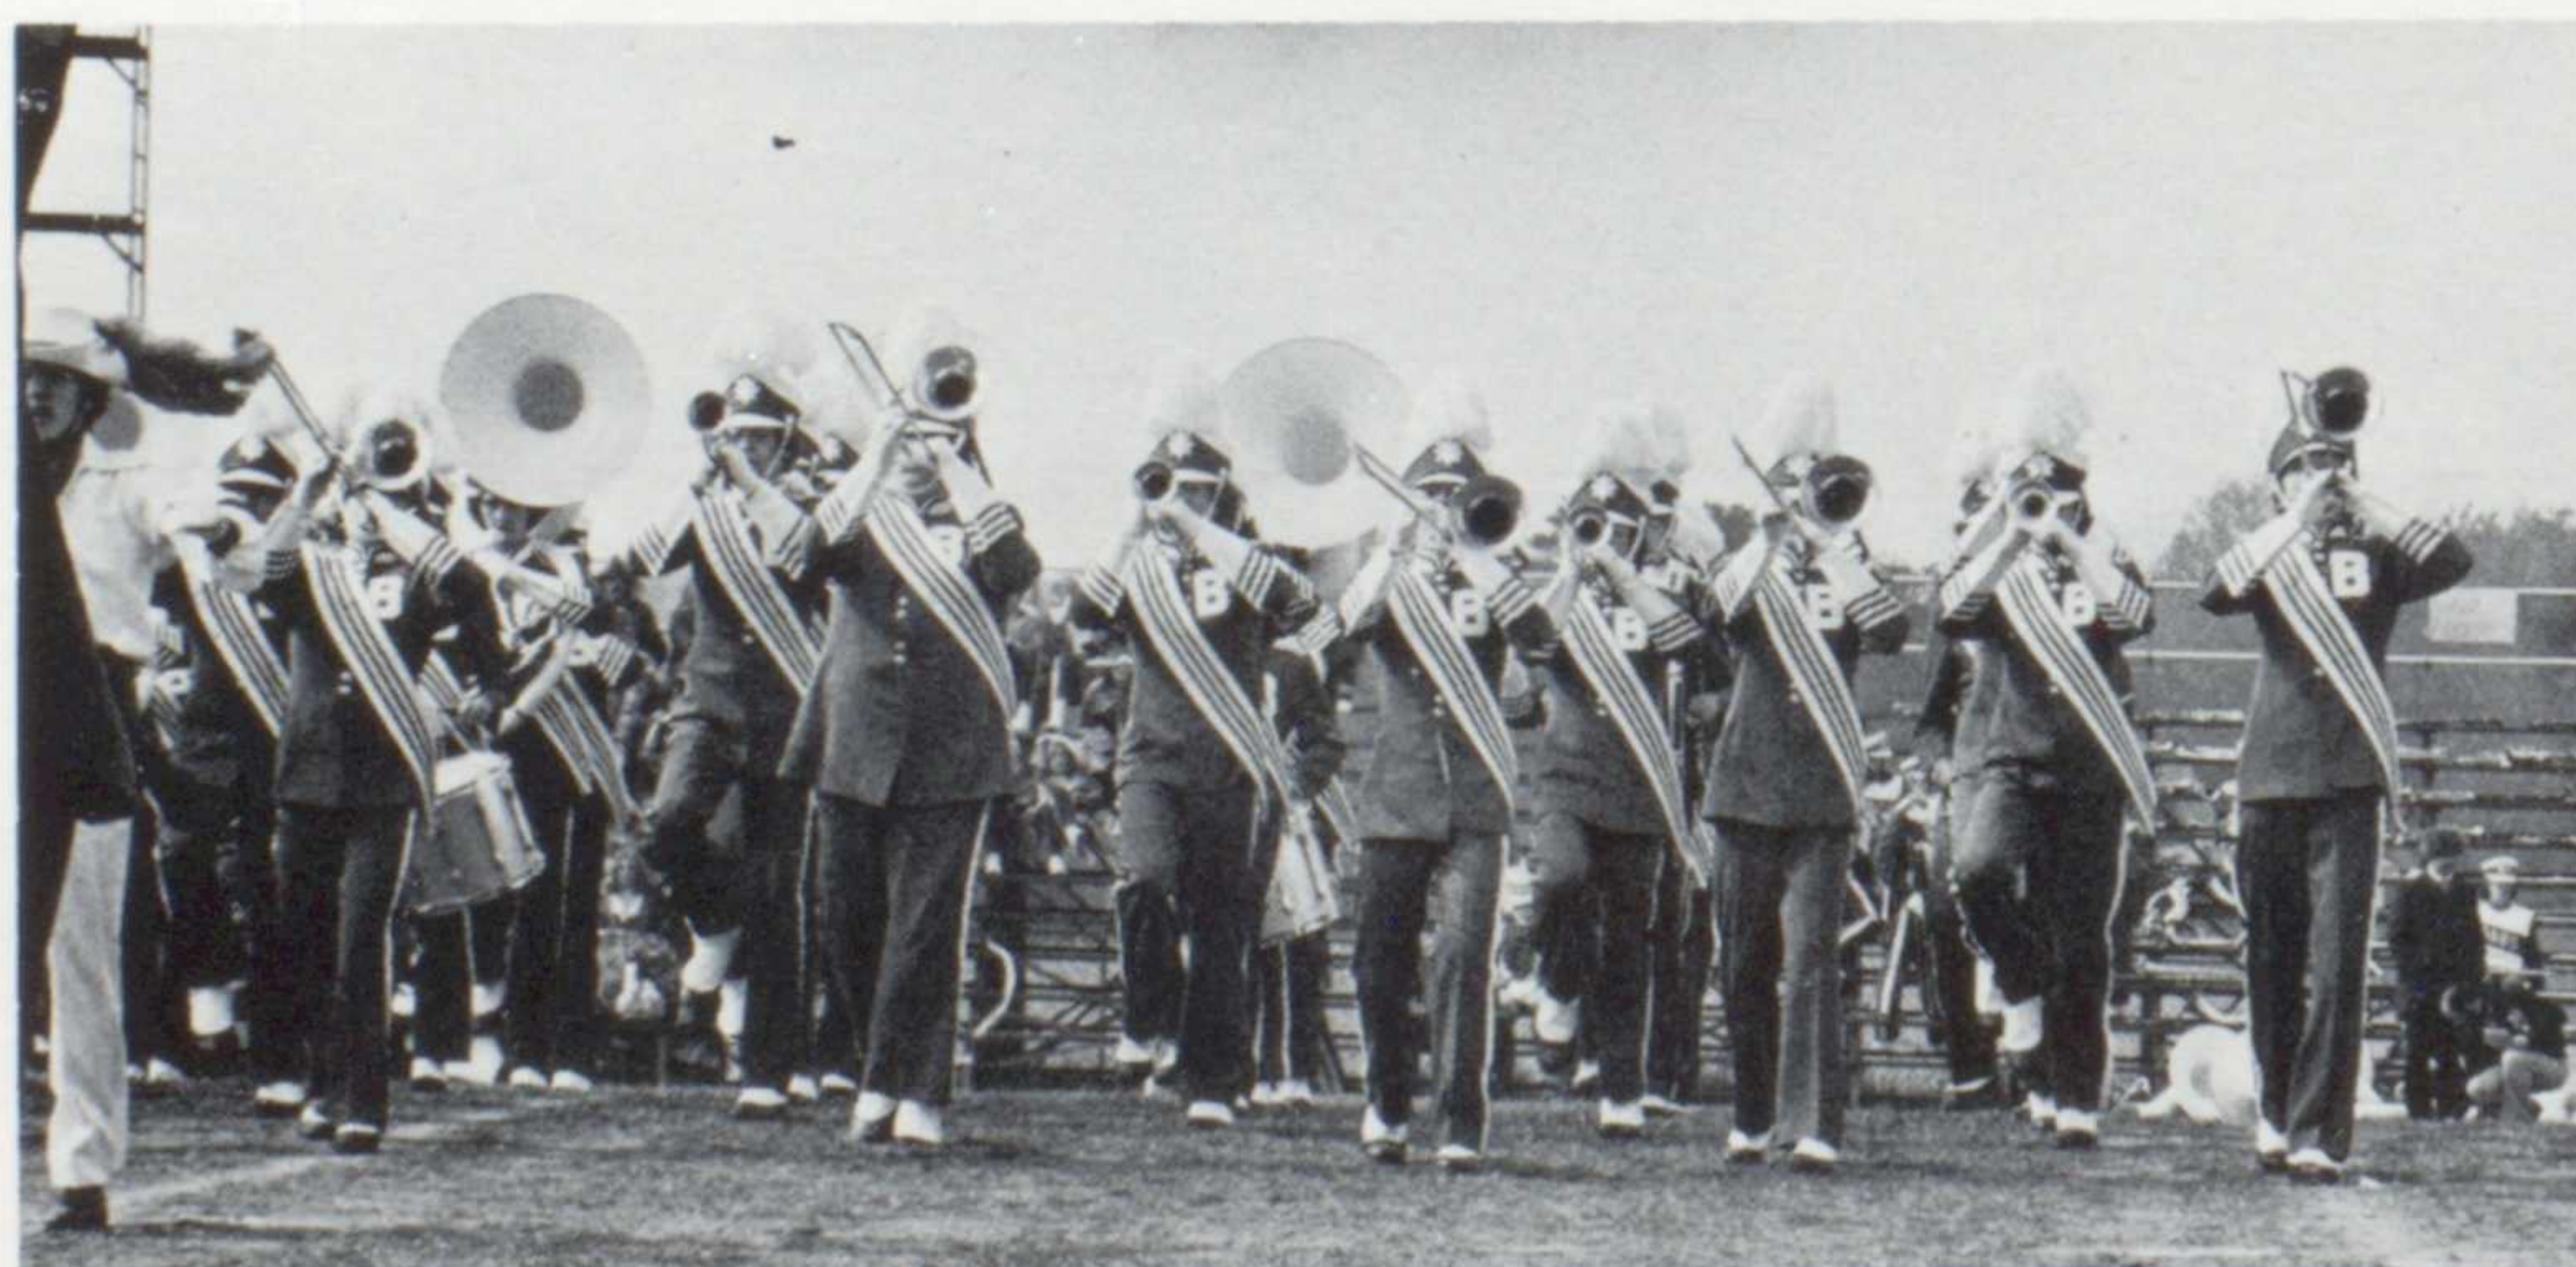

Agreeing with Betsy about the closeness of the band was Bobby Brass, a new student who moved from Tennessee. "It gave me a great chance to meet people," he explained.

An uncommon hardship unique to the Bay band was coordinating the new uniforms. With 16 pieces and

two different tunics to mix and match, there could easily have been a new uniform every game!

Directors Mr. Day and Mr. Frost strove to have a new show every other game. This was complicated by having two home games in a row, but the band always succeeded in giving the fans an original and interesting show to view.

The players, however, were not alone on the field. Several other groups played a major role in the band.

—D. Day

**At a competition in Lexington, Ohio,** the show features the trombone section marching drum corps style in "ABC's Wide World of Sports".

**About to dazzle** the home crowd with their parade dance "Jimbo", the band carries their new aussie hats into the stadium gate.

—J. Sohl  
—B. Calmus

Although freshman Andy Helm joined the band late, he soon blended into the percussion. In this performance, he and the band wore the new winter or formal uniforms and hats.

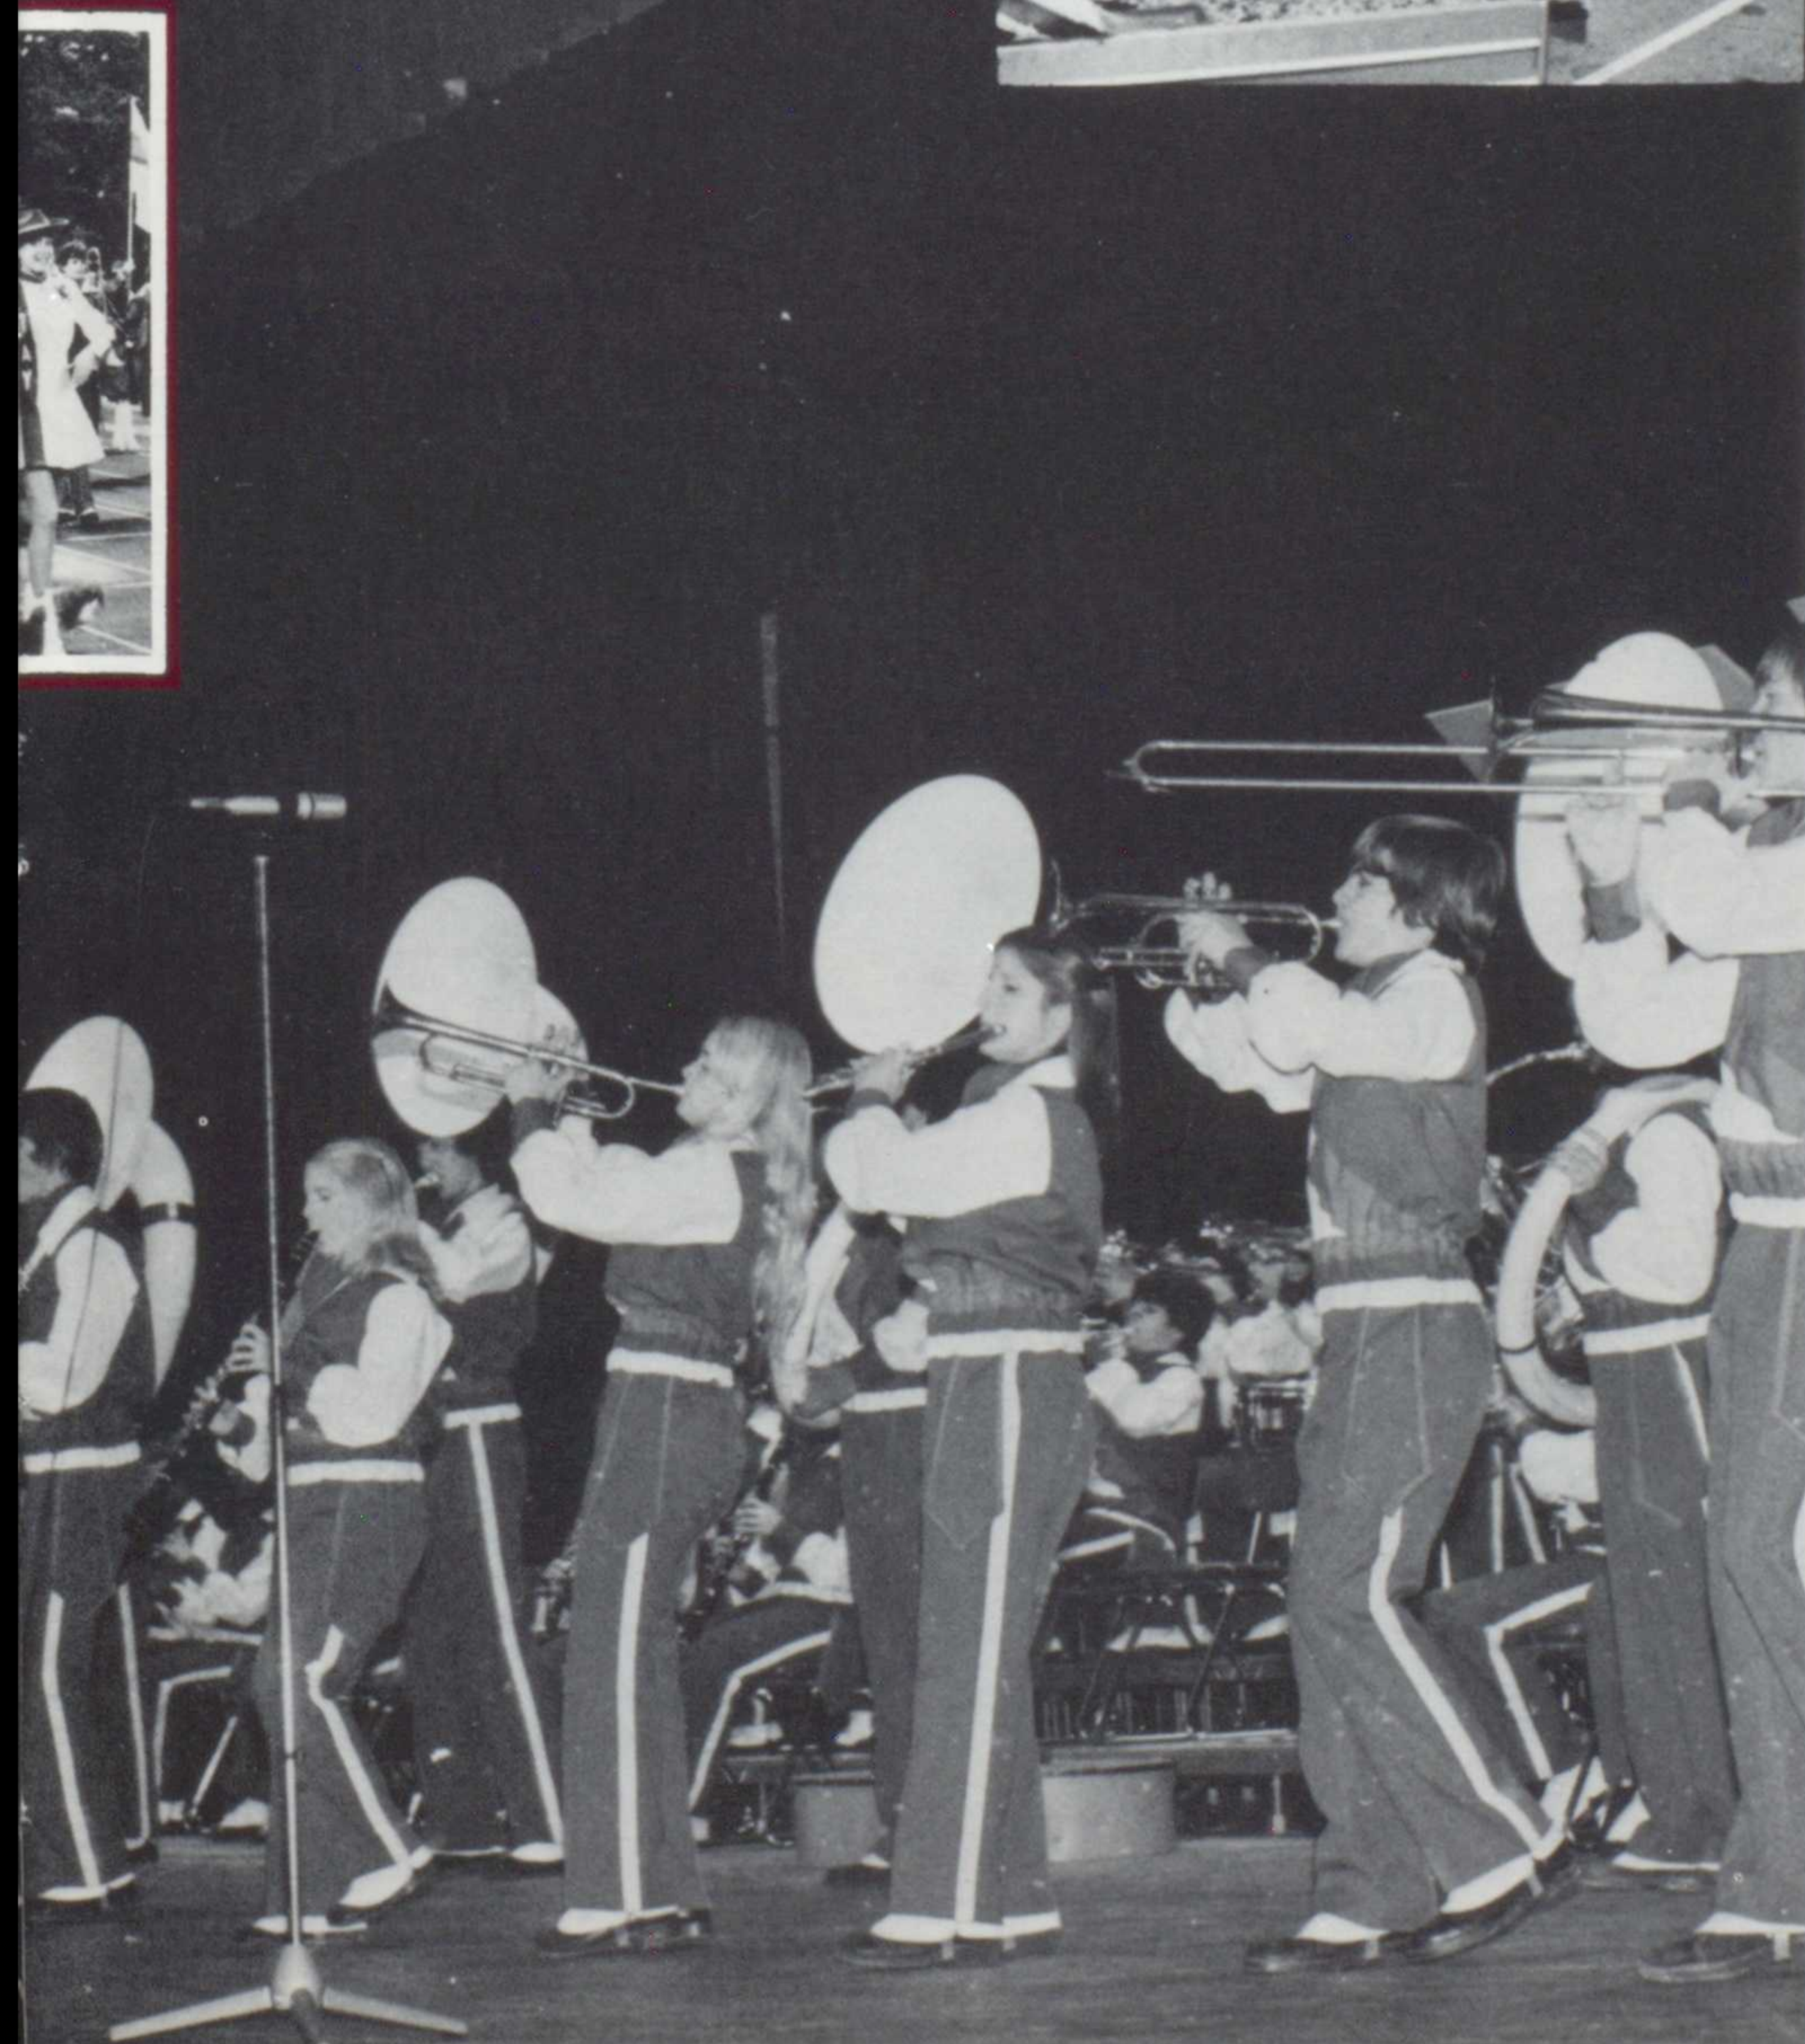

About to begin playing "Clouds", the band passes the judges stand at the Wadsworth competition. They received 86 points in parade and ranked third.

—D. Khym

Bass, snare, and tenor drums all make up a drum corps style percussion unit. Dale Pulver, Mike Cahill, and Marty Duesing keep time during a summer practice.

Chosen to perform the dance routine to "I Wish", ten select players entertained the crowd at the varsity show in the auditorium.

# FOOTBALL EXTRAVAGANZA continued

**One by one**, the Rockettes bend over while doing their routine to "Do Ron Ron," made up by head Rockette Barb Jonas.

**At the Lexington competition**, one half of the Flag Corps marches out at 'right shoulder arms' to the sounds of "ABC Wide World of Sports".

-D. Day

-B. Calm

-B. Calmus

**Because of the small amount of space** on stage, the Flag Corps barely had enough room to do their routine to "Clouds".

**High kicks** throughout the routine to "Superstar" kept the Rockettes practicing after school on Tuesdays.

At the end of the Rockette line, Jane Mowery shakes her pom-poms to the beats of "Temptation."

In front of the stands, junior Ed Begnaud displays the drum corps marching style while directing the band.

Able to see their batons during the afternoon Rocky River game, Andrea Boyd and Jill Moro twirl in their feature number "I Wish".

## The perfect ingredients for any half-time show

- 30 Rockettes
- 10 Flag Girls
- 5 Majorettes
- 1 Field Commander

Mix together and add to a well-dressed band. Place in a football stadium and spread out evenly. Let stand five games; then chill four games. Finally, serve at a varsity show.

Sounds like putting together a half-time show is simple; you just throw everything in the stadium and somehow a performance takes place. But it doesn't really work that way.

The Rockettes began their season in August when ten of them attended summer camp for a week. "It was hard because all the

different schools competed," said head Rockette Barb Jonas. Rockettes also spent their summer painting house numbers to raise money for new uniforms.

The Flag Corps received new uniforms to match the band's and according to Karen Stroup, "They gave us confidence and made us accent the band." The Flag Corps made up and learned their routines without the help of an adviser.

Five majorettes complemented the band, and Kathy Poltorak stated, "Five wasn't that hard to work with, you can do stuff like ripples easier." As far as the majorettes' new uniforms were concerned, they were all too big and had to be altered.

The field commander for the

band was Ed Begnaud, and he received two uniforms, although he could only use one because the other didn't fit.

And so for the first nine weeks of school, Friday nights revolved around the football extravaganza. Whether a player on the field, a band or Rockette member, a cheerleader, or a fan seated in the stands, the stadium was home to Bay's spirited thousands. ■

To prepare for the church service that the Presbyterian youth group conducted, Janet Onstott practices reading from the pulpit.

Seated at the back of the church, several of Bethesda's teen members sit together for the 11a.m. service which follows Sunday school.

-J. Heiser

Founded by Father Zwilling in 1946, St. Raphael's offers the only parochial school in Bay as well as 18 masses per week.

At Bay Baptist Church, the youth group studies their lesson for the week during Sunday school, which takes place before church.

-J. Heiser

Campaigners, a more serious side to Young Life, attracts many students despite the fact that they meet at 6:30 Tuesday mornings.

ITH FAITH FAITH FAITH FAITH FAITH

-J. Heiser

## Area denominational groups serve as youth outlets

By Sunday night, many people are home just starting the homework they put off all weekend. Well, there is an alternative to this drudgery—youth groups. Nearly every church in Bay has one. If you prefer an inter-faith group, there's something for you, too.

At the far west end of Bay, St. Barnabas Episcopal Church has a group that meets once a month. Oriented mainly towards social activities, they have had a volleyball party, a Christmas progressive dinner, and a canoe trip.

Continuing east, the Bay Village Baptist Church has a group with about 25 members. Together, they participate in activities such as a Valentine's Banquet and a bowling party, and they also sing in the choir.

Next on the map is Bethesda-on-the-Bay Lutheran Church. Their youth group participates in a variety of activities ranging from roller-skating parties to hunger walks. They even took

**In the middle** of the 10 a.m. church service, the youth at St. Barnabas leave to meet in the library for Sunday school.

over the church service one Sunday.

Perhaps the most active group is located at Bay Presbyterian Church. About 30 kids meet every week to sing, play games, or listen to speakers discuss current concerns. They have weekend retreats, and participate in service projects such as raking leaves for shut-ins. Not all activities are on the serious side, though. They have also had a progressive dinner, a toboggan party, and a square dance.

Last, and not even on a Sunday night, is Young Life. A mixture of fun and serious study, it appeals to almost everyone. A typical Wednesday night meeting consists of several songs, a silly skit, and then a meditation by the group's leader, Tom Hamman.

A chance to get away for awhile, lasting friendships, and learning about God and yourself—all are to be found in the nearby youth groups. Leah Neel from Bay Baptist explained, "It's a chance to make new friends, and worship God." All the groups welcome new faces, and you're sure not to be disappointed.

-J. Heiser

# Is There Life After Football?

## Gridders grind through the Season

**W**ow! Freshman football was a real kick this year! The season better have been fun because we worked hard enough during it. Since the punishment for missing a practice was running a mile, not too many of us skipped a practice.

As for the team accomplishments, our 6-0 victory over North Olmsted was one of the great games because they have been our rival since eighth grade.

—Jim Fain

"It seems everybody worked hard towards achieving their goals."

—Tony Obey

We were said to have a poor spirit and lousy attitude, but these rumors were totally false. Although the season was not a total success, it was a turn-around from last year's two wins.

Running during the practices was our key to success. Our after school practices usually lasted long into the night. But, we could always say that no matter what happened, we never quit.

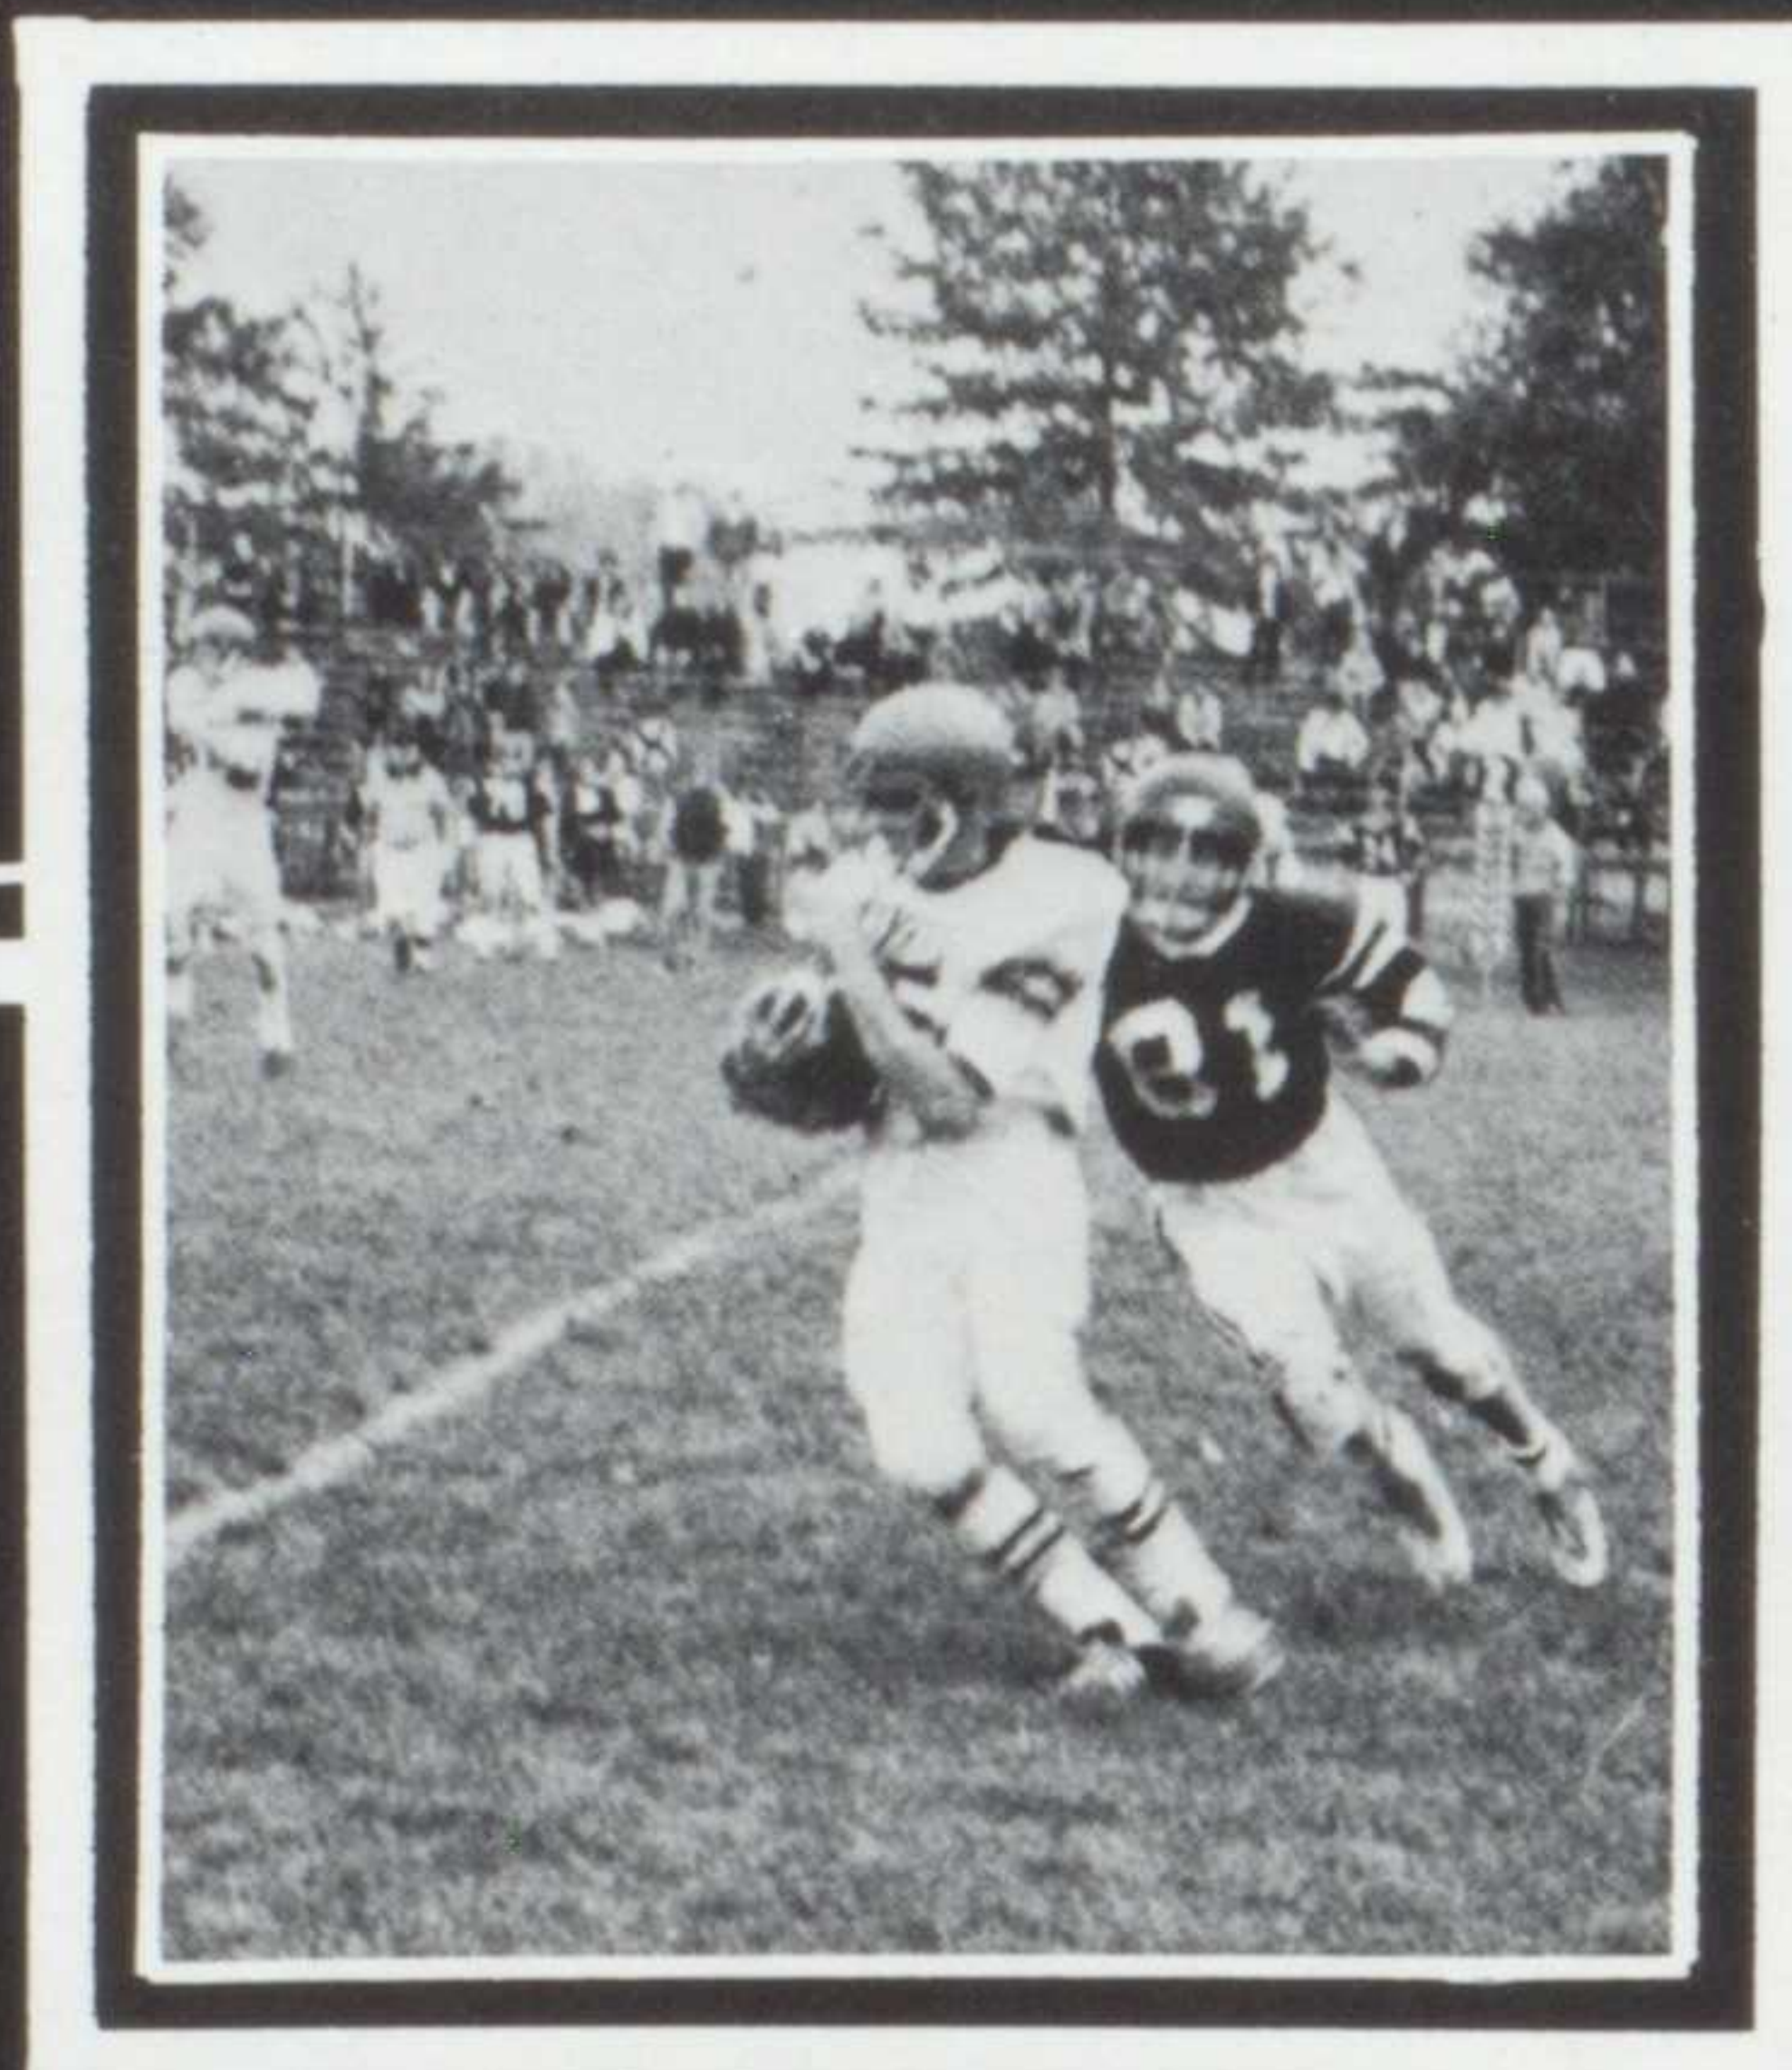

—Dan Hayes

**Nearly grabbed** by an Olmsted Falls' tackler, Tom Marquardt breaks free to bring Bay closer to a touchdown

—J. Heiser

**1** Bill May heads the ball. Heading is used when the ball is too high in the air for a block with the feet. The procedure is as follows: 1. Plant feet firmly into the ground. 2. Eye the ball while it is in the air. 3. As the ball nears, jump up and hit it with the middle of the forehead using the strong neck muscles. This is one of the most unnatural and useful techniques in the game of soccer.

**2** Phil Nixon executes an instep kick. The kick is probably the most basic of all soccer skills. To perform a perfect instep kick, do as follows: 1. Run up to the ball. 2. Kick the ball with the inside of the big toe. By kicking with this part of the foot, much of the pressure is alleviated. This instep kick is the most powerful and accurate of all of the soccer kicks.

**3** Joe Boggs performs a thigh block. The thigh block is used primarily when the ball is too high for the feet. In executing this block, one should proceed as follows: 1. Set the position and stance in the direction of the on-coming ball. 2. Watch the ball to note its velocity. 3. Let the ball hit the leg and bounce to a teammate.

**4** Don Groff boots the ball in a corner kick. The corner kick is utilized after the offensive team kicks the ball out of bounds near the goal. The new offensive team gets to kick this penalty kick in. The form for the corner kick goes as follows: 1. Start to run towards the ball. 2. Kick the ball about two to three inches above the ground. The force and magnitude are the greatest when kicked in this manner. Make sure the ball is kicked to the offense.

Who wants to start training in the summer? I certainly didn't.

I guess the only thing that kept me going in summer training was the fear of Coach Hussey and his "guided missile" roll of tape. Together they formed a combination that could motivate you with a flick of the wrist.

As each game went by where I did not produce, I hoped that our next game would be the one, and I strived for it in practice.

But as the end of the season neared, I started to think that the one game I hoped for would not materialize and it didn't.

---

"I never thought I would be anxious for school to start, but then I was."

---

I was disappointed in my overall performance this season, but the friends I gained overshadowed that disappointment.

—Toby Jones

Twice a day practices consisting of drills, scrimmages and running got us ready for the upcoming season. Coach App prepared us well for the games and lifted us up when our spirits sagged. Even though we weren't totally successful the skills and attitudes we learned will help us in the coming years.

—Phil Nixon

Voted by the head coaches in the Western Division to be a member of Ohio's second team, John West boots the ball towards another fullback.

With the motto "Never give up!" Jeff Rinaldi outruns his opponent to try for his third goal assist of the season.

A high kicked ball catches Fritz Ahler's attention in the Padua game. Fritz had three assists in seasonal play.

—J. Heiser

Since Bay High School has had a soccer team, the student body and fans have been rewarded with many excellent teams; again, Bay High had a fantastic team. The team was so good, in fact, that two of its three losses came at the hands of North Olmsted, the eventual state champs.

As far back as June, the stubs had aspirations aimed at a state title.

"Summer practices were used to sharpen up our basic skills," commented Jim Rinaldi.

Also, Chris Giles stated, "Even from the beginning we all

"We have been playing together since Bay Middle School, so we know what to expect from each other."

—Jim House

tried our hardest. Soccer camp was used to work on polishing our skills and establishing our positions."

Besides establishing themselves in their league, they also established themselves as state soccer powers. The team's most memorable moments ranged from a preseason victory over the alumni to a game-winning goal against top-ranked Hudson.

By going as far as sectional finals, they showed that they were one of the best soccer teams Bay has ever had.

The girls' track team had a great season. But more important than having a winning season, we won in other ways, too.

Co-captains Karen Francy and Gail Christofferson led the team through the season. We started our workouts in the middle of the gas shortage when school had closed for two weeks. We had to split up into three groups to continue practice.

The meets were definitely the best part of girls' track. It is a real thrill to watch your teammates during their events and to cheer them on to victory.

Yes, the team did have a winning season. We also made new friends and had different and exciting experiences.

—Gretchen Mittag

“Our first meet was a step into the fast times.”

Also the boy's track team triumphed by adding seven victories to their 33-game winning streak.

This accomplishment was achieved because the coaching staff was very helpful by requiring early January workouts which concentrated on basic techniques. They helped us individually.

After all the groundwork was laid, the real season was in sight. The medley relay focused attention on our Bay runners, because they had the fifth best national time.

After our loss in the West Tech relays, we were feeling low, but the SWC competition always brightens things up, and of course, we came in first.

—Doug Fanta

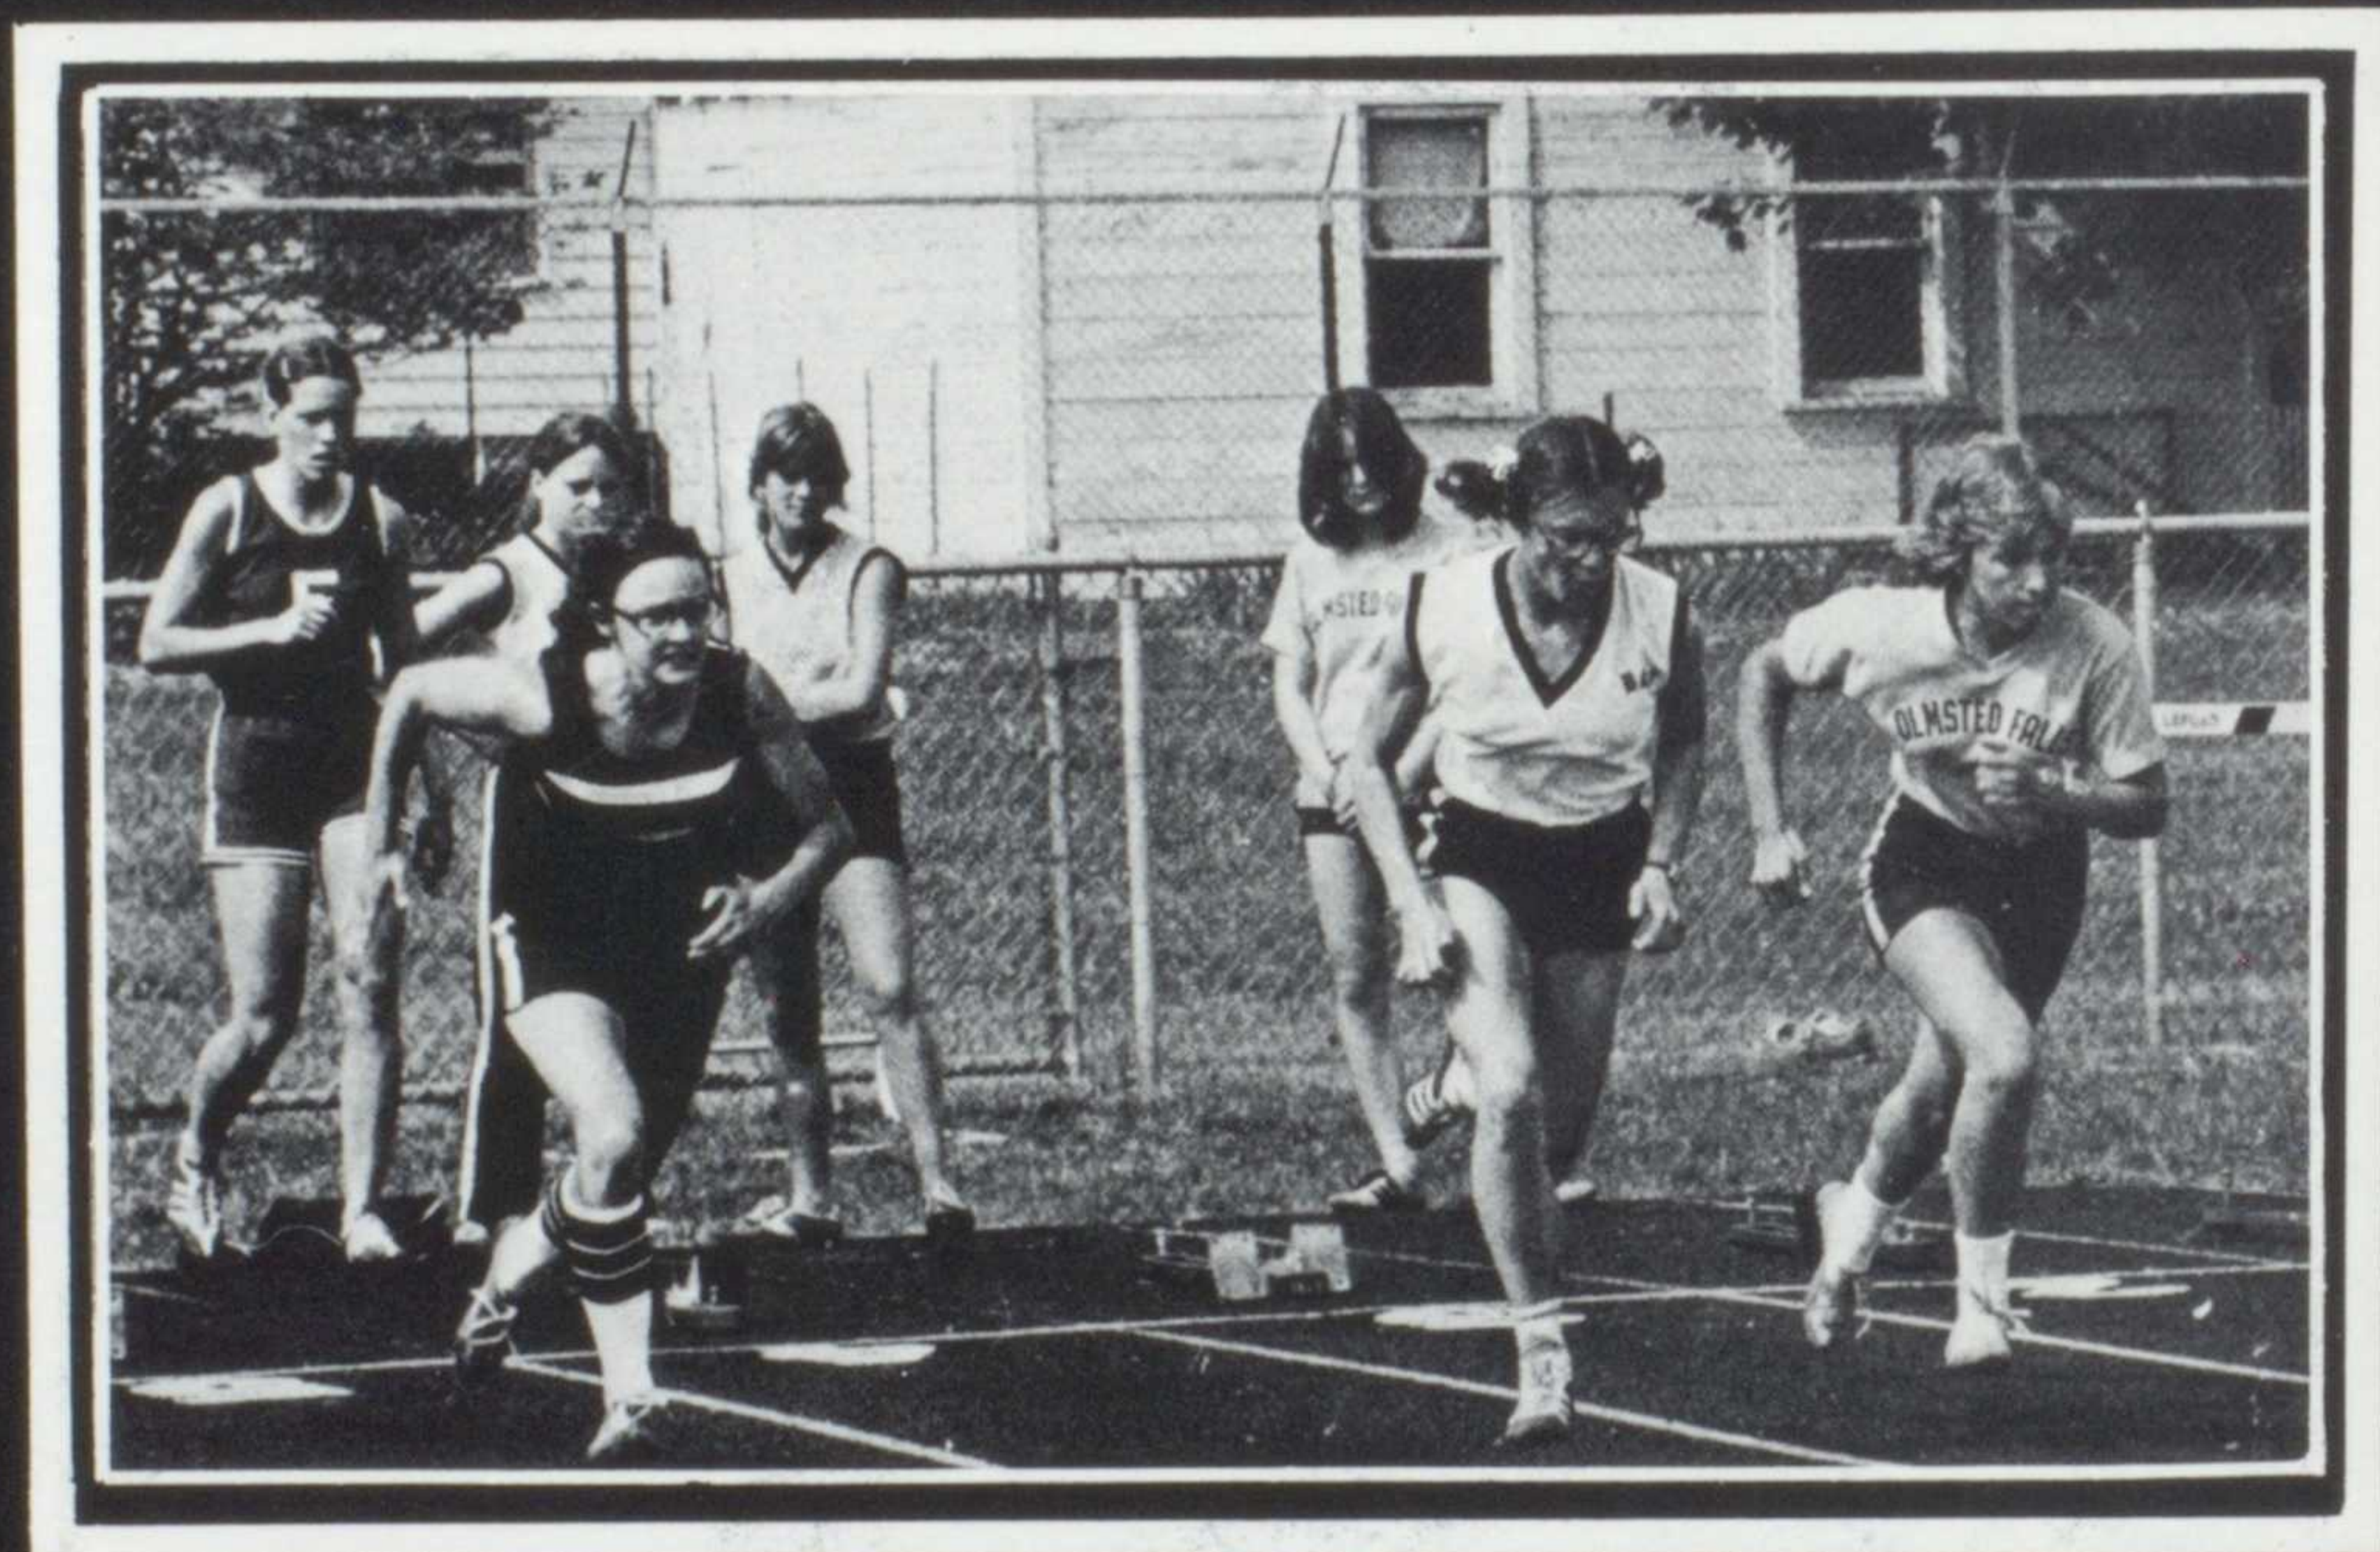

**A 100-yard dash school record** of 11 seconds qualifies Gail Christofferson for the district meets.

**After the hand-off** of the baton, Margi Brown continues her leg of the 440 yard dash to the finish line.

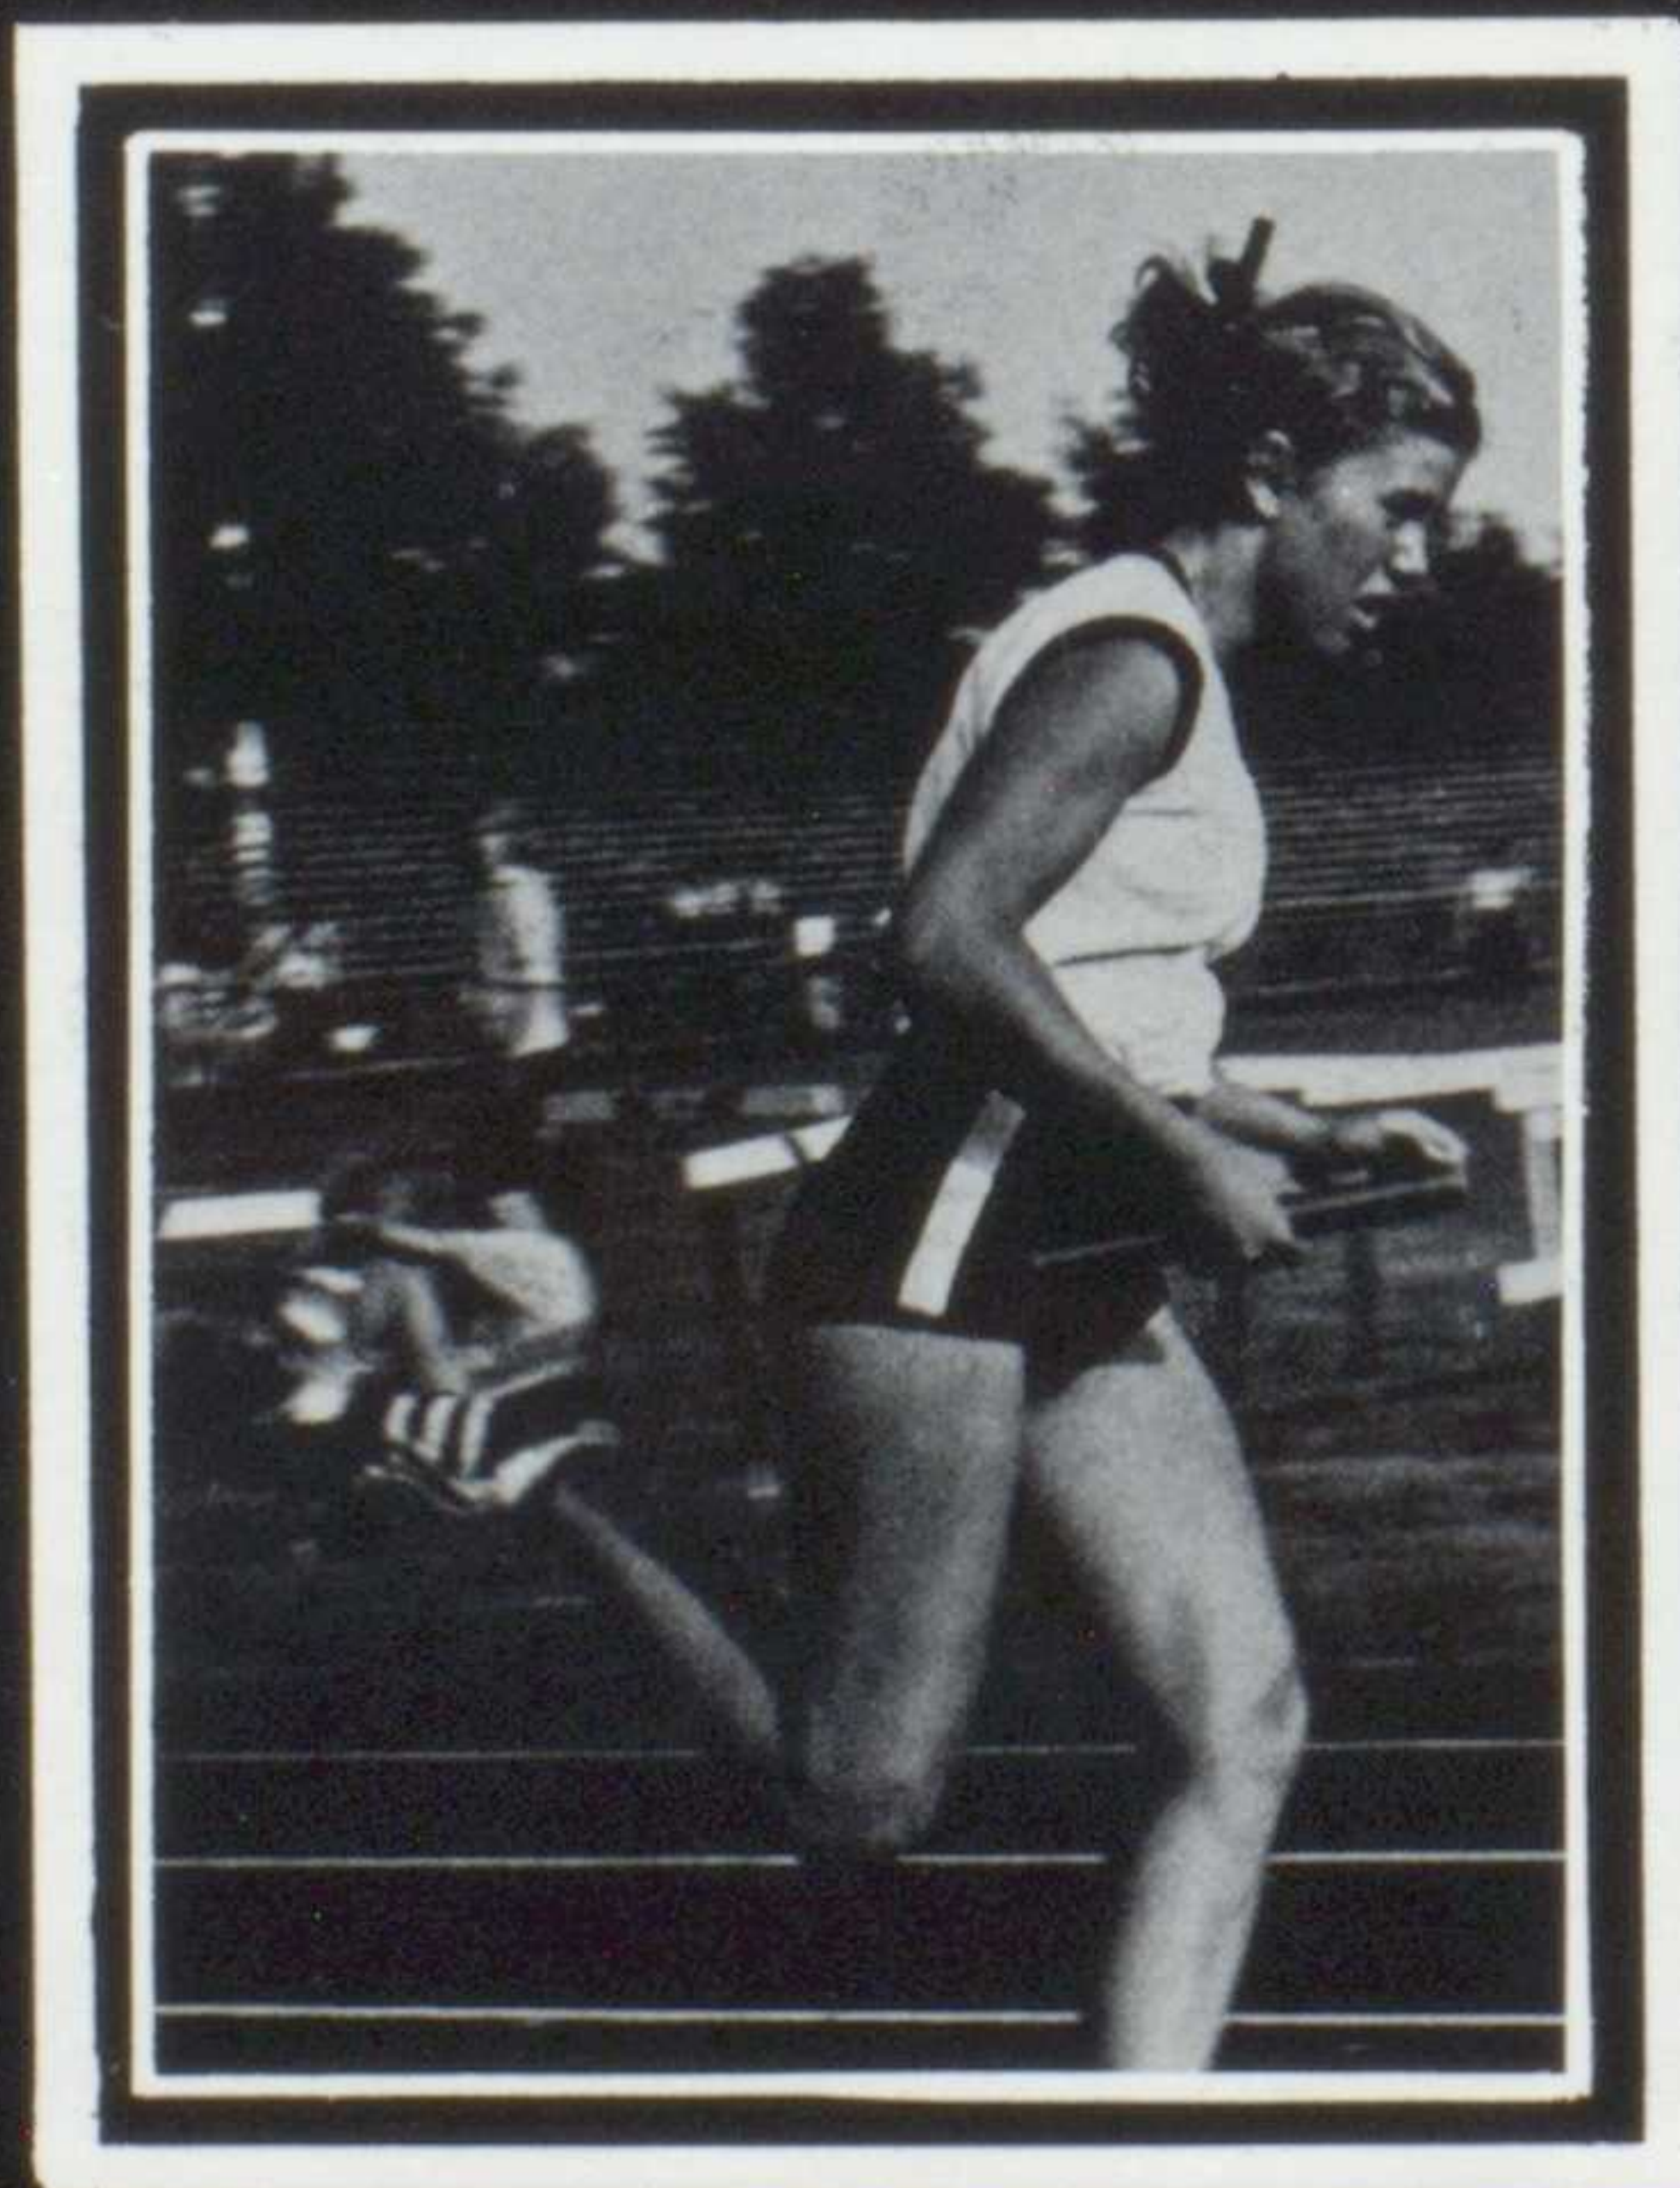

**The winning six foot leap** by Dave Sankey determines Bay as the victor. The jump was Dave's best of the season.

## TIME OUT FOR A CHANGE OF PACE

Varsity, J. V. and freshmen sports were the extent of Bay High student involvement. Right? Wrong!

When Bay students could tear themselves away from their books, they filled their free time with the less celebrated sports.

For varied recreation, students played frisbee, went fishing, and rode skateboards. Throwing a frisbee was an activity that was enjoyed by senior Ken Hagedorn, who commented, "I'd rather throw a frisbee than a football because it's fun to try and perform different tricks with it. You can throw it in so many ways."

In reply to the same question about fishing, Bart Sullivan stated, "It is enjoyable because it gives you the op-

**Sheer balance** saves John Linn from a near fall during a practice with the Bay Skateboard Team.

—J. Heiser

portunity to just sit and think."

As for the art of skateboarding, freshman Mike Crane told how he became involved, "I became interested when the skateboard fad was reborn about a year ago."

While these activities were leisurely, other sports in which students participated were more strenuous. Both bicycling and football were good examples of arduous athletics.

For fun and a means of transportation, bicyclist sophomore Carol Sullivan declared, "On the average, during the summer, I probably ride at least four miles a day."

Most students needed to have some kind of rest and relaxation, and they have found types of recreation in which to participate.

So, isn't it really all just for the fun of it?

—J. Heiser

—B. Calmus

**As a means of escape** from the hassles of his day, Bart Sullivan goes to Serb's Pier for the serene activity of fishing.

**W**hirlwinds of dust and then, "You're safe!" Whew!

All the practices that began in March sure were worth it when the umpire confirmed that he was safe on base.

The basic skills of bunting, stealing, and defensive playing were the top priorities emphasized in practices. Also, the team members spent many hours slugging away in the batting cage.

When the season began, Bay diamondmen, with eleven returning lettermen, were ready to defend themselves against any team.

They defeated all SWC opponents except Rocky River, but this game was a high-scoring close game.

Much of the support behind the

team came from the "Bleacher Bums" who staged special days such as Lawn Chair Day and Helmet Day to psych-up the team.

The advancement to regionals included a variety of games. One example was the first game against Rocky River. After a hard afternoon of intense ballplaying, the score was tied at the end of the ninth inning. The umpire called the game because of darkness, and it was recorded as a tie. A replay of the game was impossible because of a league rule.

Despite this crucial occurrence the diamondmen continued their excellent play to finish first in the SWC and district play.

—J. Heiser

With a warning glance from Coach Cook, Rick Naumann slams the ball past the Demon left fielder to end the game with a score of 10-1.

First baseman Jay Sobe hits three-for-three in the Lorain game which raised the Rockets overall record to 20-2.

—J. Heiser

# Catch them on the rebound

**S**miling was a new type of team strategy used by the junior varsity basketball players. "If we were smiling, we would automatically feel better about our game, no matter if we were winning or losing, so in this way, we were always on top of the game," explained Brad Svenson. "To prepare ourselves for the victory, the team also had a fifteen second prayer before the game," he added.

The J.V.'s biggest rival was Westlake. In the second Westlake game, the energy was running high, and the team played a tough game, only to lose by one basket. "Of course we felt especially bad after this loss; but losing does have at least one advantage—we go

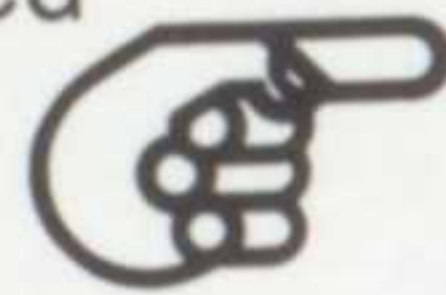

out and play even harder for our next game," summed up Bill Johnson.

The freshman team also had their share of games that were decided in the last few seconds.

During the season, these close games made the team interesting to watch. According to Mickey Corrigan, "The first Fairview game was the most exciting because we went into an overtime and won by five points."

"We should have been better. We lost to the easy teams," commented Mickey Corrigan, point man for the freshman team.

Nevertheless, according to the total wins and losses for the season, the freshman basketball team bounced back victorious.

**Boys' Junior Varsity Basketball**—Front Row: Bob Hanhauser (manager), Coach Scott. **Back Row:** Bob Bowles, Chris Fedor, Bill Weir, John Campo, Bob Kimball, Steve Rode, Jeff Hammerschmidt, Bill Johnson, Brad Svenson, Joe Auman, Jim Liberatore, Tony Obey, Mark Kaiser, Brian Livingston, Mike Cseh.

**A Court Case**

## Flu bug & injuries bite basketballers

The Varsity Girls' basketball team was extraordinary. Some of the girls had played together since sixth grade, the others, since ninth grade. After six years of practice, the final year had to be fantastic.

In the first game of the season, they set a new conference record for points scored in a game by creaming Fairview 92-25. The team was incredibly psyched for a terrific season, but then disaster struck. Guard Julie Seed, who averaged 20 points/game was injured and would miss six games. Yet, the team gave their all and won all six.

Seed came back, but the Admiral King game brought an end to her high school career after she reinjured her knee in her third game of the season.

The final game was against Westlake and a defeat would have meant sharing the SWC title. Behind the cheers of the largest crowd ever, they out-played the Demons and took the crown of the toughest conference in Cleveland, the SWC. The team was seeded number one in the district and ranked fourth in the State.

Indeed, the team will be one of the best Bay ever has. There will never be another team as close, as good, as special as the team of '77-'78.

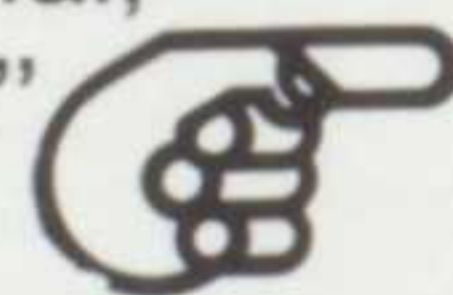

-Cathy Wallace

Drinking from the same water bottle caused most of the problems for the J.V. team. At almost every game, 3 or 4 of the girls were missing because of the flu. However, they still lost only 2 games and were number one in the SWC conference.

This phenomenal record was due to the unity of the team and the new coach, Mr. Ule. His practices were hard, two hours every night, except before games, but they paid off in the long run.

The unity was a necessity. Because so many players were sick, the remaining members were forced to play many positions. In fact, two players, Sarah Nauman and Mary Hoenes alternated for Varsity players in the District tournaments.

"We really had a good team," summed up Margo Gustafson. "All the players have potential, but we all need experience."

-L. Mead

**Girls' Junior Varsity Basketball**—Front Row: Debbie Deter (manager), Coach Ule. Back Row: Sarah Naumann, Margo Gustafson, Karen Fuller, Mary Hoenes, Cindy McLaughlin, Tara Pattyn, Beth Hampton, Debbie Thompson, Kelly Griffin.

-L. Mead

WON 11 LOST 7

-J. Heiser

Bay didn't repeat as conference champs, but the Rockets did give Bay fans something to cheer about.

It was an up-and-down year for the varsity cagers as they started out winning their first five games then losing the next five out of six.

Starting into the season, Bay was labeled as a dark horse contender for the SWC title, but the team just didn't have the experience. John Gross commented, "We didn't have the togetherness of a team which we needed to be a winning unit."

In the first game, John Gross sank a 20-footer at the buzzer enabling Bay to defeat cross-town rival Lakewood. Then, against Berea, Matt Oakley duplicated Gross' actions to give the Rockets a perfect slate against non-conference foes. But, the biggest thrill of the year was when Bay upset Westlake 48-46 to knock the Demons from the undefeated ranks in conference play. "We played as a team and kept our composure to defeat a well-balanced team," commented head coach Rick Voiers.

Fairview, a strong basketball rival, and Bay traded overtime victories. Both games provided

action-packed suspense for all fans. The Fairview students got out of hand at their home game as a smoke bomb and a fire alarm were set off to cause disturbances. Dave Hook asserted, "It really broke up our game when we had to clear the gym and then wait for everyone to come back in."

The cagers agreed that there was no natural talent on the team and that they had to work to win; but they felt the results were worth it.

In order to gain control of the ball, Randy Ingram must tip it to a Bay player. Bay stunned Westlake by giving them their first conference loss of the season.

-B. Hurst

-L. Mead

After some quick advice from Coach Voiers, John Gross heads back to tell the team. The overtime loss by one point to rival Rocky River set Bay's record at ten wins and seven losses.

Boys' Varsity Basketball—Front Row: Scott Carras. Second Row: Craig Little (manager), Coach Voiers, Mike Crook (manager). Back Row: John Gross, Dave Hook, Pete Ganyard, Dave Dye, Lee Rohlke, Matt Oakley, Dave Detlev, Dave Urbanowicz, Stan Walker, Randy Ingram, Tom Munson, Jim Mackey, Rick Voiers.

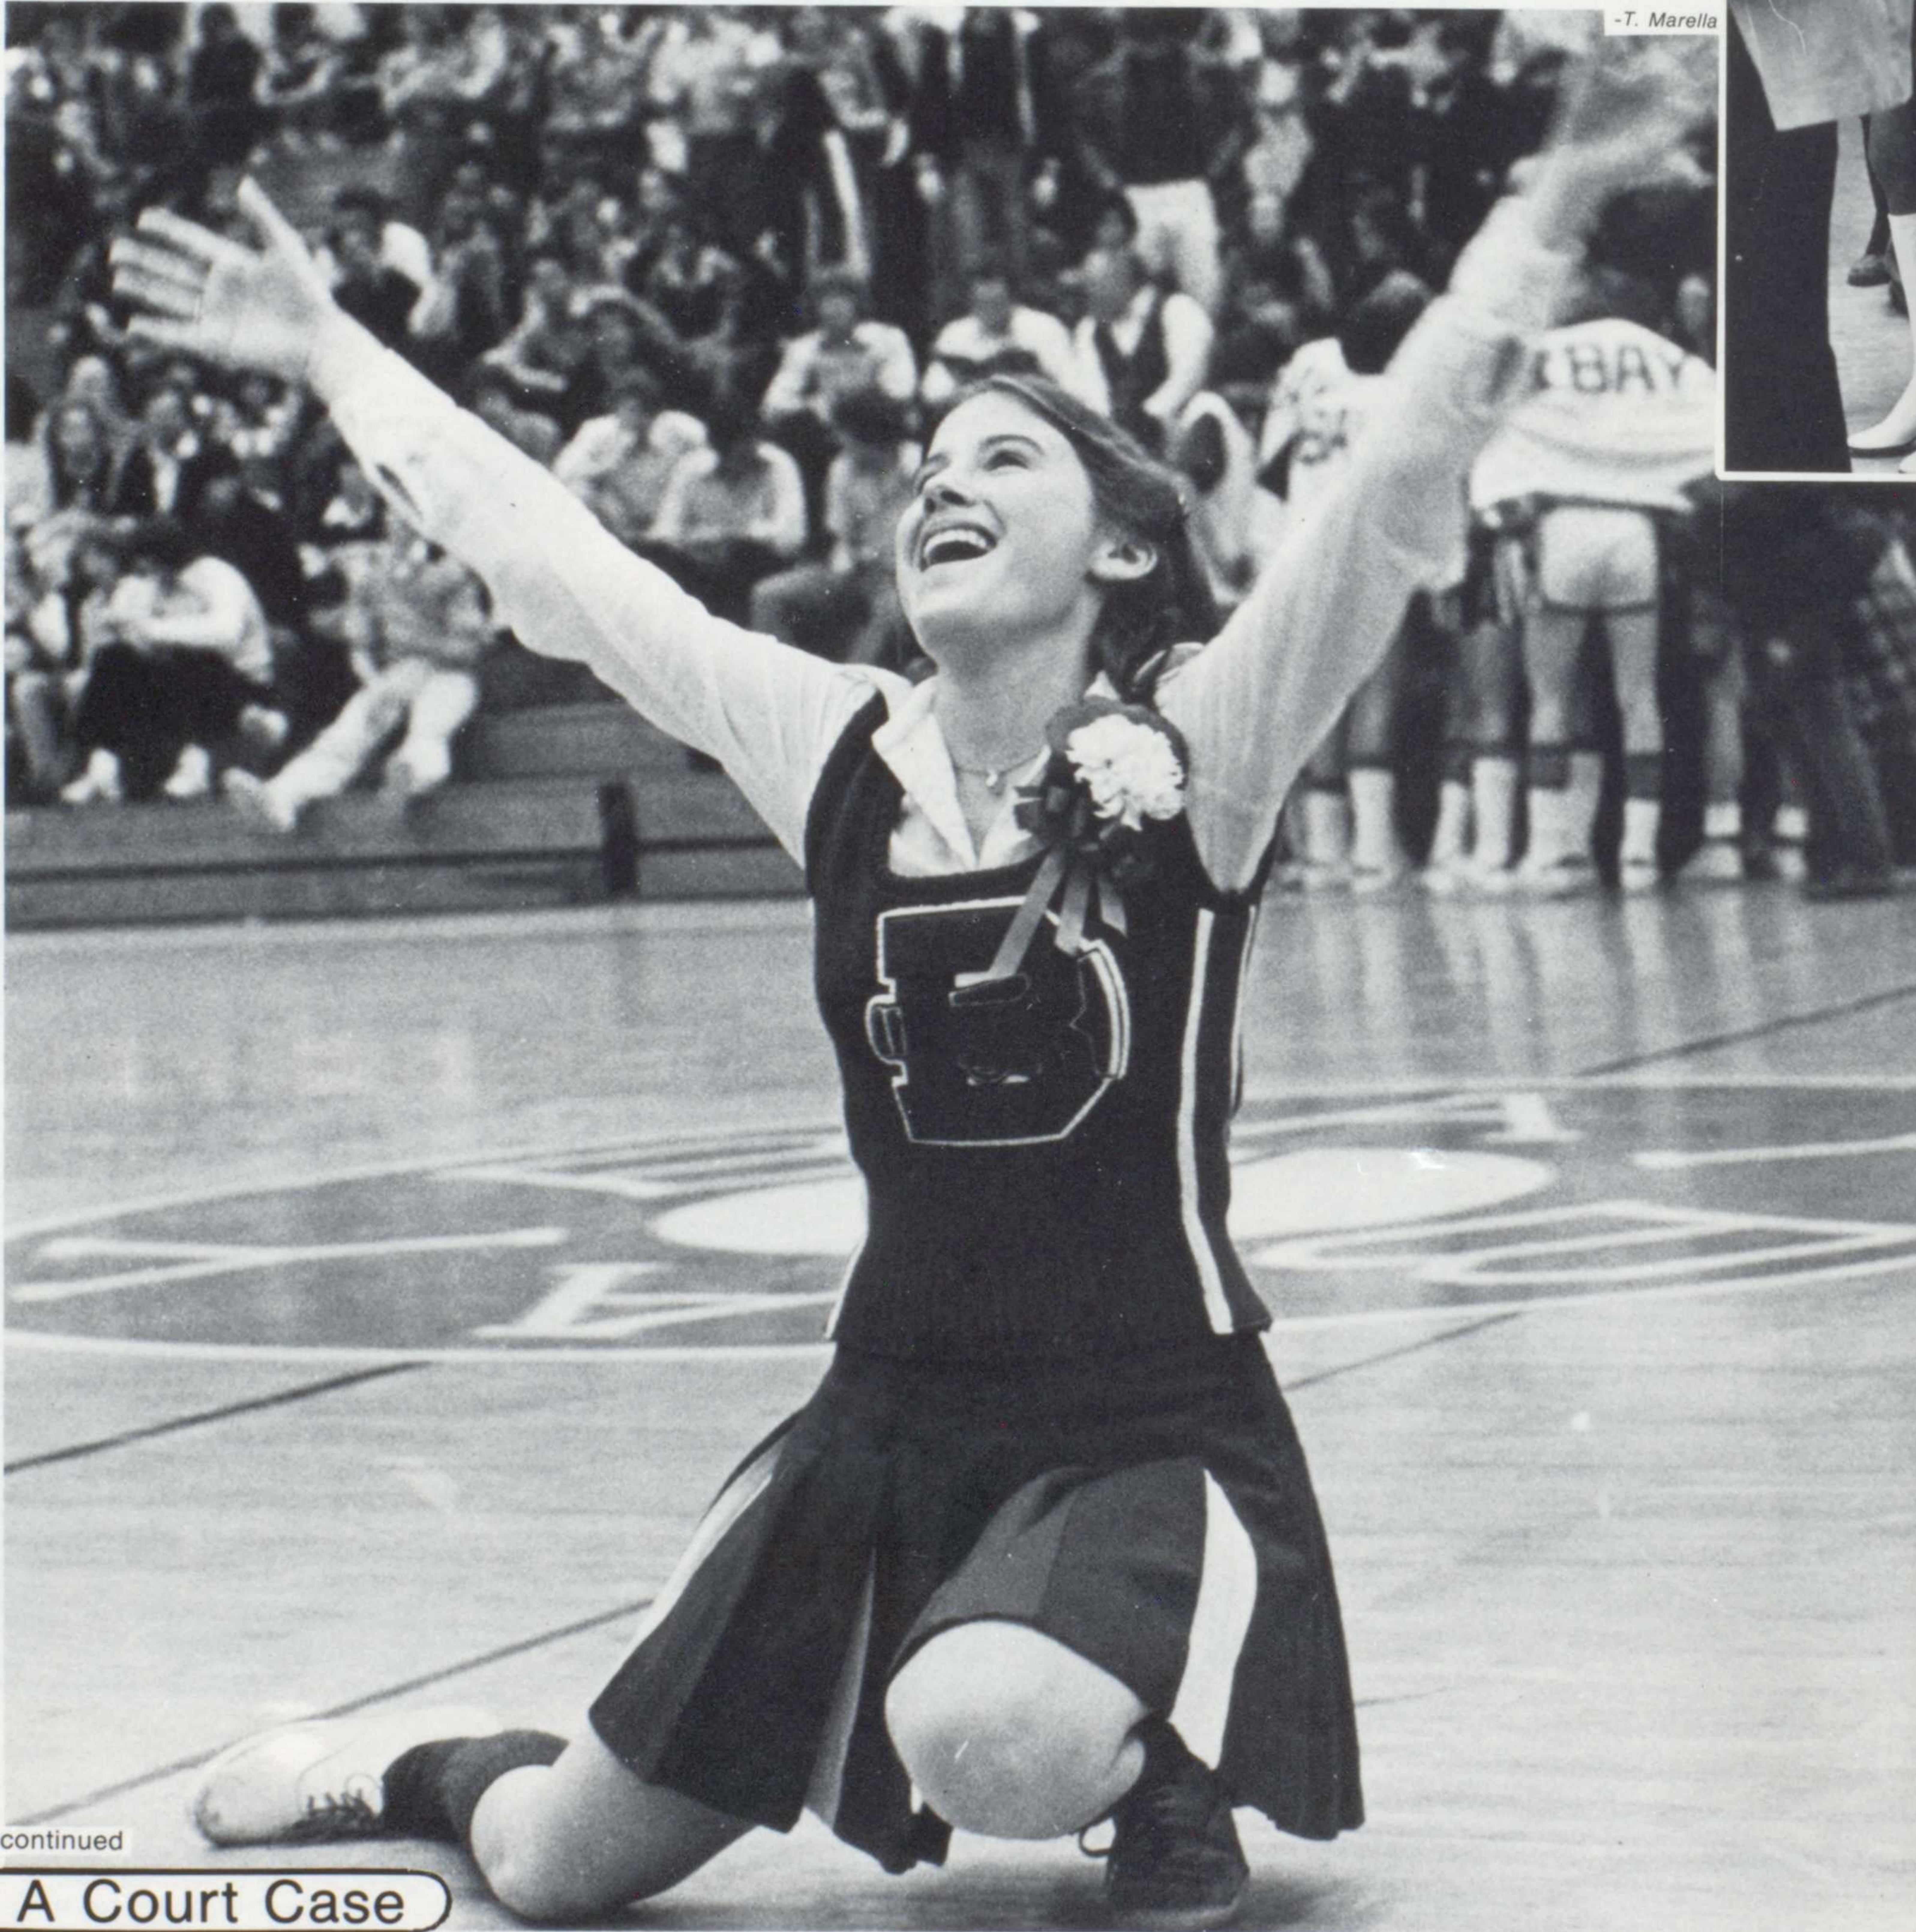

down season

**"Turn the Beat Around"**, arranged by Mr. Pendergrass, became a half-time favorite of the thirty or so members of the pep band.

continued

### A Court Case

**At the end of the first quarter**, Rockette Chris Terry gets ready for the half-time show. Senior Rockettes received flowers from the juniors at the last game.

**"Hey all you Rocket fans,"** a favorite cheer, gets J.V. cheerleaders Jean House, Leslie Welsh, and Anne Kortan involved with the fans during a time out.

-B. Calmus

## Entertainment fills the half-time gap

As the half-time buzzer sounds and the players leave the courts, there is a mad rush of fans to the restrooms and popcorn machine. Aside from these physical reliefs, the half-time break gives the fans a chance to relax from the tensions of the game.

The cheerleaders, Rockettes and the pep band all perform to the delight of the remaining fans. The entertainments have a feeling of warmth and closeness that is lacking during the football season.

The pep band's music at basketball games is relaxed and casual. No official uniforms are worn by the players, although many wear their marching band T-shirts. Their music ranges from popular songs to background for the Rockettes. "Pep band is fun because we're closer to the fans. I think we should be able to play at other winter sports events, too," senior Jim Calhoun said.

**After the Rockettes'** last performance, Chris Terry and Cathi Budlong discuss the good and bad points of the show with Cathi's parents.

**To help team member Stan Walker** land a free throw, Senior Jodee Janda encourages him with her cheer "Sink It."

-J. Heiser

-J. Heiser

-J. Heiser

-J. Heiser

**With hands raised**, Rockettes Denise Casey, Rose Prosek, and Janet Durfey, finish their second performance. Rose Prosek choreographed the routine, "The Theme from Rocky."

**With a smile on her face**, Betsy Lahey shows her spunk in the cheer "Rock River!" Unfortunately, Bay lost the game by one point in overtime.

While Tom Munson shoots a free throw, Lisa Pickup, Karen Sandstrom, and Marilyn Post wait to record his score. The stats sponsored a G98 disco dance to pay for their shirts and locker decorations.

-J. Heiser

## Behind-the-lines action supports team

As the weather grew colder, the Rockettes were glad to move inside. They found the experience of performing in the gym quite a change. Junior Shellie Buckholz explained, "We're in closer contact with people; we're performing *with* them more than *for* them." Jane Mowery agreed. "You can actually see faces, and that made me a little nervous."

The cheerleaders boosted spirit not only at half-time but during the game as well. This was the time that all their grueling practices really paid off. "We're so close to the fans that we can't get away with even a little mistake because they'll know," varsity cheerleader Lisa Thill stated. Leslie Welch commented, "I enjoyed the

basketball season because we were so close to the guys."

Behind the scenes, the stats played an important part in the smooth running of the games. Throughout the winter, they could be recognized by the blue and white shirts they wore on game days. Each girl kept records of one player and compiled a scrapbook of newspaper clippings. Sophomore Marty Duesing explained, "The books are fun to keep, but finding information is sometimes a real problem."

Why did so many students give their time during the basketball season? Pep band member Dave Messina chuckled, "I got into the games free." ■

-J. Heiser

"Boogie Blues," performed by Rockettes Kim Priest, Judy Tarbert, and Kerry Koehler, began the Rockettes half-time performance. Thirty Rockettes perform with 3 as alternates.

-B. Calmus

-J. Heiser

At the last game of the season, the J.V. cheerleaders cheered their team to a 57-38 victory against Rocky River.

After performing "The Theme from Rocky" the Rockettes begin to exit. The routine included a four point star and chain kicks.

continued

## A Court Case

After cheering for the J.V. basketball game, Ann Kortan and Robin Santo help the varsity cheerleaders boost the team.

As the score tightens, Julie Schumm, Peggy Marquardt, and Lisa Hellebrekers wait for a time-out. The wrestling and basketball cheerleaders combined for the last game.

-J. Heiser

-J. Heiser

**“B** ut I did meet him. Nobody ever believes me when I tell them I really met Sigmund Freud,” said Carla Horan, and I breathed a sign of relief as the second scene got under way. We had all been skeptical about Carla reaching her spot because she had a difficult costume change, but everything went smoothly, or so I had thought. Only later did I find out that Carla had tripped and fallen off the stage, badly cutting and bruising her forearm. Somehow she managed to get up and be ready when the lights rose.

## “Bad Seed” sprouts into blooming performance

Similar incidents characterized the entire casting, rehearsing, and staging of “The Bad Seed”, a drama by Maxwell Anderson. From the outset problems beset both the cast and the crew.

The largest obstacle was getting people to take us seriously. The school was skeptical when they learned that we were attempting a real honest-to-goodness murder-mystery drama.

Lesser problems also faced us; they included a lack of graying spray to make John Davis look

old, a lack of sound from Dennis Pontius two days prior to the show (due to laryngitis), a lack of make-up personnel the second show, a lack of water in Darin Bell’s janitor bucket the first show, and a lack of an audience Saturday.

Against these odds, the efficient work of a great crew, and the iron will of our closely knit cast somehow managed to overcome all these problems.

Dennis’ laryngitis healed; Cathy Budlong in pigtails and bobby socks looked fiendishly childish; John Davis looked old using powder; and Darin found water for his bucket the second night. The way everything went, we’re lucky we didn’t really break a leg.

—Chip Nilges

While Debble Dawson looks on, Carla Horan dotes over Cathy Budlong. Carla’s part required that she wear the most tasteless clothes she could find.

—B. Calmus

—S. Ormsby

While working on the setting, the stage crew paints the chimney, a replica of a Williamsburg chimney donated to Thespians by Scott Johnson’s father.

# IN THE SPOTLIGHT

**Because she knows** that Cathy Budlong inherited her evil ways from her, Debbie Dawson decides she must kill them both. She gave Cathy pills, and tries to put her to sleep before she kills herself.

—B. Calmus

—S. Ormsby

—B. Calmus

—B. Calmus

**Due to lack of make-up personnel** Saturday night, Laura McFarland had to apply Chip Nilges' make-up, a water base type instead of the traditional grease paint.

**Teacher at Rhoda Penmark's school**, Liz Catone relates the murder to Debbie Dawson and explains that she suspected that Rhoda had something to do with it.

**When Cathy Budlong confesses**, Debbie Dawson realizes that she has a murderer for a daughter. Cathy killed two people during the play.

As the bell for the beginning

## OVERTURE: Musicians climb up the scales

of the period rings, there is a mad rush to get instruments out and assembled, and to grab a stand that doesn't wiggle. A typical band scene like this can be seen fifth, seventh, or eighth periods in the bandroom at the far end of the gym corridor.

Varsity Band is a new and different experience for most of its freshmen members. Since many of the freshmen are in the marching band, their practices don't officially start until the end of November. The marching band director, Mr. Day, is also the Varsity Band director, and he is quite popular with all the students.

"He knows how to direct well," Olivia Dorsey said. "He's not too strict, but you can't take advantage of him."

The group played two concerts during the year, and also competed at the district band contest, playing such songs as "Devonshire" and "Irish Suite." Many of the songs we play introduce us to new techniques, so we're learning a lot," Marsha Hunt explained.

Concert Band, as its name implies, is an independent concert performing organization. Composed

mainly of sophomores, they practice to prepare for their two concerts. "The small size of the band limits the choice of music, but Mr. Pendergrass does a good job with what we have," sophomore Jim Fielden explained. Concert Band also participated in the district band contest, playing songs such as "Colorburst" and "The Theme from the Tony Randall Show."

The Stage Band has enjoyed a surge of popularity and are now in the process of expanding. They played various types of jazz and rock music throughout the year, and performed at the varsity show with the marching band. They then proceeded to play at a company party, a basketball game, and the Cuyahoga County Hospital. "Our playing was a nice Christmas present for the patients," junior Jeff Tiefermann explained, "and they really seemed to enjoy the music." Besides performing, the band members also learn the basics of improvisation.

"We've really been able to work together as a team this year. No one in the band overpowers all the rest of the players," Chris Sommer stated.

The bell to end the period rings, and again there is a flurry of activity as musicians hurry to put away their instruments and folders, and then jog the entire length of the building to reach their next class on time.

"Blues for Alfie" and "Ticker" bring out the best of saxophonists Scott Borgeson, Kent Arkes, and Scott Cowan.

-J. Heiser

-J. Heiser

Fifth period every day the bass clarinets come out of their cases for Marty Duesing and Johnna Litschko. They work on their hard passages in one of the practice rooms.

# IN THE SPOTLIGHT

continued

"Rompln Stompln," a slow jazz tune, comes alive with the help of trombonists John Dombey, Bob Young, and Doug Crowe. Stage Band members also play waltzes and rock.

"Colorburst" comes forth from tubas weighing approximately twenty pounds. Andrea Koch and Bob Popernack prepare for the band's contest in February.

-J. Heiser

-J. Heiser

-J. Heiser

While Jeff Ziegler beats on an A# timpani, Mr. Day listens for any intonation problems common to this type of drum.

To tune up her flute, Pam Senko plays a C into "the black box," and adjusts her instrument until she gets the tone just right.

"One, two, ready . . ., by the way, did I ever tell you about the background of this piece?" Thus starts a typical rehearsal of the Orchestra or Symphonic Band. Frank Pendergrass, who directs both groups, has a habit of remembering something important just as he is about to give the downbeat to start a song.

Bay High's Orchestra has finally grown up. "We now have a complete orchestra and are playing more challenging music," Liz Jones

## REPRISE: Four beats to the top

explained. Pieces such as a Sibelius symphony, a Bach fugue, and one of Dvorak's Slavonic dances were included in their repertoire.

In November, the Orchestra was host to the Northwest Ohio Regional Orchestra and three of the top players also went on to the All-State Orchestra in February. "Being chosen for All-State was really a great honor," sophomore Sue Kier stated.

The orchestra played two concerts, one after Christmas and one in the spring, and competed in class "A" at the State Orchestra Concert in February.

Symphonic Band, one of the largest music groups in BHS, is composed of the best musicians in the school. In August, several of the players participated in the Ohio State Fair Band in Columbus.

After returning to school, they started practicing for their season of performances. Pieces such as "Joyance" and "Terpsemetrics" rounded out their concerts, although they required many hours of concentrated practice. "It's good preparation for college work," Betsy Nagy explained.

Linda Yoo summed up the band experience. "Even though the music is challenging, Mr. Pendergrass is a good director," she said. "We do a lot of work and we have fun in the process."

**One of the two** baritone players in the Symphonic band, Pam Baker sits first chair and has her own baritone.

**Although he mans** the only stringed instrument in the Symphonic Band, B.G. Bartolotta's contribution on the base sometimes replaces the tuba section.

-J. Heiser

-J. Heiser

# IN THE SPOTLIGHT

With three grades represented, sophomore Don Wolf, junior Tom Reynolds, and senior Tracy Marlier sometimes have third trumpet solo passages.

-J. Heiser

Seated at the east side of the band room, the second clarinet section, the Linda Yoo, Ginny Rush, Bruce Bacher, and Andrea Boyd play harmony with the firsts.

-J. Heiser

-J. Heiser

Violins and violas make up the first row of the Orchestra. About to downbow, the heads of their respective sections follow Bach's Fugue in G minor.

-J. Heiser

In order to reach the correct pitch, sophomore Jim Fielden must place his hand in different positions in the bell of his French horn.

# ENTR' ACTE:

## Getting ready for the big time

Upperclassmen beware! The freshmen and sophomores are going strong when it comes to their vocal chords and singing ability.

The Freshmen Choir, as its name implies, is made up entirely of ninth graders. The thirty members meet each day during eighth period, not only to prepare for concerts, but also to learn the basic principles of music. "We learn counting and rhythm, and also gain self-confidence by singing individually," explained Sue Steward.

The group performed at the Christmas Concert and again in the spring. Some of the students also sang at the Solo and Ensemble Contest in March. "The concerts and the contests make it worthwhile to be in choir," Amy Hessian said. "I've really enjoyed it and plan to continue in a choir until I graduate."

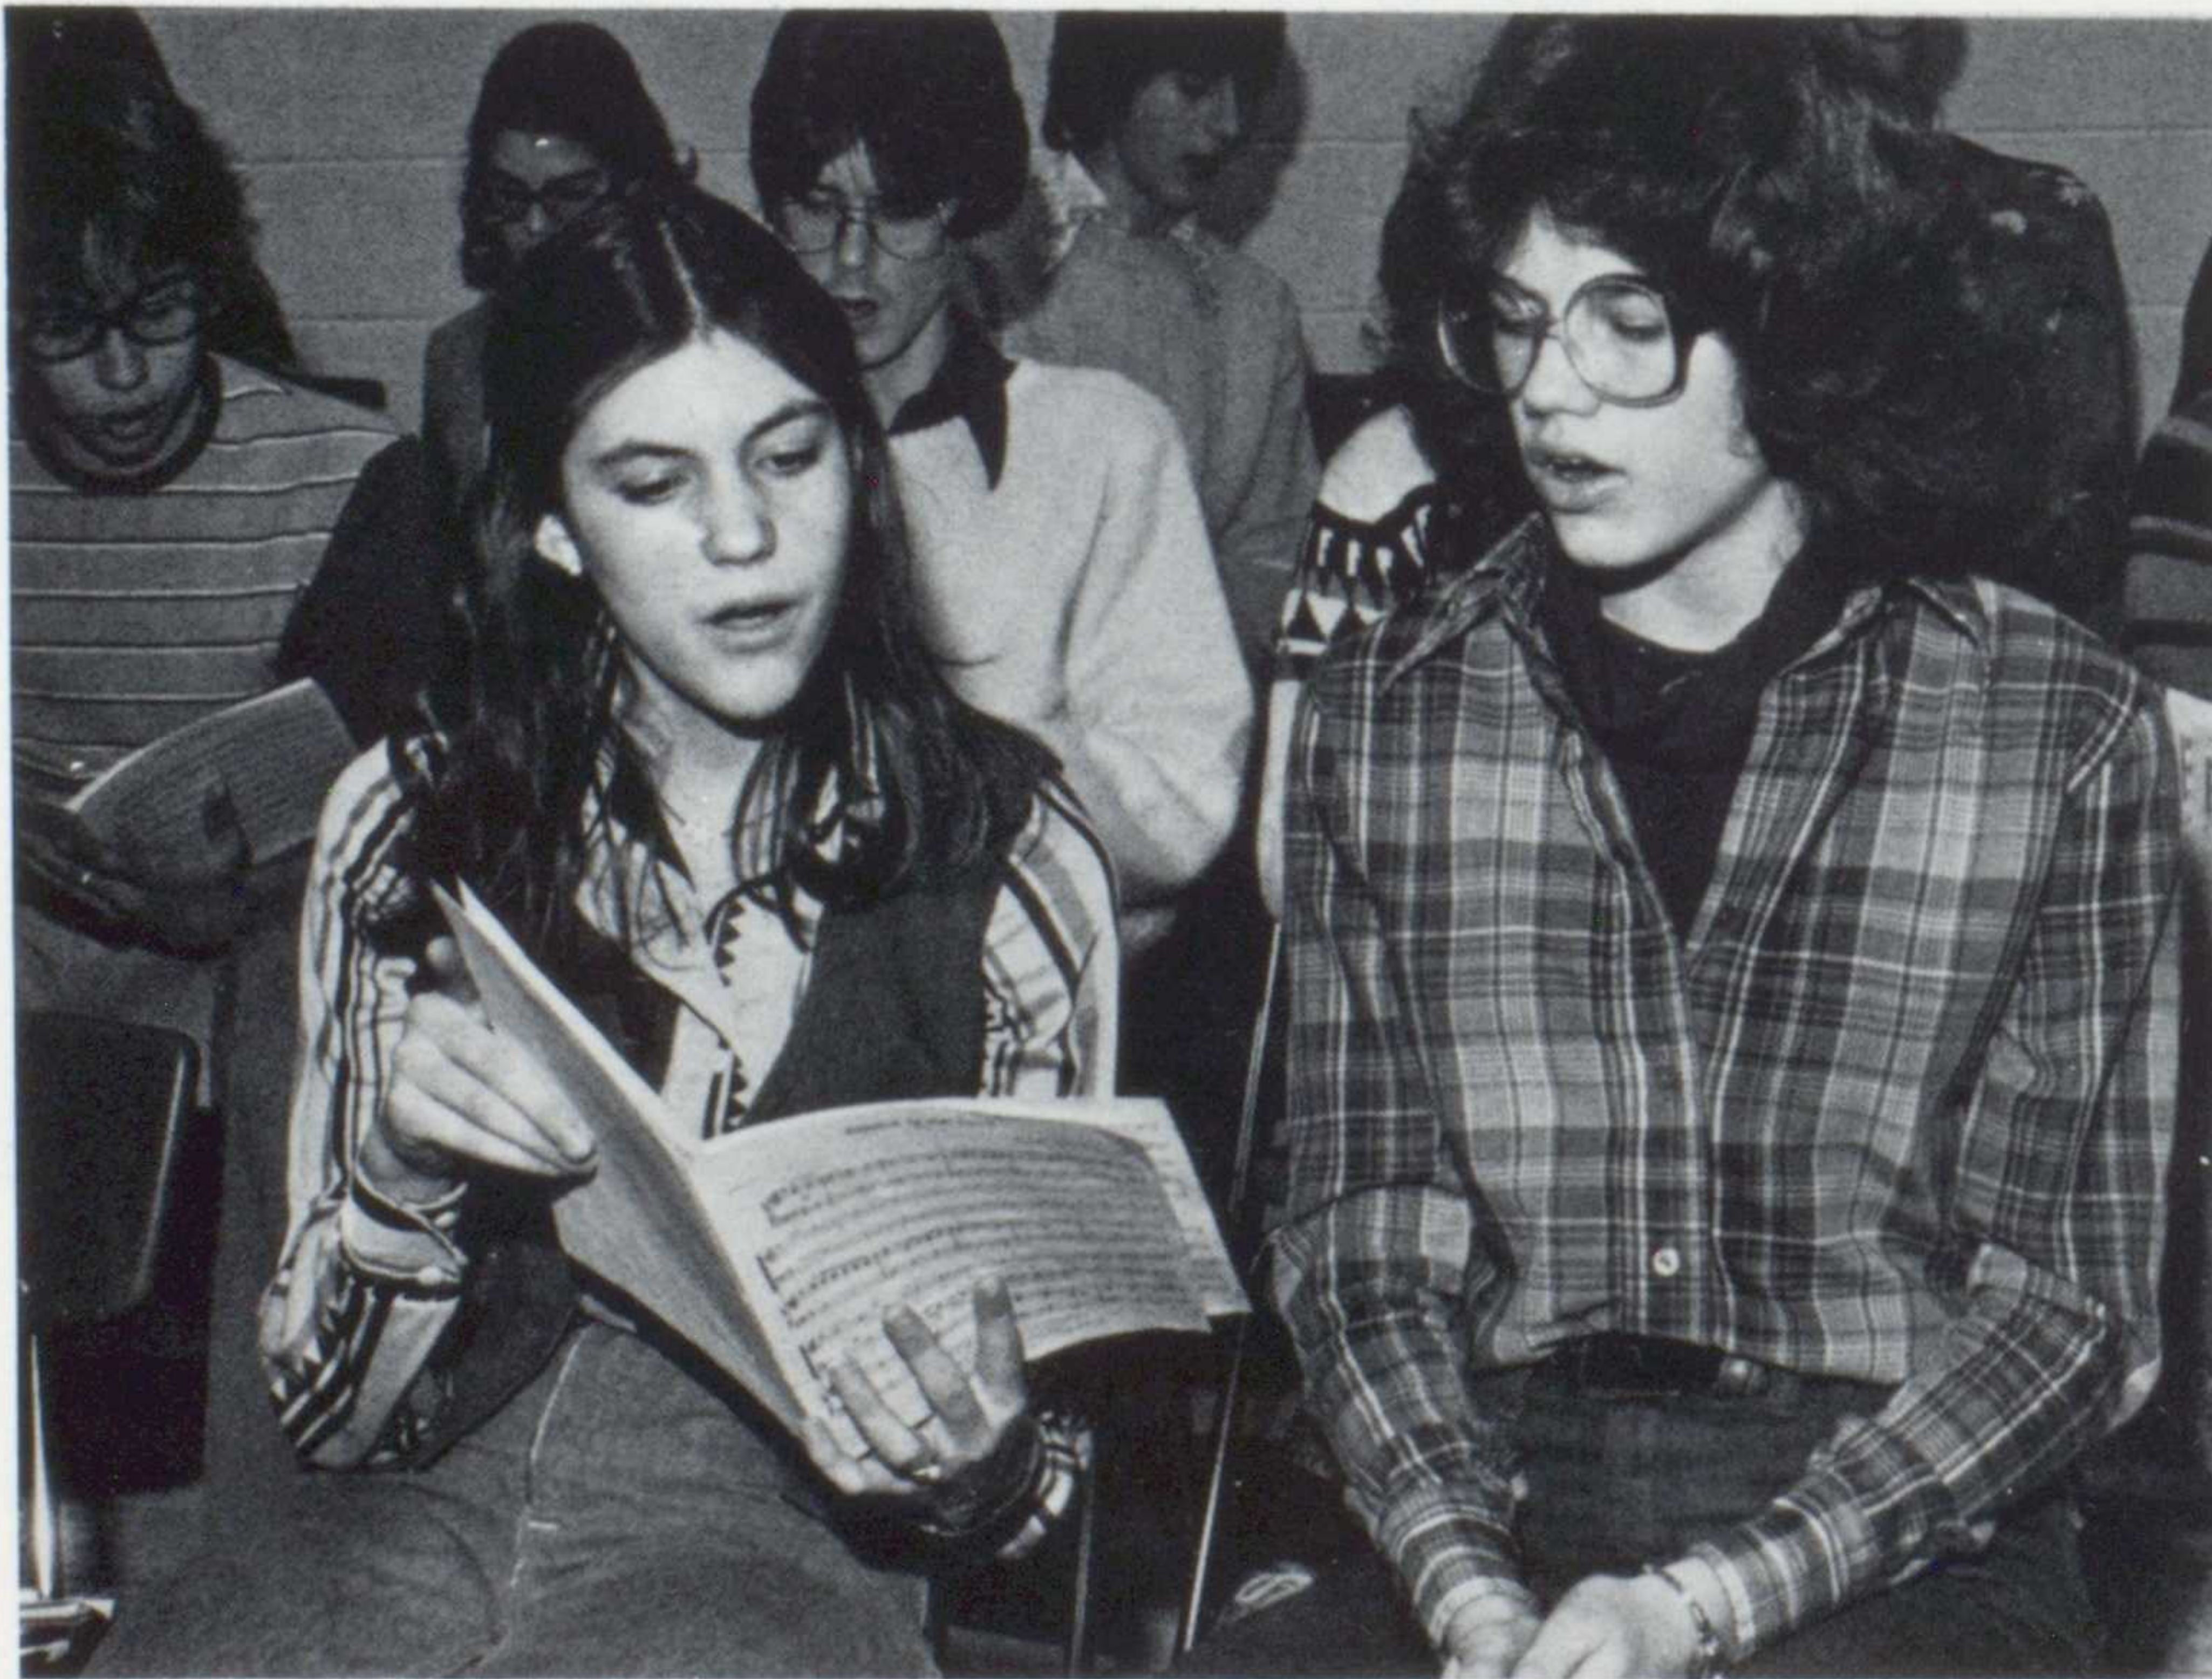

During first period, while many

students are still home in bed, the Girls' Glee Club is already up and singing. The period starts out with warmups such as scales or rhythms. Next, they practice such songs as "Snow Legend" or a medley of carols in preparation for a performance. "Mr. Crews knows what he's doing, and he makes us work," Judy Schwing explained.

They also sang at two concerts and the Solo and Ensemble Contest. Diane Veres explained how she felt about the group. "Glee Club involves hard work, but it's well worth the time and effort you put into it."

In the next couple of years, all this effort will have paid off, and the students will have a well-deserved place holding a candle on the choir Christmas tree.

**Eighth period each day** finds the girls and guys of the Freshmen Choir hard at work. Nancy Schumm and Denise Bailey anticipate the upcoming notes.

-J. Heiser

-J. Heiser

**Before singing**, the Girls' Glee Club look over their music. Reading through their scores, Sue Grimes, Sue Eland, and Beth Charles try and work out the kinks.

Warmups with scales and rhythms get the Girls' Glee Club going each morning first period. Mr. Crews expects the best from all, despite the early hour.

-J. Heiser

While singing "Rejoice to the Lord", Jennifer Shy and Olivia Dorsey look at a score. Sharing becomes a necessity for the Freshmen Choir of thirty members.

-J. Heiser

-J. Heiser

Decked in their very best, the Girls' Glee Club perform at the Choir's Christmas Concert. They sang such numbers as "Four Carols" and "Maria Walks Amid The Thorn," while Mr. Crews directed.

# IN THE SPOTLIGHT

continued

It takes hard work to get a piece right. Shannon Wyatt concentrates on a score required for contest titled "A Fable."

-J. Heiser

## FINALE: Single notes together become a melody

"Dah, mey nee poh too la bay . . ." Now say this three times fast. This is one drill the choir goes through to better their diction. Other practice techniques include singing scales and running around the choir room.

Mr. Crews uses many techniques to grab the singer's attention and get his point across. When the choir sings flat, he pulls his hair, giving the illusion of reaching up. Relaxing while singing brings out the best in singers, and he illustrates this by dislocating his jaw and swinging it about. And if the choir is too loud, Mr. Crews puts his fingers to his mouth and lets out a shrill whistle.

Choir develops friendships as well as voices. Donna Shore says, "I depend on my next door neighbor. She's more experienced. If I do something wrong, it's nice to have her help me." The Choraleers also feel this way. Leah Neel states, "I've made a quality friendship with every choraleer."

Eighteen of the best voices from the choir form the Choraleers. They competed for the spots last

spring by singing scales, songs, and reading music. One morning, about a week after competition, each member was dragged from their beds to surprise breakfast celebration.

Tramping door to door, the choir collected empty bottles, and collected nearly \$3000.00. With their treasury, the choir sponsored the bluegrass band "Buckeye Biscuit."

Combined, the Choraleers and the Choir performed an annual Christmas Concert. The concert was a success with full houses both December 20 and 21. The finale of the show was "The Song of Christmas" in which the choir performed as a singing Christmas tree.

". . . pa too la bay—I think I've got it."

**Choraleer Amy Fritz** performed "White Christmas," a tribute to the late Bing Crosby at the request of choral director Mr. Crews.

-J. Heiser

Each and every morning at 7:20, Diane Vogel, Barb Hess, Tracy Marlier, and Amy Fritz, members of the choraleers, meet to practice.

-J. Heiser

In October, the choir held its annual bottle drive. Kurt Zillmann sorts and stacks the bottles and that night kept lookout for possible looters.

-S. Teschner

While Mr. Crews directs, the Choraleers sing during the Christmas Concert. The girls perform in long blue skirts and blouses which they made and the guys in tuxedos owned by the choir.

-J. Heiser

-J. Heiser

Band director, Mr. Day, narrates "The Song of Christmas" for the Choir's traditional Christmas tree. A white cross lit up the middle, while multicolored candles surrounded it.

# IN THE SPOTLIGHT

# IN THE SPOTLIGHT

continued

Much to her mother's dismay, Linda is having an affair with a married man. Bobby has fallen hook, line, and sinker for Sam, and a despondent Kaye is contemplating suicide. Sound like 'One Life to Live' or 'General Hospital'? Not exactly, just a brief background on the lives of a few of the 18 girls who live at the Footlights Club, the setting for the spring play *Stage Door*. The production was performed March 17th and 18th.

The leading roles were played by senior Laura McFarland as Terry Randall, Carla Horan as Jean Maitland, and junior Doug Crowe as David Kingsly. Terry is a down-to-earth actress who has the ability to get ahead, but never does. Laura commented on her part, "The more I played the part of Terry the more I felt she was like me. I hope I end up like her in a few years."

Terry is hopelessly in love with Keith Burgess, who uses her

-B. Hurst

## 'Stage Door' opens up to both old and new talents

abilities to profit himself. Jean Maitland is a lousy actress who makes it big in Hollywood by her good looks. All three of their lives are complicated by their unique acquaintances, which include a zany housemother, an unfulfilled pianist, and an oversexed man-hater, among others.

The script called for a cast of 32, which gave underclassmen a chance to try their hand at acting. Many new faces, especially freshmen, appeared on the stage. Miss Marilyn Frazier, director of the play, commented, "I think the freshman class is one of the most challenging and talented classes I have ever worked with. I hope they all continue in the theater."

Because of the school's energy conservation program, rehearsals in the auditorium were a chilly affair. Everyone donned coats, hats, mufflers, and mittens in the 40° room and shivered through their lines every day for weeks. Nearly every cast member was bitten by the flu bug sometime during rehearsals, and full-cast practices were almost non-existent.

In spite of the cold and flu miseries everyone had to suffer through, the cast gave a heart-warming performance. And the audience, in winter coats and galoshes, enjoyed every minute. And so the stage door closes on another spring play.

**Nearly sixty students** tried out for *Stage Door* on February first, including freshman Karen Anderson and junior Doug Crowe. Both made the play.

-J. Heiser

**Decked out** for an evening on the town, Patti Kennedy and her blind date John Davis lead a somewhat reluctant Kristy Janda and Chris Gillespie out the door.

**Old friends together again,** Doug Crowe and Debbie Shinn reminisce about the stage in the old days when she acted and he worked in the stockroom.

# Successful Matches Spark Spikers

We had a big game the next day and wanted people to be aware of that, so we had a breakfast in the cafeteria. We also painted our own signs and decorated each others' lockers.

We practiced often and had matches. This may seem typical, but there were some things that made the year special. Christy Bologna, an exchange student, made the team. At this time, we tried to put together some new rotations. We soon realized that one of our players didn't have the foggiest idea of what we were doing, so we worked out pantomimes for different moves.

Overall, we had a winning season in more ways than one.

-Joan Hammer

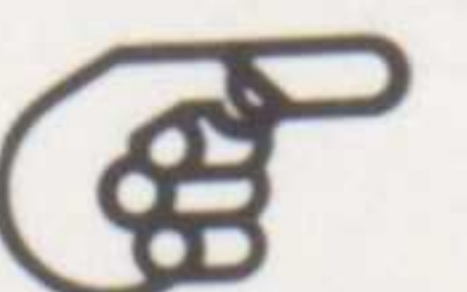

We used a lot of tape. Before each practice and each game, more than half the team had their thumbs, wrists, or ankles wrapped.

After the taping, we psyched ourselves up for the game. One way we did this was by putting our mascot, a little mechanical woodstock, on the floor. We wound him up, and he wound us up before the games and during time-outs.

In addition, one member had her own way to make sure we won. To ensure our victory, Cheryl Reddish sat on the right side of the bus during the ride to the away games. Her quirkish superstition worked every time except once.

Our winning season made me really proud to be on the team.

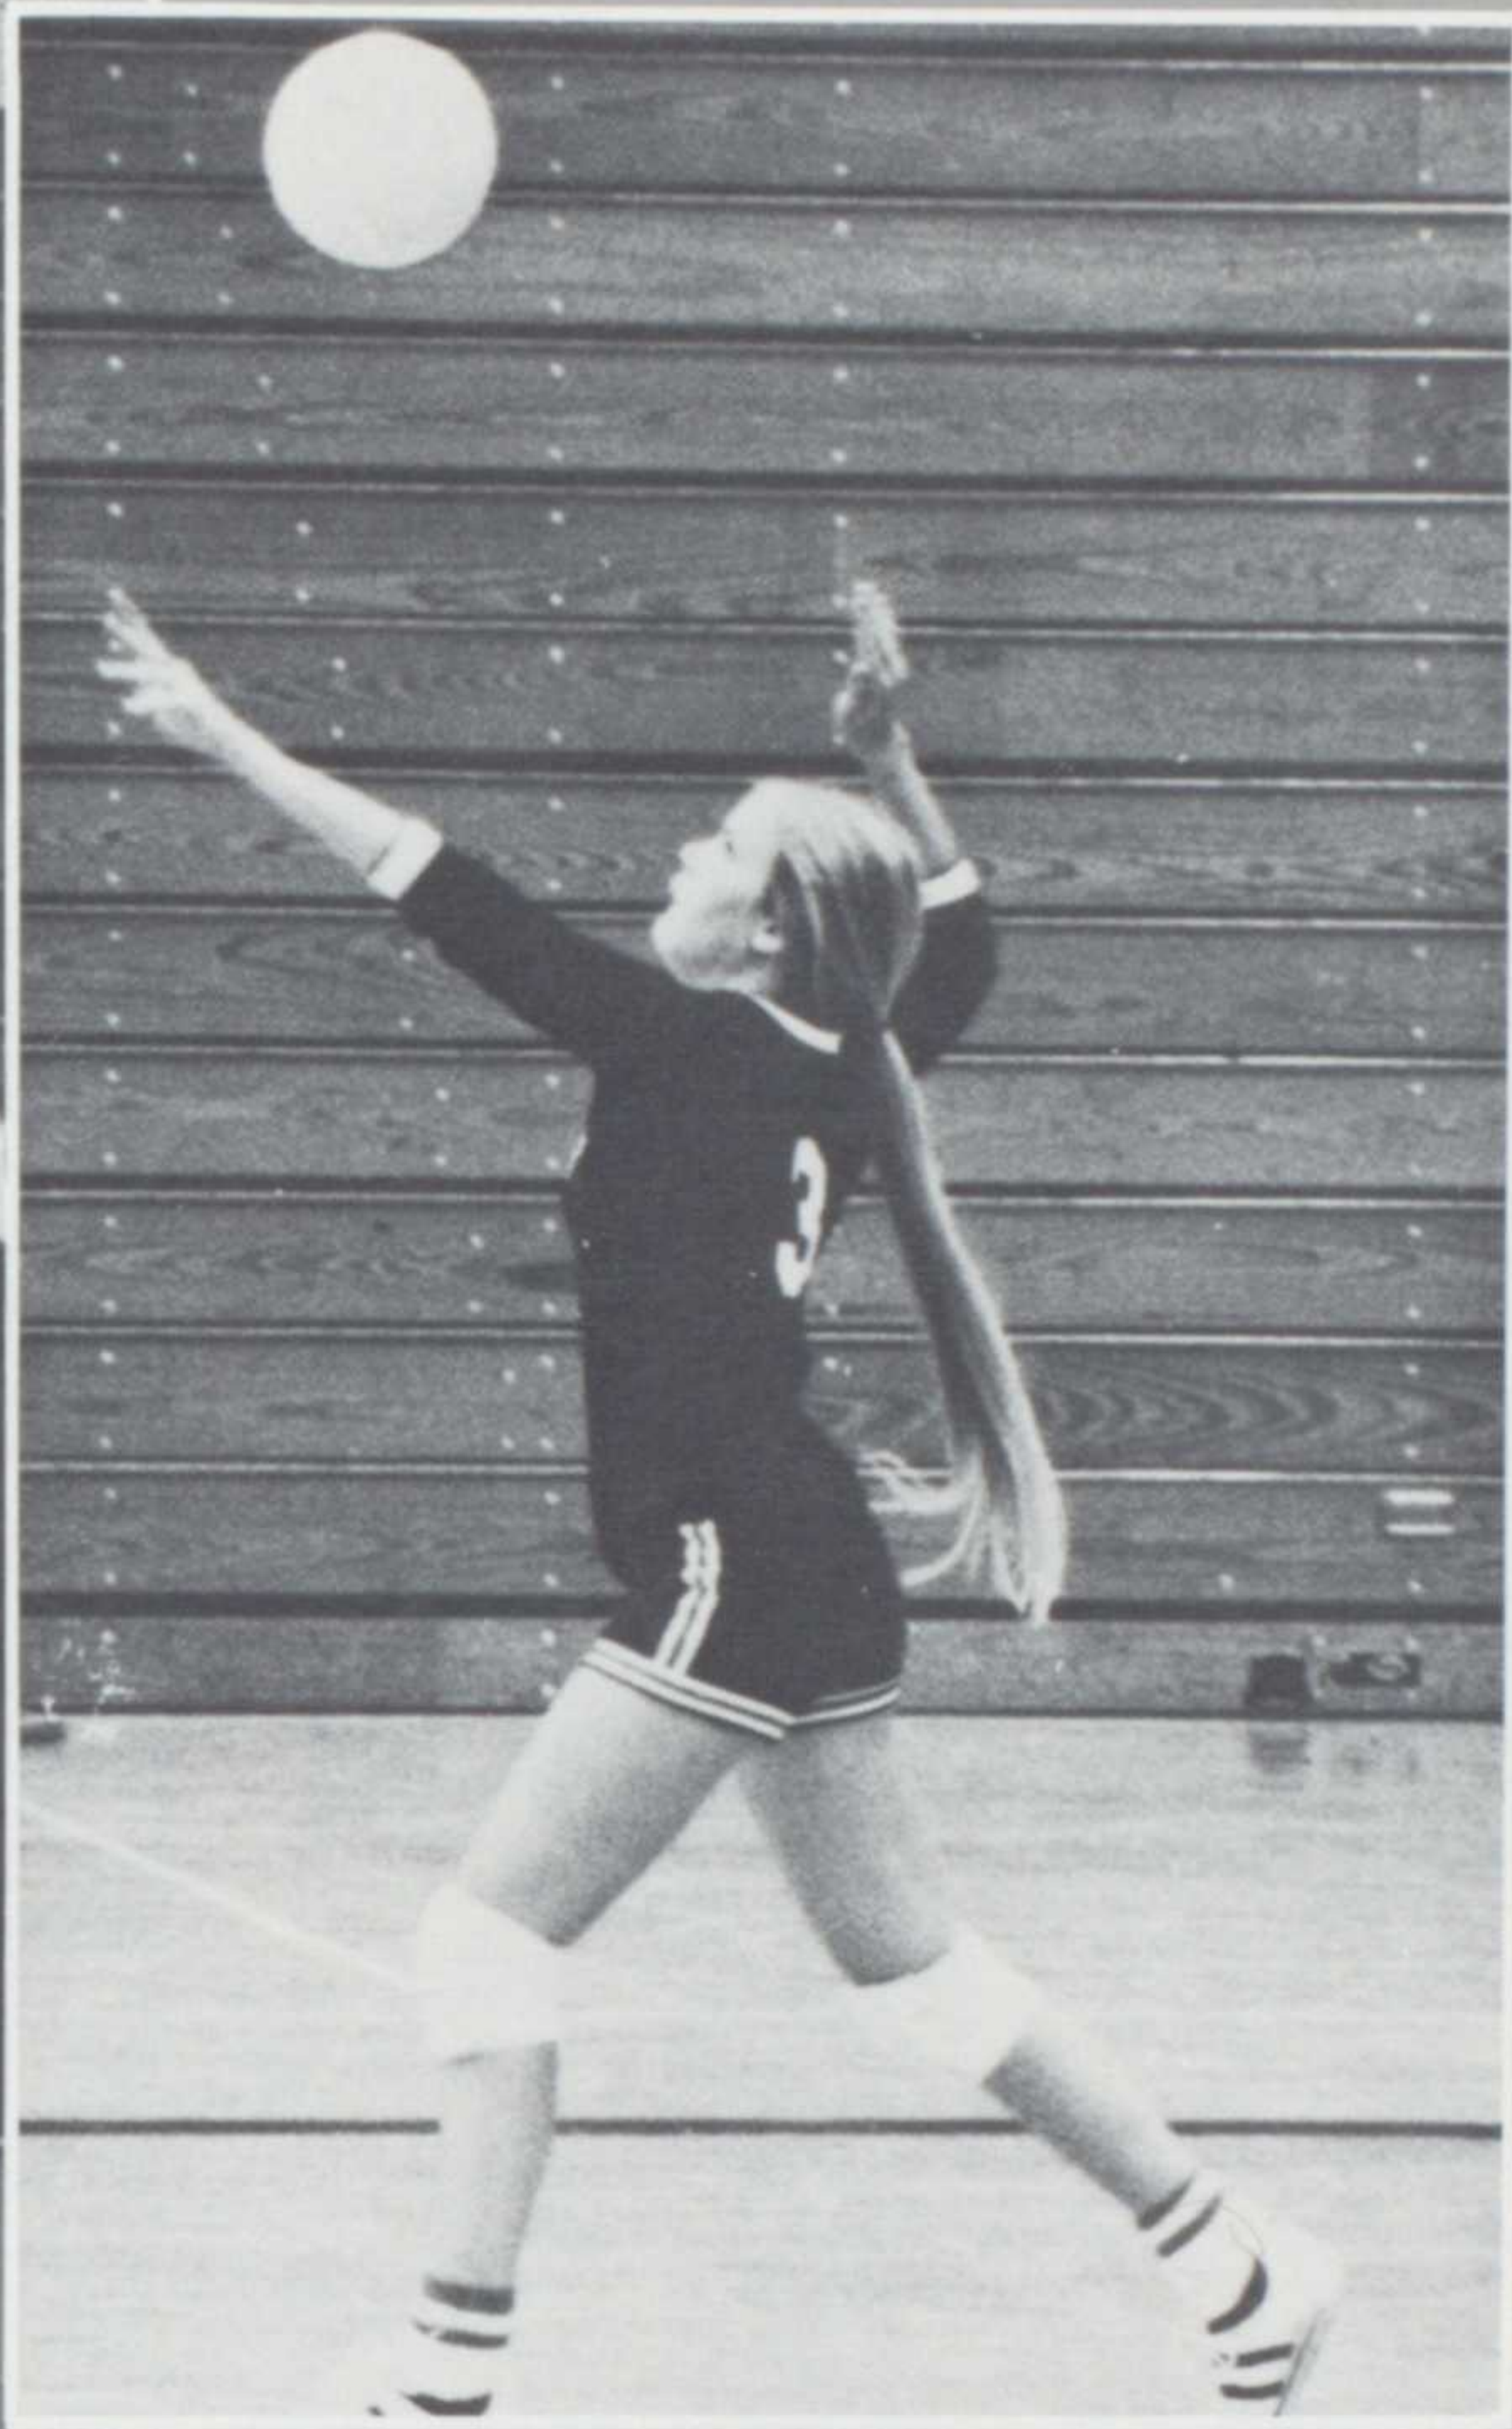

-Kathy Barker

-D. Khyrn

-D. Khyrn

For the tying point, Karen Anderson uses the powerful open hand serve against Avon Lake.

# Gymnasts tumble over perfect season

There was an abundance of enthusiasm tumbling around the gymnastics team, especially before meets. On those occasions, the gymnasts gorged themselves on oranges, peanuts, raisins, and orange juice to gain quick energy. They also listened to their favorite albums to "psych" themselves up for coming meets. Obviously, their strategies worked. They had a perfect 14-0 season.

In the four years of the team's existence, they have become progressively better. With six returning letterpersons and seven new members, the '77-'78 edition took the SWC crown for the second year in a row.

On top of that, the Northeastern District title fell when Bay took the title with a score of 203.8. Sue Mercurio, Katie Greaser, Lindsey Yount, and Gail Nolte all finished in the top twelve, qualifying them for state.

Closeness and dedication were the reasons for the team's overall success. "There was spirit and unity within the team," explained Lindsey Yount. Sue Mercurio agreed in saying "We all worked hard together to make a winning team."

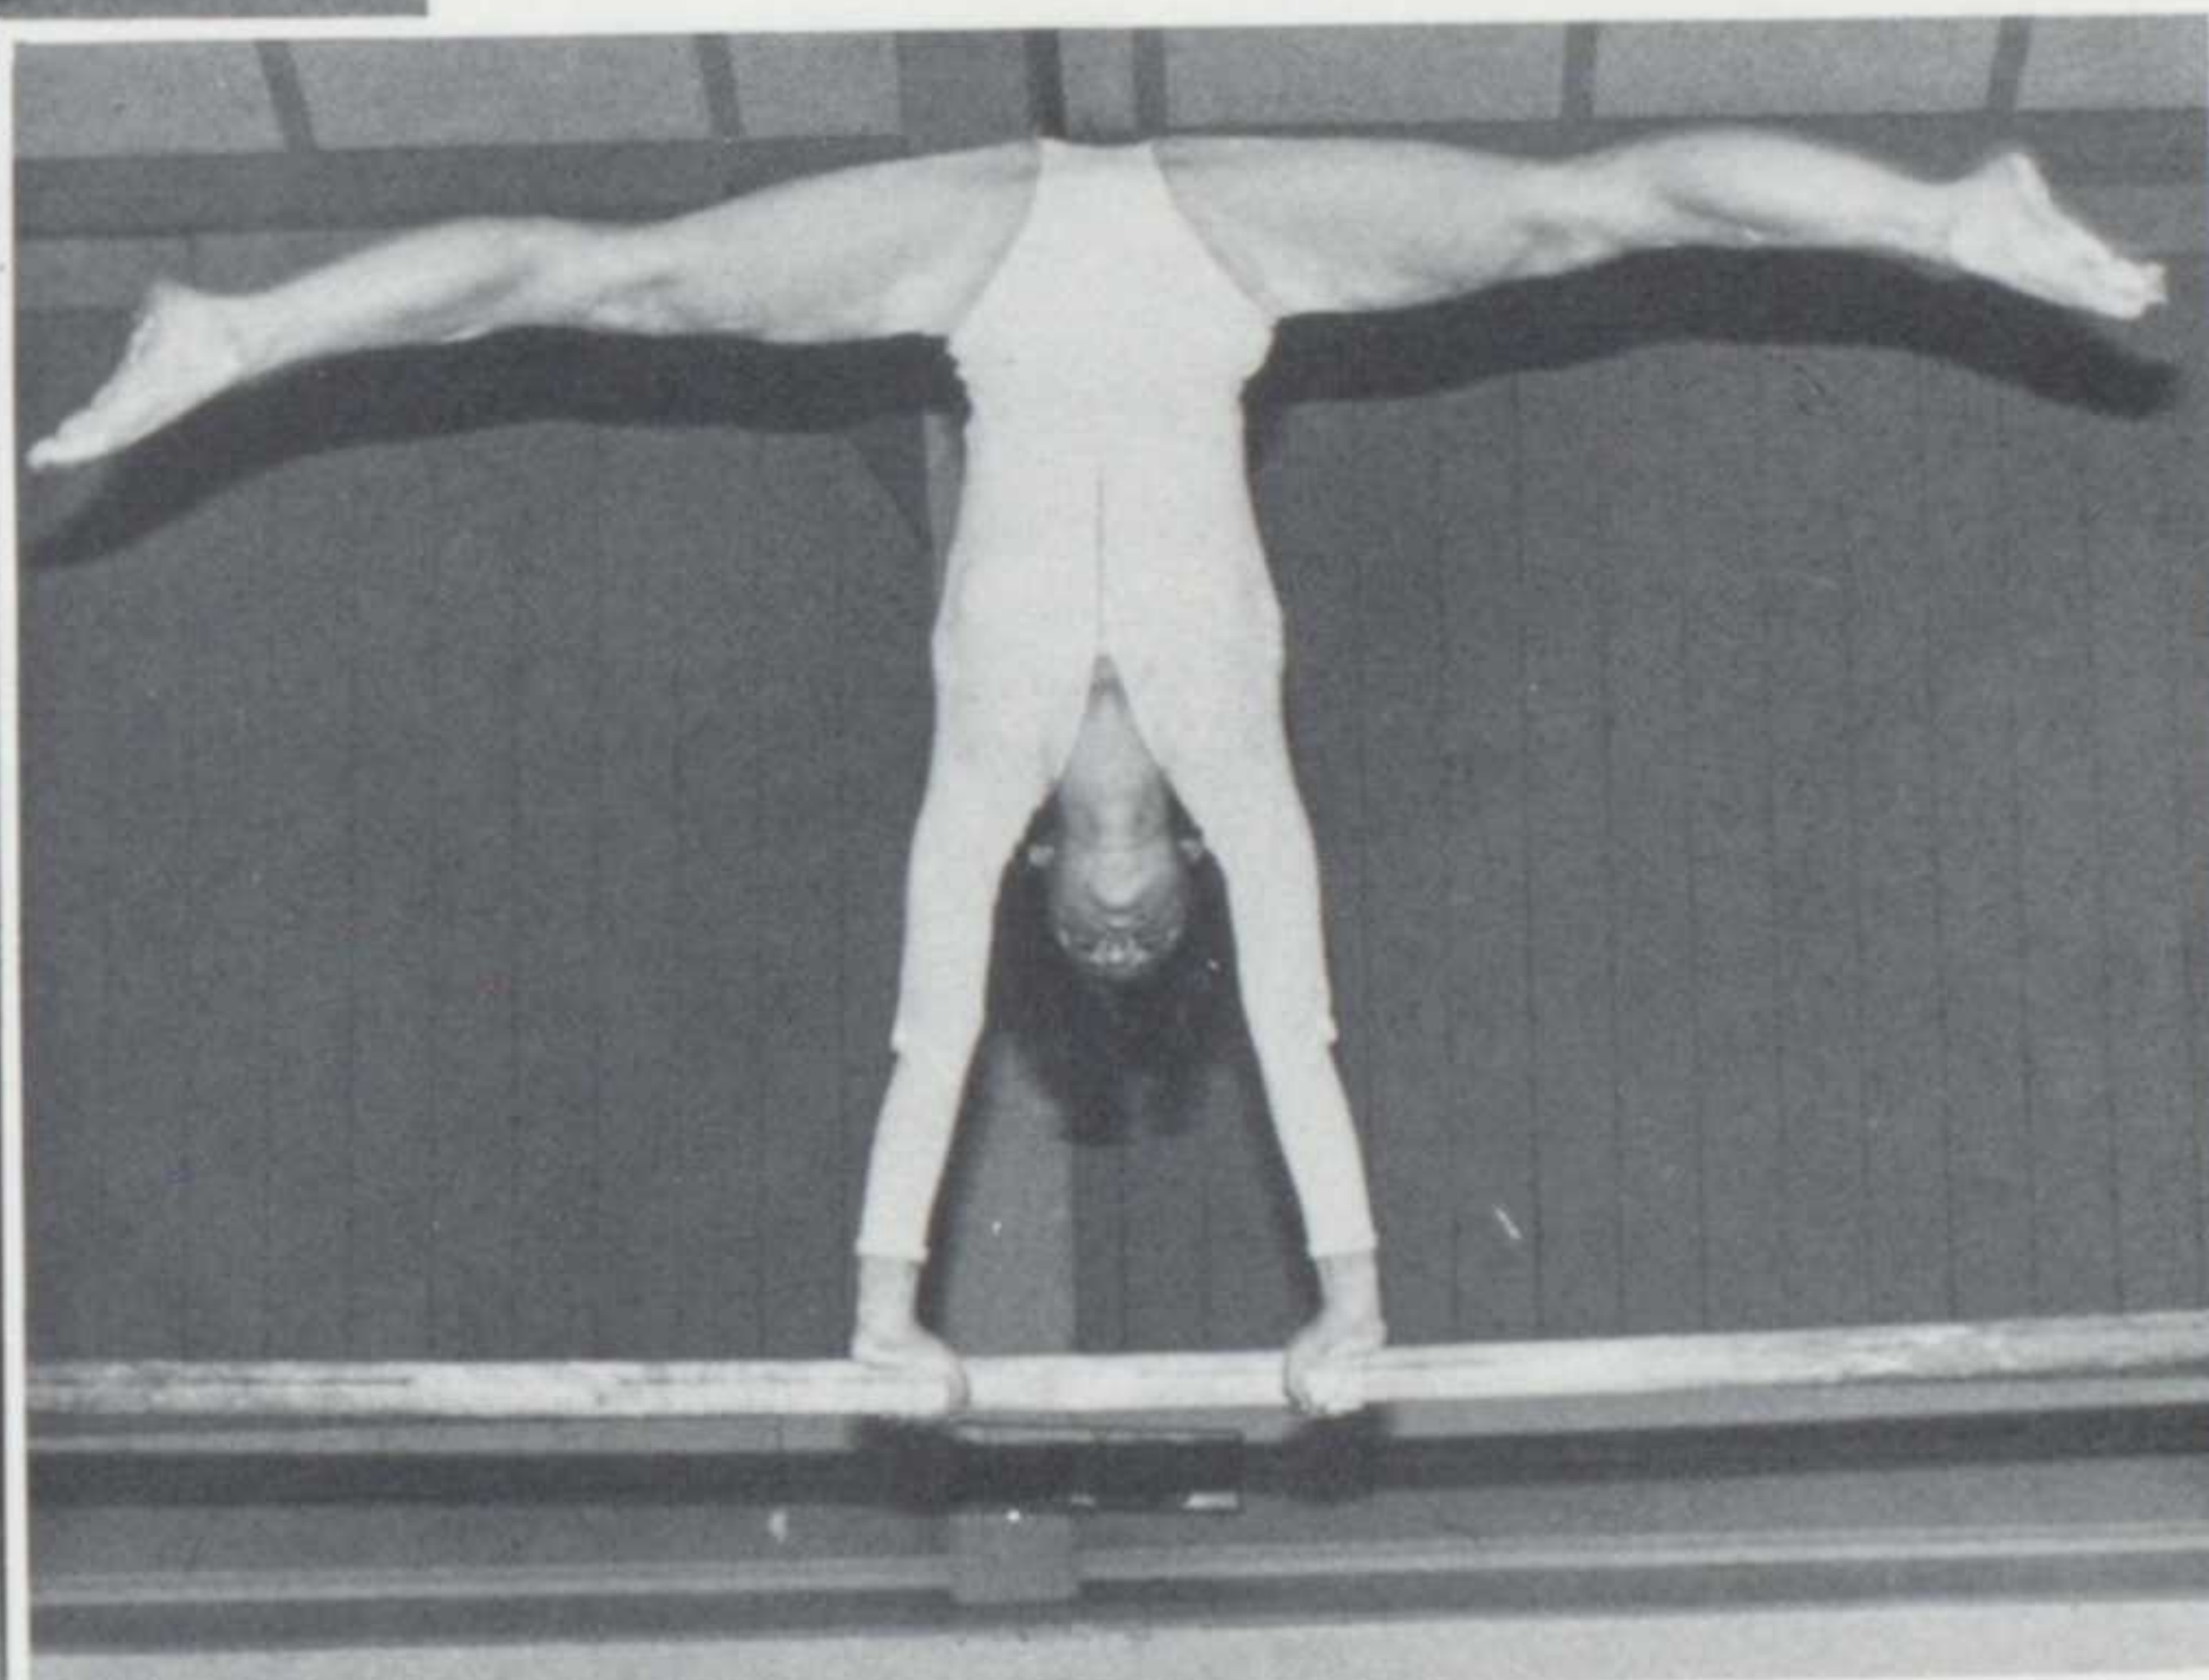

In a floor exercise that qualified her for State at the District meet, Sue Mercurio gracefully moves with the music.

-L. Mead

With chalk-dusted hands for a sure grip, Kelly Perrier whirls into a momentary handstand on the uneven bars.

Balanced on a four-inch beam, Lindsey Yount demonstrates the skill that earned her a fifth place finish in the Districts held at North Olmsted.

-D. Pulver

Trying to pin his Medina opponent, 154-pounder Mike Zallar attempts to gain six points for the J.V. team.

## Not fit for a forfeit

What ever happened to the nearly undefeated 1976-1977 eighth-grade wrestlers who were supposed to become the undefeated Bay High frosh wrestlers?

Good question, because the freshmen's record was 2-6-1, which is not impressive compared to their Middle School record of 7-1.

According to freshman Dave Macri, "It was the forfeits that messed us up." The frosh wrestlers had as many as six forfeits per game, and the team lost six points for each forfeit.

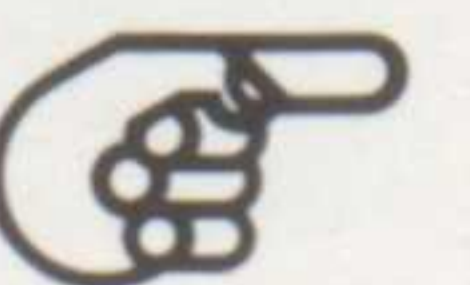

Why so many forfeits? A main reason was because three freshmen wrestled for the varsity team. Another factor was injuries—Keith Arnold and Neal Bauer were

both hurt and couldn't play until after Christmas.

The J.V. wrestlers had the best record of all the wrestling teams, and yet they only won half of their matches. According to sophomore Dave Foote, "We either killed 'em or got killed."

Like the freshmen, forfeits were the J.V. team's main problem, and were the major cause of the J.V.'s 4-4-1 record. Coach Mr. Mead explained, "We just didn't have enough kids try out this year." The team lost four wrestlers to varsity; they also lost some to the swim team.

Obviously, the forfeits made a difference. And according to Mr. Mead, "That's what really hurt us."

Introductions take place before every match, and Jeff Sellers meets his North Olmsted rival. Bay lost the match, 54-4.

On the bottom at the start of a new period, senior Tom Pettit overcame the Fairview matman to win 8-5. Tom wrestled at 132 pounds.

-J. Heiser

# Varsity rolled up the mat on a disappointing season

"This was a rebuilding year for the team. Bay will be back on the top in the near future," senior Tom Pettit commented about the varsity wrestling team.

Since many of the "stars" of recent years had graduated, the team started at the bottom with representatives from all grades. Their starting line-up included three freshmen and two sophomores as well as three juniors and five seniors.

At the beginning of the season, the grapplers fought with the gymnastic team for practice time in the gym. After arranging a satisfactory compromise, pract-

ices started in earnest.

The grueling two-and-a-half to three hour sessions included team meetings, individual work and wrestle-offs to determine who would participate in the meets.

On Thursdays anyone who was above his weight class stopped eating and started running. Wearing several layers of heavy clothing, they tore through the halls trampling anyone who had the misfortune to still be hanging around.

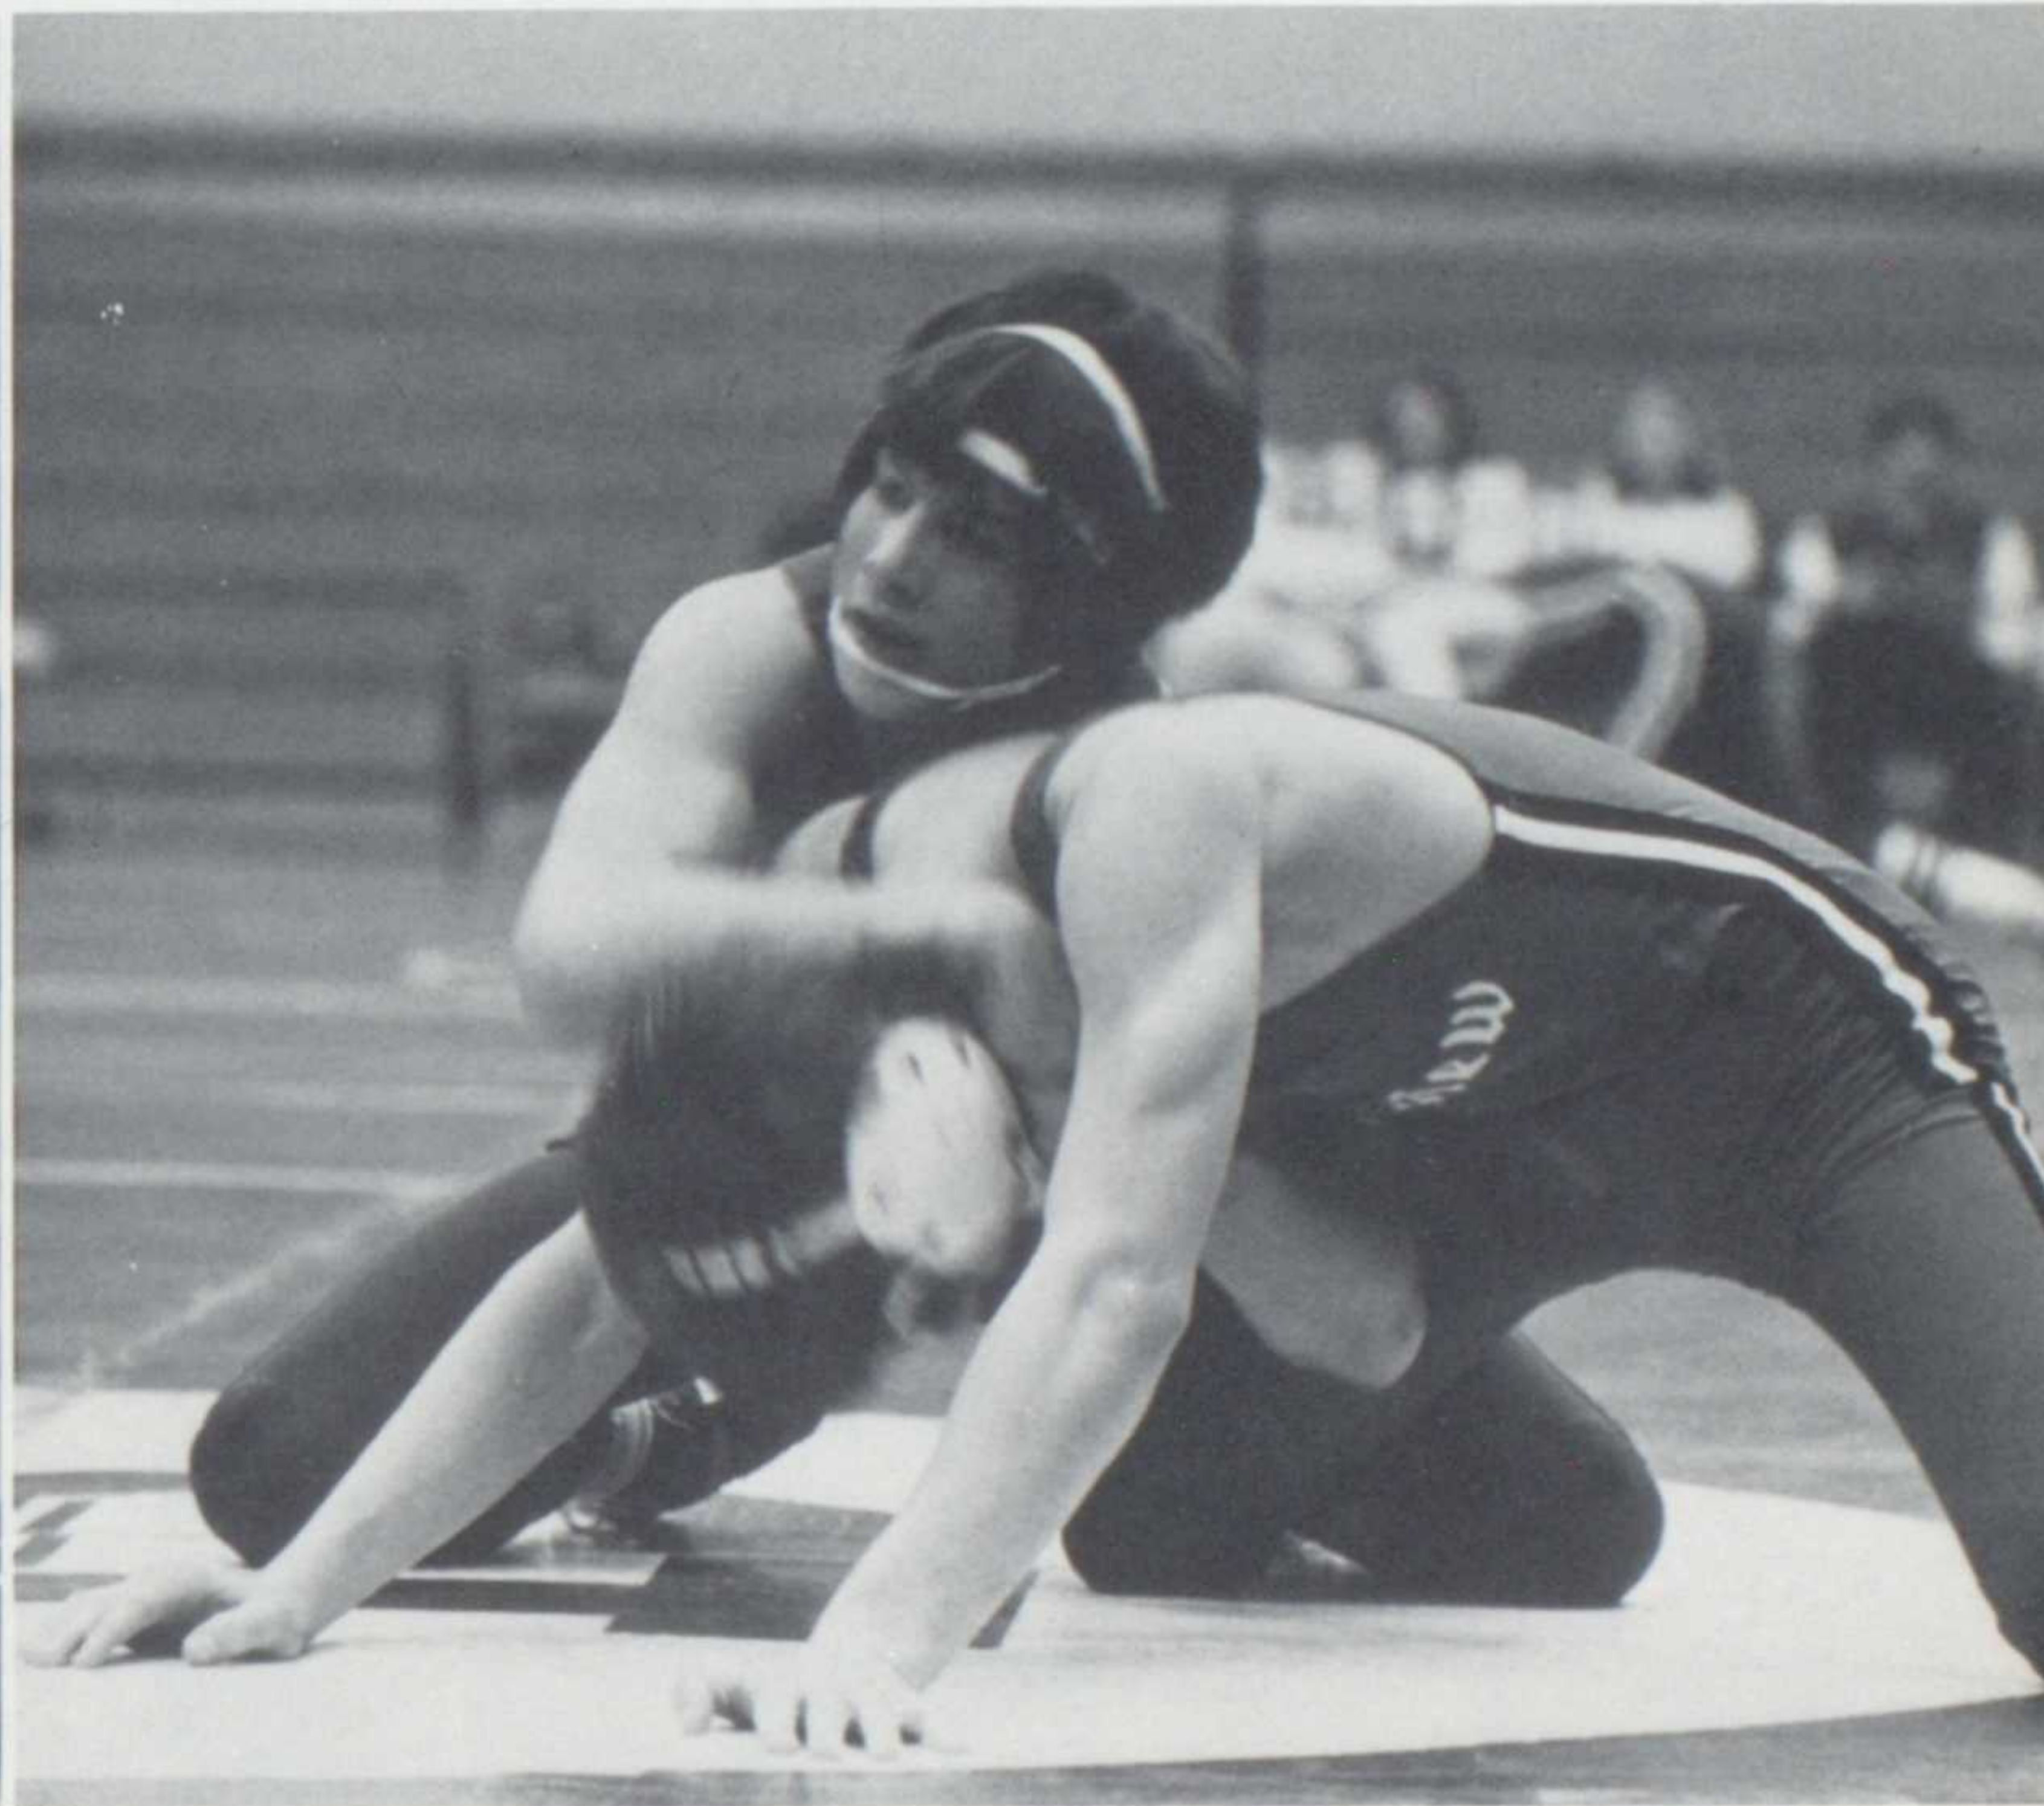

"Losing weight is hardest at the beginning of the year, but you get used to it," senior Scott Kile explained. "It's just

With a little from friends, Liz Hahn and Kelly Karcher, varsity cheerleader Lisa Hellebrekers gives her support at the last game of the season.

By using the three-quarter nelson pinning combination, sophomore Tim Plott tries to pin a Warrior. Tim won the match 2-1.

-J. Heiser

-J. Heiser

a part of the sacrifice you make for wrestling."

However, the sacrifices didn't seem to pay off, because the team only won two of their ten matches. Yet the problem was not due to a lack of ability, but to a lack of experience.

By the end of the season, most of the grapplers had gained valuable wrestling experience. Not only that, they had learned how to lose five pounds in twenty-four hours. Maybe wrestling should become a new "crash diet".

# DECK THE HALLS...

—B. Calmus

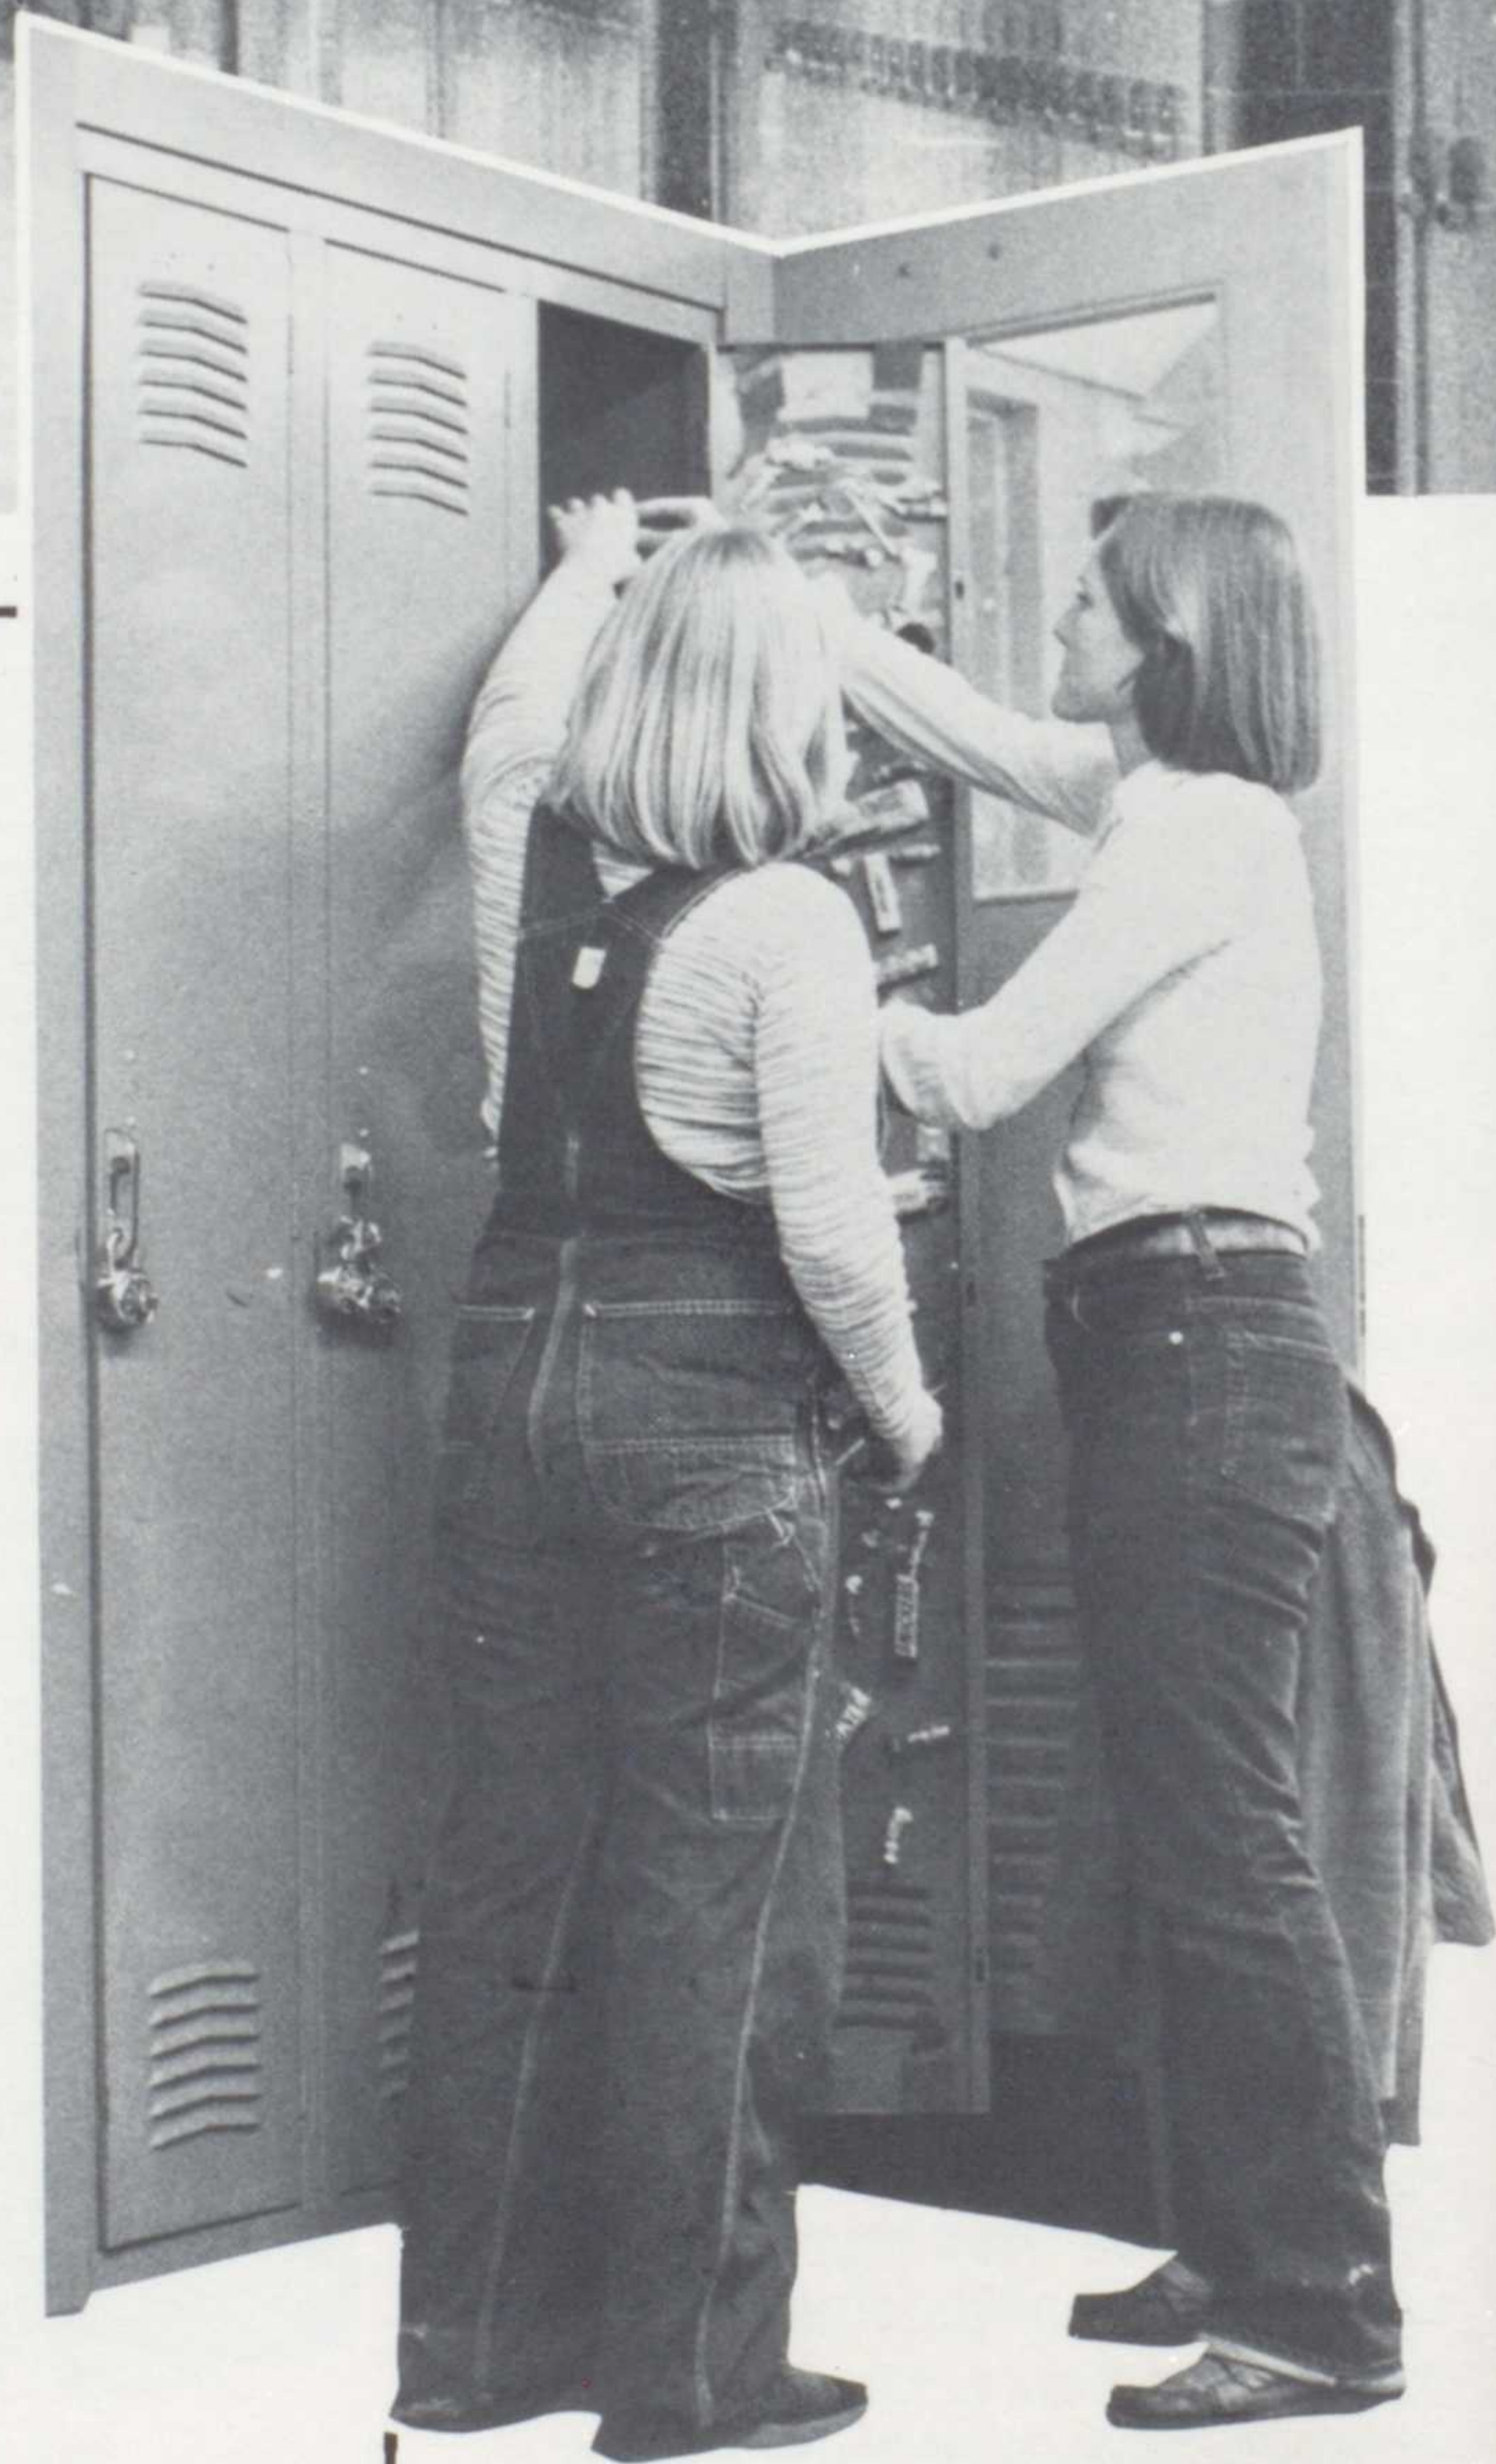

## with daily activities, Tralalalala lalalala!

**D**id you know that about 14% of your school day is spent in the halls? Although most of this time is spent between classes, the halls can set the scene for a variety of activities.

During the football season, the marching band can be heard clamoring around the school on Friday mornings. When wrestling begins, grapplers can be seen running through the halls after school to get in shape.

Outside of the attendance window, representatives from colleges visit during the lunch periods. And on game days, you can sign a player's football that's hanging on the wall.

A new addition to the halls was a class wall. According to Stacy DePaolis, "Last year we had a meeting with Josten's to get going on some class spirit. We thought the wall was a good idea for class unity."

**Sweet surprises** await Karen Brazell as Diane Nelson and Maurita Hackett plaster her locker with candy. They can get her locker combination from the office.

—B. Calmus

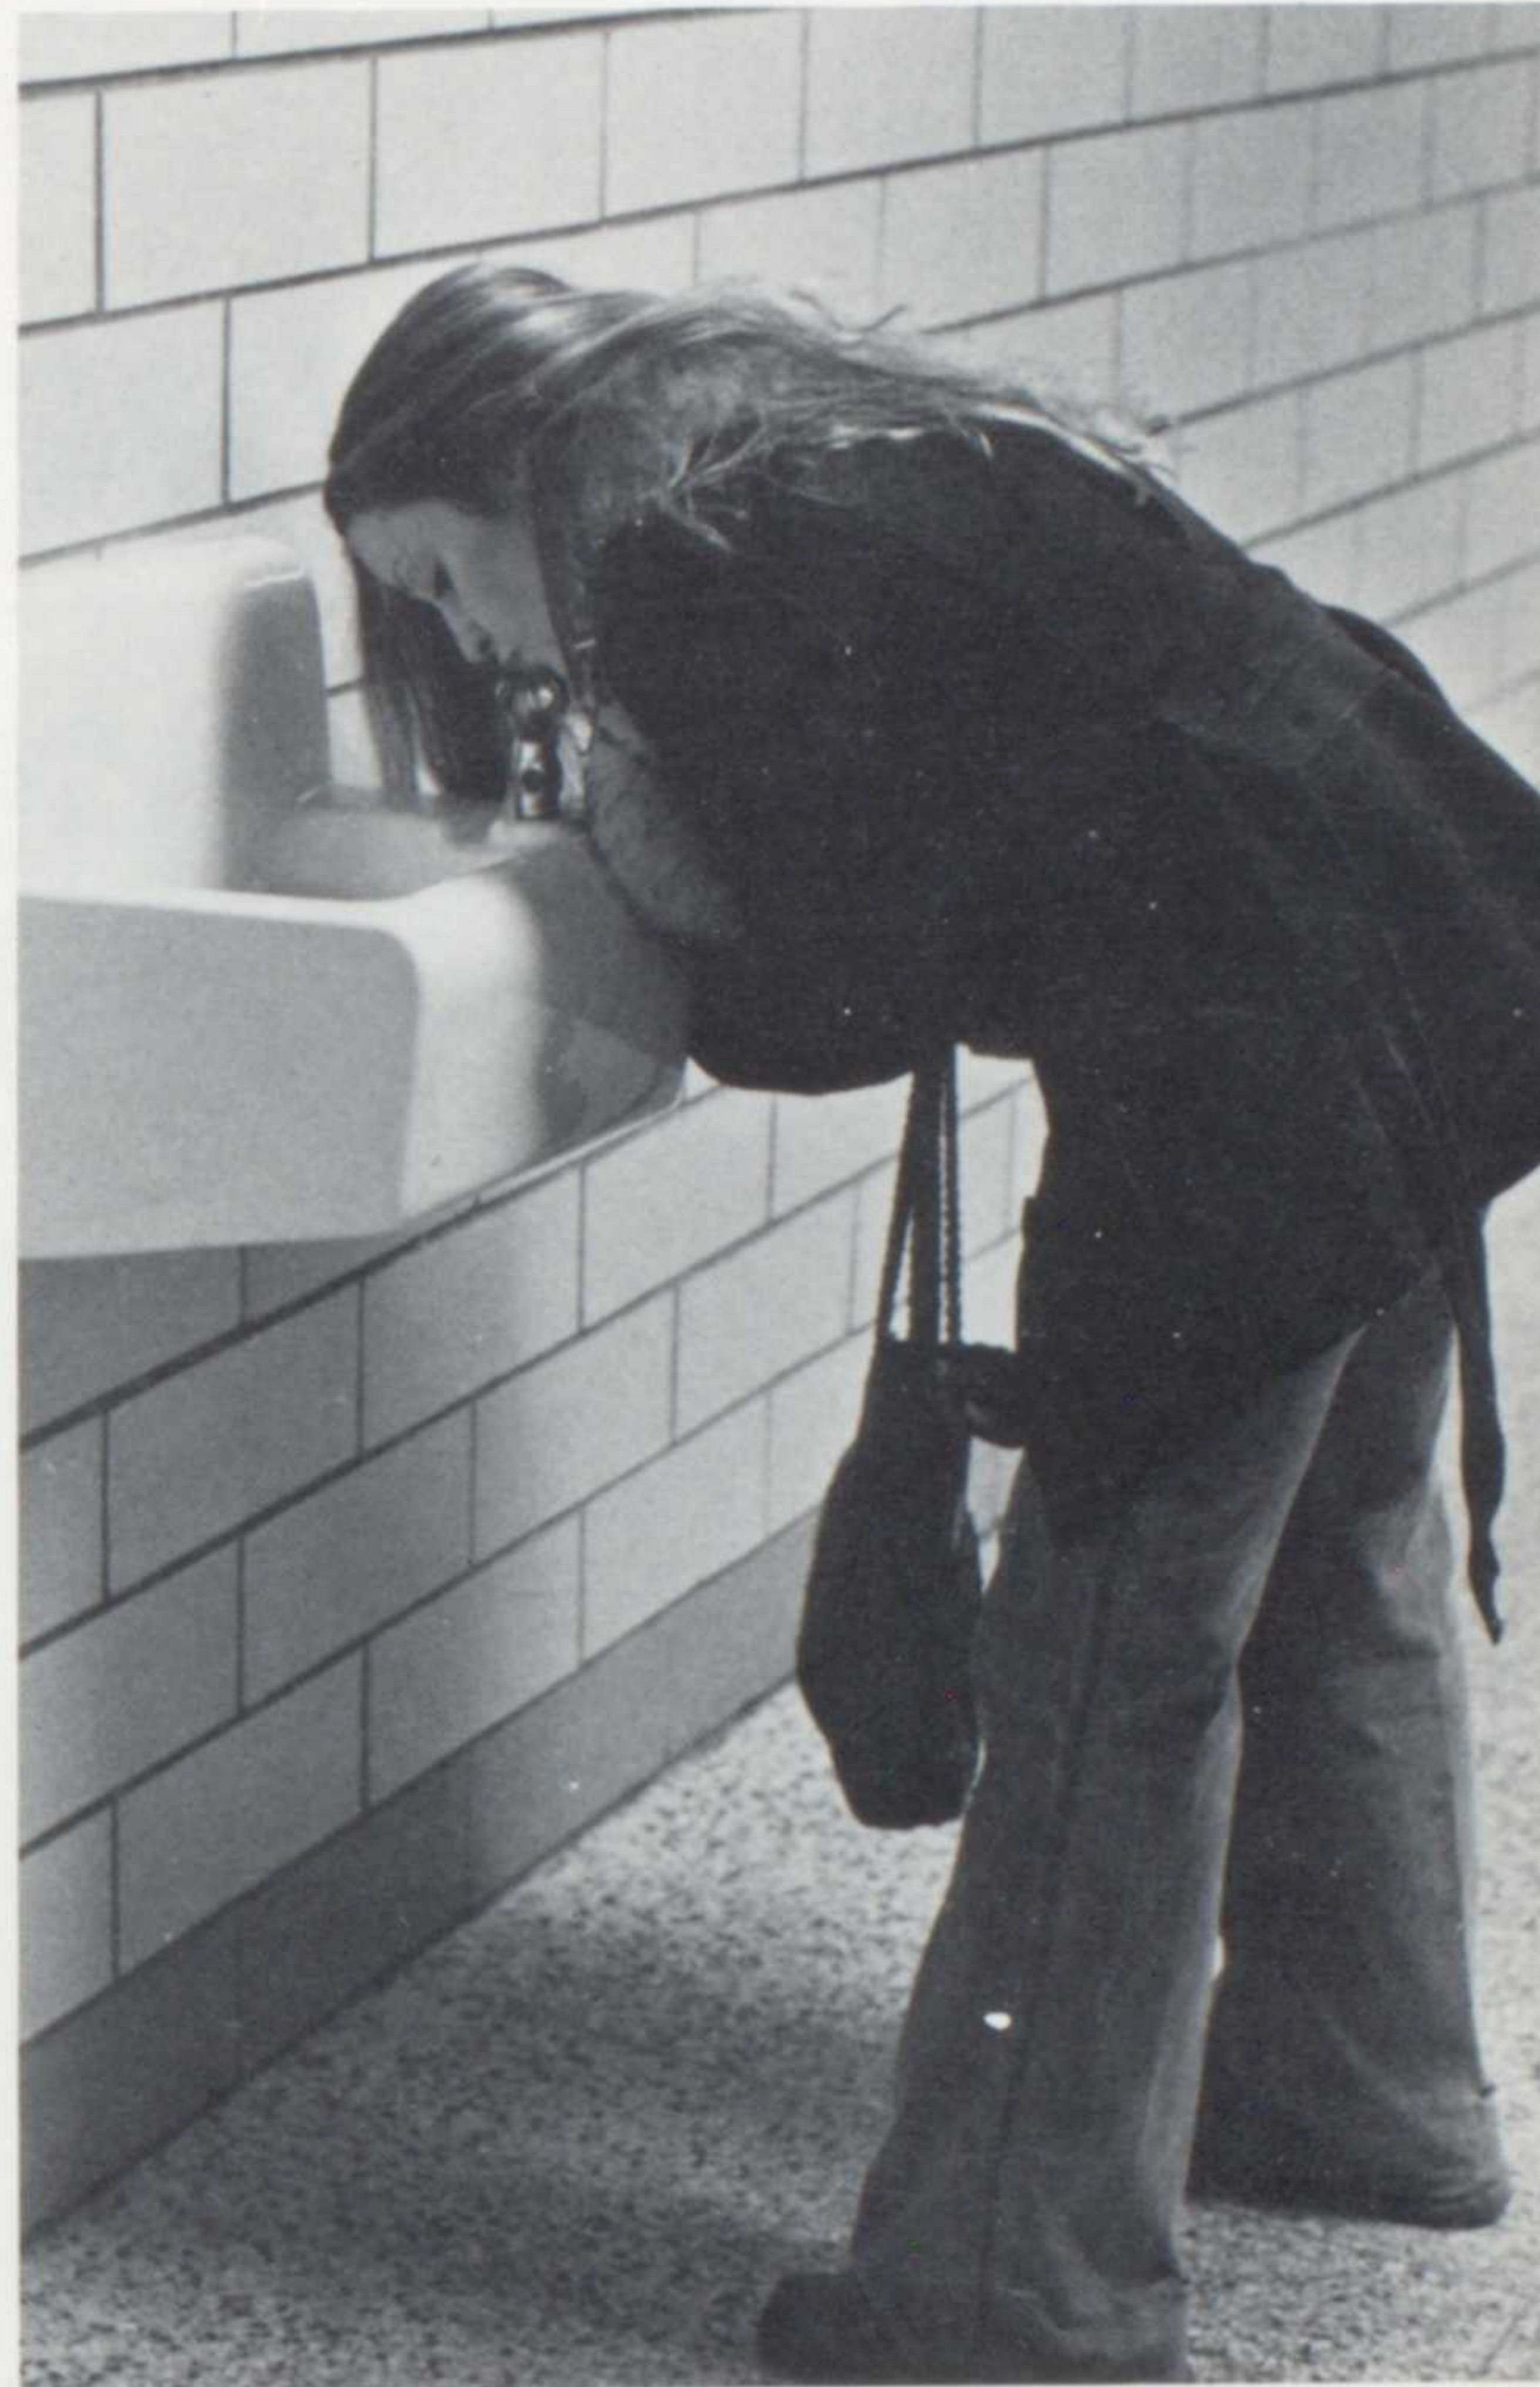

Usually full of activity, the hallways only become empty between 5 p.m. and 7 a.m. Deserted lockers await the 7:15 bus and the arrival of early students.

To help boost the Juniors' class spirit officers Stacy DePaolis, Barb Hess and Doug Crowe decided to put up a class wall. The bulletin board cost about 20 dollars.

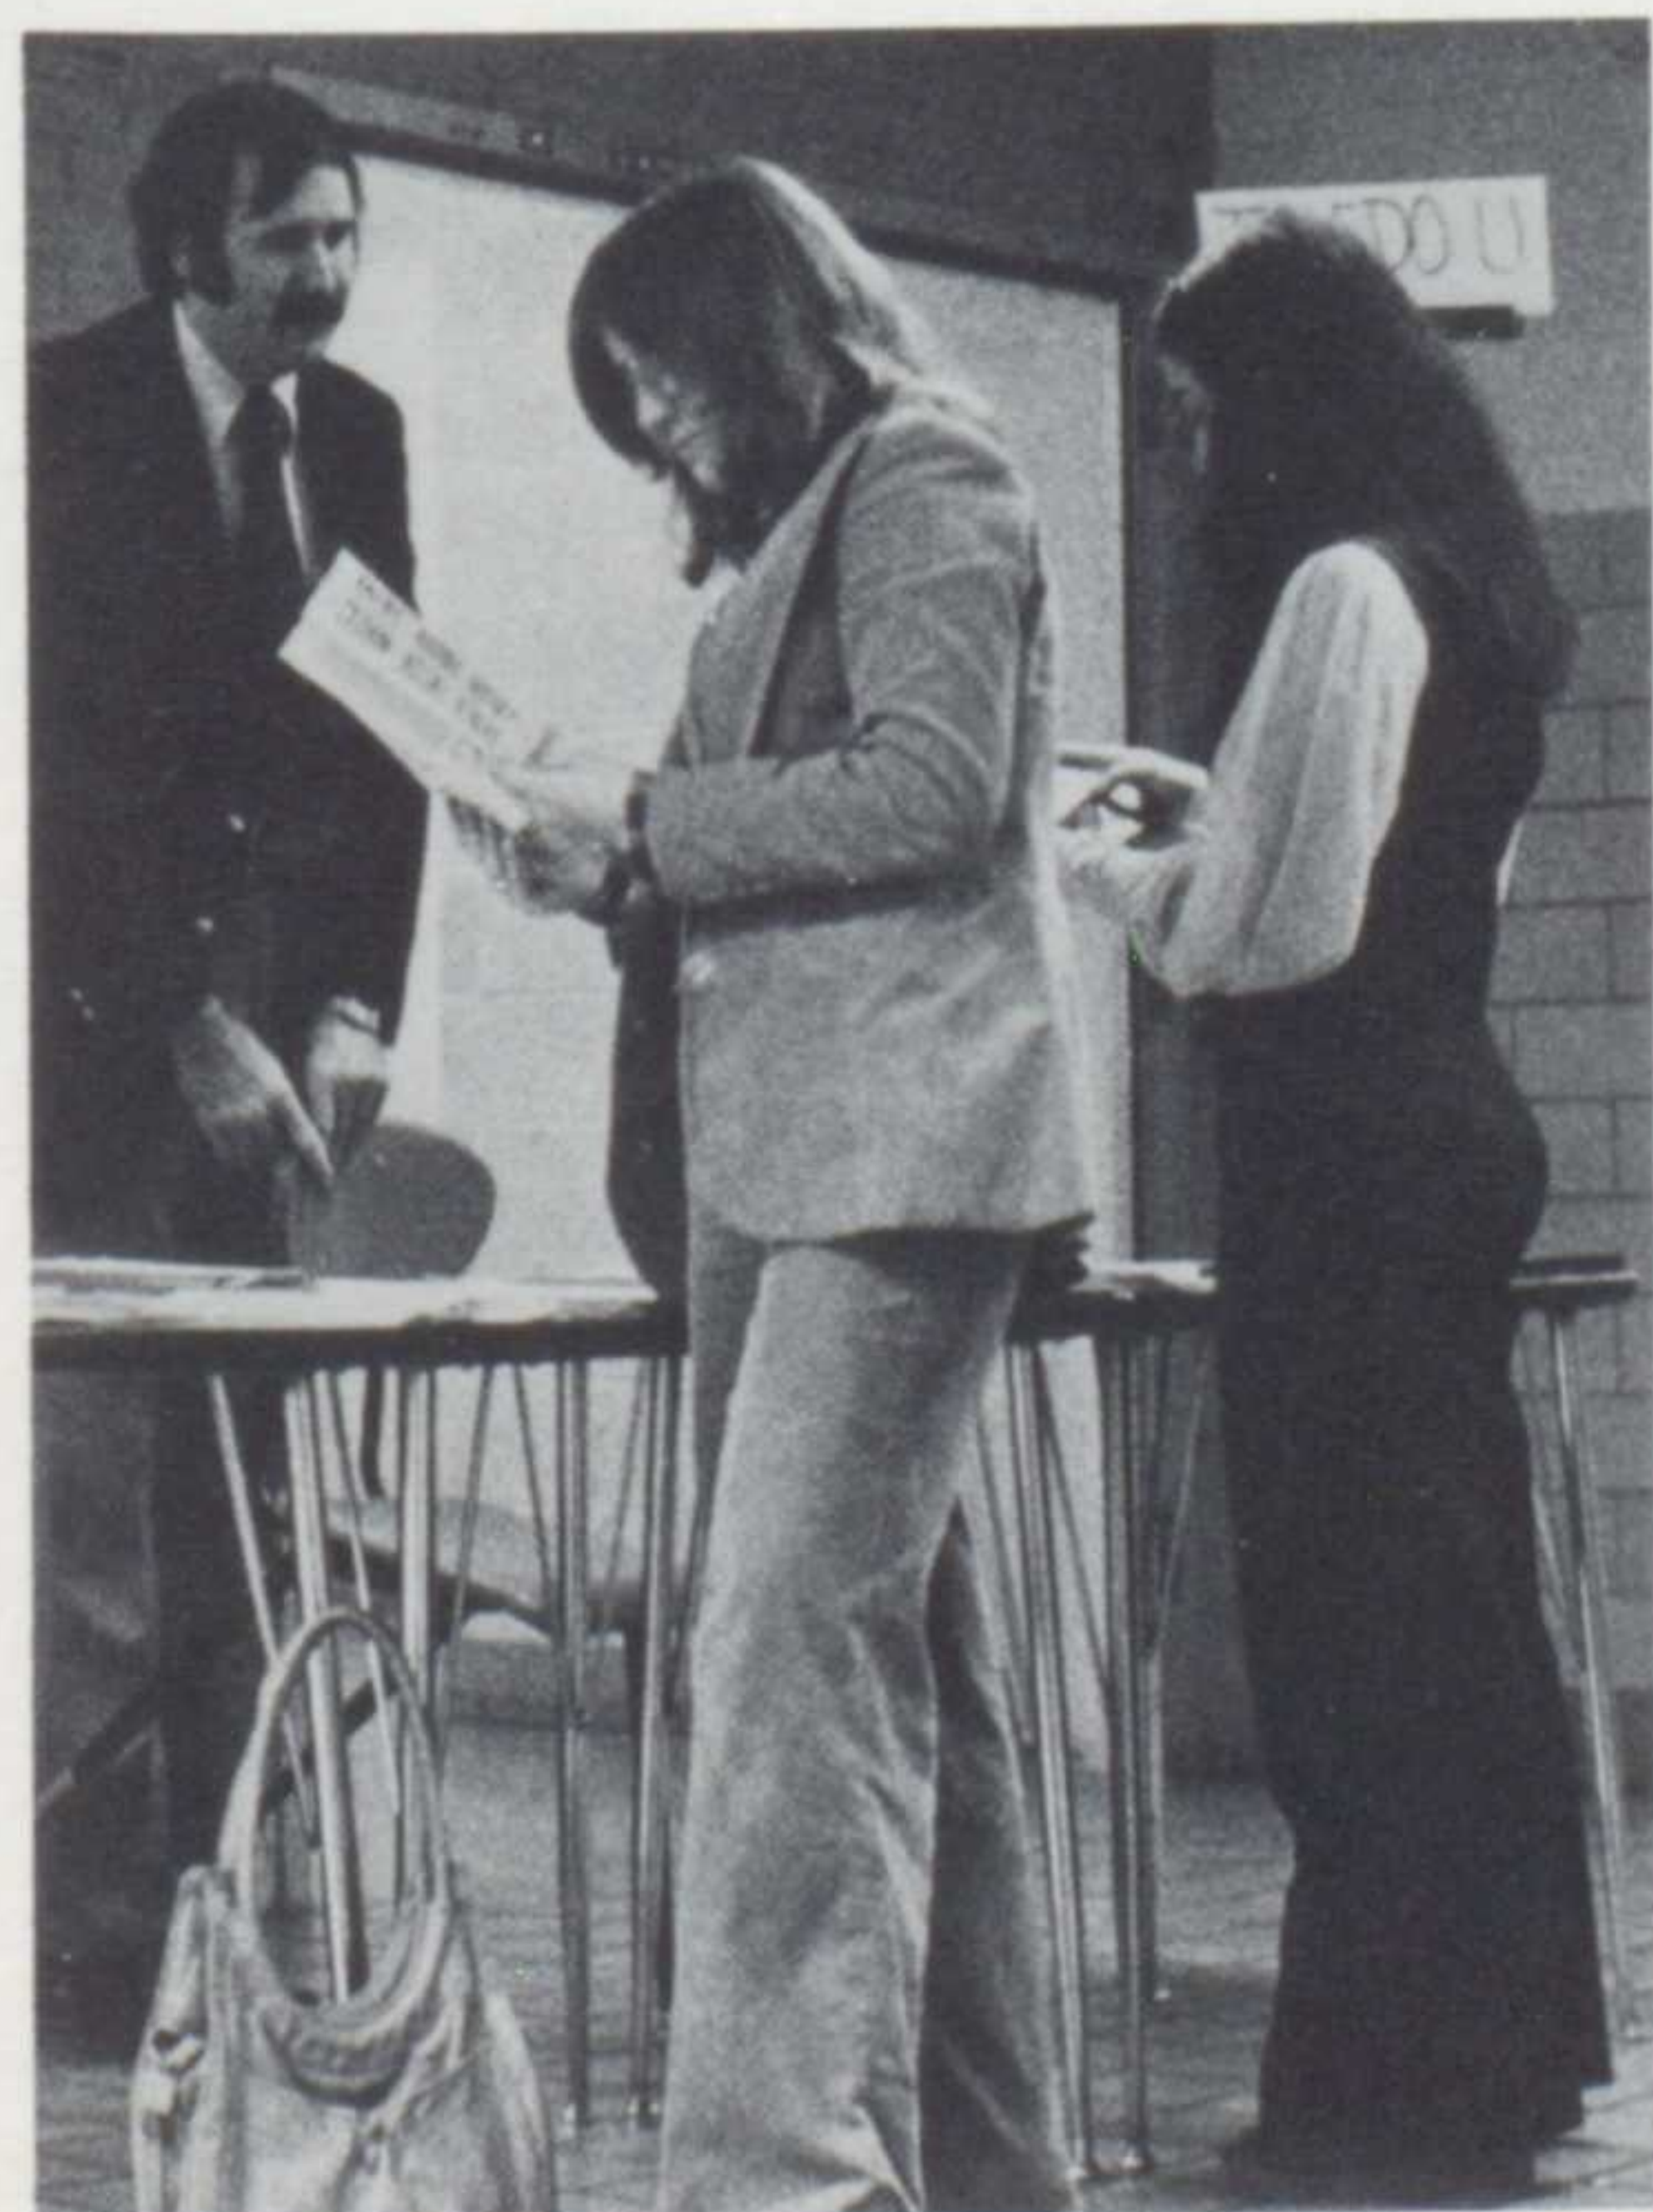

—J. Heiser

—J. Heiser

Thirsty when she arrives at school, Angela Sanders slurps from one of the 13 drinking fountains throughout the building.

—S. Ormsby

—J. Heiser

Interested in their future, Julie Gutheinz and Liz Catone look at information about Toledo University. College students often represent their colleges and can give a more personal view of campus life.

Between choruses of the flight song, Carol Maher and Mary Gavin take a breather. The band usually ends their morning trek with a rousing song in the library.

# DECK THE HALLS...

**Squeezably soft**, Sue Smith adds an extra touch to the landscaping. She and other senior girls take 30 minutes to cover football player Matt Alteri's house.

**Forty-two footballs** made weekly include the name of each team member. Laura Purdum and Wendy Alexander sign Mike Zallar's football to wish him luck in the upcoming game.

—J. Heiser

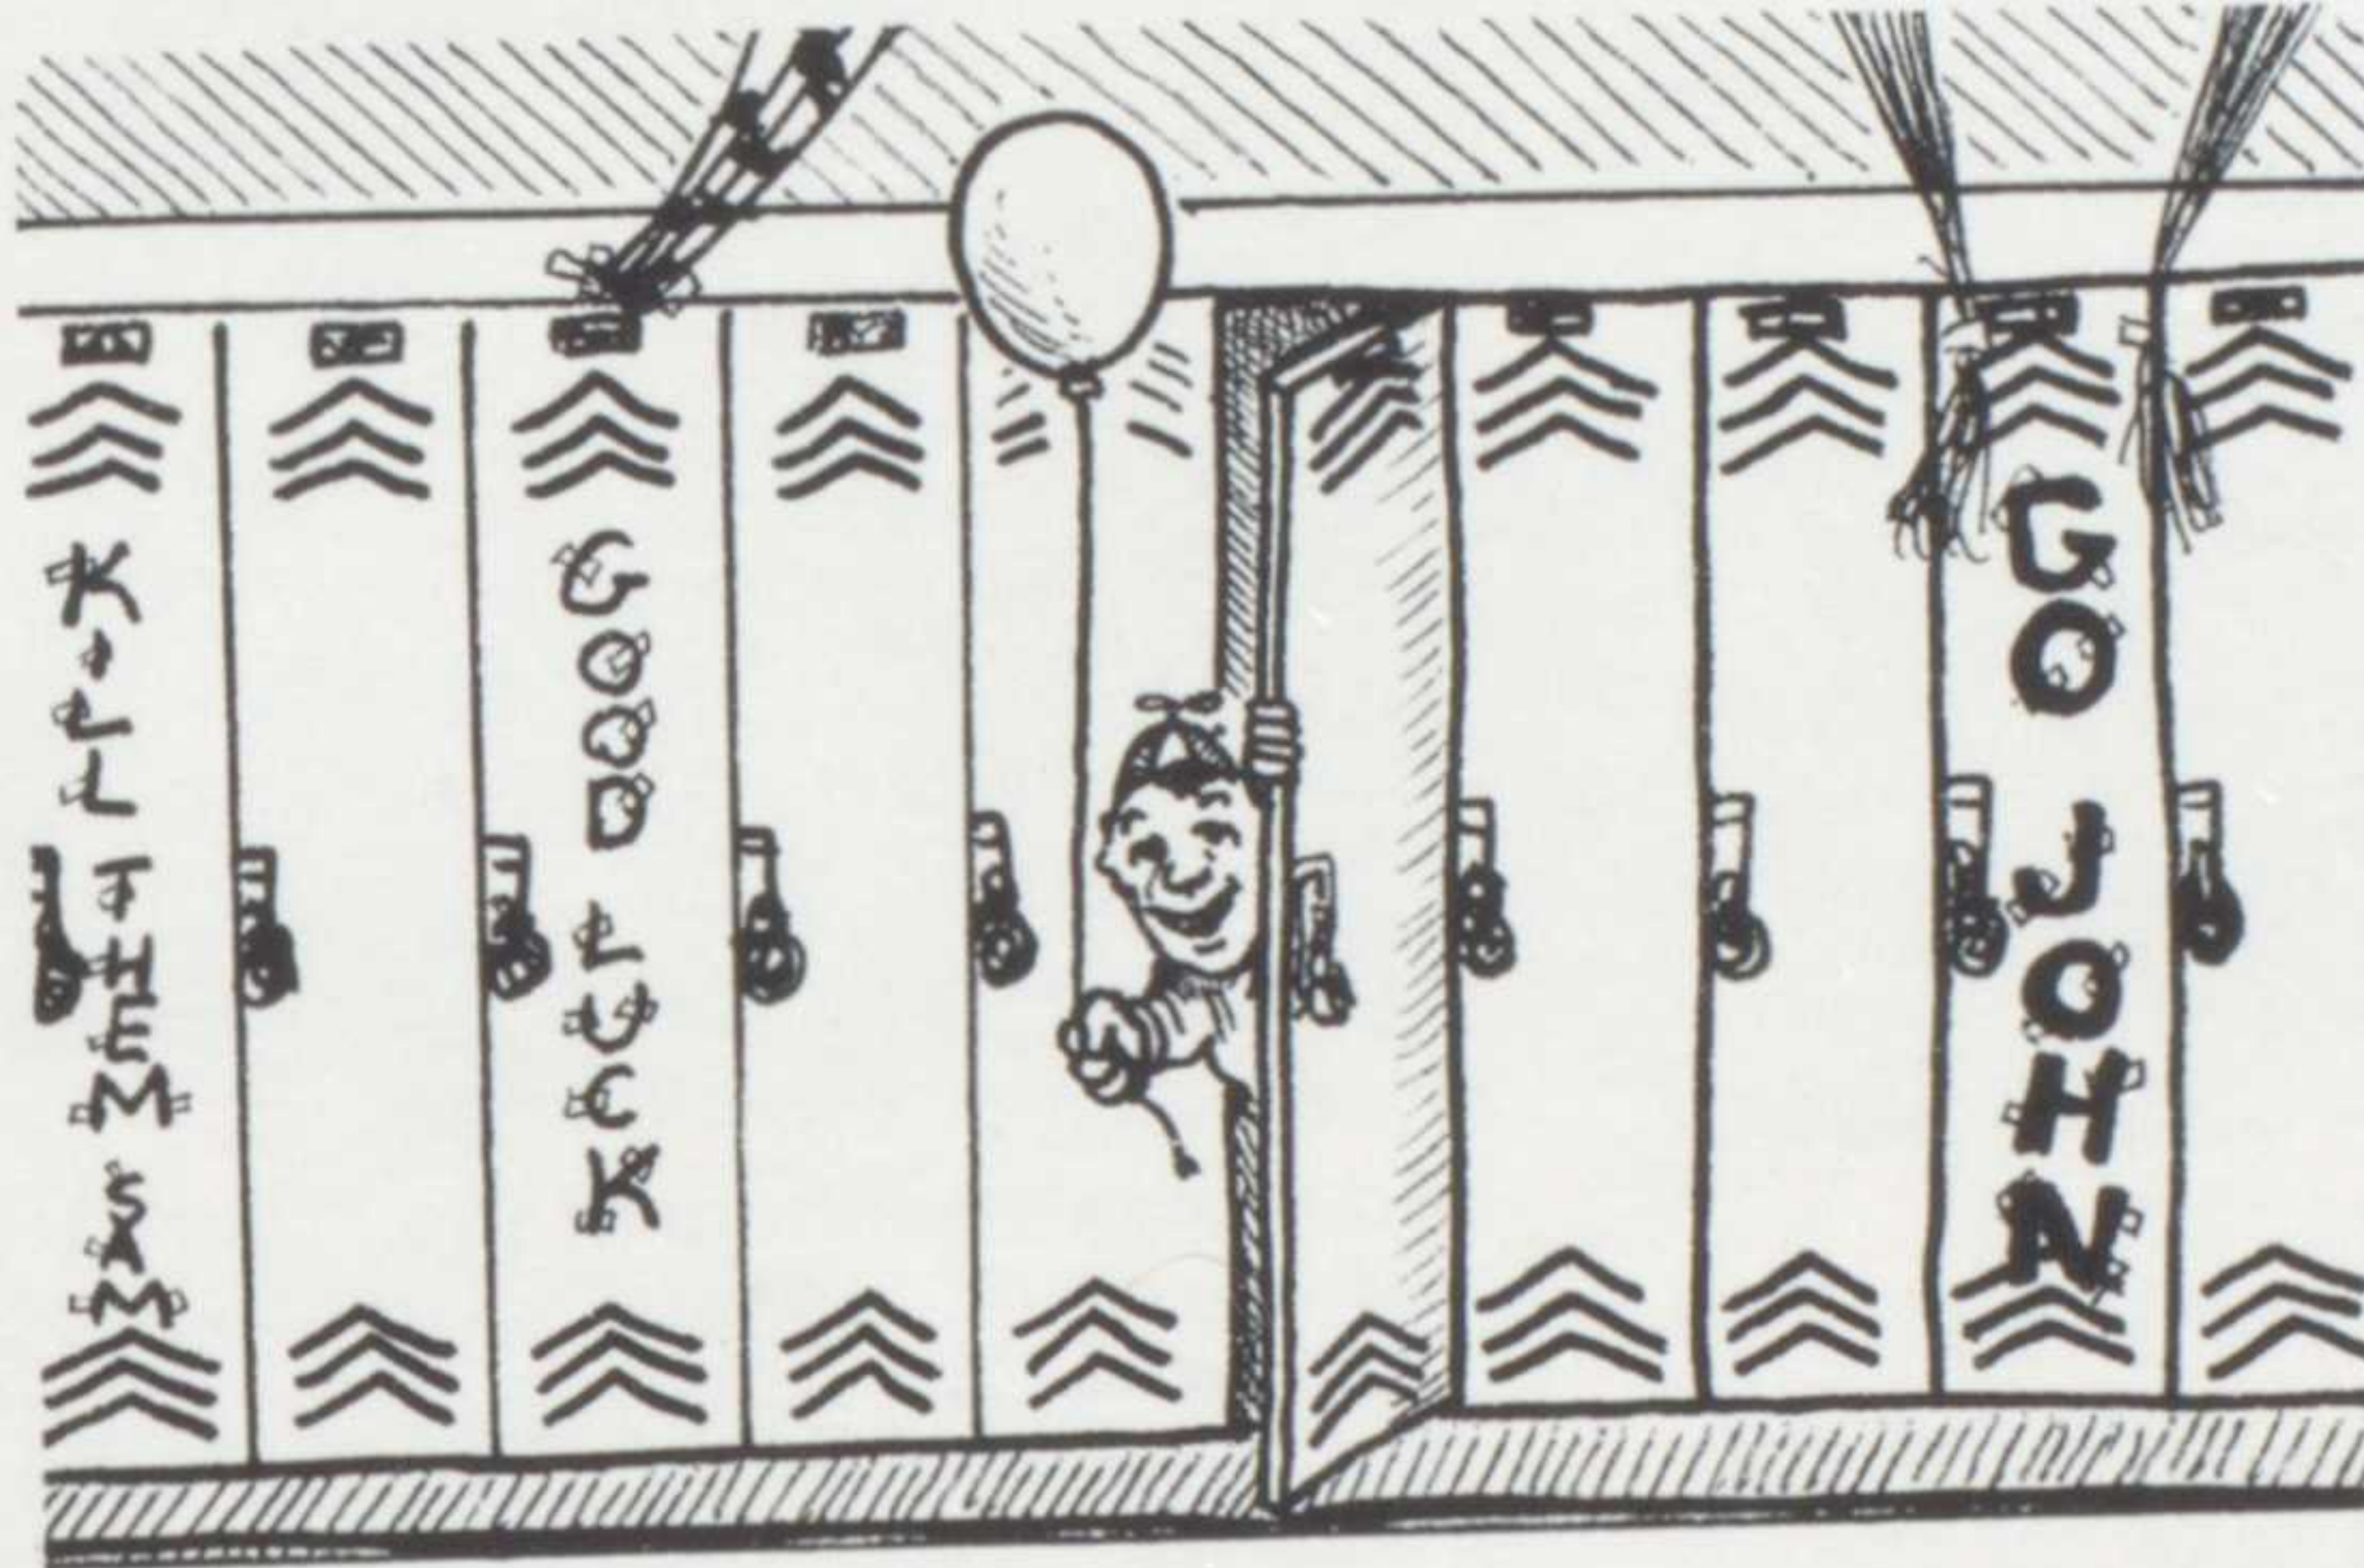

—B. Calmus

Before the Lakewood basketball game, Pep clubber Tracy Priest supports the team by decorating Dave Hook's locker. The paint, paid for by Pep Club, comes from Sell's.

"I get **Into** lockers!"

with Pep Club spirit,  
Tralalalala lalalala!

—B. Calmus

In order to psych the grapplers to a victory over Parma at their first match of the season, Kathy Brogan adds the finishing touches to a J.V. sign.

Why does the school always look like a ticker-tape parade on game days? Because Pep club creates the spirit and pizzazz that spark enthusiasm throughout the school.

They splatter the walls with "GO BAY" banners and plaster paper emblems in the cafeteria hallway for people to sign. These dynamo kids also produce the "super locks—for super jocks."

Pep Club's members don't limit their spirit to the school. Sometimes they get mad cravings to decorate players' houses at 4 a.m.!

(However they aren't responsible for the T-Ping of the school on Friday mornings!)

What do some of the team members think that are getting all this special treatment? Pete Dillon says, "I think they do a

**"super locks—  
for super jocks"**

great job for the little recognition they get. Sometimes we don't say it, but we really appreciate what they do. I get a lot of friends (moochers) on game days just because of my locker."

# It used to be the **Cafeteria** Now, it's the *Dining Area*

**B**oy, are they going to have a hard time keeping it clean," was the comment of junior Chip Nilges when he came to school in September to find the cafeteria floor covered with a wall-to-wall, blue, polyester carpet.

It wasn't long before predictions circulated the school about how long it would take for the first plate of seashells in meat sauce to fall on it. Nobody could understand why carpet was even considered for a cafeteria floor.

Well, the first person who considered it was Assistant to the Superintendent J. Louis Cardinal. Commenting, he said, "Moisture had gotten under the tile and did a lot of damage. The concrete floor was badly deteriorated."

**Seemingly deserted** in the early morning, the "dining area" can also be used for a study hall or conversation area.

Mr. Cardinal felt that carpeting would last long and also cut down on noise in study halls. Besides, it was cheaper.

In an effort to make kids have more respect for the room its name was changed to the "dining area". This caught on, and soon people were seen running around with their noses in the air proclaiming that they were going to the dining area to take part in the afternoon repast.

How did they treat the carpet? The person to ask is Mr. John Schwartz, the custodian in charge of the lunchroom. Candidly, he stated, "It's a disaster. I can't even start vacuuming till I pick up all the large objects they leave on the floor."

It takes John 1½ hours every day to clean the carpet.

Whether or not the carpet was an improvement is debatable, but it sure was a change. ■

—B. Calmus

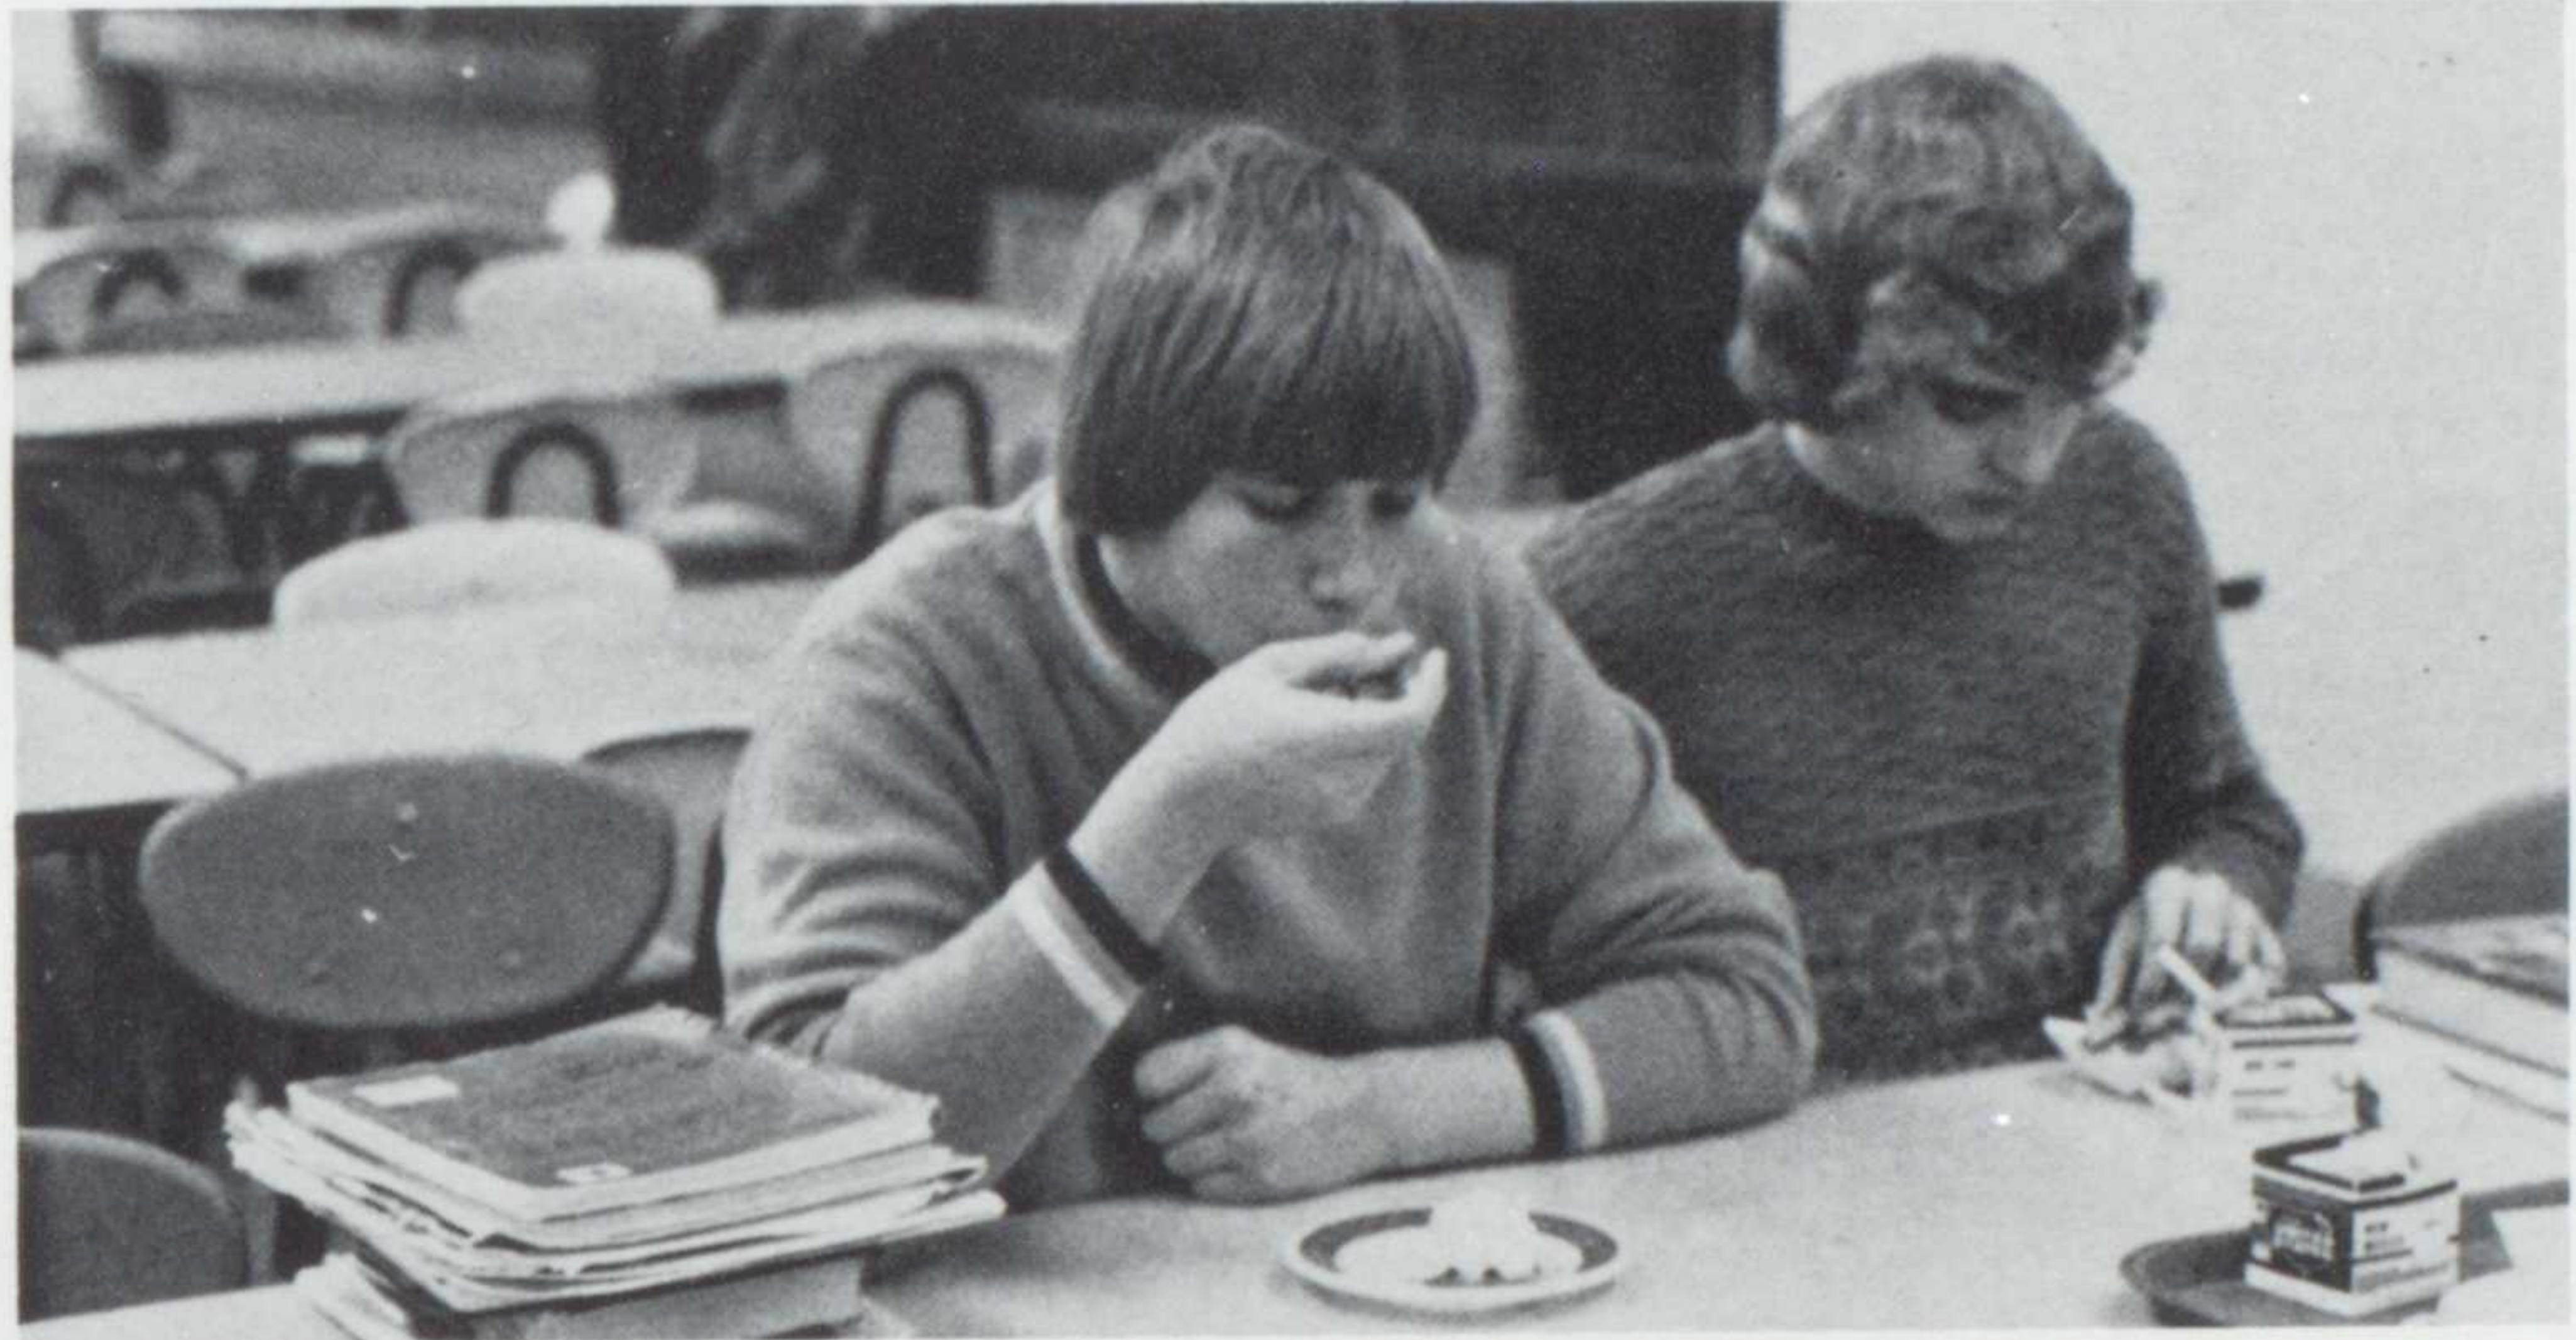

Oven fried chicken, one of the cooks' specialties, occupies the attention of Jeff Wahl. Bay benefits from one of the few self-supporting cafeterias in the state.

—B. Calmus

High on the list of Bay High favorites have to be the french fries. One of the few items that never seems to be bad, they are consumed by Bob Kimball and Dave Davies.

—B. Calmus

And now for the dessert! Sophomores Scott Brua and John Berneike round off their plate lunch with a strawberry ice cream jello fluff and a carton of fries.

1. Orange Cream Bar—15¢, 2. Sausage Pizza—35¢, 3. Chocolate Milk—5¢, 4. White milk—also 5¢, 5. Straw—free with purchase of above.

Habitual in his clean up, janitor John Schwartz maneuvers the vacuum cleaner bought at the beginning of the year especially for this purpose.

We can make it happen

Sparkling events  
spice up  
spirit week

**TUESDAY** Spirit week blasted off with a vivid display of blue and white—mostly on people. Some even went to the extreme of painting their bodies.

**WEDNESDAY** T-shirts were on the agenda along with the Gong Show talent contest. During the 5th and 6th period lunches, Terry Fain and Hal Berry walked away with a \$20 cash prize each.

**THURSDAY** 10¢ was the fee to have a buddy thrown in jail. Bail was set for a verse of the old fight song.

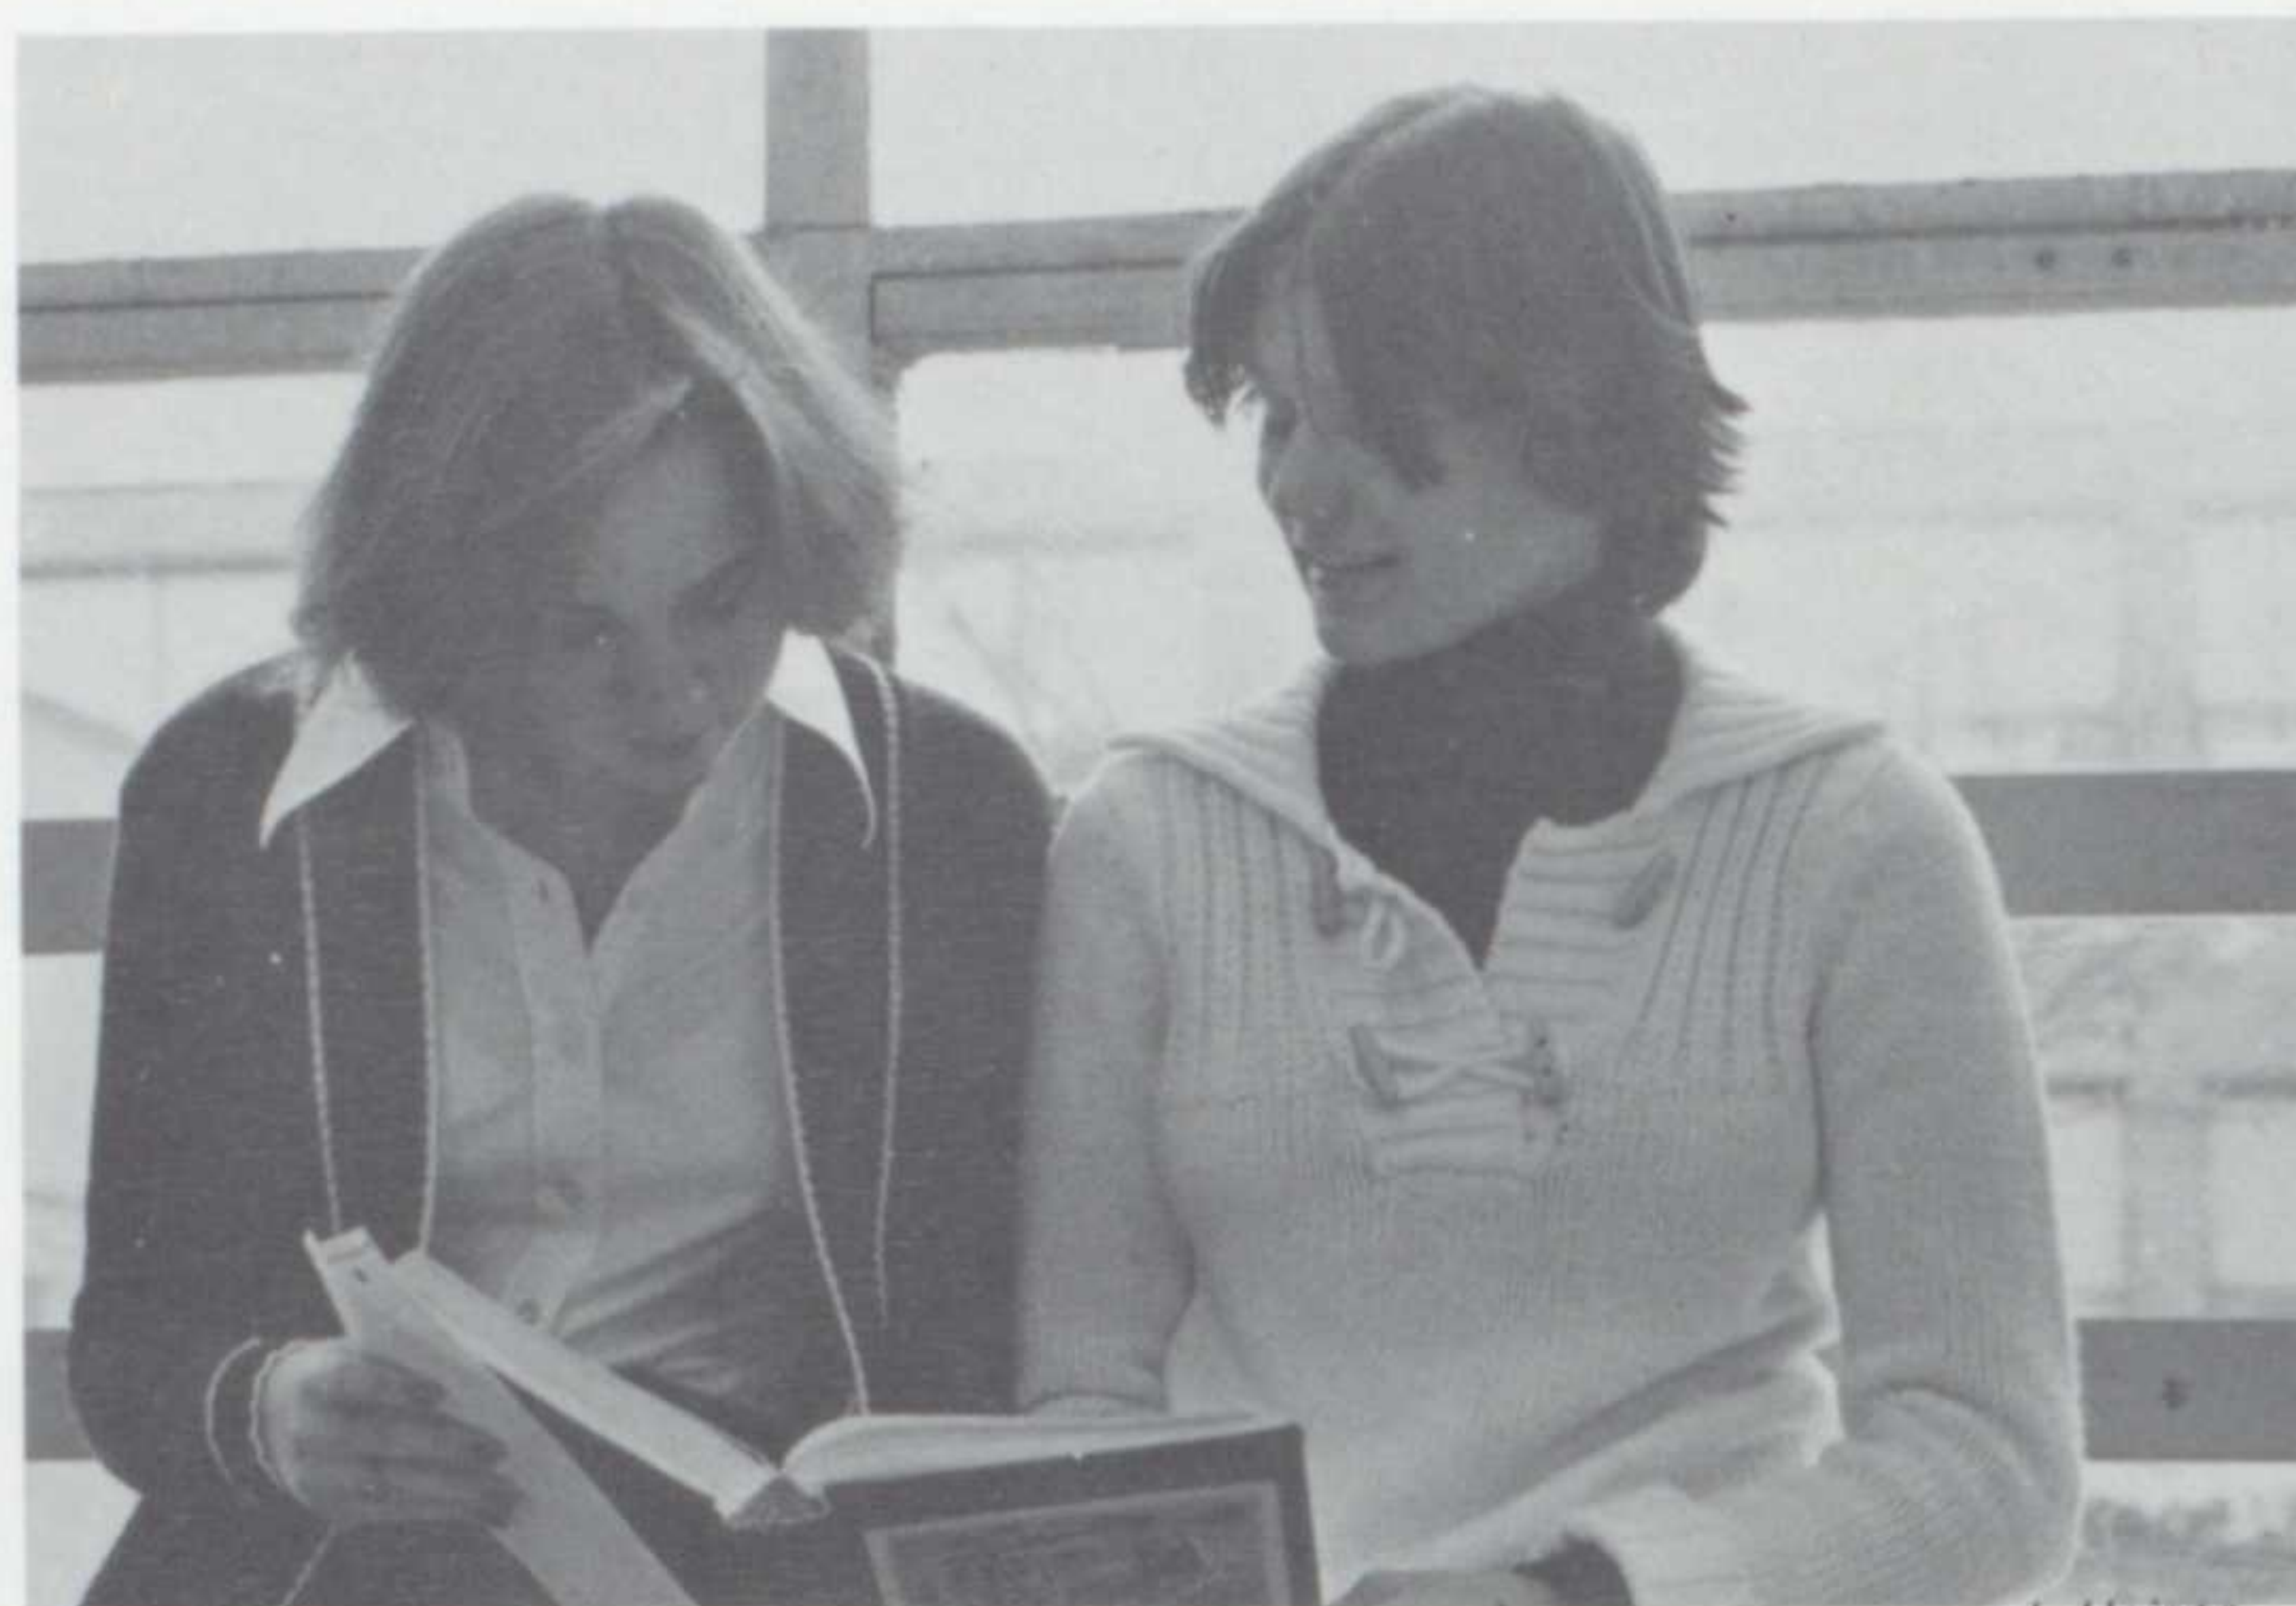

**FRIDAY** Whip cream flying, representatives from every class gorged themselves during the lunch period pie-eating contests.

—J. Heiser

While sporting the Adidas' logo, Chris Ziegler joins mobs of T-shirted students who crowded the halls on T-shirt day.

## Tuesday

—J. Heiser

Although displaying less extreme examples of blue and white day, Karen Stroup and Debbie Moodi still don the School colors to show their spirit.

## Wednesday

—B. Calmus

Gong show participant Terry Fain slips into his impression of Richard Nixon that won him 20 dollars.

—J. Heiser

Additions of crepe paper by Karen Barry and Cathi Budlong help create the float, built in Pam Palmer's barn.

# Friday

The thrill of competition mounts as Doug Crowe and Shirley Shepherd devour lemon meringue and chocolate cream pies.

—J. Heiser

# Thursday

—B. Calmus

Grabbed by "prison guards" Scott Johnson and Chris Nakel, Paul Begnaud must sing the fight song to get out of jail.

—B. Calmus

In order to fire up the rockets for the Avon Lake game, Tom Cowles, co-captain of the varsity football team broadcasts a speech to the crowd.

# We can make it happen → Homecoming '77

continued

## Weekend activities end the spectacular week

**ASSEMBLY** Friday and the assembly rolled around quickly after a week full of excitement. Dressed in their Sunday best, 373 seniors lined up along the gym corridor. The processional began and the class paired up. After the seniors were seated, Mr. Herron and Mr. Scott gave their speeches; then came the announcement of the King and Queen. Pam Baker declared the winners, "Ann Showalter and Chris Low—I mean Jim Zajac!" The traditional kiss was followed by the equally traditional crown drop.

The assembly was over and for the rest of the day echoes of "Who'd ya get?" filled the air.

**GAME** The game was supposed to be jinxed—we hadn't beaten Avon Lake in four years. The Shoremen even sent us an ominous telegram—"If you can't beat River, then you sure as hell can't beat us." We were doomed.

In spite of this curse, Bay was psyched, and spirit was roused when the senior float went around the track. During the pre-game festivities, Ann and Jim were re-crowned by Lance Hamilton and Nancy Thibo, last year's royalty.

With a huge crowd of enthusiastic spectators cheering them on, the Rockets beat the Shoremen, 14-7.

**DANCE** The beam of a huge spotlight lit the way into the world of "Old Movies." The band "Islands" provided enjoyable entertainment, and even though the students couldn't dance on the carpet, the tiled area was sufficient. After the dance, many couples went out to dinner and enjoyed the rest of a romantic evening.

All in all, Homecoming was a success—"we made it happen." ■

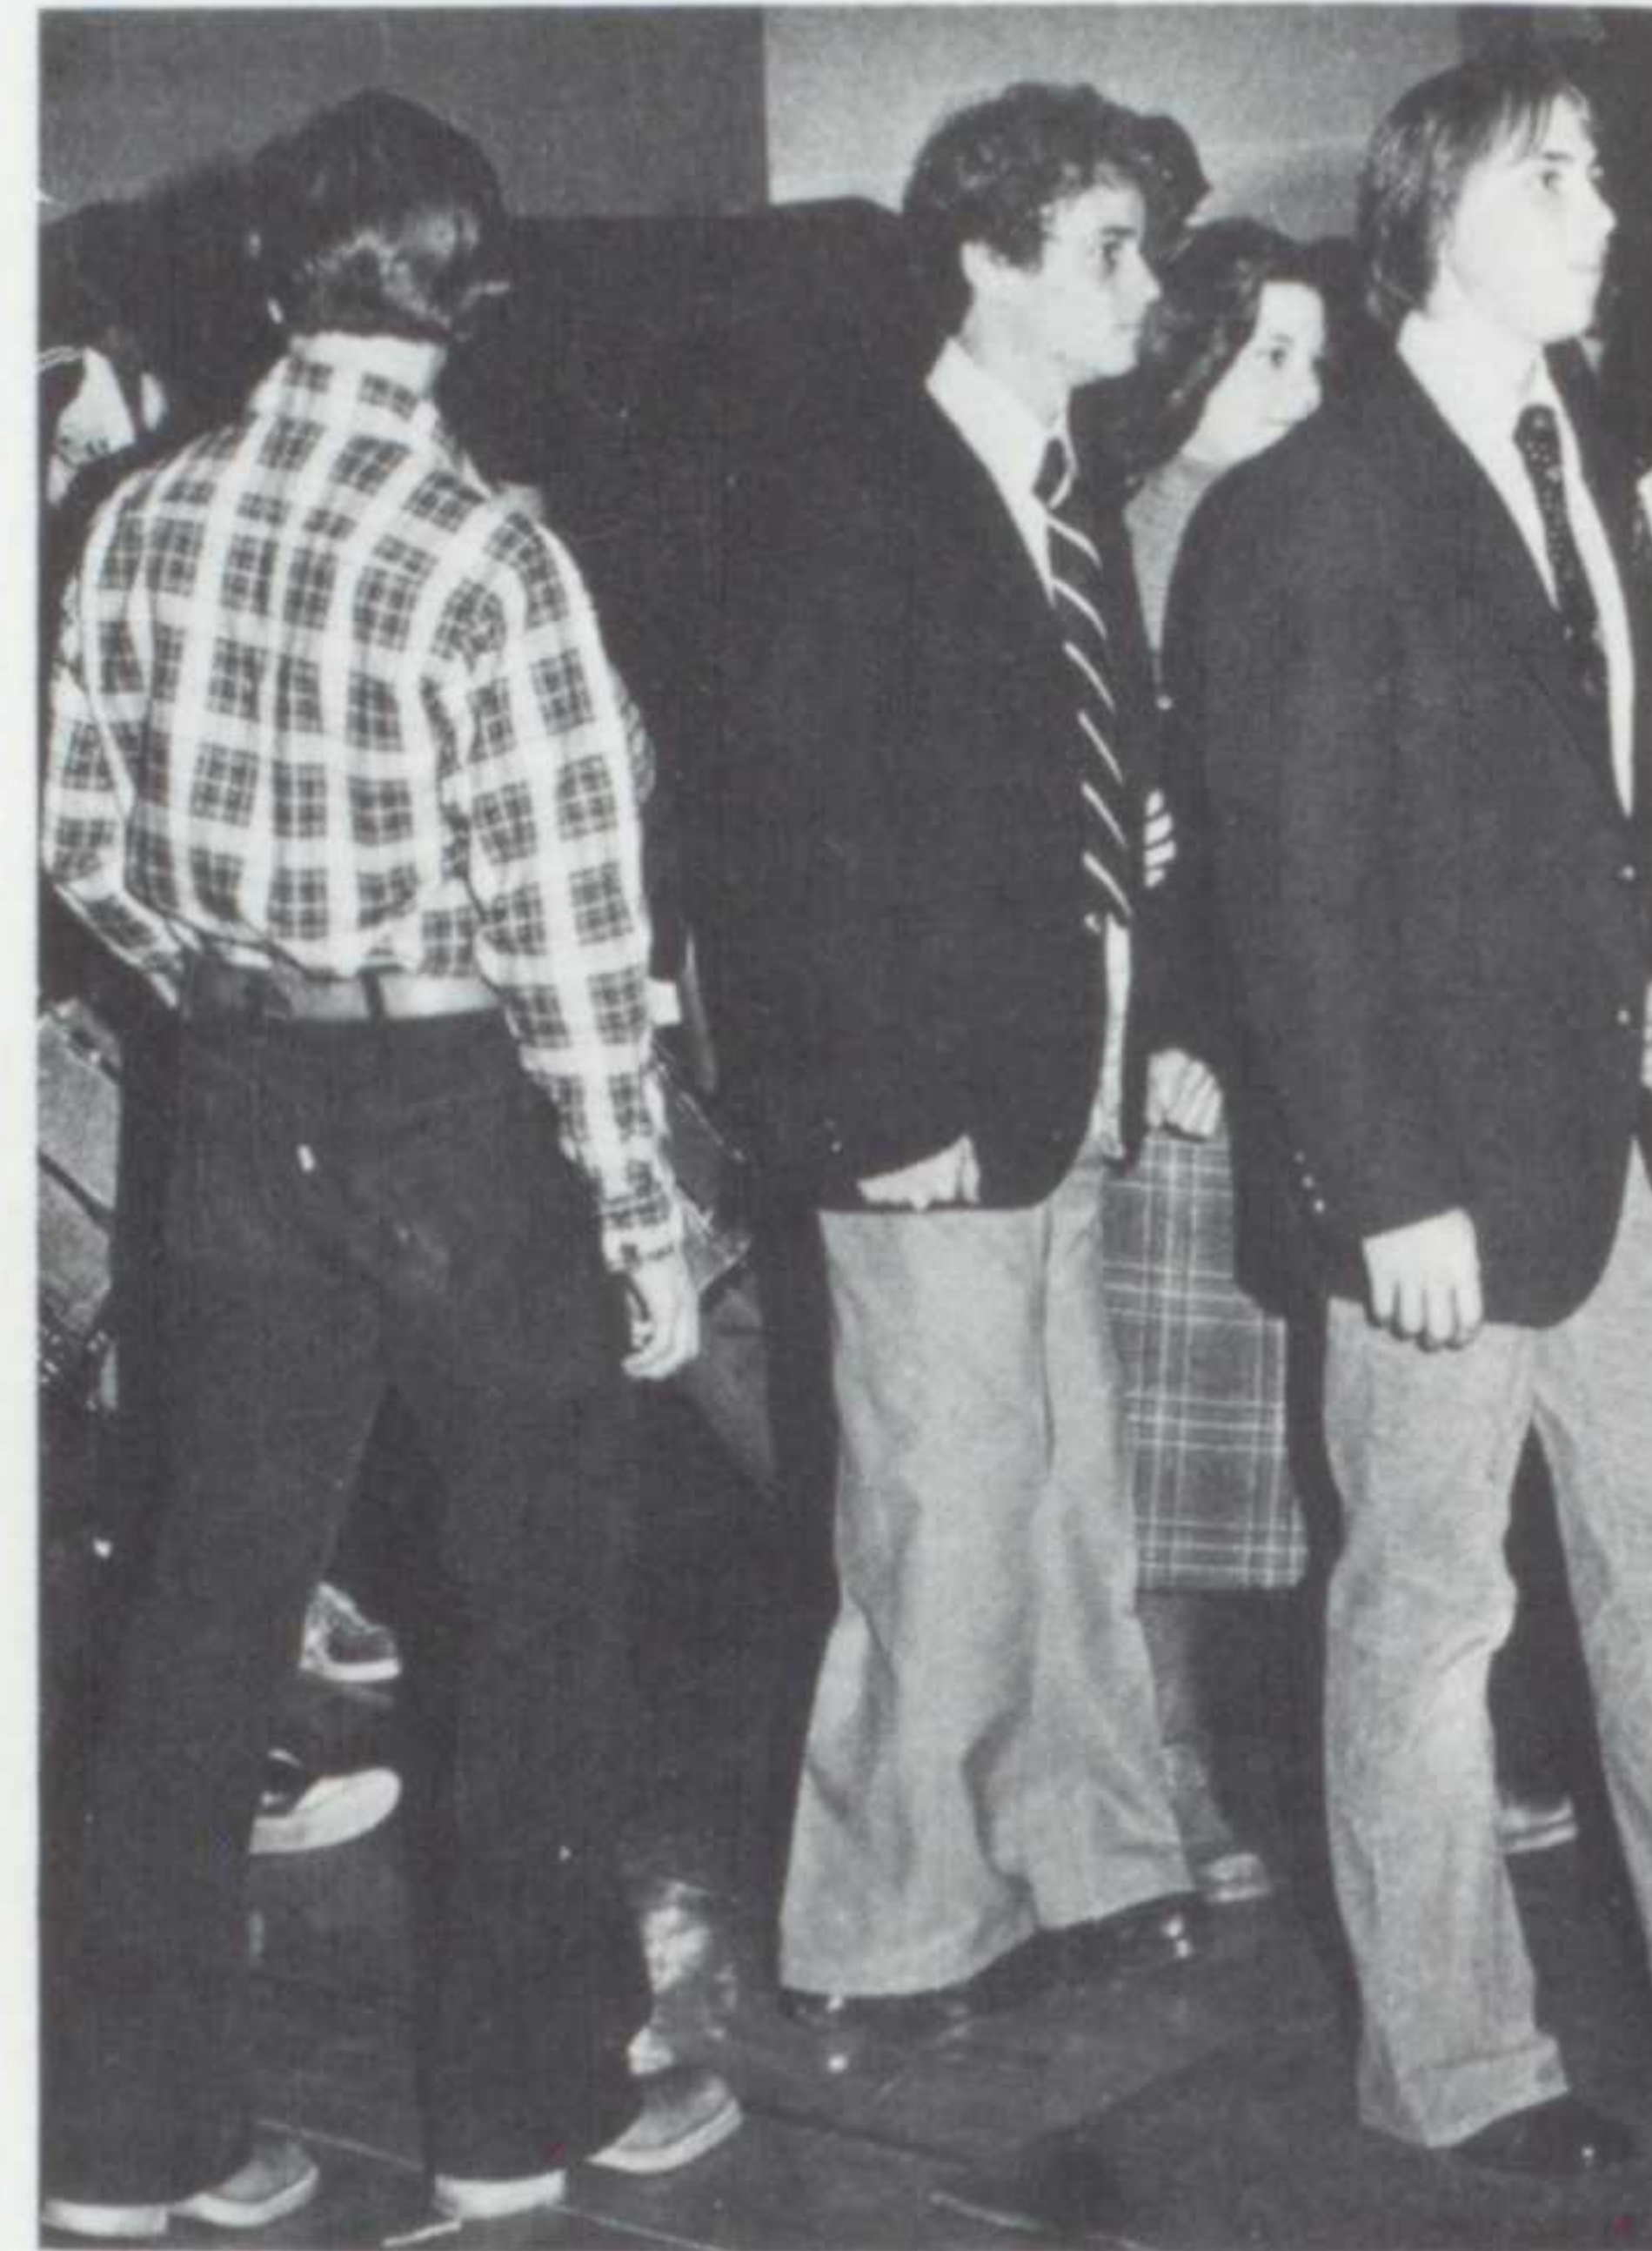

## Assembly

To the tune of "You've Got a Friend", Ned Koster and Annette Russell join the line of seniors filing into the assembly.

As part of her duty as Student Congress president, Pam Baker introduces Mr. Herron and Mr. Scott, speakers at the assembly.

—B. Calmus

—B. Calmus

## Game

—S. Geuther

Last minute details on the float take place before the game. Student donations paid for the float.

Engulfed in roses and fur, Jim Zajac and Ann Showalter, Homecoming king and queen, add the finishing touch to the assembly.

—B. Calmus

## Dance

## OPENING NIGHT

Due to limited space, only the slow songs allowed everyone to dance. Steve Ellison and Sally Sage sway to the sounds of "Islands."

—S. Ormsby

—D. Khyrn

After a scoreless first quarter, the Rockets exploded with two touchdowns and held the Shoreman to one. Matt Alteri and Lee Rholke each scored one TD.

Prior to their introduction to the crowd, members of the Homecoming Court entered the stadium in antique cars provided by Richard M. Kranz, father of senior Jim Kranz.

—D. Khyrn

—S. Ormsby

With two seconds left in the game, the Rockets rest assured of their first victory over Avon Lake in four years.

# Girls Take Over

**“A**re you going to play powderpuff?”

“I don’t know—I heard there might not be a game this year!”

There had been a question as to whether or not the traditional game should be held because the school was concerned about their liability. Last year, two juniors broke their wrists during practice, and the year before, a senior cut her face during the game.

Assistant Principal Richard W. Townsend brought the matter to the school board and received approval for the game. However, if there were any injuries during the game, Powderpuff wouldn’t take place next year.

As soon as they got the go-ahead, the teams began practice. The seniors took over the middle school, and the juniors used the high school. After a week or so, each side heard rumors that the other team was out to kill. With this incentive, both teams were fired-up for the big day.

Bright and early November second, the seniors hit Sambo’s for breakfast, while next door at Mac’s, the juniors gobbled down Egg MacMuffins.

## War paint psychs seniors to slaughtering victory

**After the handoff** from the quarterback, senior Colleen Rooney thwarts Leslie Welch’s attempt to recover the fumble. Seniors gained three yards on the play.

**Confusion over which leg goes first** runs rampant as senior “Rockettes” entertain the fans. Some of the more buxom stuffed their sweaters with balloons.

Later, to get fuel for the game, they munched-out at potlucks. After their potluck, the senior team arrived at the school, complete with war paint and chants of “Boo-rah!” They found that the juniors had thrown away their flags—by mistake, of course! Spirits on both teams temporarily sank at the thought of the game being forfeited, but the flags were recovered, and the game would go on.

Junior Jane Mowery got the game off to a quick start as she ran back the opening kick-off for a touchdown. What a shock to the seniors!

But they were not to be out-done. The seniors dominated the rest of the game by scoring six touchdowns to make the final score 40-6.

The score doesn’t tell the story of the game. The juniors were tough and never gave up, but the seniors had the advantage of experience.

The game created quite a bit of excitement. The **Chronical Telegram** and the **Press** both ran stories about it. What a thrill to see the action of the game re-captured on the 11 o’clock news!

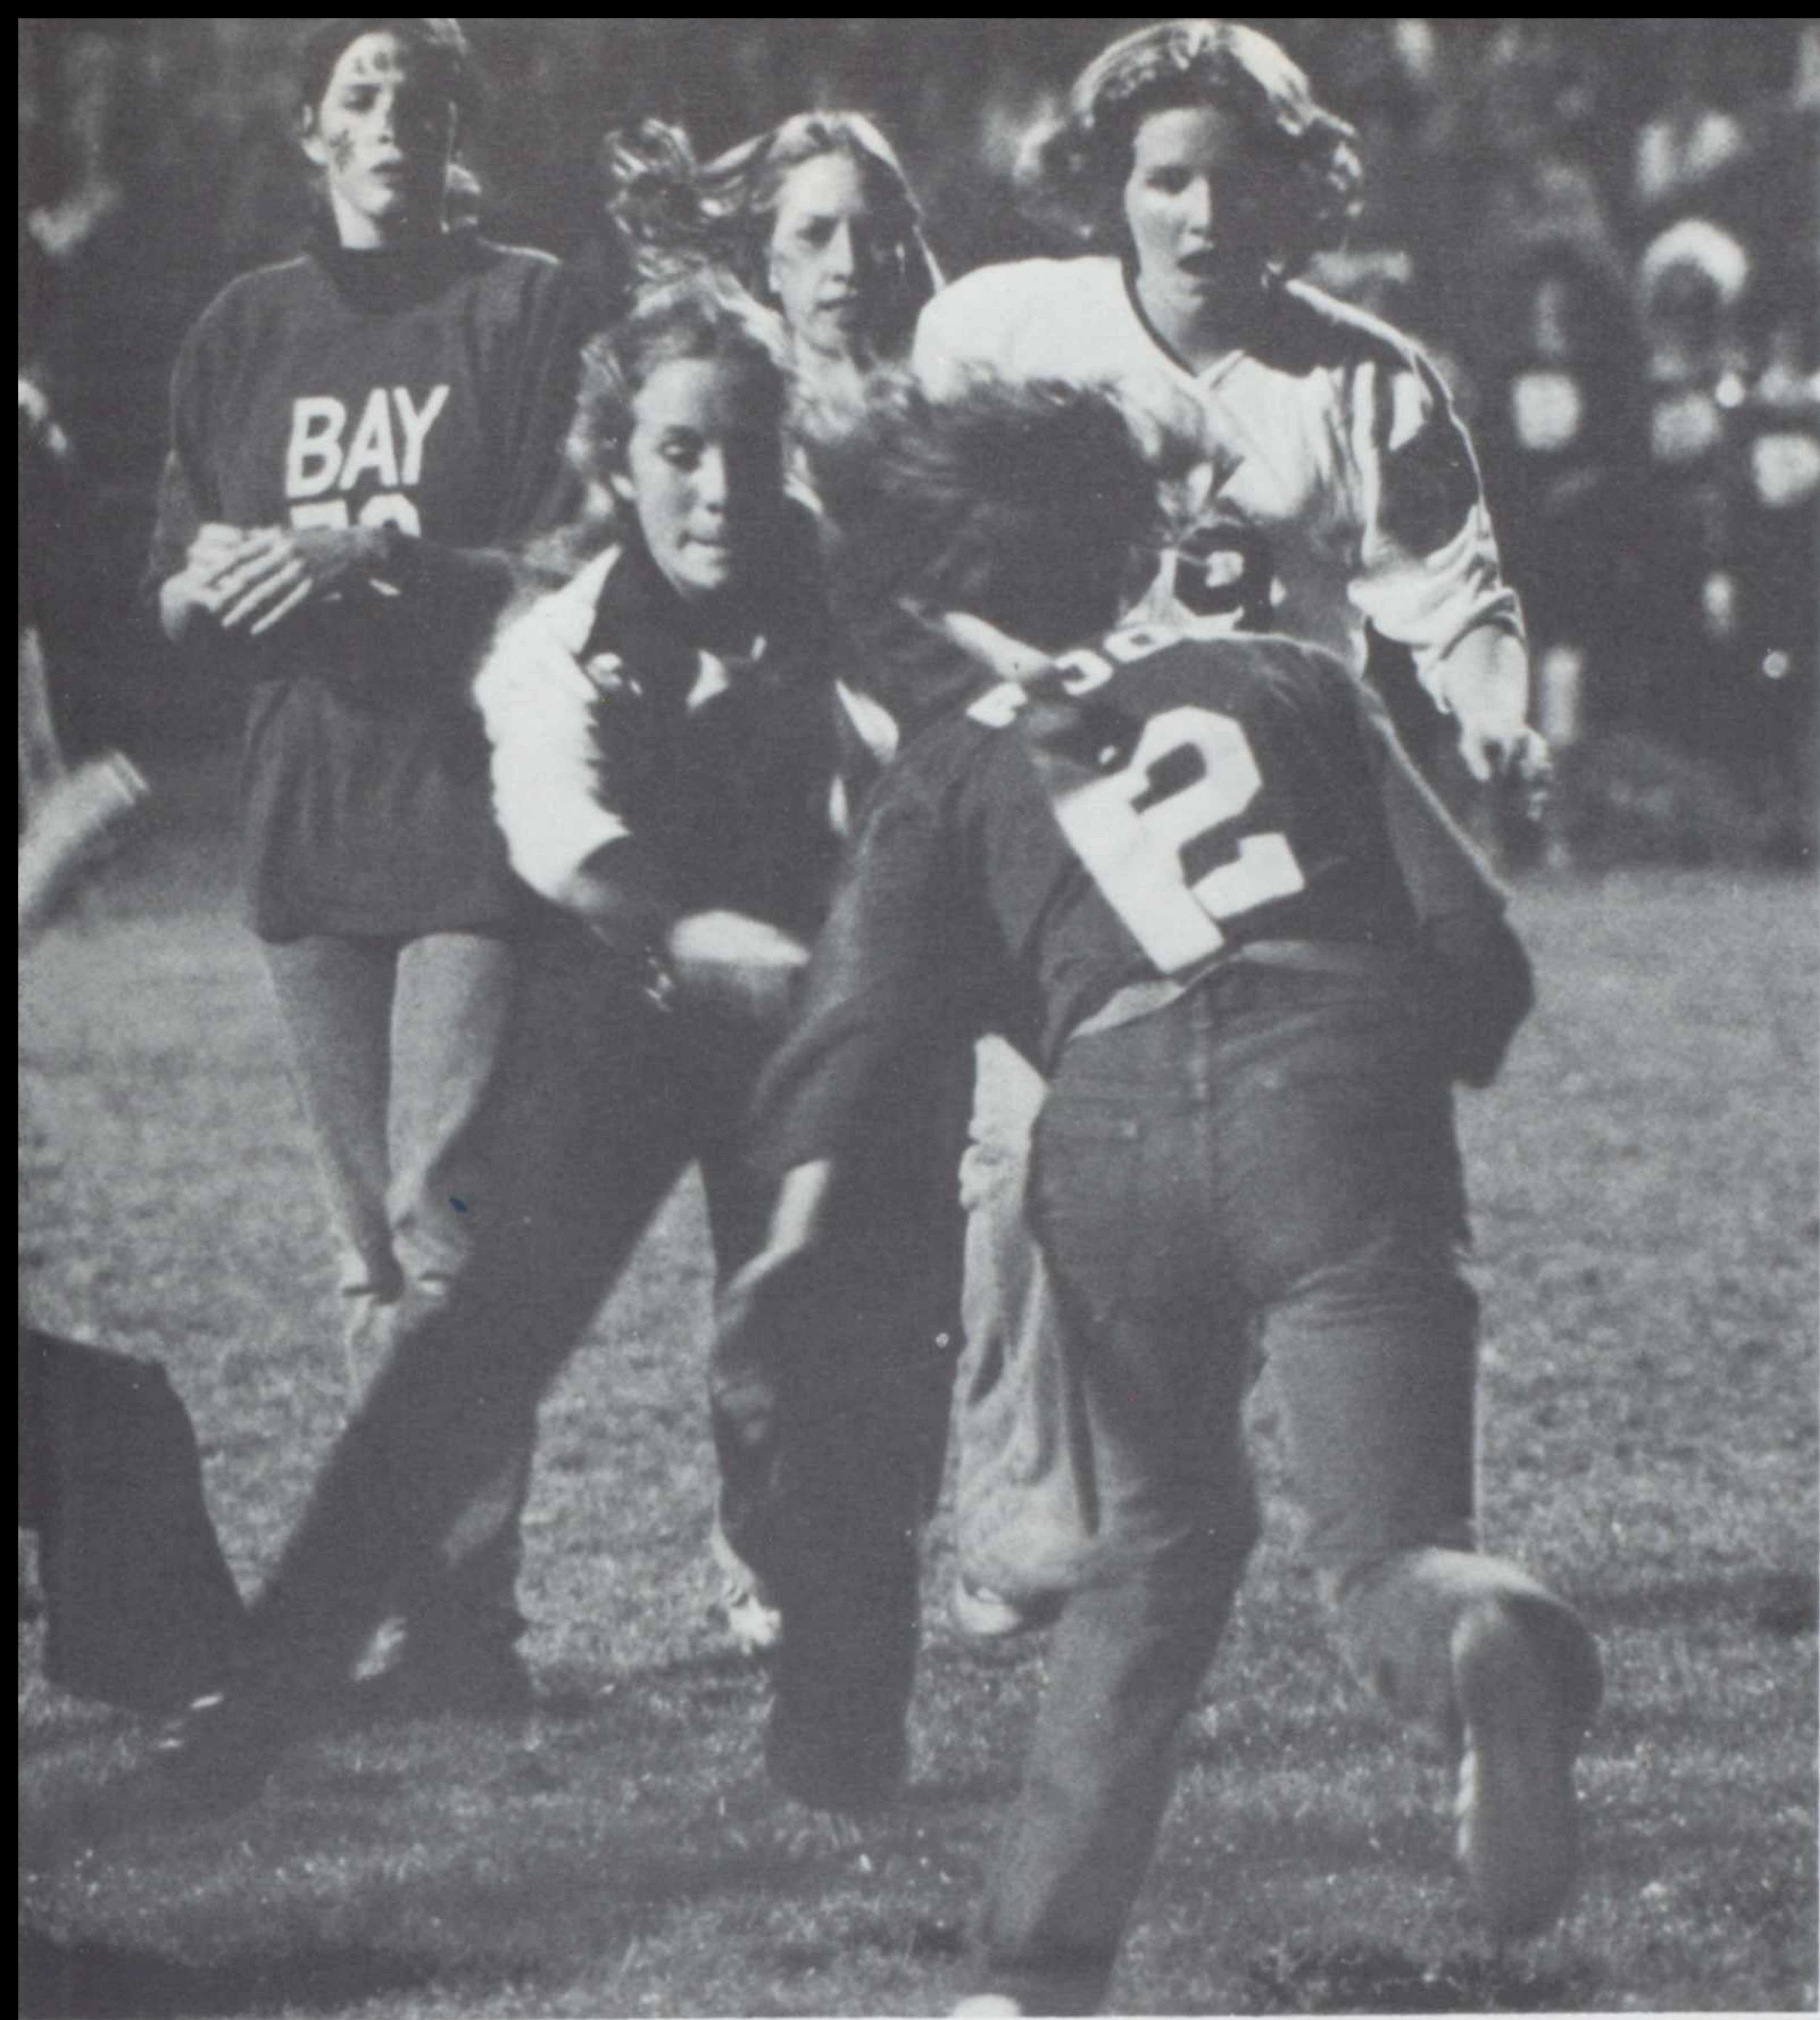

*“Even though I was part of the winning team,” said Laurie Blomstrom, “I hold respect for the junior team.” She continued, “It was satisfying to know that the game was played fairly. The seniors weren’t out on the field to “kill” the juniors. We were out there to beat them—and we did!”*

-D. Khyrn

-D. Khyrn

**Still clutching the ball,** Laura Welsh comes to a halt after an unsuccessful attempt at the extra point. Julie Seed stopped her before she crossed the goal line.

-D. Khym

-B. Calmus

-B. Calmus

-B. Calmus

**Just out of Kim Hitchcock's reach,** offensive halfback Colleen Rooney rushes for a two point conversion.

**Pre-game fortification** at Kelly Webster's potluck gives juniors Nancy Schuster, Nellie Hillenbrand, Beth Woodburn, and Kris Johnson a moment to relax before the game.

**Full of spirit,** the senior cheerleaders wear the uniforms of their female counterparts. Most of them had to wear the skirts unzipped or pinned because they did not fit.

-B. Calmus

**Crepe paper adds a festive air** to the senior potluck held at Laurie Blomstrom's house. The offense brought main dishes while the defense brought dessert.

## Snoball: 'White Christmas' and mistletoe all rolled into one

"Snoball was different; we felt like we were on the outside looking in," commented junior Liz Jones. "The snowflakes and decorations made it seem like we were out in the snow."

Mistletoe, tissue paper snowmen, Christmas trees, snowflakes, and winter scenery all contributed to the theme of "White Christmas."

With stopwatch in hand, Mr. Richard (Boo) Scott timed each couple as they indulged themselves in the traditional mistletoe kiss.

Breathlessly in need of oxygen, each couple took time out to retrieve their favor off of the Christmas tree.

"They gave us a special ring ornament with both names on it,"

explained Brad Scotten, a freshman.

Adding to the mood of enchantment was the music of "Love Affair". Not only did the band play popular songs, but they also performed well on stage. A highlight of their show was the number in which one group member donned a Santa suit and did a dance to their original song, "Disco Santa Claus".

In spite of the mystical atmosphere, many couples felt that a damper was put on the evening because of the limited dancing space. Dancing on the carpet was forbidden, which crowded couples together on a minimum amount of uncovered floor.

All in all, the dance went well due to careful planning by the Snoball committee. ■

**Stopwatch in hand**, Mr. Scott times couples' kisses upon entry. Laura Charvat and Dave Mowery held the record for the longest kiss, unofficially a minute and a half.

**"Love Affair's" lead guitarist** wore many unique outfits, including a Santa suit for their version of "Disco Santa".

-D. Khym

## Girls Take Over continued

**After putting their coats** in the cloak room, Carol Hoover and Paul King hurry to make the best use of their time under the mistletoe.

**In front of a winter background**, Michelle Lauth and Pete Sac get their picture taken by Hal Briggs for a mere \$5.50.

**In preparation for Snoball**, Lisa Lowrie, Karen Laurson, and Karen Zisko paint a mural to transform the cafeteria into a "White Christmas".

## Something new from Out of the Blue

—J. Heiser

Did you know that your literary magazine could have been named "Lullabies and Revolutions"?

That was just one of the many titles suggested when we renamed "Bay Bits" to "Out of the Blue".

The decision on a new name was not an easy one. We decided in May that we wanted to change the name. A summer spent think-

**Busy working overtime at home,** Doug Kirsop enters the corresponding numbers of poems submitted so that he can write out rejection or acceptance slips.

ing of new titles led to the beginning of school, and several more hours of brainstorming. Finally, the field was narrowed down, and a list of fifteen possible names were placed on a ballot. We voted, and "Out of the Blue" came out on top.

Our adviser, Ms. Ghezzi, is also new. Although she has never advised a publication at BHS, she was the yearbook adviser at Perkins High in Sandusky, where she taught four years ago.

Although the first "Bay Bits" was published in the late 1930's, it did not become a yearly publication until the early 1960's. Many changes have occurred at BHS since then, but the literary magazine has retained essentially the same character.

I assign a number to all prose and poetry submitted to the magazine and then remove the author's name. This is done to help ensure an unbiased decision by the selection board.

After being accepted by one of the two selection boards, double selection board is the final hurdle for submission. This double screening is necessary to determine the best fifty to sixty entries from the nearly five hundred submitted each year.

Obviously, if something is accepted, we didn't just take it out of the blue.

—Doug Kirsop

—S. Teschner

**At one of their Thursday meetings** in room 106, the selection board studies the possibilities of a new submission.

# NEW IMPROVED

**Head of the circulation staff**, senior John Griffiths, has the job of writing the names of all subscribers in the top right hand corner of each paper.

—H. Briggs

**In an editorial board council**, Janet Schell, Laura Mogyordy, and Jim Zajac decide upon the use of a topline. The Window used more of them than ever before.

—S. Teschner

**Engaged in eating**, Robin Trioia proof reads her page for the last time. Usually the staff finished the paper by Tuesday night.

—S. Teschner

While Janet Schell and Robin Trola read over their stories, Jeff Tiefermann and Randy Nyerges eat their usual Monday after afternoon munchies to tide them over until dinner.

Numbers like 4418, A730, and 1712 became common vocabulary to Amy Finch and Carol Sullivan. The symbols designate headline styles.

—S. Teschner

## New year's revolutions

continued

—S. Teschner

Things that revolve: doors, lazy-susans, and *Bay Window* editor-in-chiefs. That's right! While tradition-

ally one editor-in-chief was selected, four students, Jim Zajac, Janet Schell, Terry Kiskin, and I shared this title

and rotated the duty every six or seven issues. All four took part in decision-making and other business, while one editor dominated during his particular term.

Some felt this new system went well, but a few editors found major faults. Sports editor Randy Nyerges explained, "The editors that weren't in service at the time seemed to be missing. I thought it was garbage. The editor-in-chief is supposed to have some authority. I didn't see how they could practice authority when by the time they took control, they were gone."

Why did the editors and staff sacrifice seven and a half hours a week to put together one of the only two weekly high school newspapers in Ohio (most are bi-weekly or monthly)?

Co-editor-in-chief Janet Schell declared, "I liked the idea of helping to guide the way students feel about certain things at school through editorials."

Randy Nyerges observed that "cookies and pretzels were always plentiful." (We spent approximately \$3 a week for munchies on Monday since the editors missed a regular dinner.)

If the news page was exceptionally spicy, it could have been the ginger snaps.

—Laura Mogyordy

—S. Teschner

With **sno-paque correction fluid** at her side, Val McMullin finishes a story. Typists worked every Monday and Tuesday.

**Grim faces** pervade the mass meeting of the *Window* staff. The editors-in-chief announced that they had to sell more ads to keep within their budget.

**Proofs, a sample page** sent by the company for corrections, occupy the watchful eyes of Becky Rothfusz and Sue Coffin. This particular package consisted of 32 pages.

**Bauhaus light,** the type style used in the Senior Section, comes in three sizes. Karla Mayock, Rhonda Clark, and Martha Raymond decide which to use.

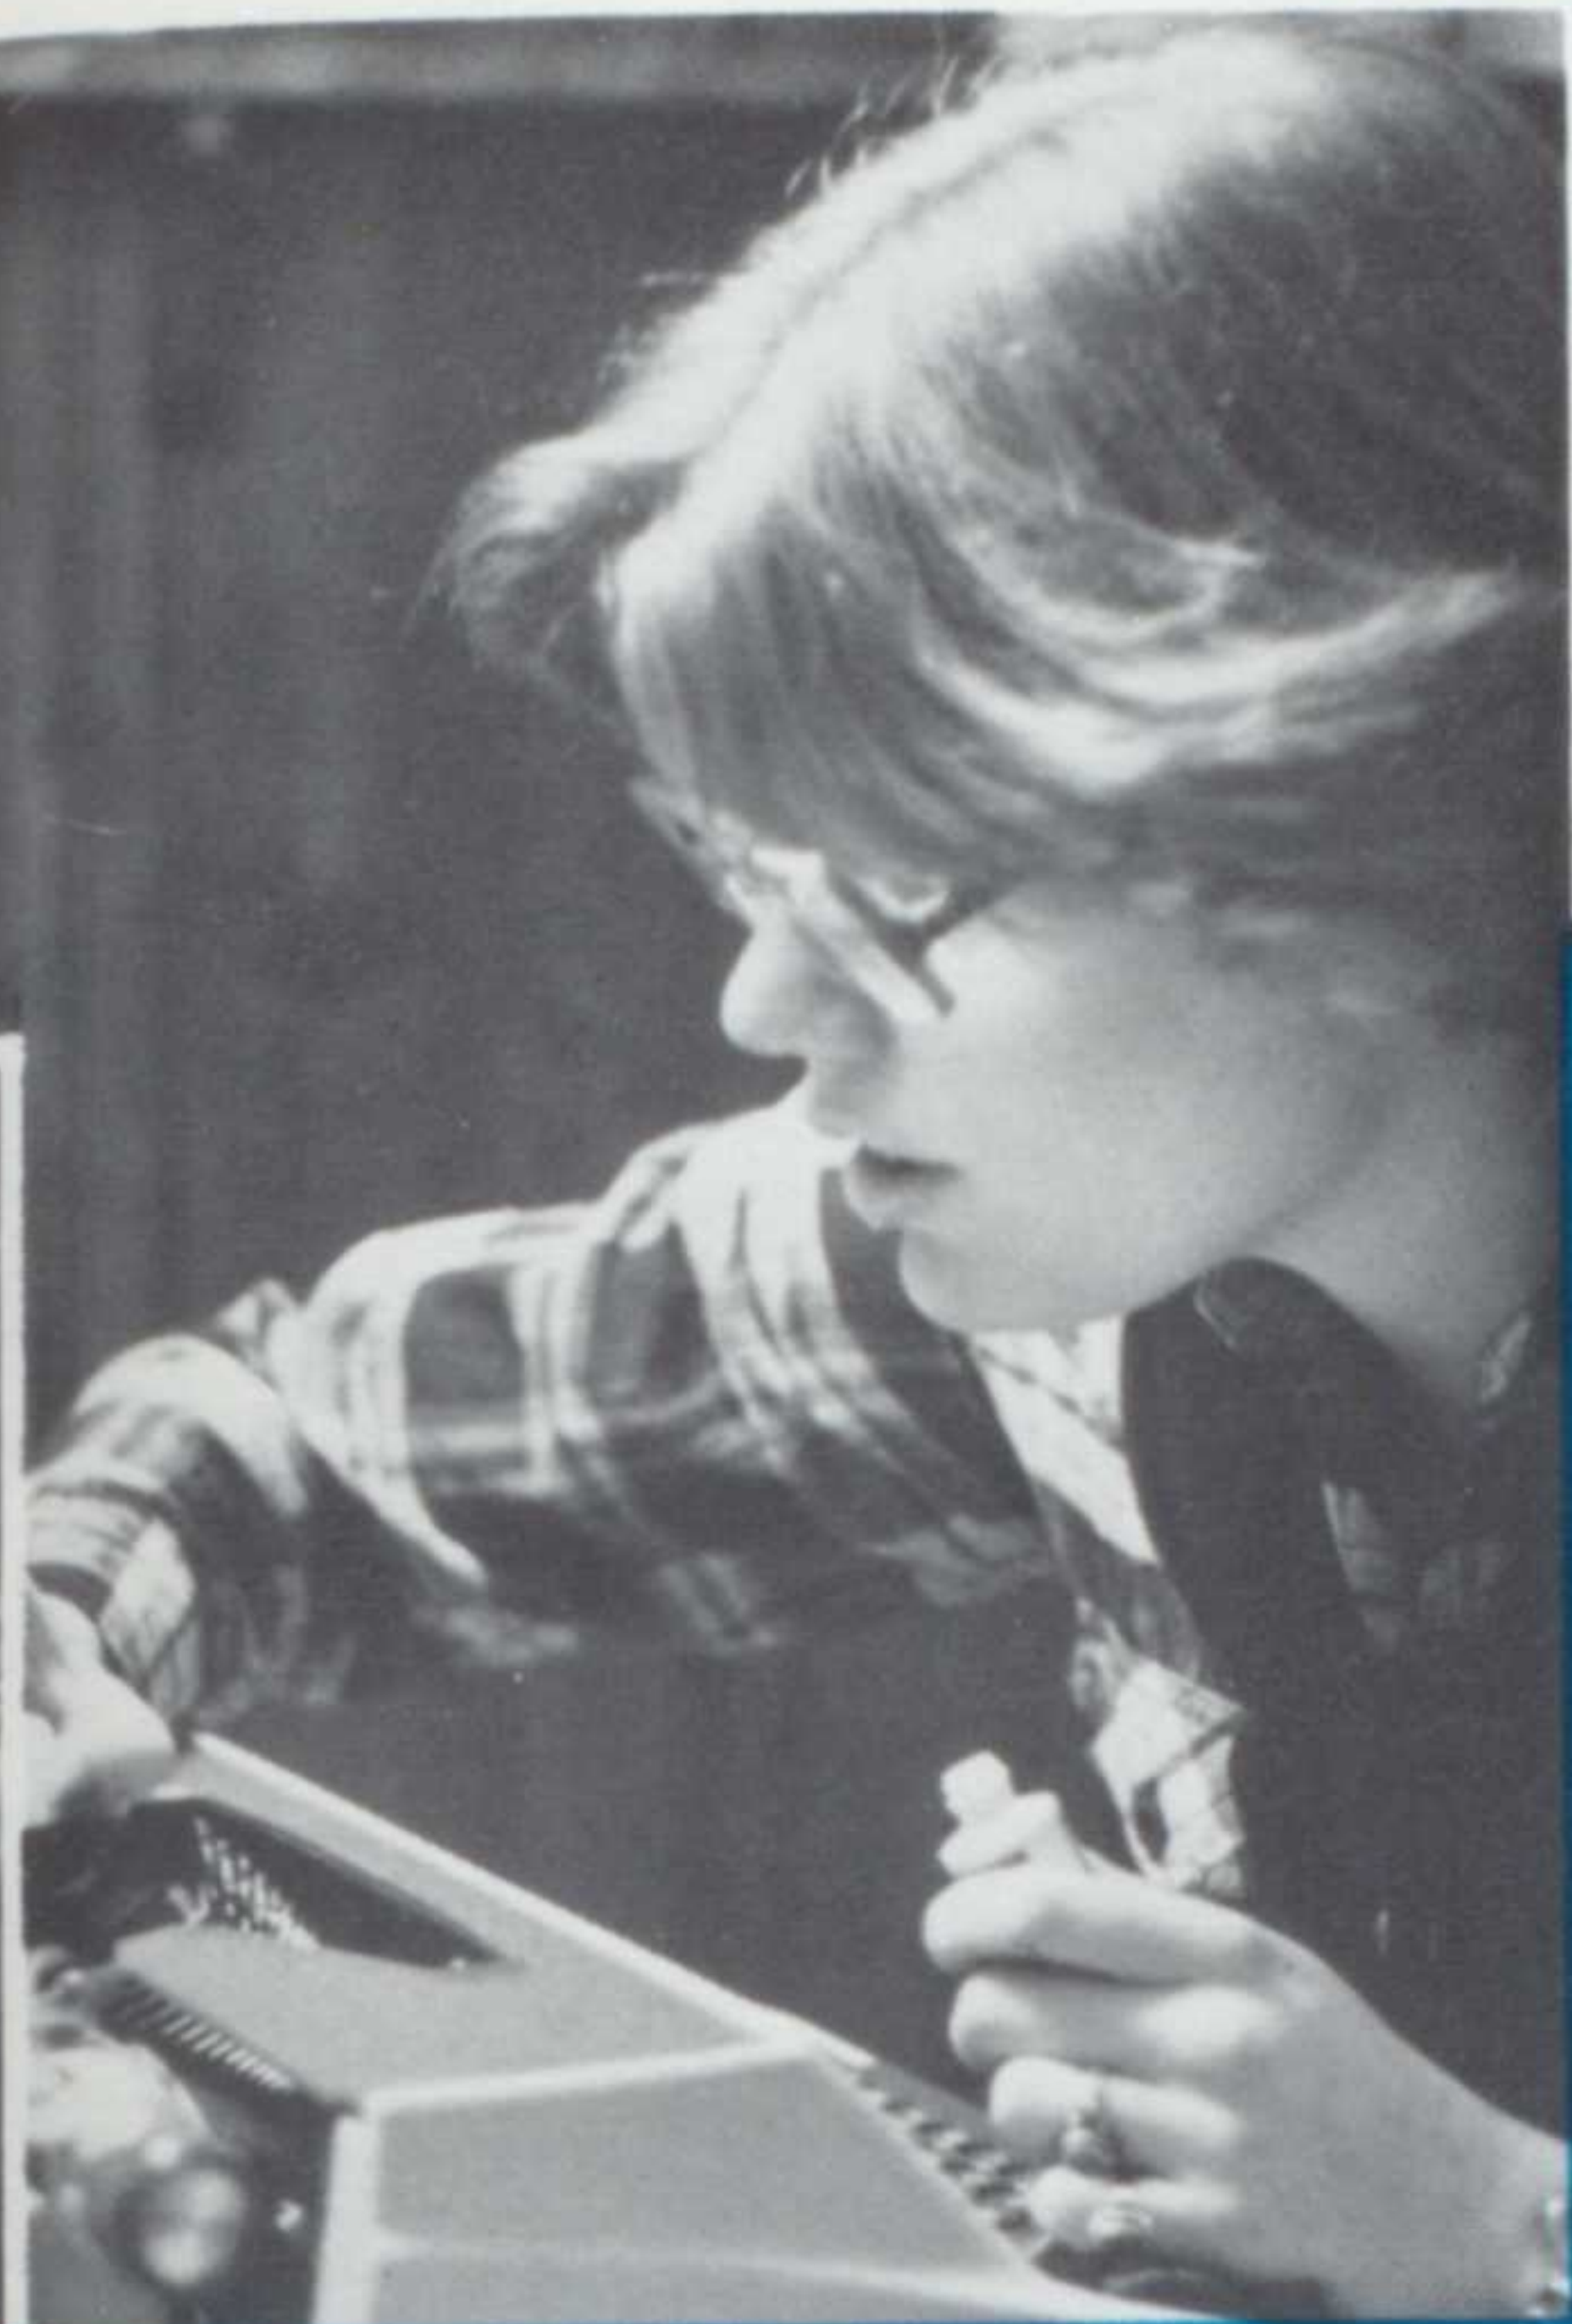

-J. Heiser

**Although they each** have their own darkroom, photographers Dean Khym, Bob Calmus, and Jay Heiser have use of the school's.

-J. Heiser

## New system improves handbook

-J. Heiser

"By the time we crawled up from the basement, it was spring, and the book was done," remarked co-editor-in-chief Martha

Raymond about the making of Handbook '78.

Surprisingly, work began on the yearbook back in May of 1977. The

**In John Davis's basement,** Laurie Meeks and Donna Shore combine to write a difficult caption. Three deadlines took place there.

**For a moment's rest,** co-editor-in-chief Susan Fain pauses on the staircase to answer a question. She was in charge of seniors and academics.

-J. Heiser

-J. Heiser

editorial board, comprised of the only five people who had any previous experience, met weekly to discuss the structure and organization of the '78 book.

With the benefit of a summer workshop at Hiram College, editors met each week during the summer and finally eeked out the theme/concept "Where do you go to find?"

After the selling of a new record of \$4,000 worth of ads, production started at the end of October. "The first major deadline was a real shocker for most of the new staffers," recalled Rhonda Clark, co-editor-in-chief.

Like everything else, the 288 page yearbook was affected by the adverse weather. Forced to relocate in several different basements, the staff grew accustomed to subterranean dwelling for the next four months.

Temporary breaks in the creating of the book involved workshops at Bowling Green and New York City.

When deadline number seven rolled around at the beginning of March, the staff breathed a sigh of relief and sent in the last 28 pages to Inter-Collegiate Press, located in Kansas.

"It was kind of a shame to see it all end. Then, all we had to do to keep busy was wait until it came out at the end of the year," summed up underclass co-editor Sue Coffin.

**Eyes glued to the paper,** co-editor-in-chief John Davis counts the number of lines of copy. John sold the largest amount of ads.

**Nearly every Friday morning,** AFS has a donut sale between first and fourth periods. Katy Brown and Brian Toole sell donuts for 20¢ a piece.

**At a summer AFS party** given by Sherry Guether, Tess eats a pretzel while Janet Onstott stands by. AFS invited members of all clubs.

**A**FS is more than just a free trip to Japan or Mexico, or anywhere else. True, they do send students (like Diane Vogel and Gail Christofferson) to other countries, but that isn't nearly everything they do.

First, AFS hosts students from other countries. Christina Bologna from Argentina and Tess Avendano from the Philippines stayed with the Weitzel and Mугan families, and both girls found that life in the United States was quite different from life in their countries.

Cristy observed that "the way the school works is different. The students do a lot for the school and are very active."

Tess found the weather to be exciting since she had never seen snow before. "I love the snow," said Tess. "And I love to play with it."

Both Tess and Cristy had communication problems in the

beginning. But they found students and teachers to be very helpful, and therefore caught on fast.

In order to host and send students abroad, AFS had many money-making projects. They were in charge of setting up the underclass pictures and the AFS talent show. Friday mornings they sold donuts, and in the fall had an international bake sale. AFS was also in charge of the annual carnation sale, which is a big hit every Valentine's Day.

AFS is a social organization as well as a fund-

raising club. They have a combination Christmas-fondue party in December and go on retreats in the fall and spring. They also exchange students with nearby schools for a day to see how they run their school and to let them observe ours.

In spite of what is thought, AFS is not just a club for the few who are chosen to visit another country.

## AFS: We're going places

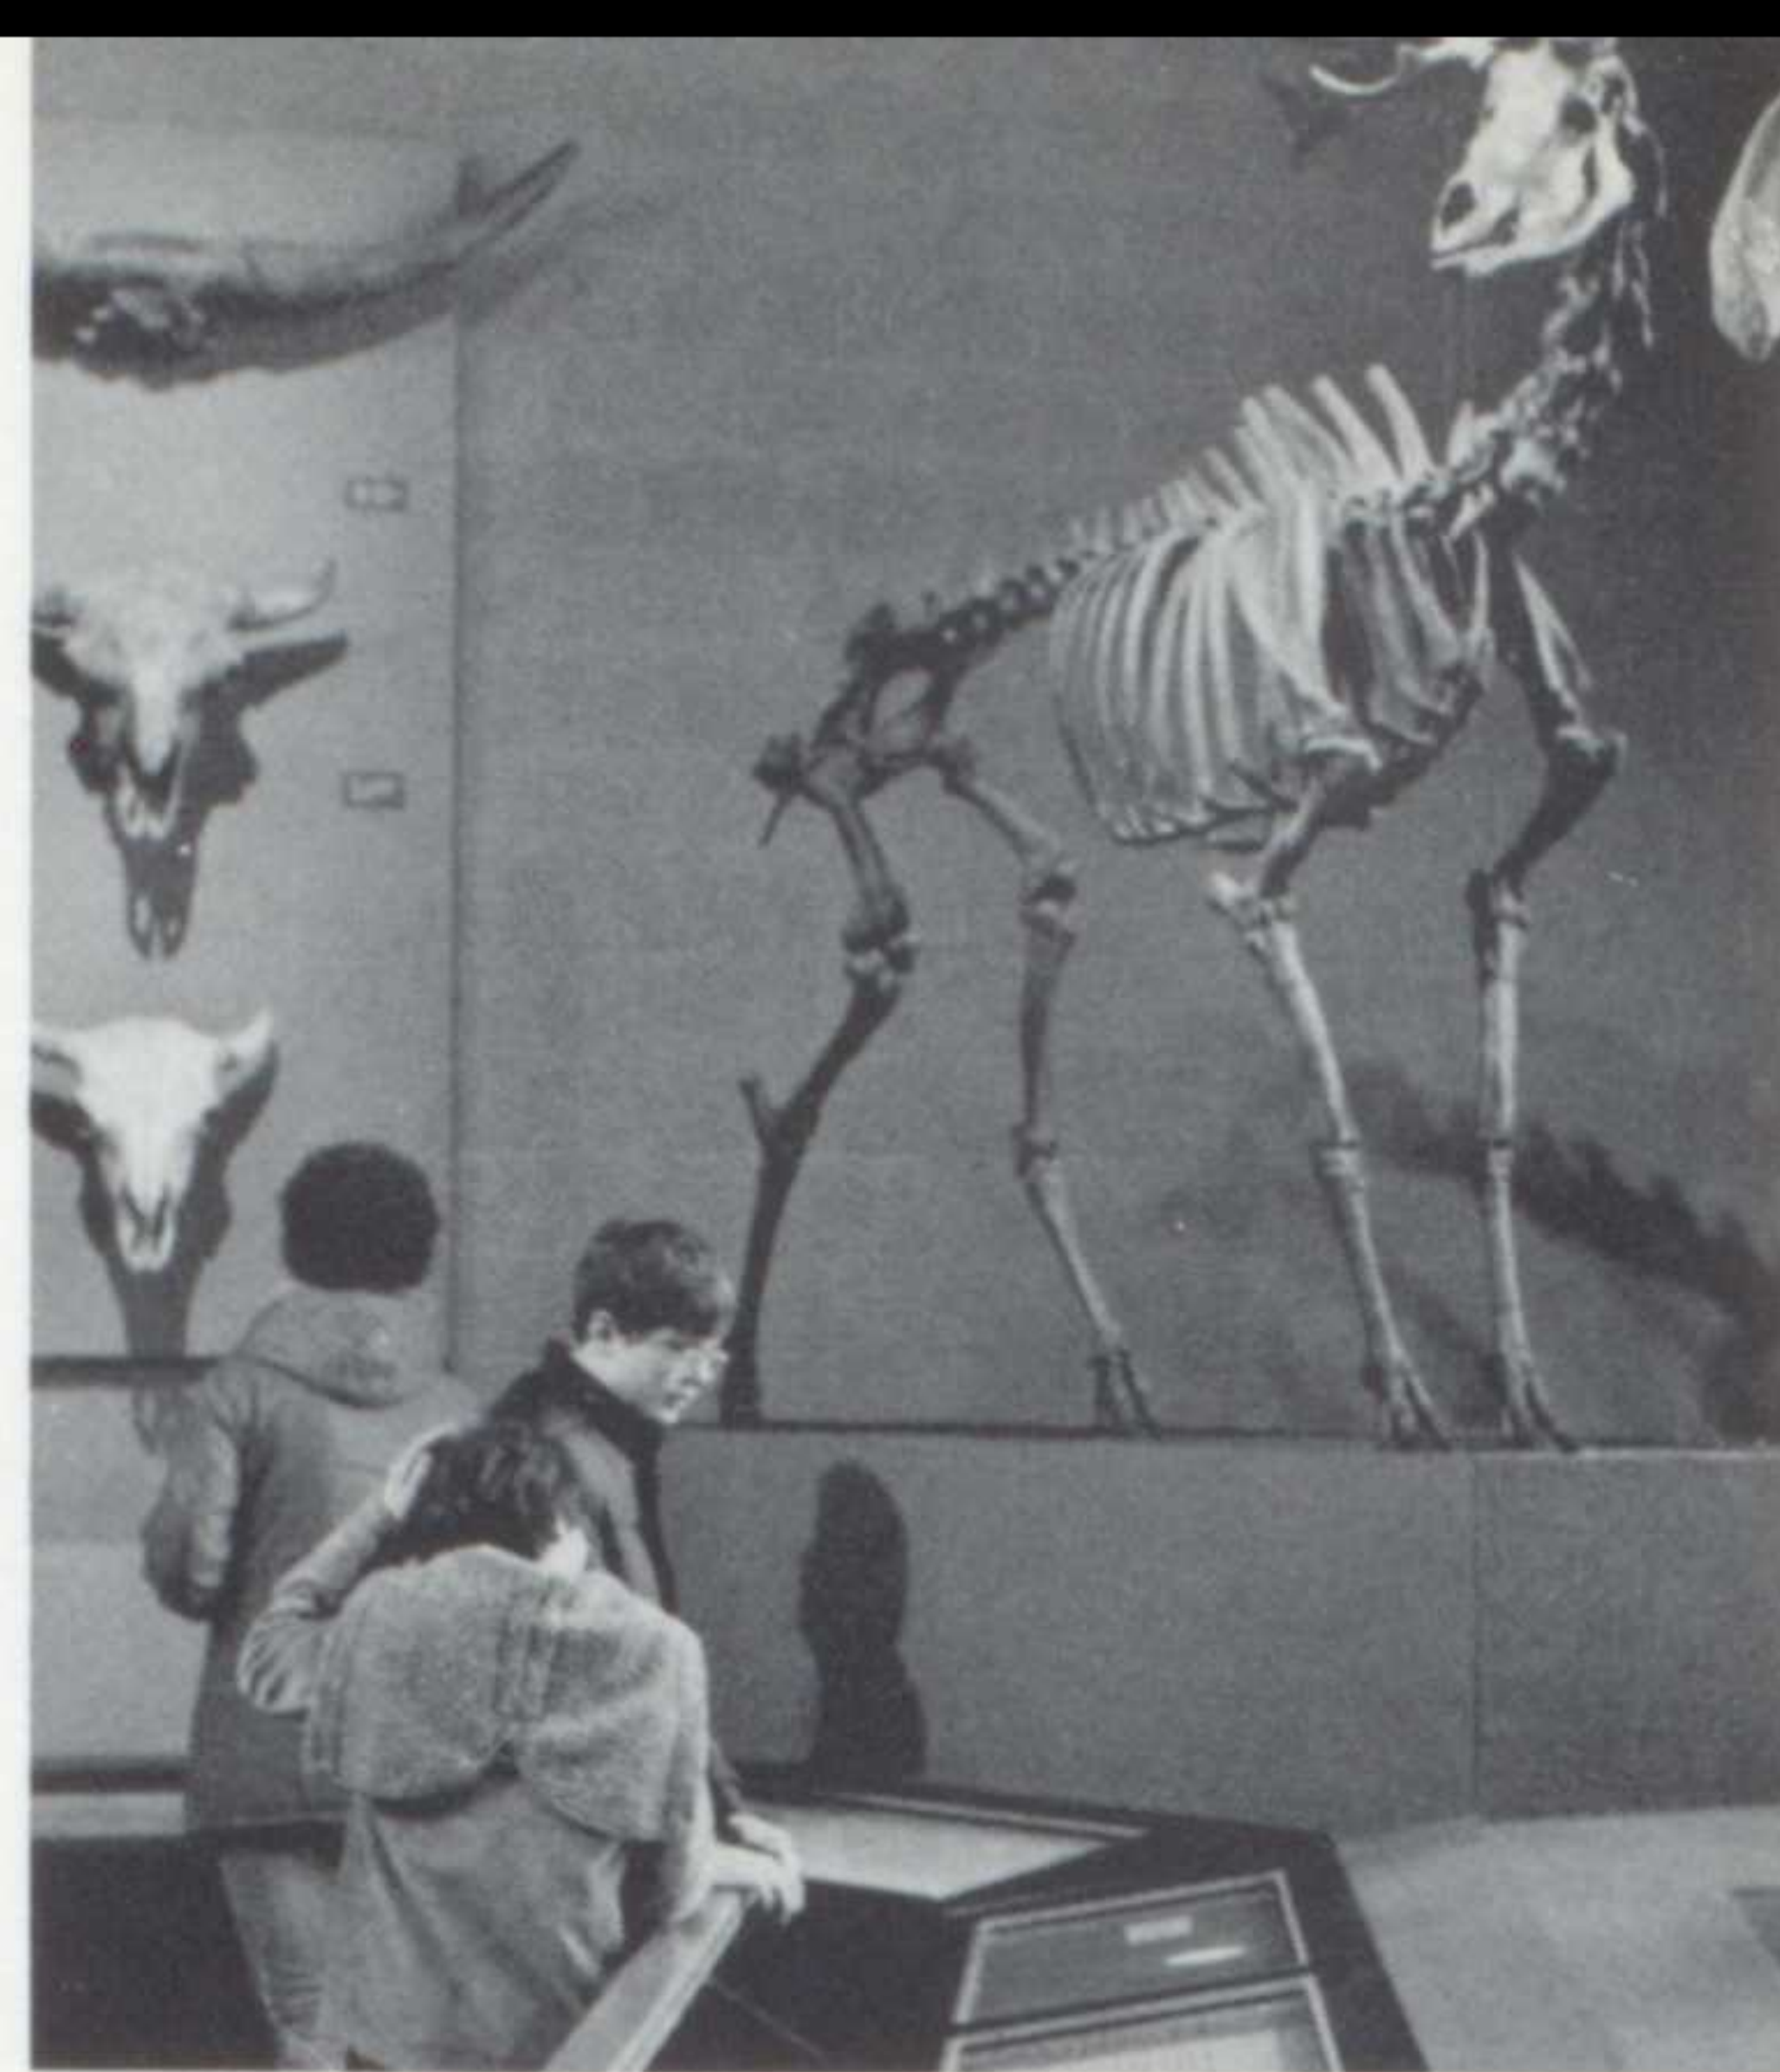

# Climb up to the clubhouse

**After experimenting** with parliamentary procedures for one meeting, Tom Alten and John Griffiths decide to go back to the club's original format.

## Climb up to the clubhouse continued

Only a few students at BHS take time to read the strange misspellings on the small black sign in the office corridor. This is the outward and visible evidence of a very active group—the Science Club. Its twenty-five members are involved in incredible efforts to better the school, and have a little fun in the process.

Their year started out with a trip to the Health Museum, highlighted by Juno, the transparent woman.

Throughout the following months, the group held a variety of fun events, such as a party, a tobogganing trip, and a visit to NASA.

Money-making projects are also a large part of the group's agenda. Each month, a paper drive was held with the profits going to charities or individual funds. "I really enjoy paper drives," Todd Lewis explained. "They're fun and help the club make money."

To increase the profits of their January paper drive, the Science Club initiated a competition between the guys and the girls.

Two other money earners, the annual Christmas bazaar and flea market, were held in preparation for the club's big trip.

They traveled to Toronto over Memorial Day weekend. The Museum

of Science, one of the best in North America, occupied much of their visit. They spent the rest of the time sightseeing in

### Social and learning activities boost Science Club involvement

the Modernistic city. "I was really looking forward to the trip," Mike Teiberis said.

Everyone is invited to Science Club's meetings, which are held every Wednesday morning at 7:30. You can find the agenda and more information on their sign—if you can decipher it!

**While waiting for Scott Totten** to arrive as Santa Claus, inner-city children munch on cupcakes and pepsi. The Junior class donated the stuffed penguins for the kids.

**Amidst the clutter** of the publication room, secretary Bonnie Bucher types up the minutes of a recent Student Congress meeting.

**One of twelve Red Cross workers** watches over senior Chuck Gebben while he donates his pint of blood. Student Congress sponsored their second annual Bloodmobile.

-D. Khyrn

All Student Congress sponsors is Homecoming. Period. Right? Wrong. Many students associate Student Congress only with Spirit Week and Homecoming, and then assume that Congress retires until next year. However, Student Congress does more than plan Homecoming.

Their year started off in the summer at Bay Day, where they ran a snow cone booth. The five flavors brought in 484 dollars for their treasury.

At the football games, Student Congress operated the concession stands. Candy bars, hot dogs, donuts, and beverages made up the menu and drew 120 dollars per game.

In October, Student Congress was in charge of the American Cancer Bike-a-thon. About 100 bikers pedalled through-out Bay and earned approximately \$2,000.

Their next activity was the Christmas party for inner-city children. Student Congress spent two months planning for the event, which took place on December 18th. The money collected from students was enough to give each child three gifts.

Another of Student Congress's responsibilities was the Bloodmobile in January. Work on this included publicizing the campaign, reserving the auditorium, and signing up students. Sixty people volunteered to give a pint of their blood, and each donor received

cookies and lemonade for their services.

Student Congress was quite successful in staying involved with the community. However, they had a little trouble involving students in Student Congress. Junior Doug Crowe commented, "If Student Congress is used effectively, it could help the school out in a number of ways. What we really need is involvement and ideas from anybody and everybody. We have the power, all we need is the enthusiasm to get the ball rolling."

John Davis was objective about the 1977-1978 Congress. "A problem

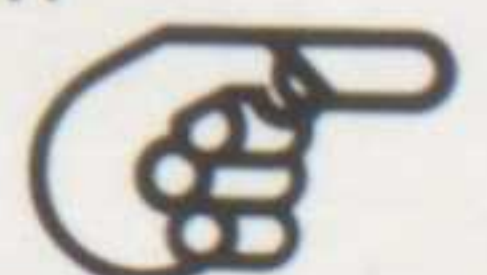

solved this year was that a diversified group of people were elected to it—not the same type of people over and over. I do think, however, that there were

## Homecoming's just the beginning for Student Congress

some leadership problems that came from inexperience. Not as much was accomplished as was promised."

Though Bay did not become the perfect high school during Pam Baker's term, she is quite pleased with her year as president. "The people that were in Student Congress this year were great! I don't know if they came to the meetings to get out of class or what, but some terrific ideas were discussed, and I had fun working with them."

Student Congress is in charge of Homecoming? You guessed it! But that isn't all, they remain active throughout the year.

**In charge of turning on** the PA console, Eric Cramer adjusts several knobs and buttons and then gives the signal to begin.

## Climb up to the clubhouse

continued

As the saying goes, "It's quality, not quantity, that counts." And that should probably be the motto of some of BHS's smaller clubs, whose memberships are less than twenty each.

KIS and Key? Yes, they still exist. The yearbook prophesied last year that these two clubs could be "on the way out," but they made it back for another year.

Key Club's concession stand at the stadium sustains many a student throughout the football season. Key Club has been active since April, 1969, when it was first organized under the patronage of the Bay Village Kiwanis Club.

KIS (Kommunity Individual Service) was first chartered for the 1971-1972 school year as the girls'

counter-part of Key Club. The club serves the "Kommunity," and this Halloween the girls brought candy-filled pumpkins and ghosts to the children at Lakewood Hospital.

Another small group, Chess Club, consists of seven members and their adviser, Mr. Richard Donaldson.

They check in Wednesdays after school to practice their skills.

The largest of the small clubs is the Speaker's Bureau, whose membership

includes 7 seniors, 11 juniors, and 2 sophomores. These dedicated few struggle to deliver the morning announcements over the noise and confusion of homeroom.

What's so great about the little clubs? Well, you might not know they're there, but if they weren't, you sure would miss them.

### Every little bit counts

**Morning announcements**, read by Marji Brown and John Davis, usually take about 7 minutes to read. They cover sporting events, test dates, and dances.

# Man vs. Machine

## The eternal battle for dominance

Ever since some clod invented the wheel, man has been doomed to battle, tooth to gear, with a machine.

And now the battle has hit home. Machines have become the great and all-powerful educators. Classes from Metals II to Computer Math I use mechanical marvels to teach skills, that is on days that they are in working order. Typewriters that don't space and stoves that only work at 800 degrees or higher are a familiar and irritating cog in a student's path.

### We found: A damaged Driver's Ed car

Do you know what went on, Saturday, Dec. 3, 1977? It was one of the most traumatic experiences in my life as a Driver's Ed car.

We started out of Bay and soon entered Lorain County Township. We went down a steep hill that was pretty slick as it had just snowed. As I was going down, I went too far over the yellow line and my driver could not straighten me out. Apparently, the tires didn't catch the road.

My back end swerved out across the road and ran down into a ditch. At the same time all this was happening, a car came from the other direction.

There I was, sticking out in the middle of the wrong lane. I'm sure the other driver tried to stop, but he lost control and also swerved around and hit me.

So, here I am sitting in the car hospital waiting for a repair job. Such is life . . .

# Art offers a crafty approach

-D. Khyrn

-D. Khyrn

-D. Khyrn

-D. Khyrn

● Another mini course that was added to the Art Department was crafts. The student had the option of taking the class for a quarter or a semester.

Instead of dealing with the usual media of the art field, Crafts opened the doors for students to experiment with new and different materials. Some projects that were included were coiling (an ancient Indian art), enameling, and basket weaving.

"Crafts was an enjoyable class," reflected Laurie Wier, "It allowed the students to express their artistic ability.

● For the high school artist, or simply an interested student, painting as a semester course provided a solid background in technique development.

The course started with the fundamentals of painting, drawing and design. Students experimented with water colors, oils, and acrylics, then chose the medium they wished to develop fully. Whichever the student chose, the entire semester was spent in perfecting.

● Dealing with the possibilities of clay, Ceramics was added to the curriculum for students who wanted to intensify their study of pottery.

Taught by Mr. Larson, Ceramics explored the different methods of working with clay. Starting with simple pinch pots, the class moved on to such techniques as coiling and slabbing. Finally, the potter's wheel was introduced, and students were taught to fire and glaze. ■

# Whatever happened to reading, writing, and arithmetic?

**R**emember the day of the freshmen orientation? The statement that frightened the whole student body was "and the required courses are . . . 4 units of English, 2 units of Social Studies, 1 unit of Science, 2 units of Math . . ." what a way to spend four years of high school.

After the initial shock of requirements came the inevitable schedule game. The object was to fit all the units into four years without taking more than nine in any one year.

The breakdown usually came out evenly with about four units a year, but it is comforting to know that there were others in the same boat. In the first quarter, 1,594 students took English, 918 took Science, 983 took Social Science, and 1,270 took Math. Some students took more than one unit of some subjects and those instances were reflected in the figures.

So, whatever happened to reading, writing, and arithmetic? It is alive and well and functioning at Bay.

**In the hopes of learning** all the basics of wave defraction, Vern Holden pays strict attention to Mr. Wagner's explanation on the ripple tank.

**Fourth period Earth Science class** teaches Andy Lawlor, Bob Tyler, Bob McKinley and Todd Jones the fundamentals of vulcano Mauna Loa.

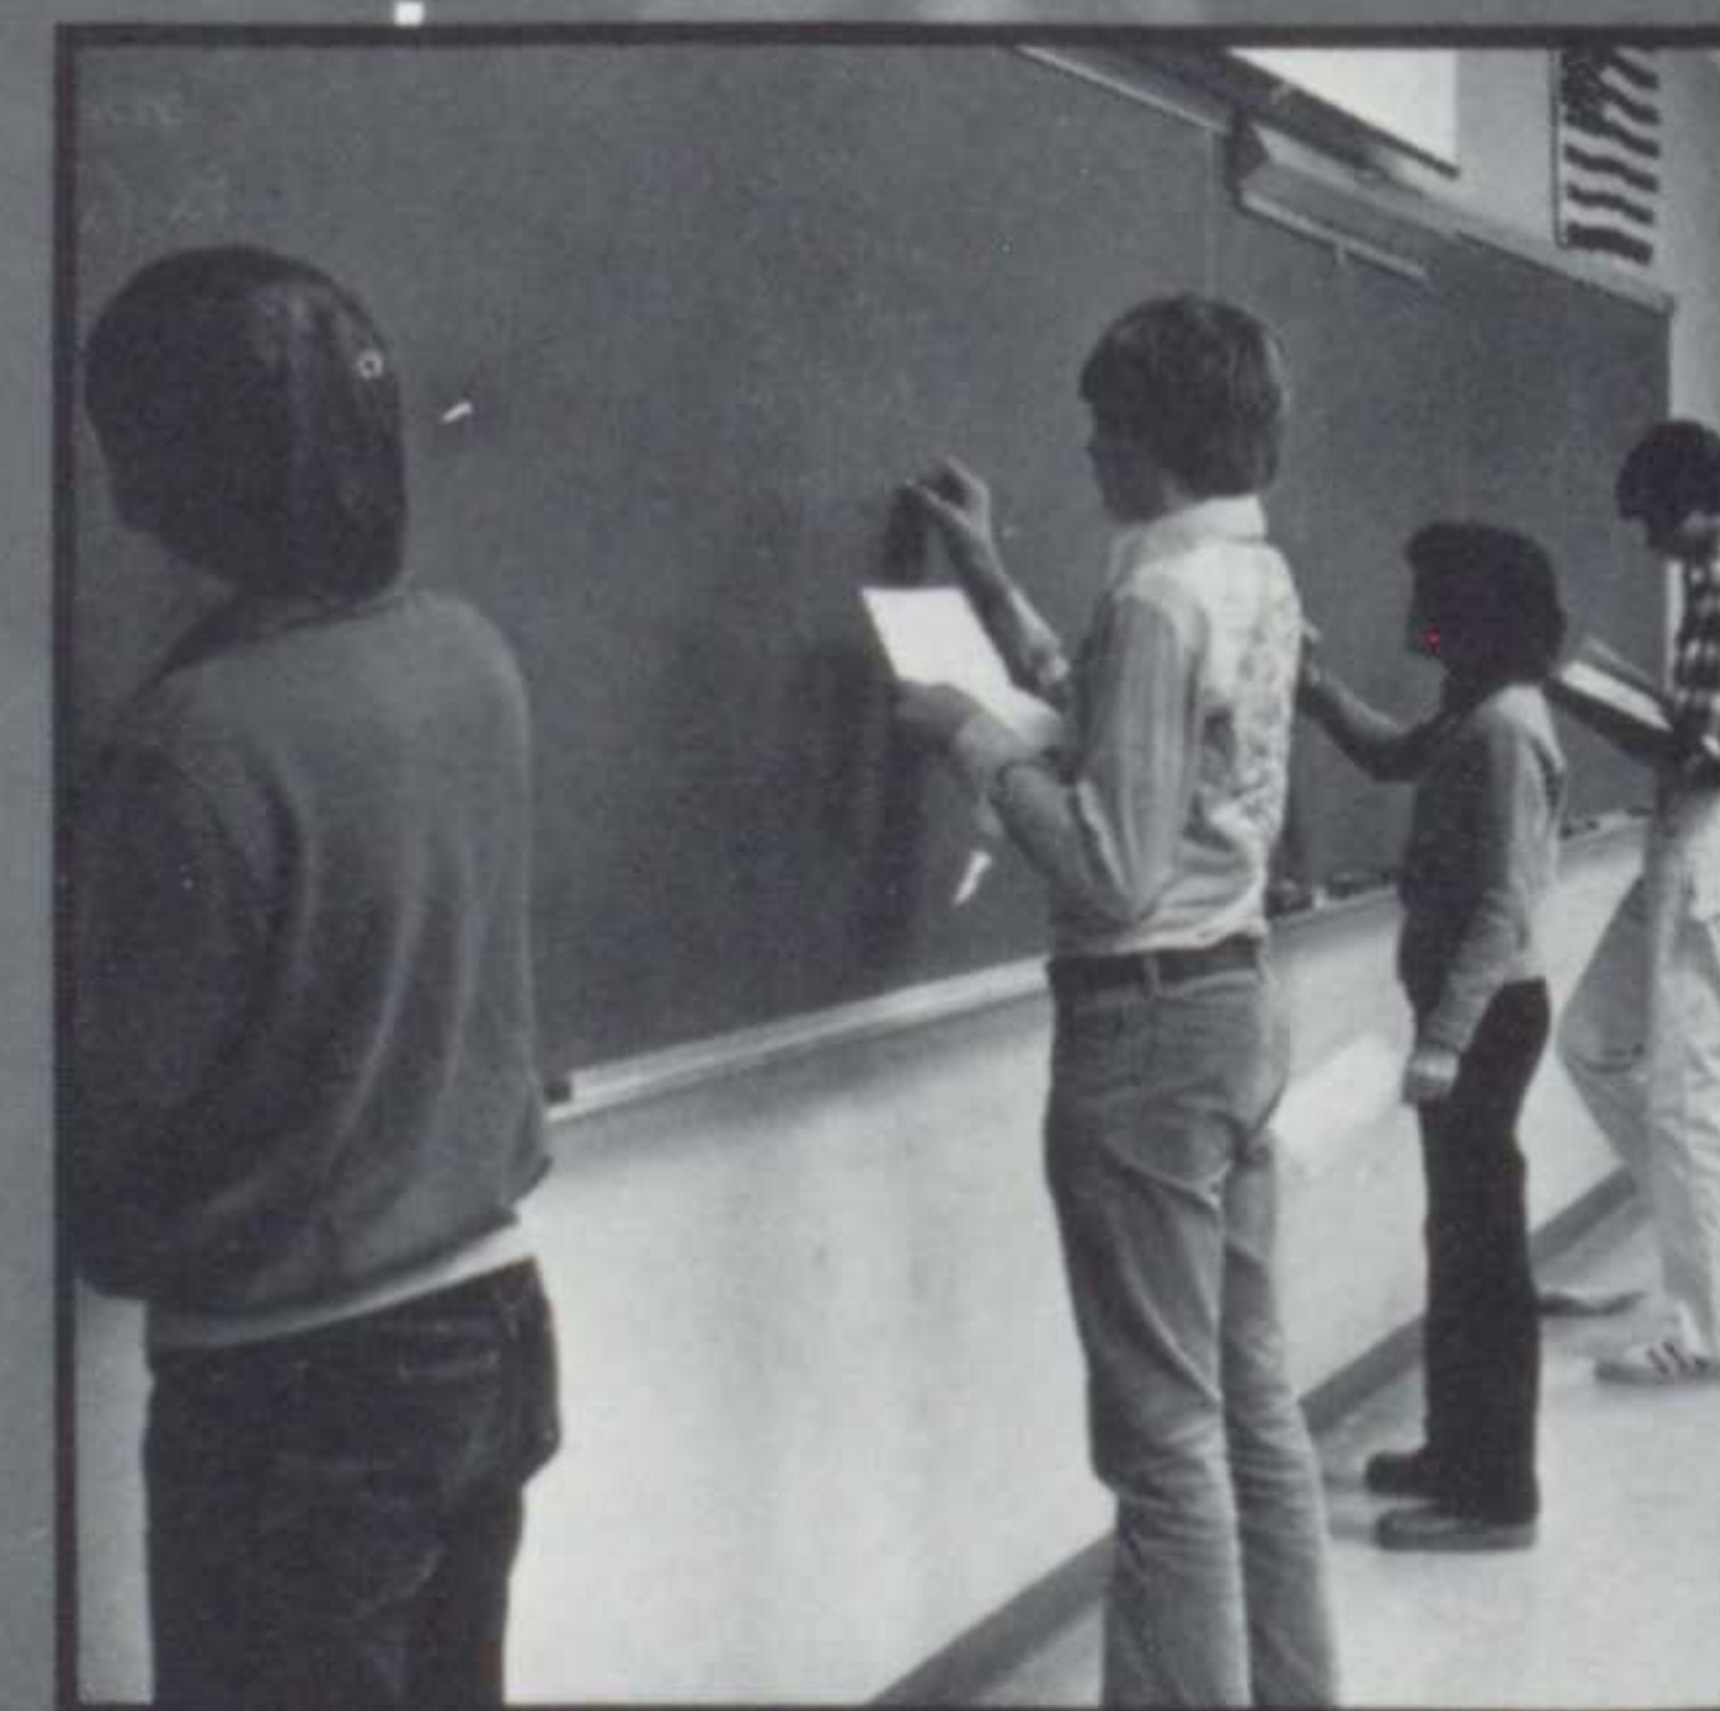

**Determined to block those points,** Ann Kortan guards her opponent Nancy Johnson in fifth period Phys. Ed.

# Fun and Games: The lemon strategy

Whatever happened  
to . . .

continued

School isn't always all work and no play. Some classes manage to fit in a little fun to make the day more tolerable, yet teach something at the same time.

Group Dynamics, an English mini-course taught by Ms. Bush, uses a unique system to teach self-awareness. It's called the lemon strategy.

Everyone in the class picked a lemon and was told to keep it with him/her at all times. At the end of the week, all lemons were to be put in a sack and every person was to try to re-identify his/her citrus fruit.

At first, no one thought it would be possible to tell them apart and the whole game was a stupid idea. But as time went on, each student seemed to enjoy it.

Senior Ed O'Neil stated, "One thing I enjoyed was that the lemon made my locker smell fresh."

One girl took her lemon home and put it in the refrigerator to keep it fresh. When she went to get it, she found that her dad had used it to make lemonade.

In general, everybody learned something from the strategy. Diane Mrohaly said, "You really get to know your lemon."

Ms. Bush thought it a beneficial experiment. She commented, "It makes the students more aware of people as individuals."

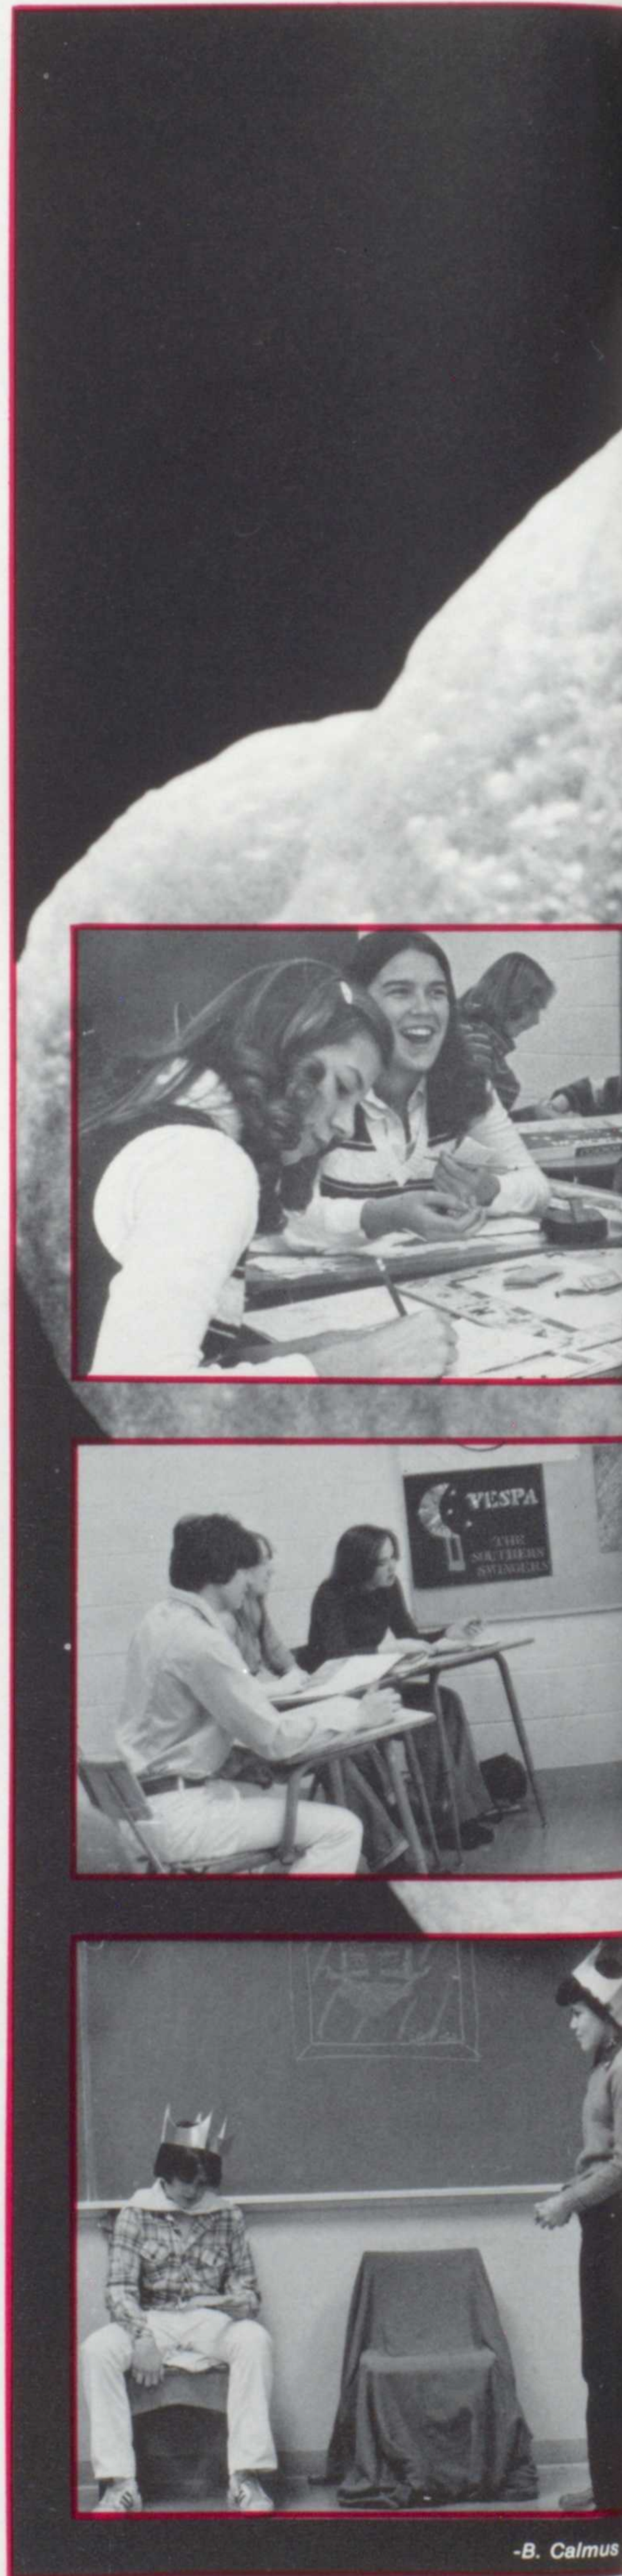

**General Business** involves Ann Kortan, Robin Santo and Susan Wier in an exciting game of Monopoly that teaches the basics of Real Estate.

**Representatives** from each of the countries in Disunia join together to rewrite the Preamble for an assignment in Creating a Nation.

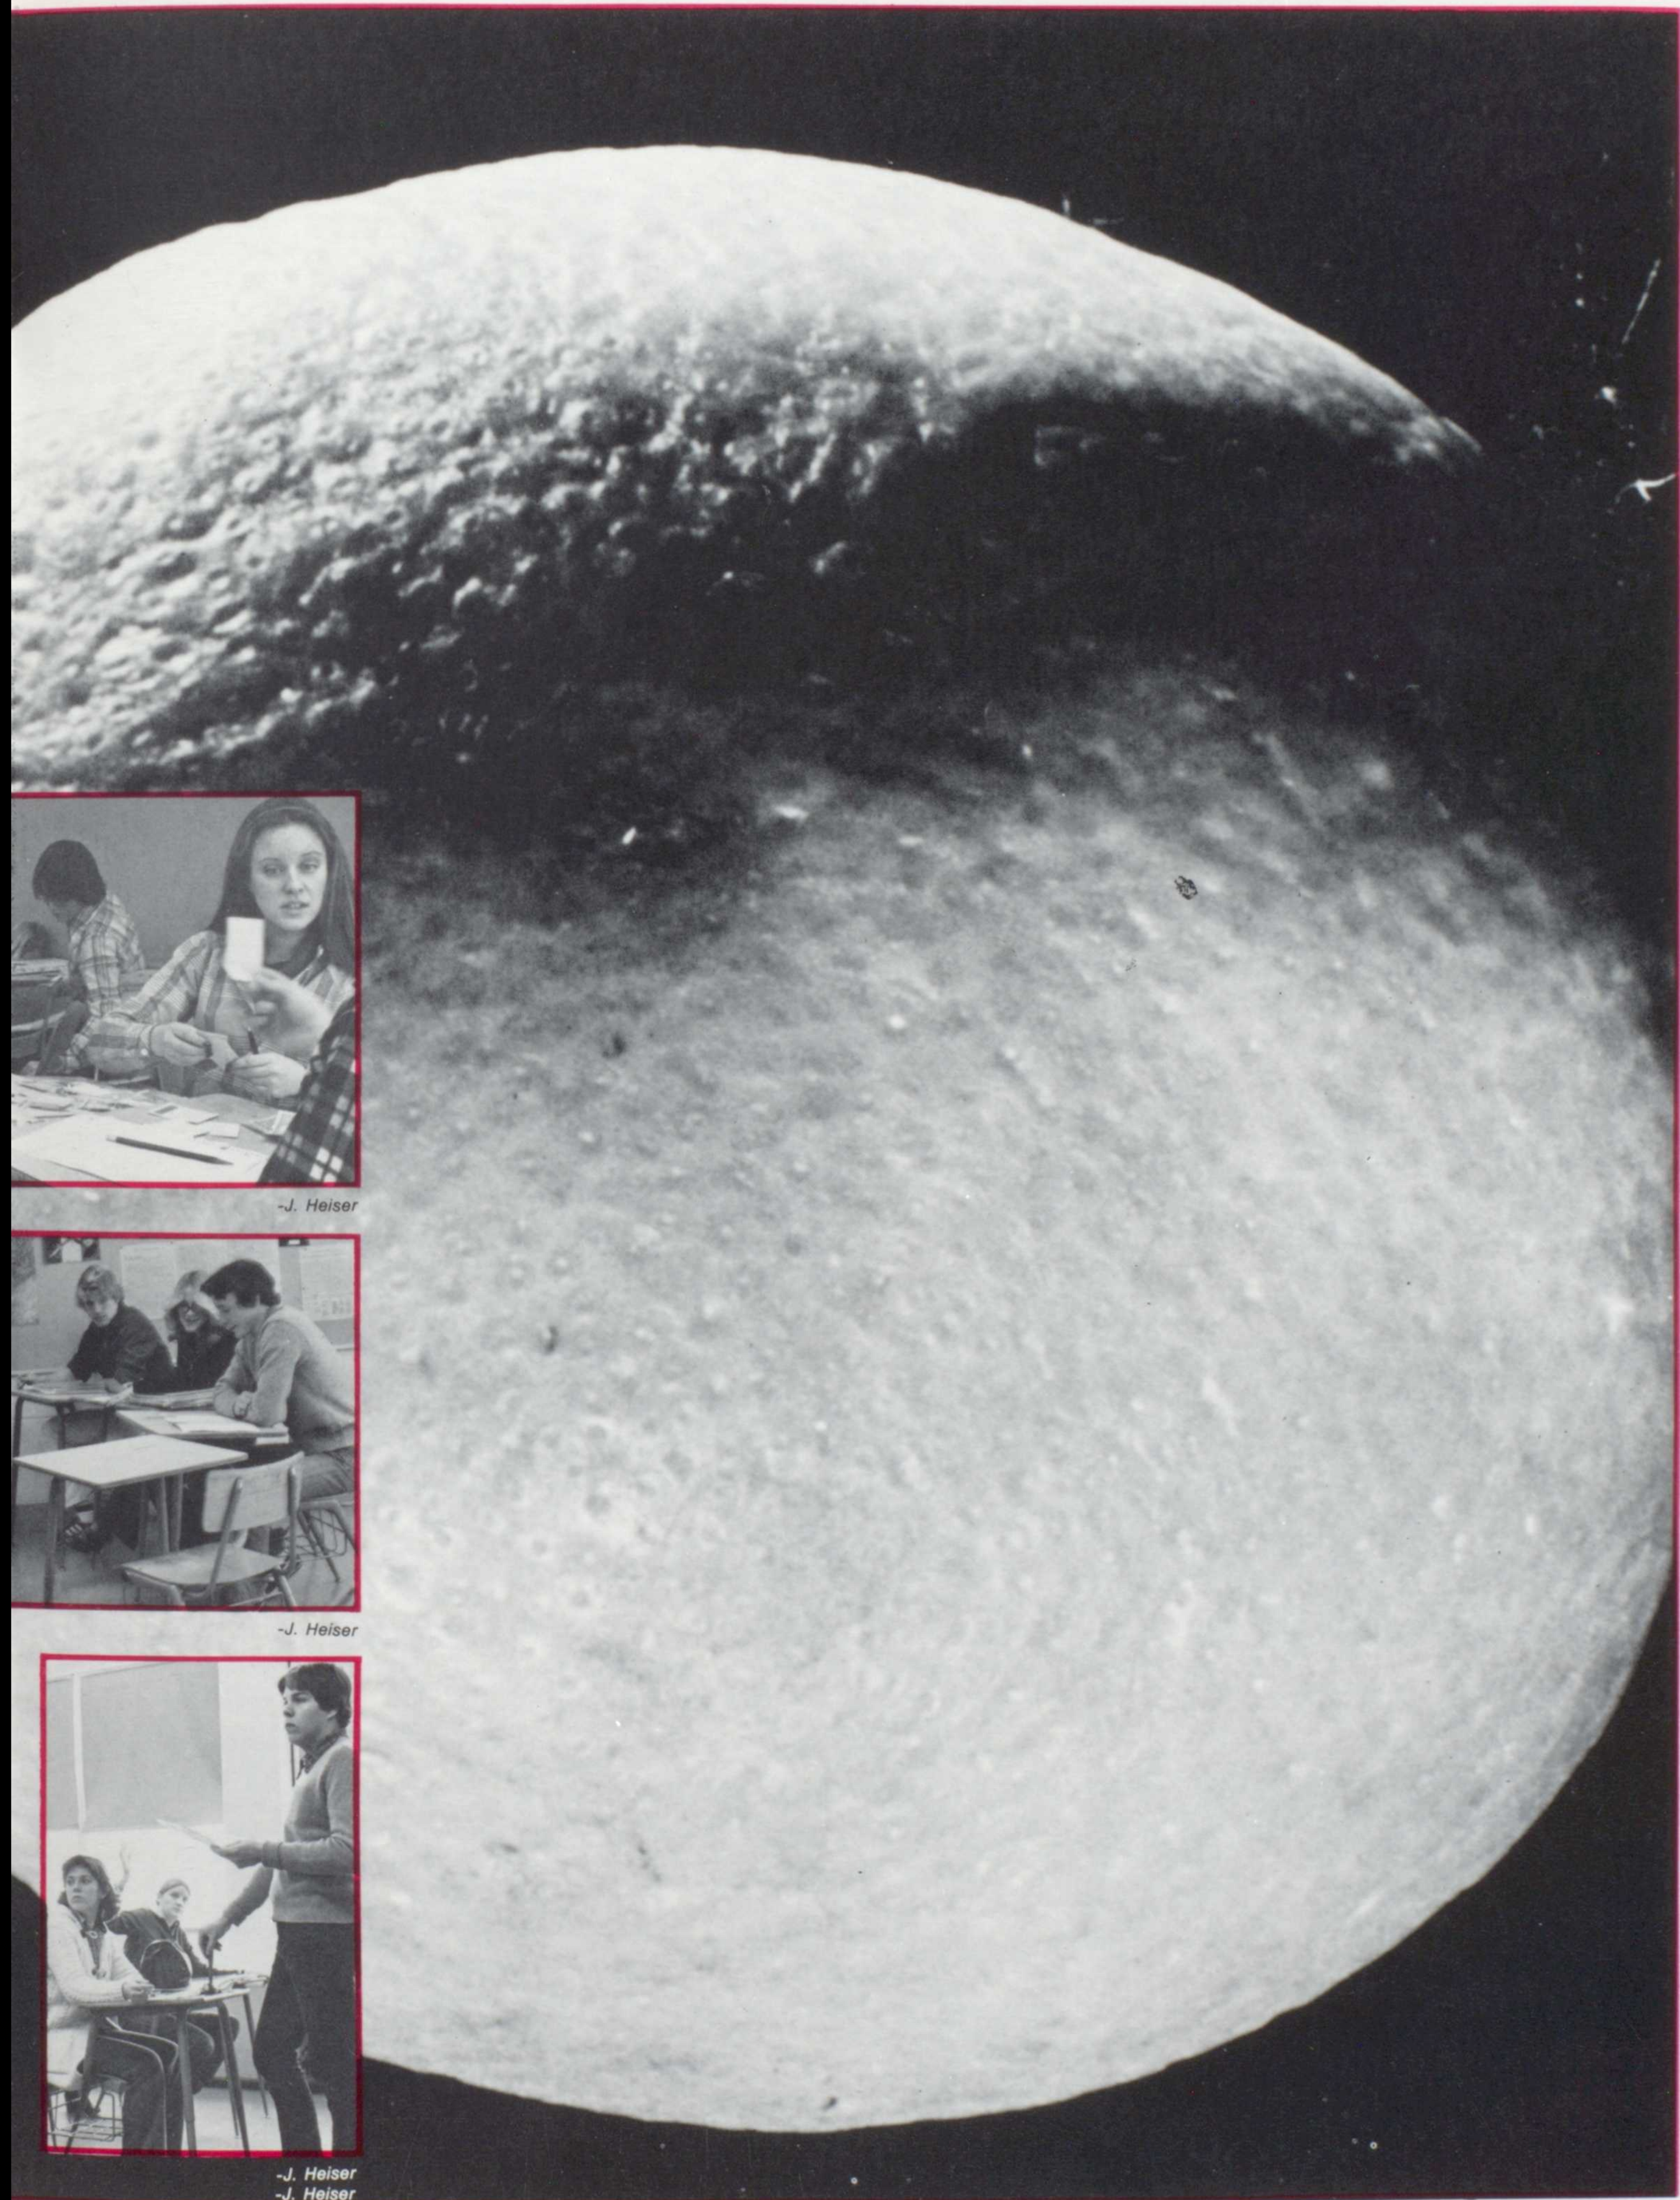

**In THE UGLY DUCKLING**, by T. H. White, Robin Woodburn plays Princess Camilla while Dan Lauderback rules over her as the king in the English I play.

**In a simulation game**, Speaker of the House Bob Sondles calls for a motion to pass a bill in Government class.

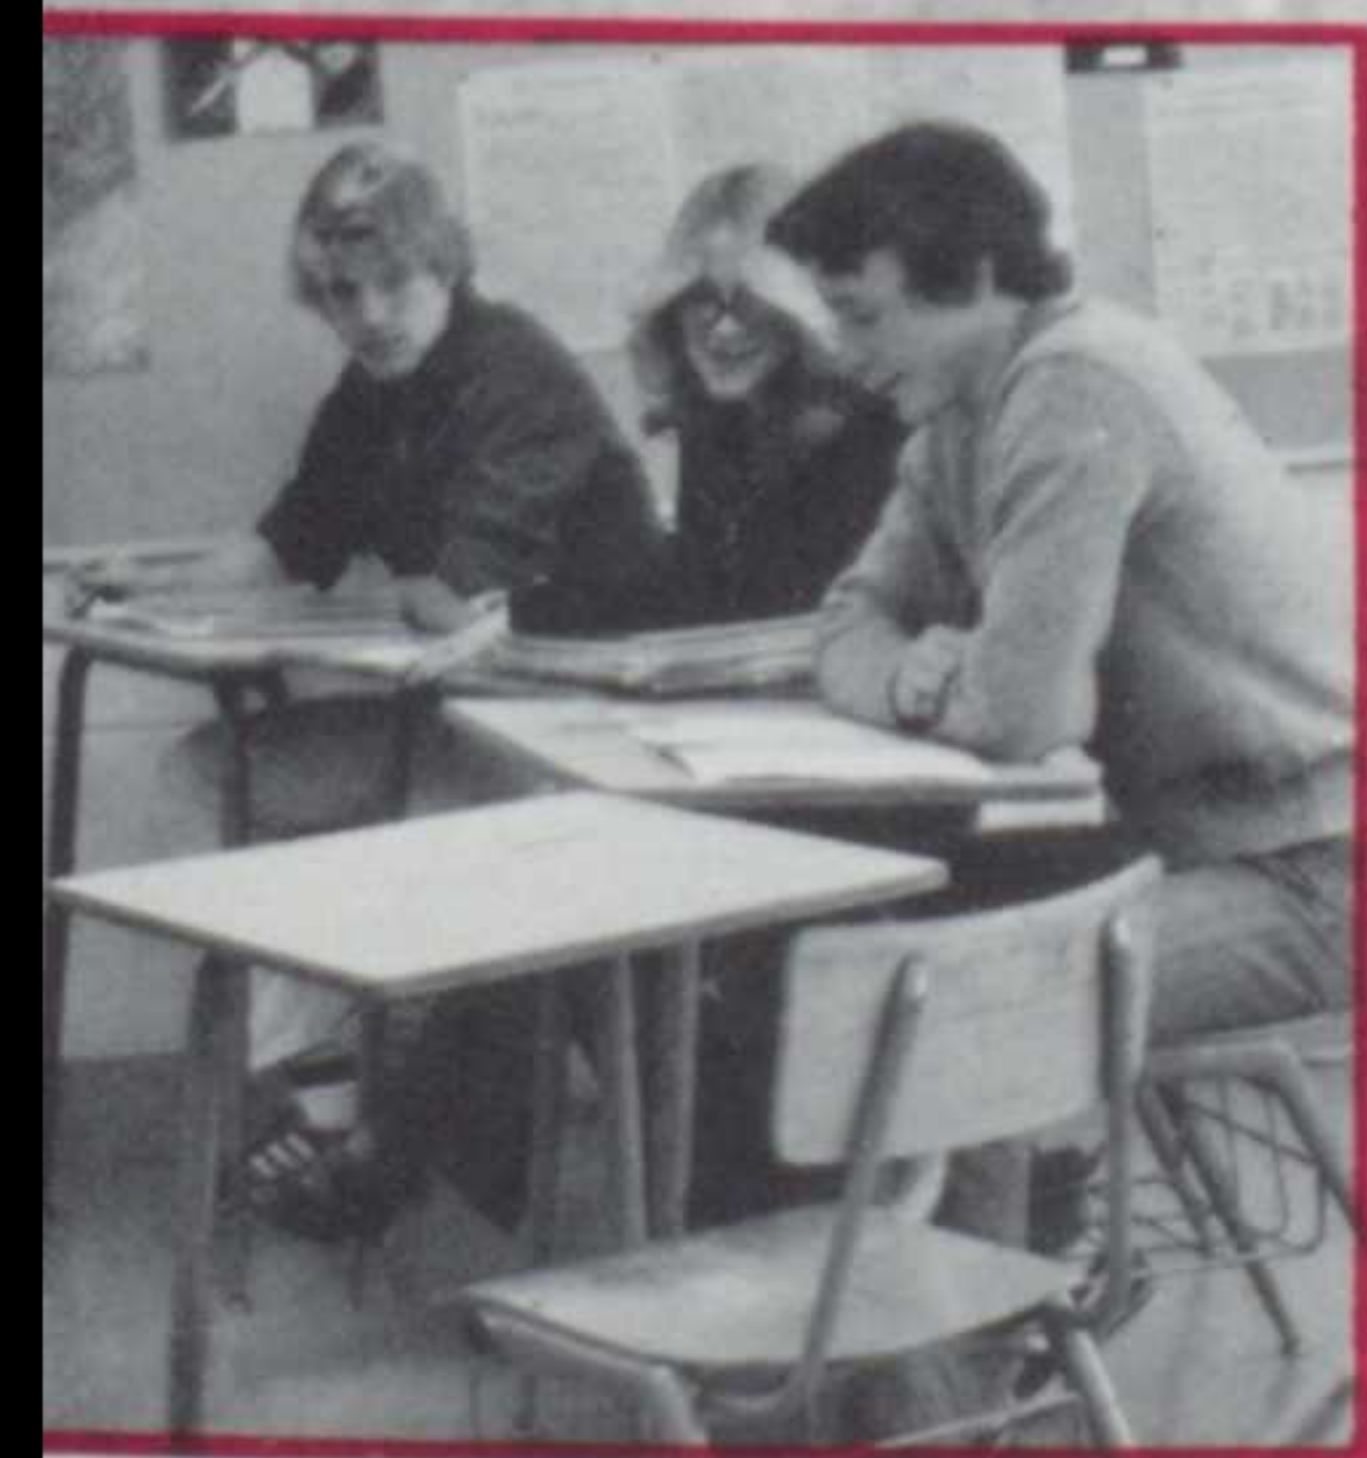

**Rigorously pawed over**, several sunkist lemons spent a week in a Group Dynamics student's purse.

continued

What do you take after you've taken everything else? What happens when your favorite class is finished and you want to learn more?

Well, three fresh, exciting courses have been added to the basic academic curriculum to make up for this slack in levels. They are: Advanced Placement English, Algebra III, and Advanced Accounting.

Betsy Scarborough, who is in Advanced Placement English, took the course for one main reason, "I really wanted to get out of freshman English in college and taking AP English was the only way I could do it".

Algebra III is offered as a semester course for those who want to continue math but don't want a real hard course. John Milloy signed up for it because, "I heard it was similar to Trig. but had more advanced Algebra in it. I wanted to learn more Algebra".

Advanced Accounting was included in the program to satisfy the growing interest in this field.

So when you think you've taken all there is to take and you've reached a dead end, take another look around. You might be surprised by what you find.

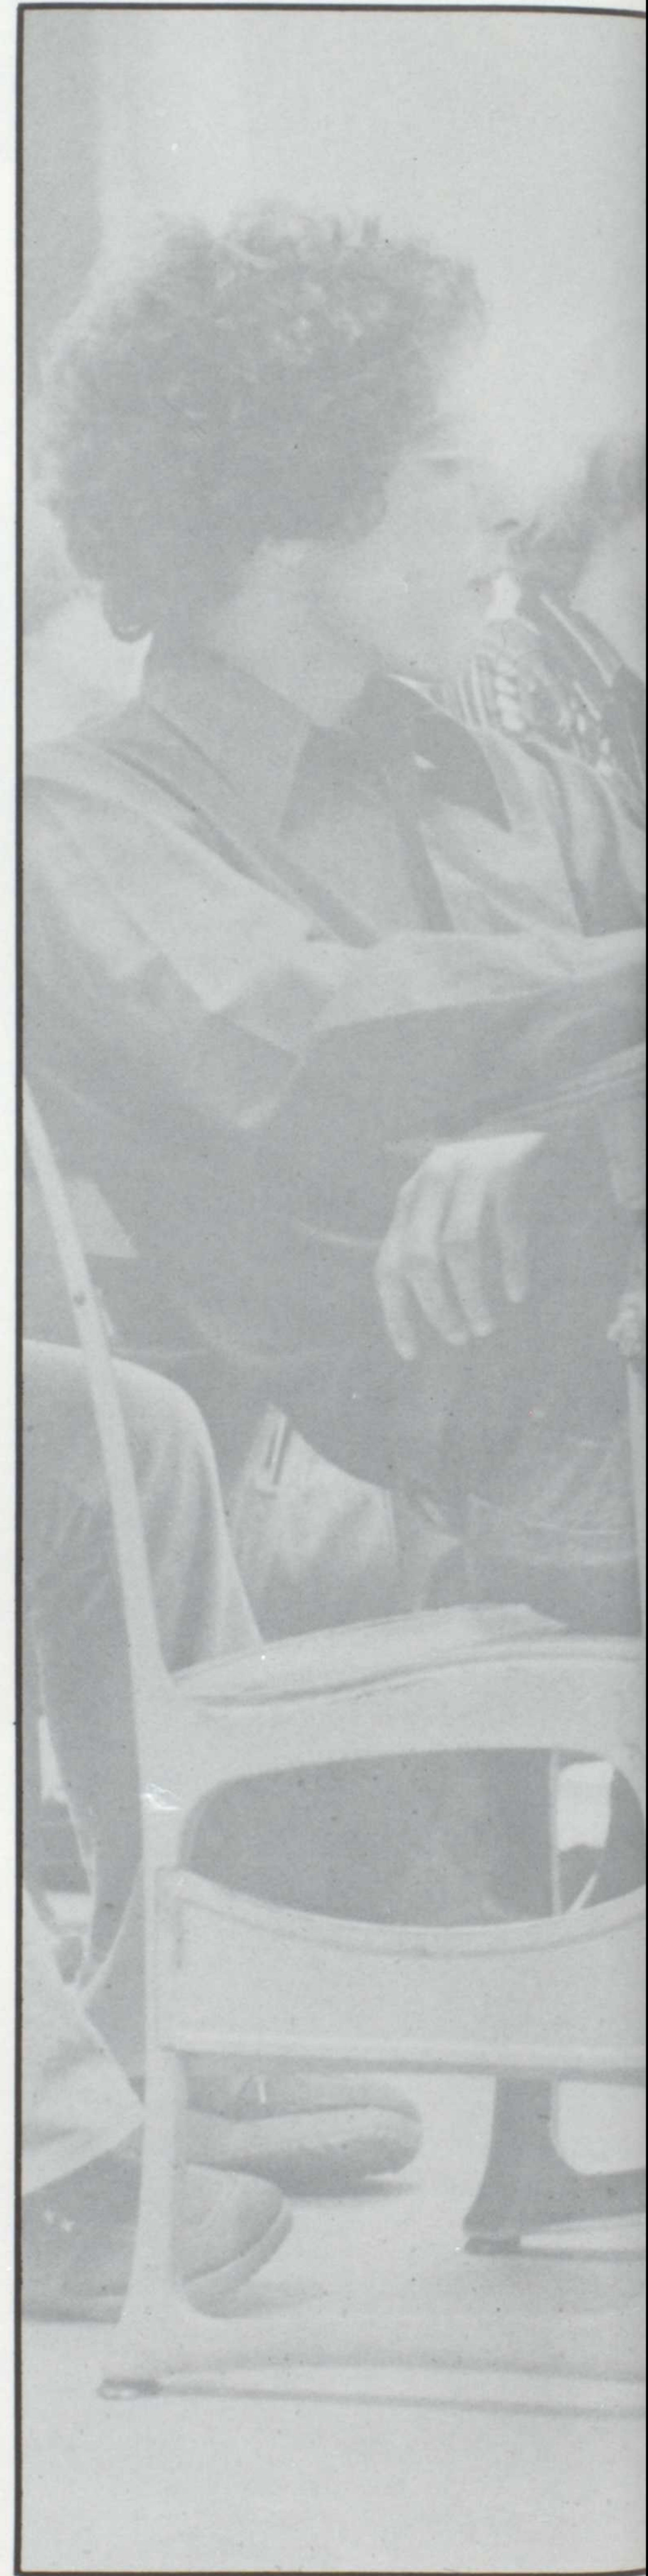

**Wrapped up in Joseph Conrad's *Heart of Darkness***, AP students discuss Marlow's soul journey into the Congo.

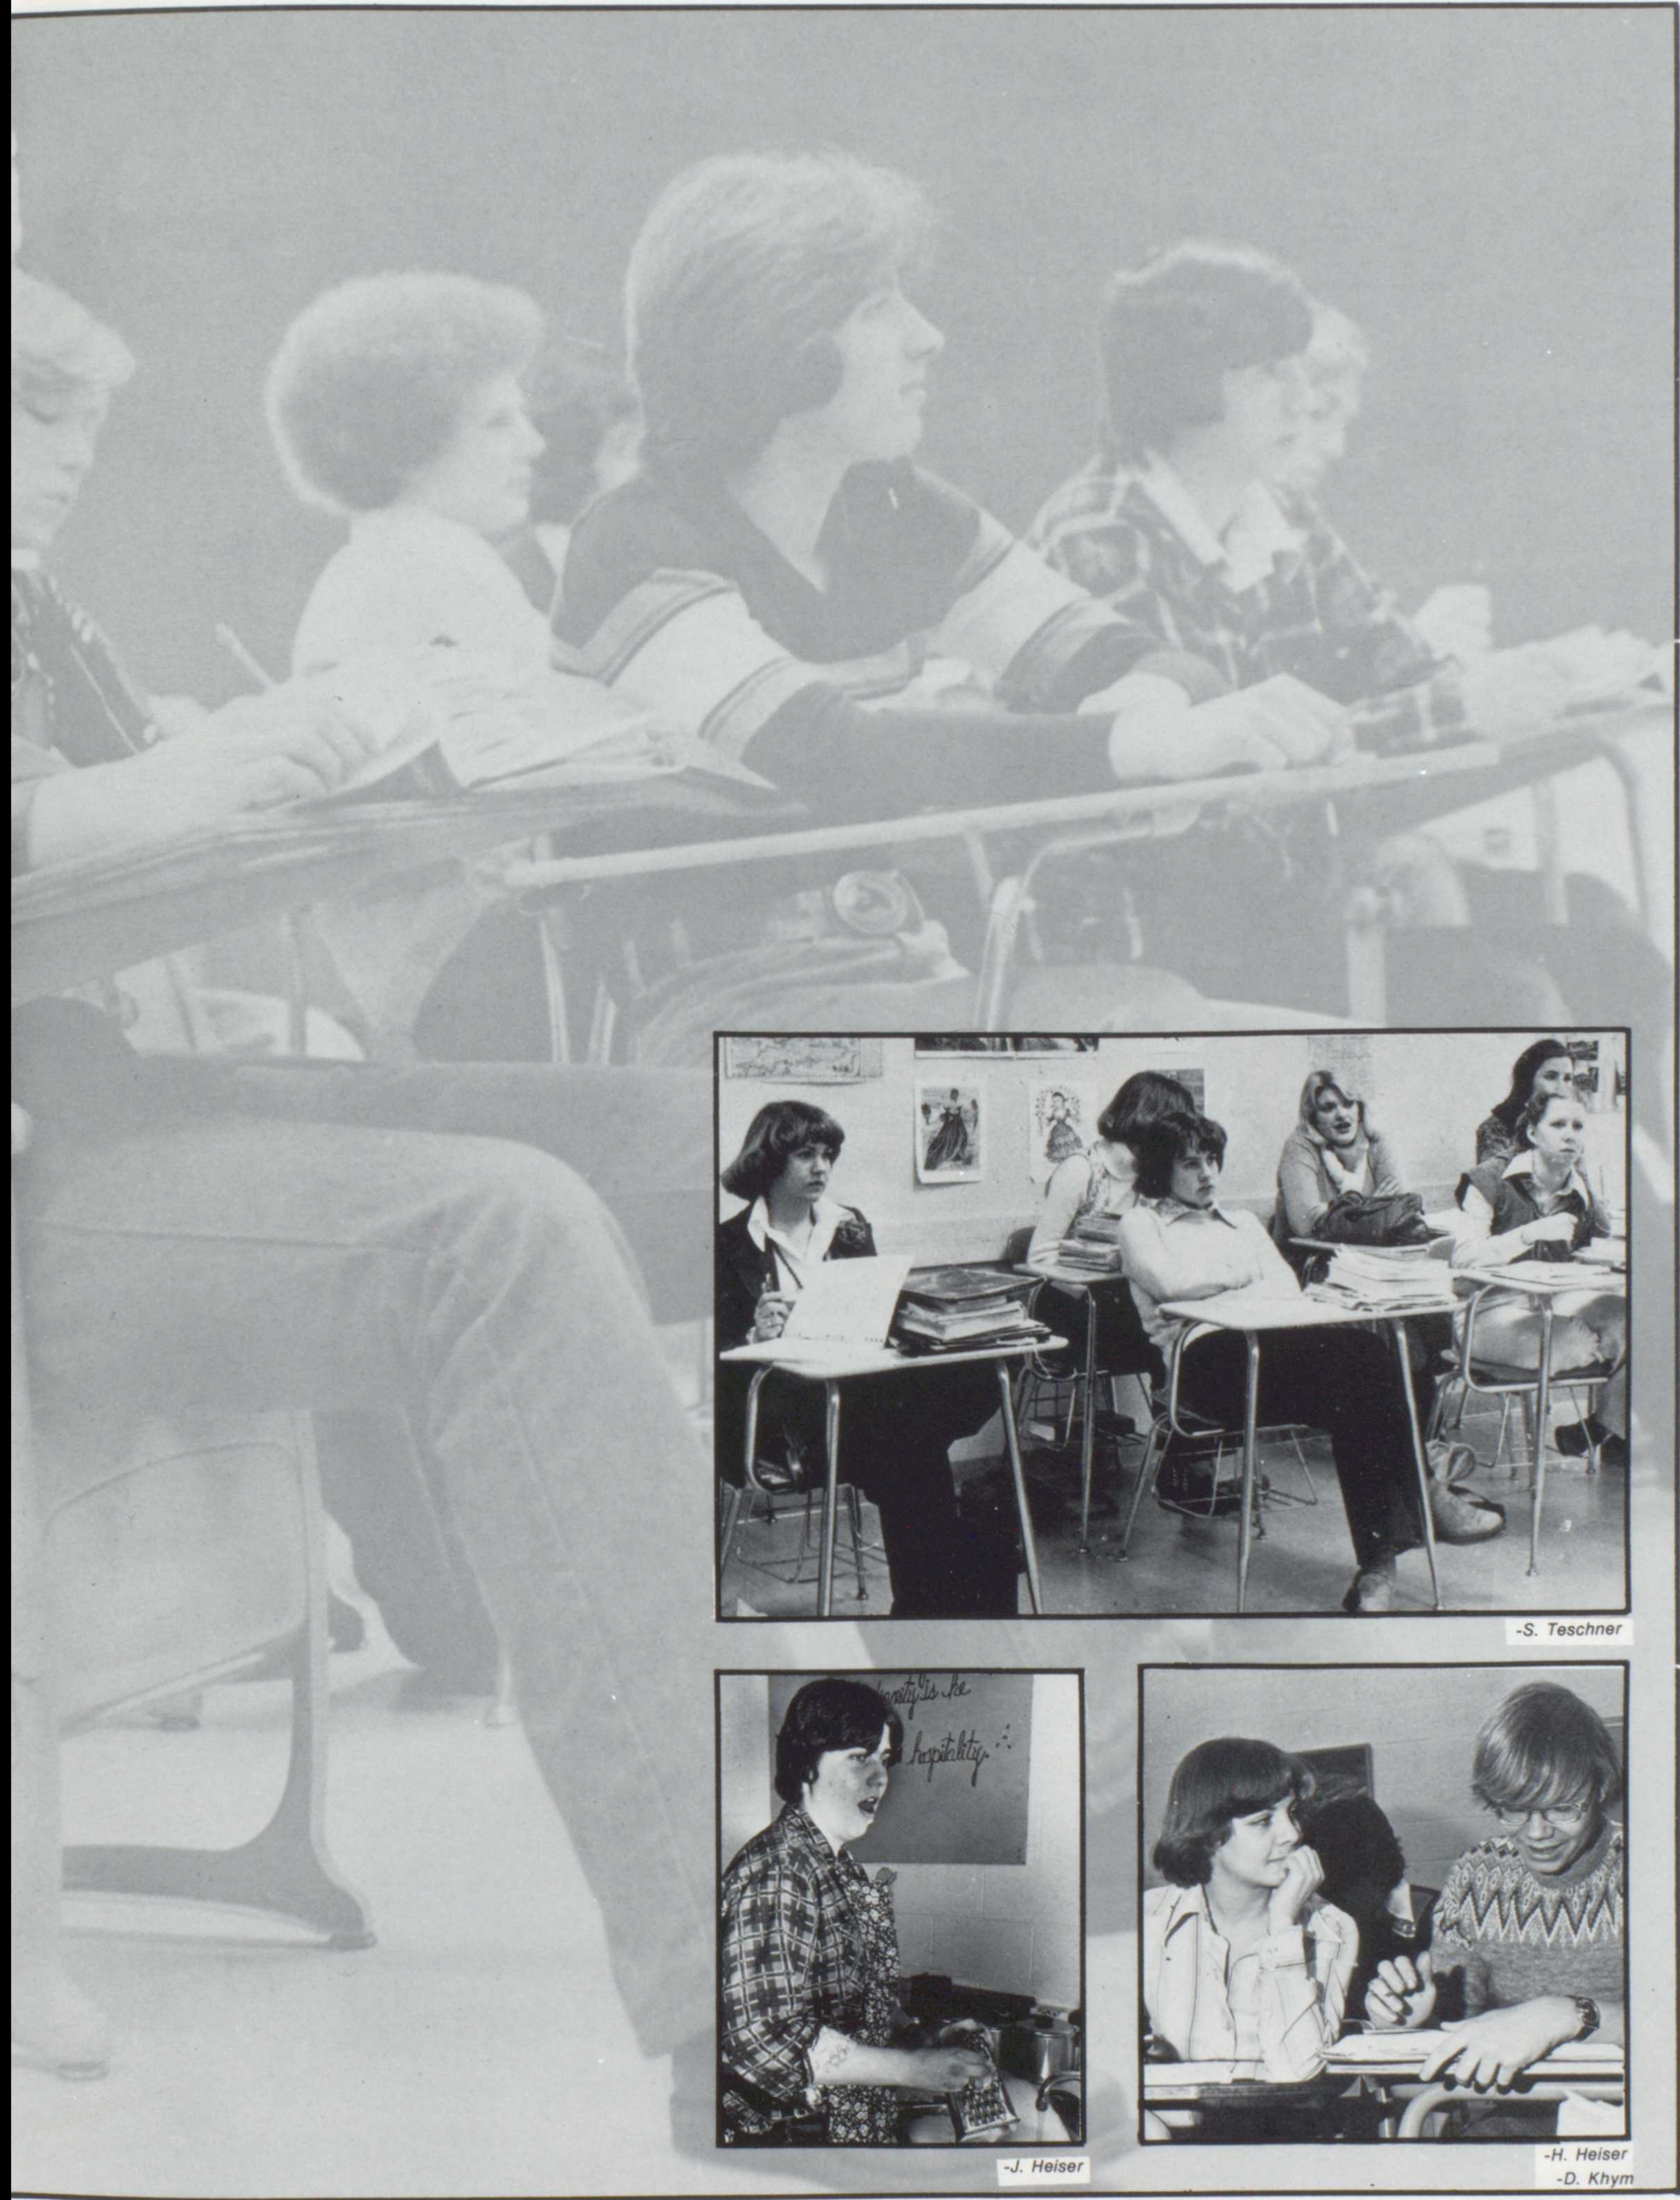

**Caught in the usual female role**, Tom Carney cleans up after a meal made in Independent Living.

**Advanced Accounting problems** sometimes require two heads. Laurie Thill enlists the help of Brad Oldenburg in order to complete assignments.

**Out of ten marbles**, how many could be red? Probability problems interest Mike Manos and Todd Satola in Algebra III class.

Reading Lab:  
The  
formula  
for  
success  
Whatever happened  
to . . .

continued

Reading Lab, what Reading Lab? Yes, Bay has done it. There finally is a place for students who are having problems with reading and study skills to get help. Room 105 underwent some major changes during the summer to get ready for the lab.

The use of this room is not limited to slow-learners; it was designed with several other programs in mind. The new reading consultant, Ms. Aker, put together five reading department course selections.

The **Freshmen Study Skills** course is a required course and is taken in the first quarter for one day a week. This course is designed to provide the average freshman with a strong foundation in high school study skills.

**Study Skills** is similar to the freshmen course, but is taught on a higher level.

Reading Lab meets the needs of students who have weaknesses in reading. Their reading level is tested and then they proceed through material at their own pace.

**College Prep** not only teaches how to prepare for exams, but also brings in college professors to prepare the student for the lecture situation.

**Reading Survival Skills** prepares the student to meet the basic reading needs of daily living. Newspapers and magazines are studied and analyzed.

Hopefully, students' study and reading skills will improve with the use of the Reading Lab. "Besides," adds Ms. Aker. "I don't give any homework." ■

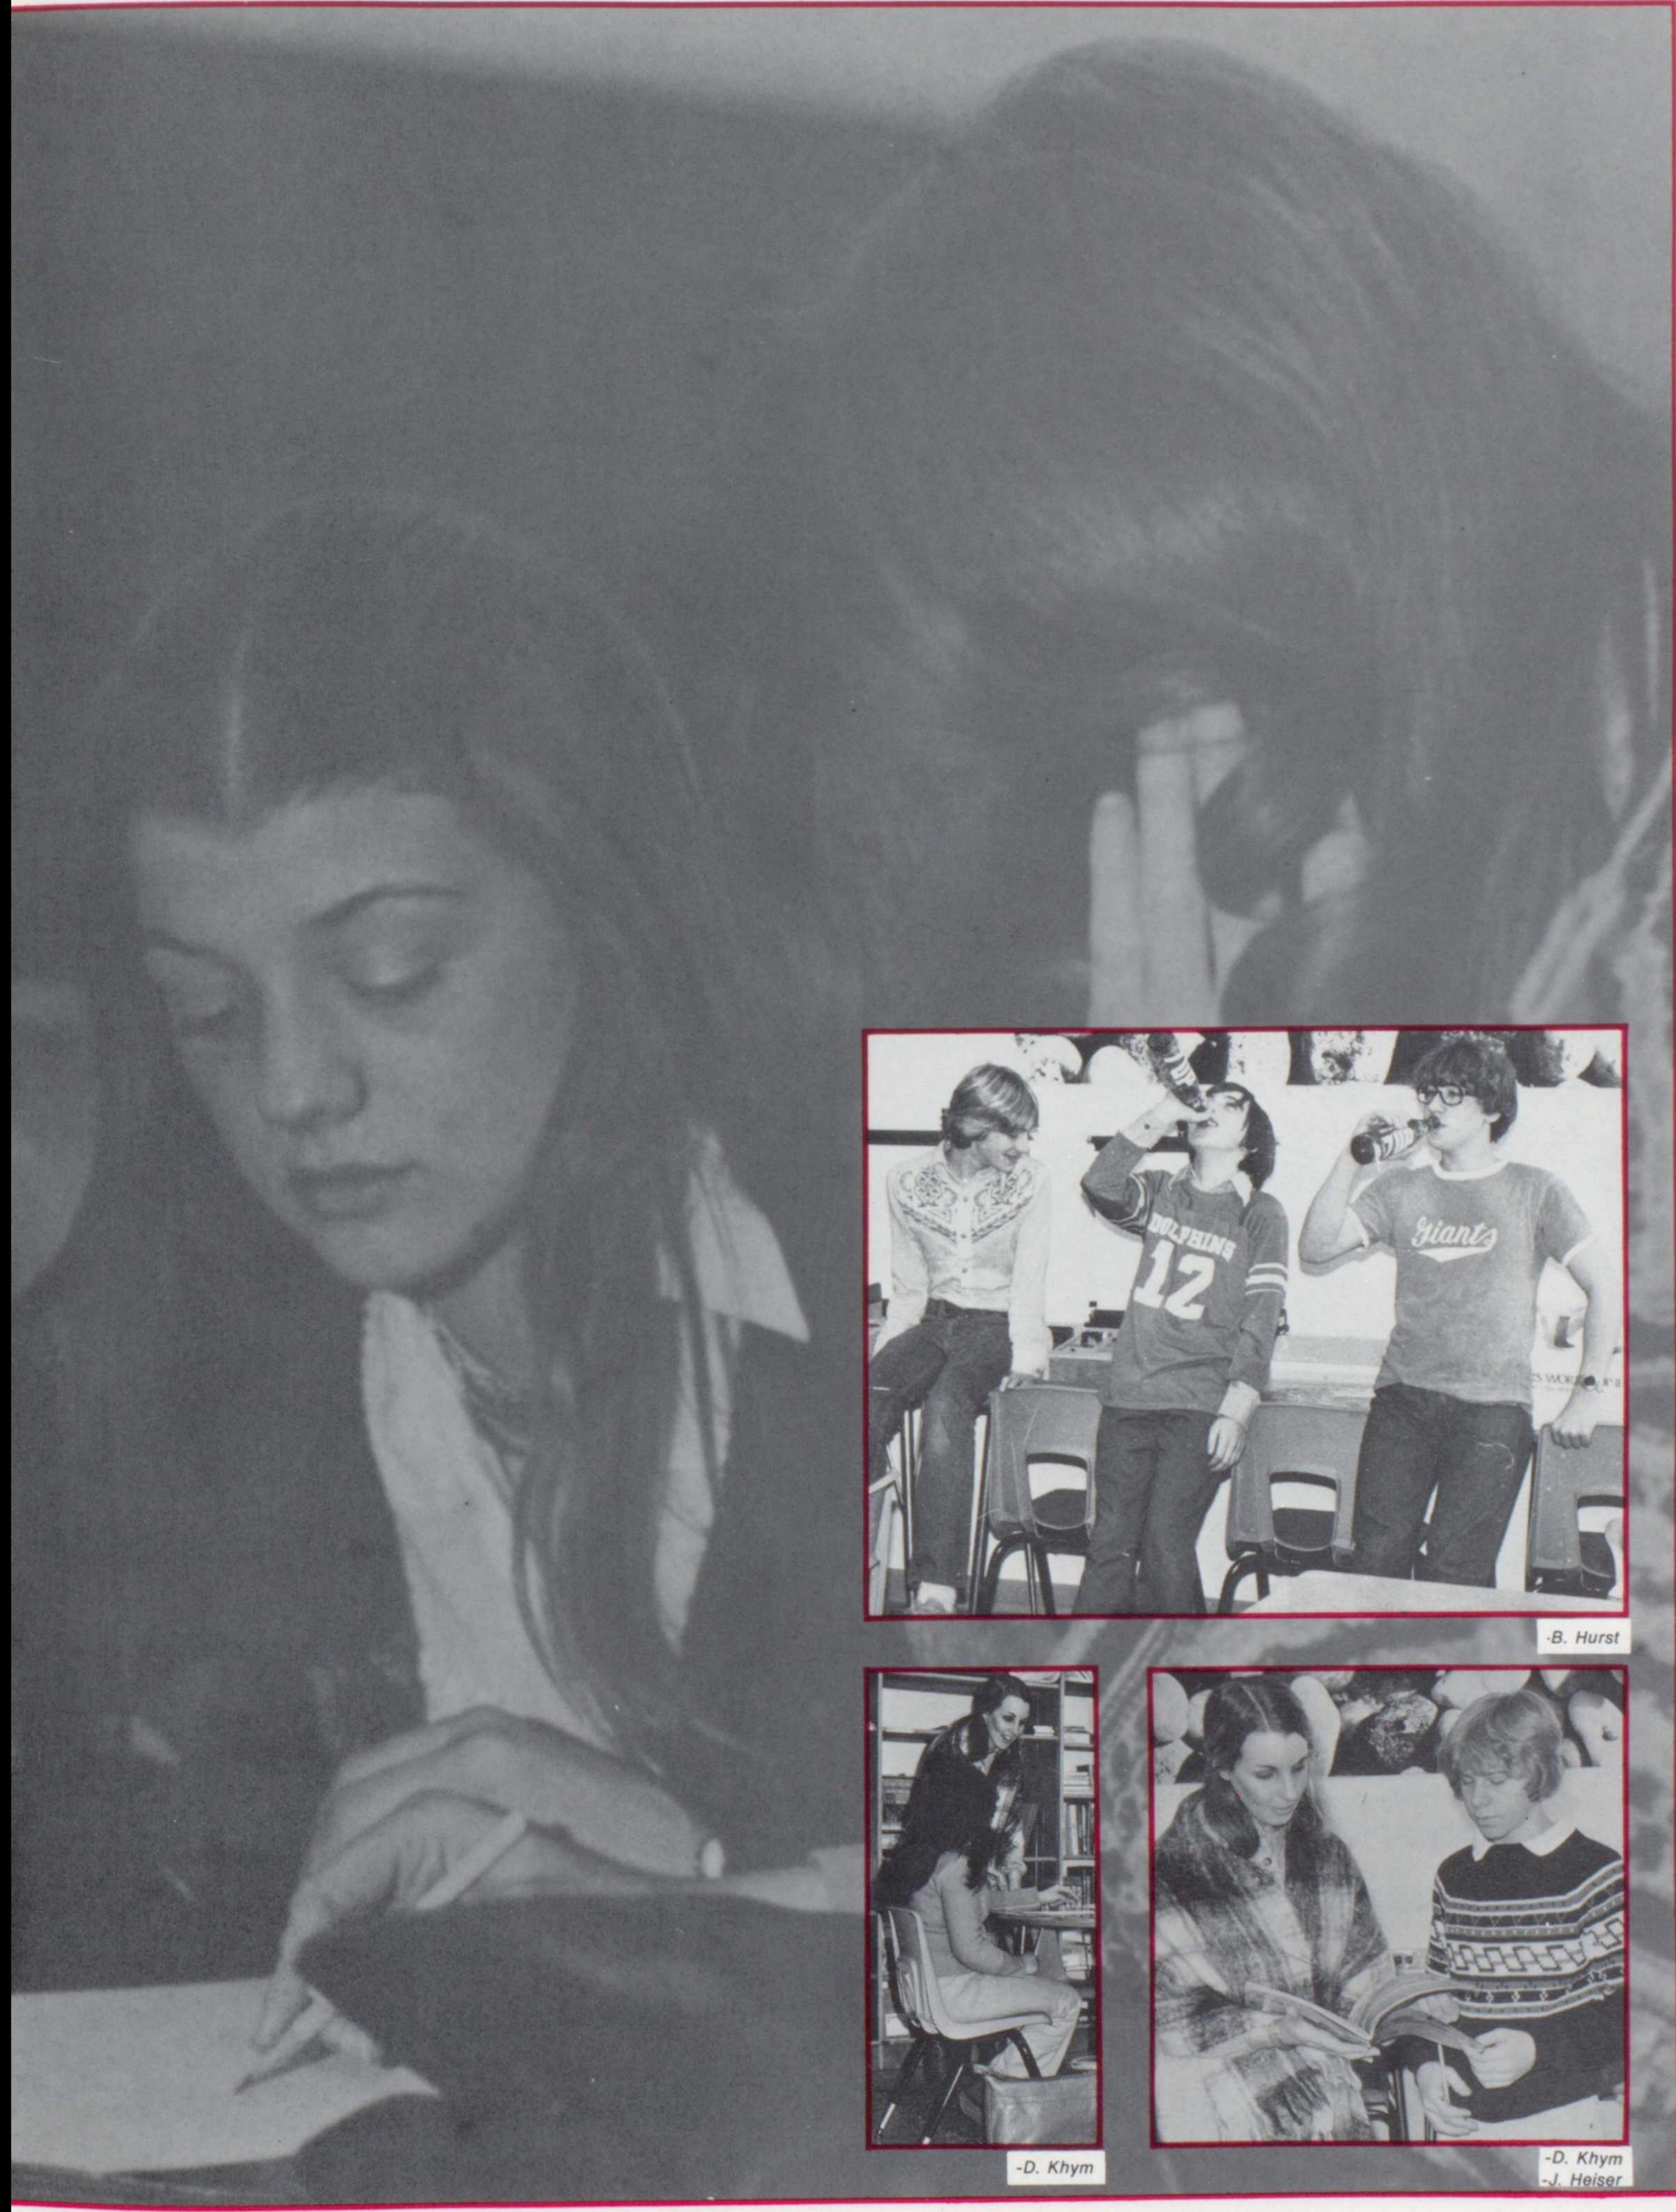

**7-up In hand**, Bob Howe, Frank Yager, and Kevin Field take a break from exercises for a Reading Lab Christmas Party.

**Sometimes a work book comes in handy.** Rick Neiman improves his comprehension by working with Ms. Aker in the Reading Lab.

**Despite her frustrations** with the English language, Syrian native Alice Chadda learns American survival skills from Ms. Aker.

**Students who need extra help** with math can find it in room 124 4th period. Linda Zittello receives aid from Ms. Gavin in the Math Resource Center.

## *Students travel outside classroom walls and* **Break the 7-hour habit**

**W**hoever said you had to sit and suffer through nine periods of school a day? Anyone involved in a vocational program will certainly tell you otherwise.

Right within our school there's Distributive Education (DE) and Occupational Work Experience (OWE). You only have to go to school five periods a day and then go off to work. If you work at a bank that's closed on Mondays, you get out of school at 12:00 p.m. on that day. Denise Casey who works at Citizens' Federal loves her job because, "It has a relaxed, friendly atmosphere that's as much fun as it is challenging."

Mark Thompson works at Gorski landscaping because, "I plan to go into landscaping business with my brother."

If you really want to get away from Bay, you can go to Westlake and enroll in one of their programs. Cooperative Office Education (COE) provides any on-the-job secretarial work and Diversified Cooperative Training

(DCT) covers any other kind of job imaginable.

Still another choice is available if you want to learn a trade and don't want to go through too much more school after high school. At Lakewood there are plenty of Intensive Programs to satisfy the finicky heart. Auto Mechanics, Commercial Art, Graphic Arts, Welding and Machine Trades are the most popular. Senior Ray Saladonis is in the Machine Trades program because, "I plan to go into it when I graduate from high school. I also like it better than regular school." Cosmetology is offered through Skelly Beauty Academy.

So if you feel your life at Bay High is dull, why not consider one of these programs to light up your life?

Students research  
out of class and

## Break the 7-hour habit

continued

Remember the good ol' days of first and second grade when all anyone did was a few worksheets, get into reading groups, recite the alphabet, and then it was time to go home? Now, it's a stroke of luck worthy of celebration if the student can go home free from the heavy burden of homework.

The major contributor to the everynight load is the inevitable research project. Taking the form of in-depth papers or projects, everything that involves research means hours in the library and at the typewriter.

Even freshmen weren't excluded from the work that is loaded on each student. Comparative Economic Systems and Earth Science, not to mention Freshmen English all had major projects for the frosh.

The research papers had to be complete with footnotes, bibliographies, and sentence outlines, however, some kindness was taken and the freshmen were freed from the usual typing requirement.

Sophomores who took the ever popular Biology found it also took some extra work, even outside the classroom. Papers were assigned to the individual on the subject of plants. This meant the sophomore student had to learn how to utilize his time in getting information from the library and making the subject sound interesting.

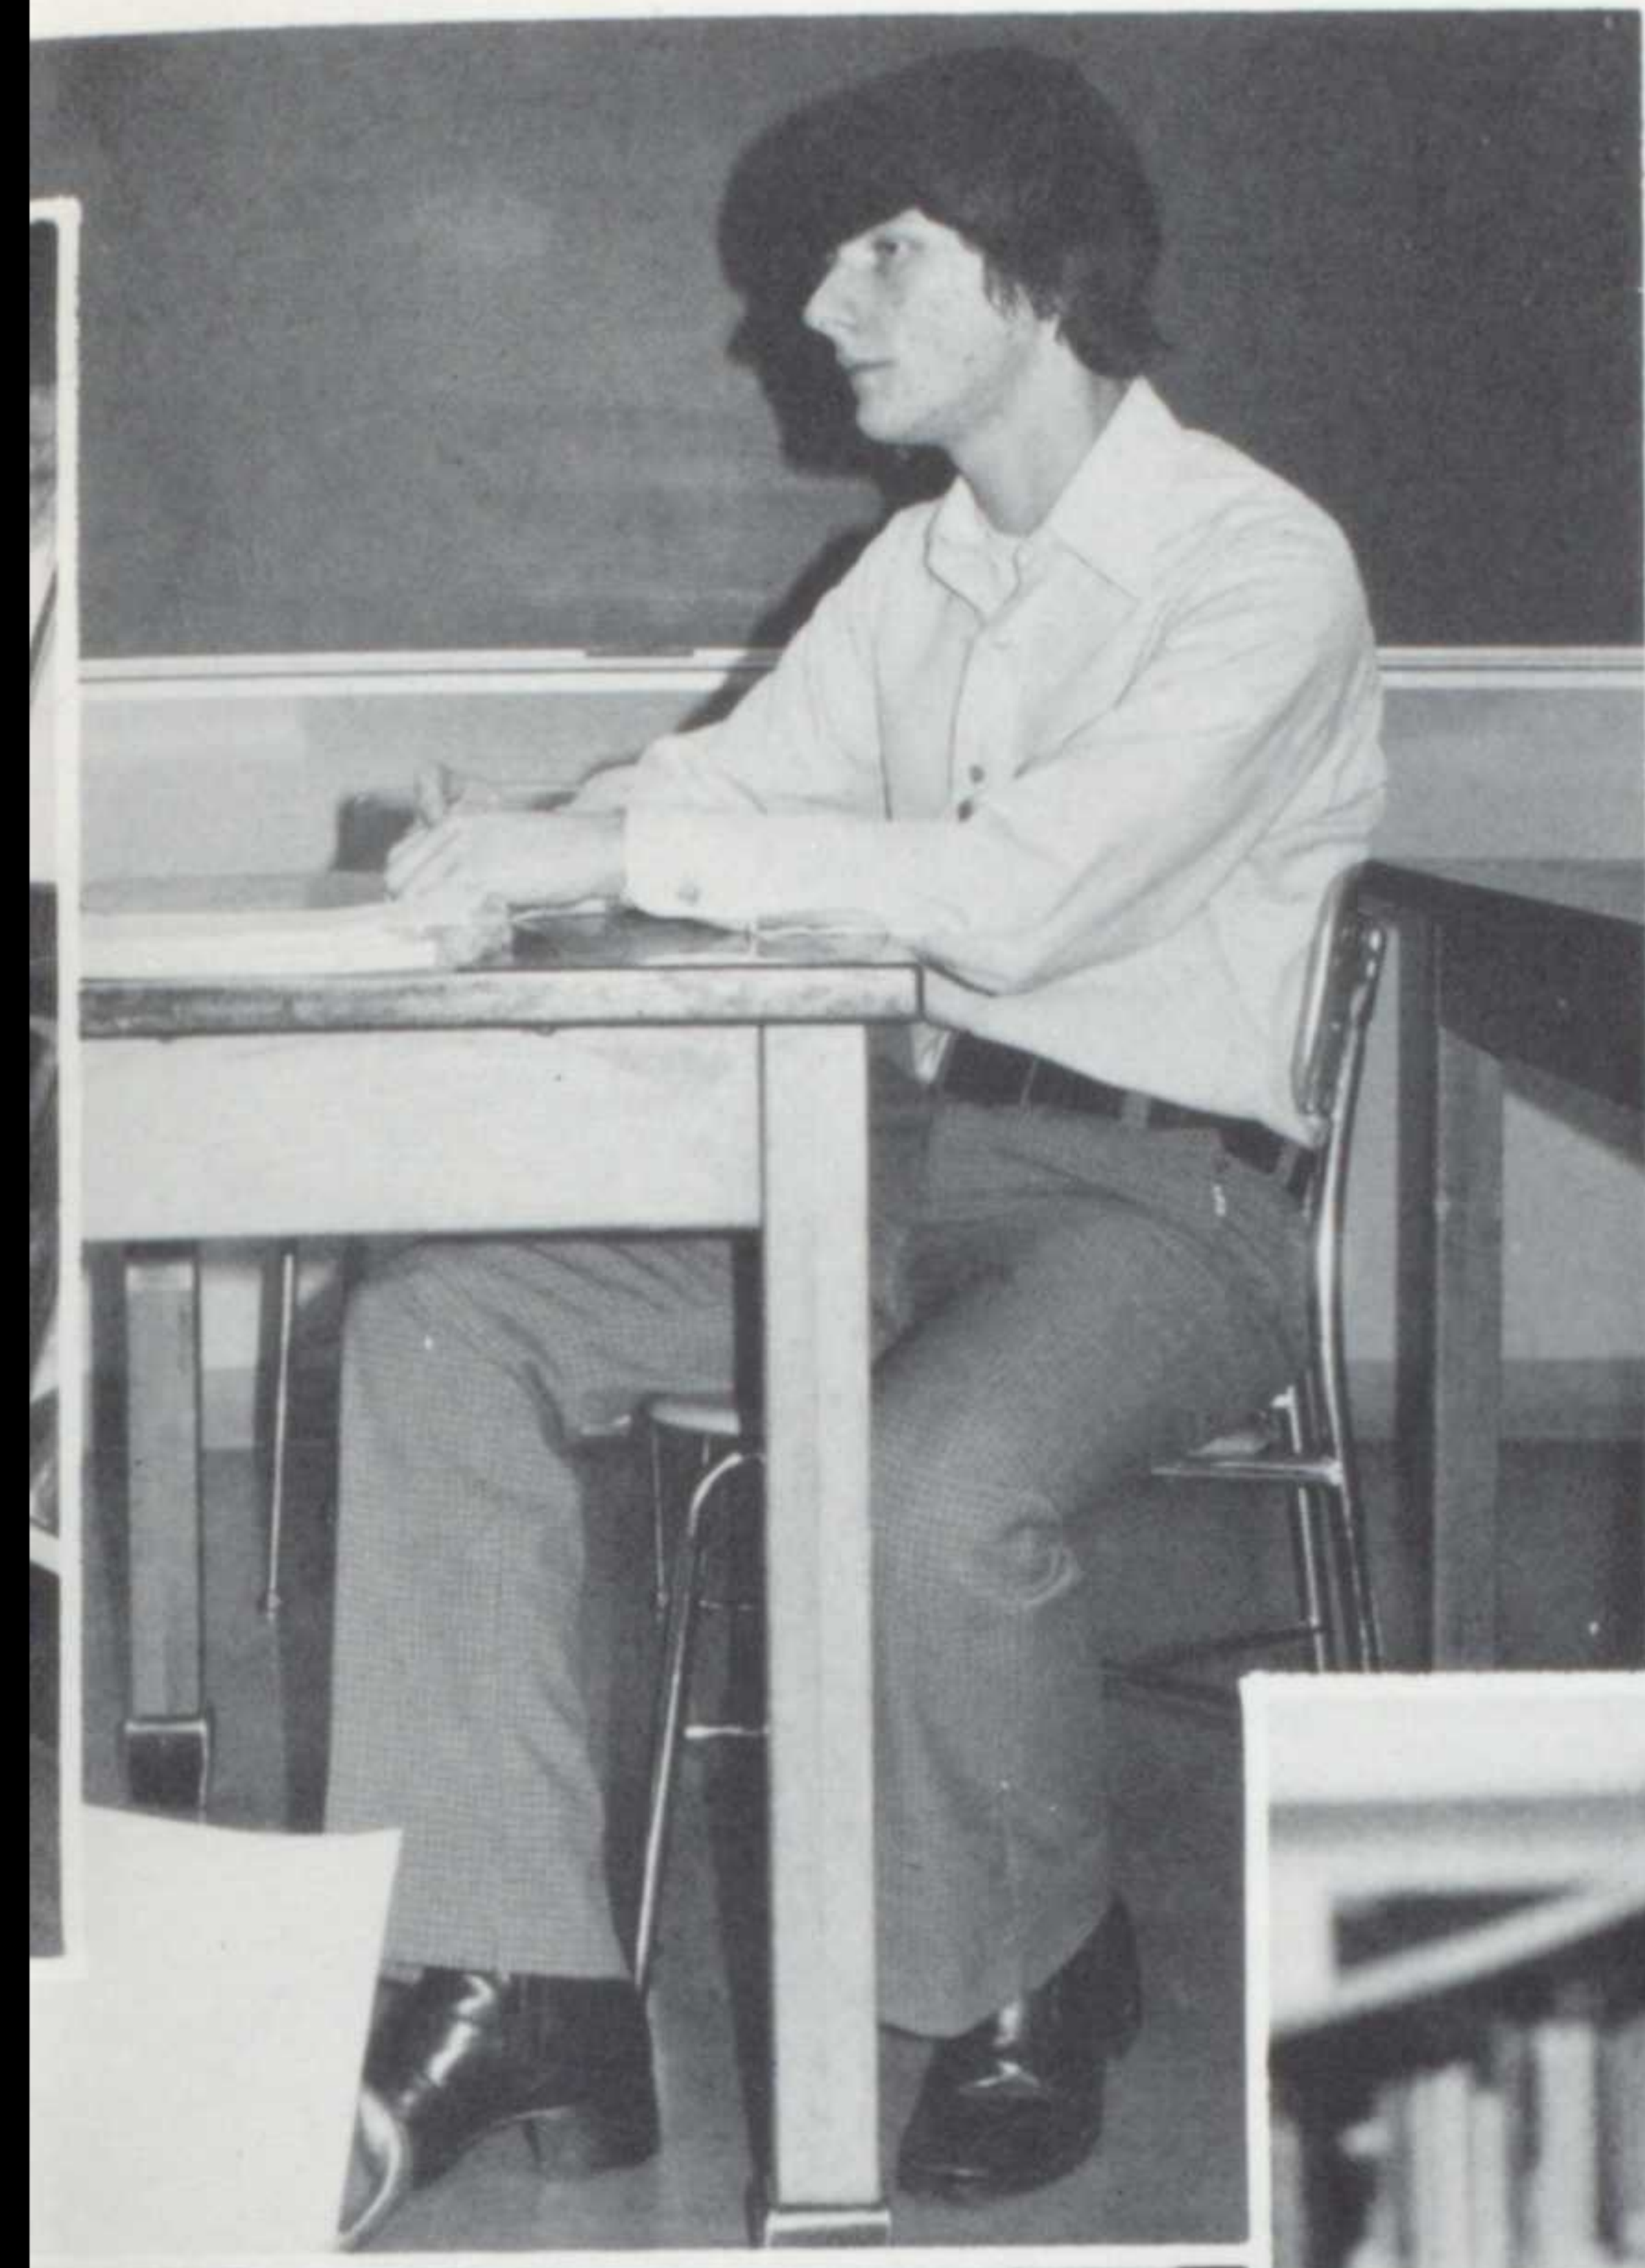

Juniors found History Survey a challenge, as far as reports were concerned. In Mr. Brandt's class, everyone was assigned a paper on any aspect of American History from the landing at Jamestown to the Civil War.

French IV gave the juniors a chance to discover the pamphlet and art files in the library. Each student taught the class for a few days and therefore had to study up on French History.

Besides writing papers for the required courses of soc and psychology, some seniors took the English course, Research Paper. This course involved a quarter of investigation on any subject.

Thus, library learning became an essential skill for every grade.

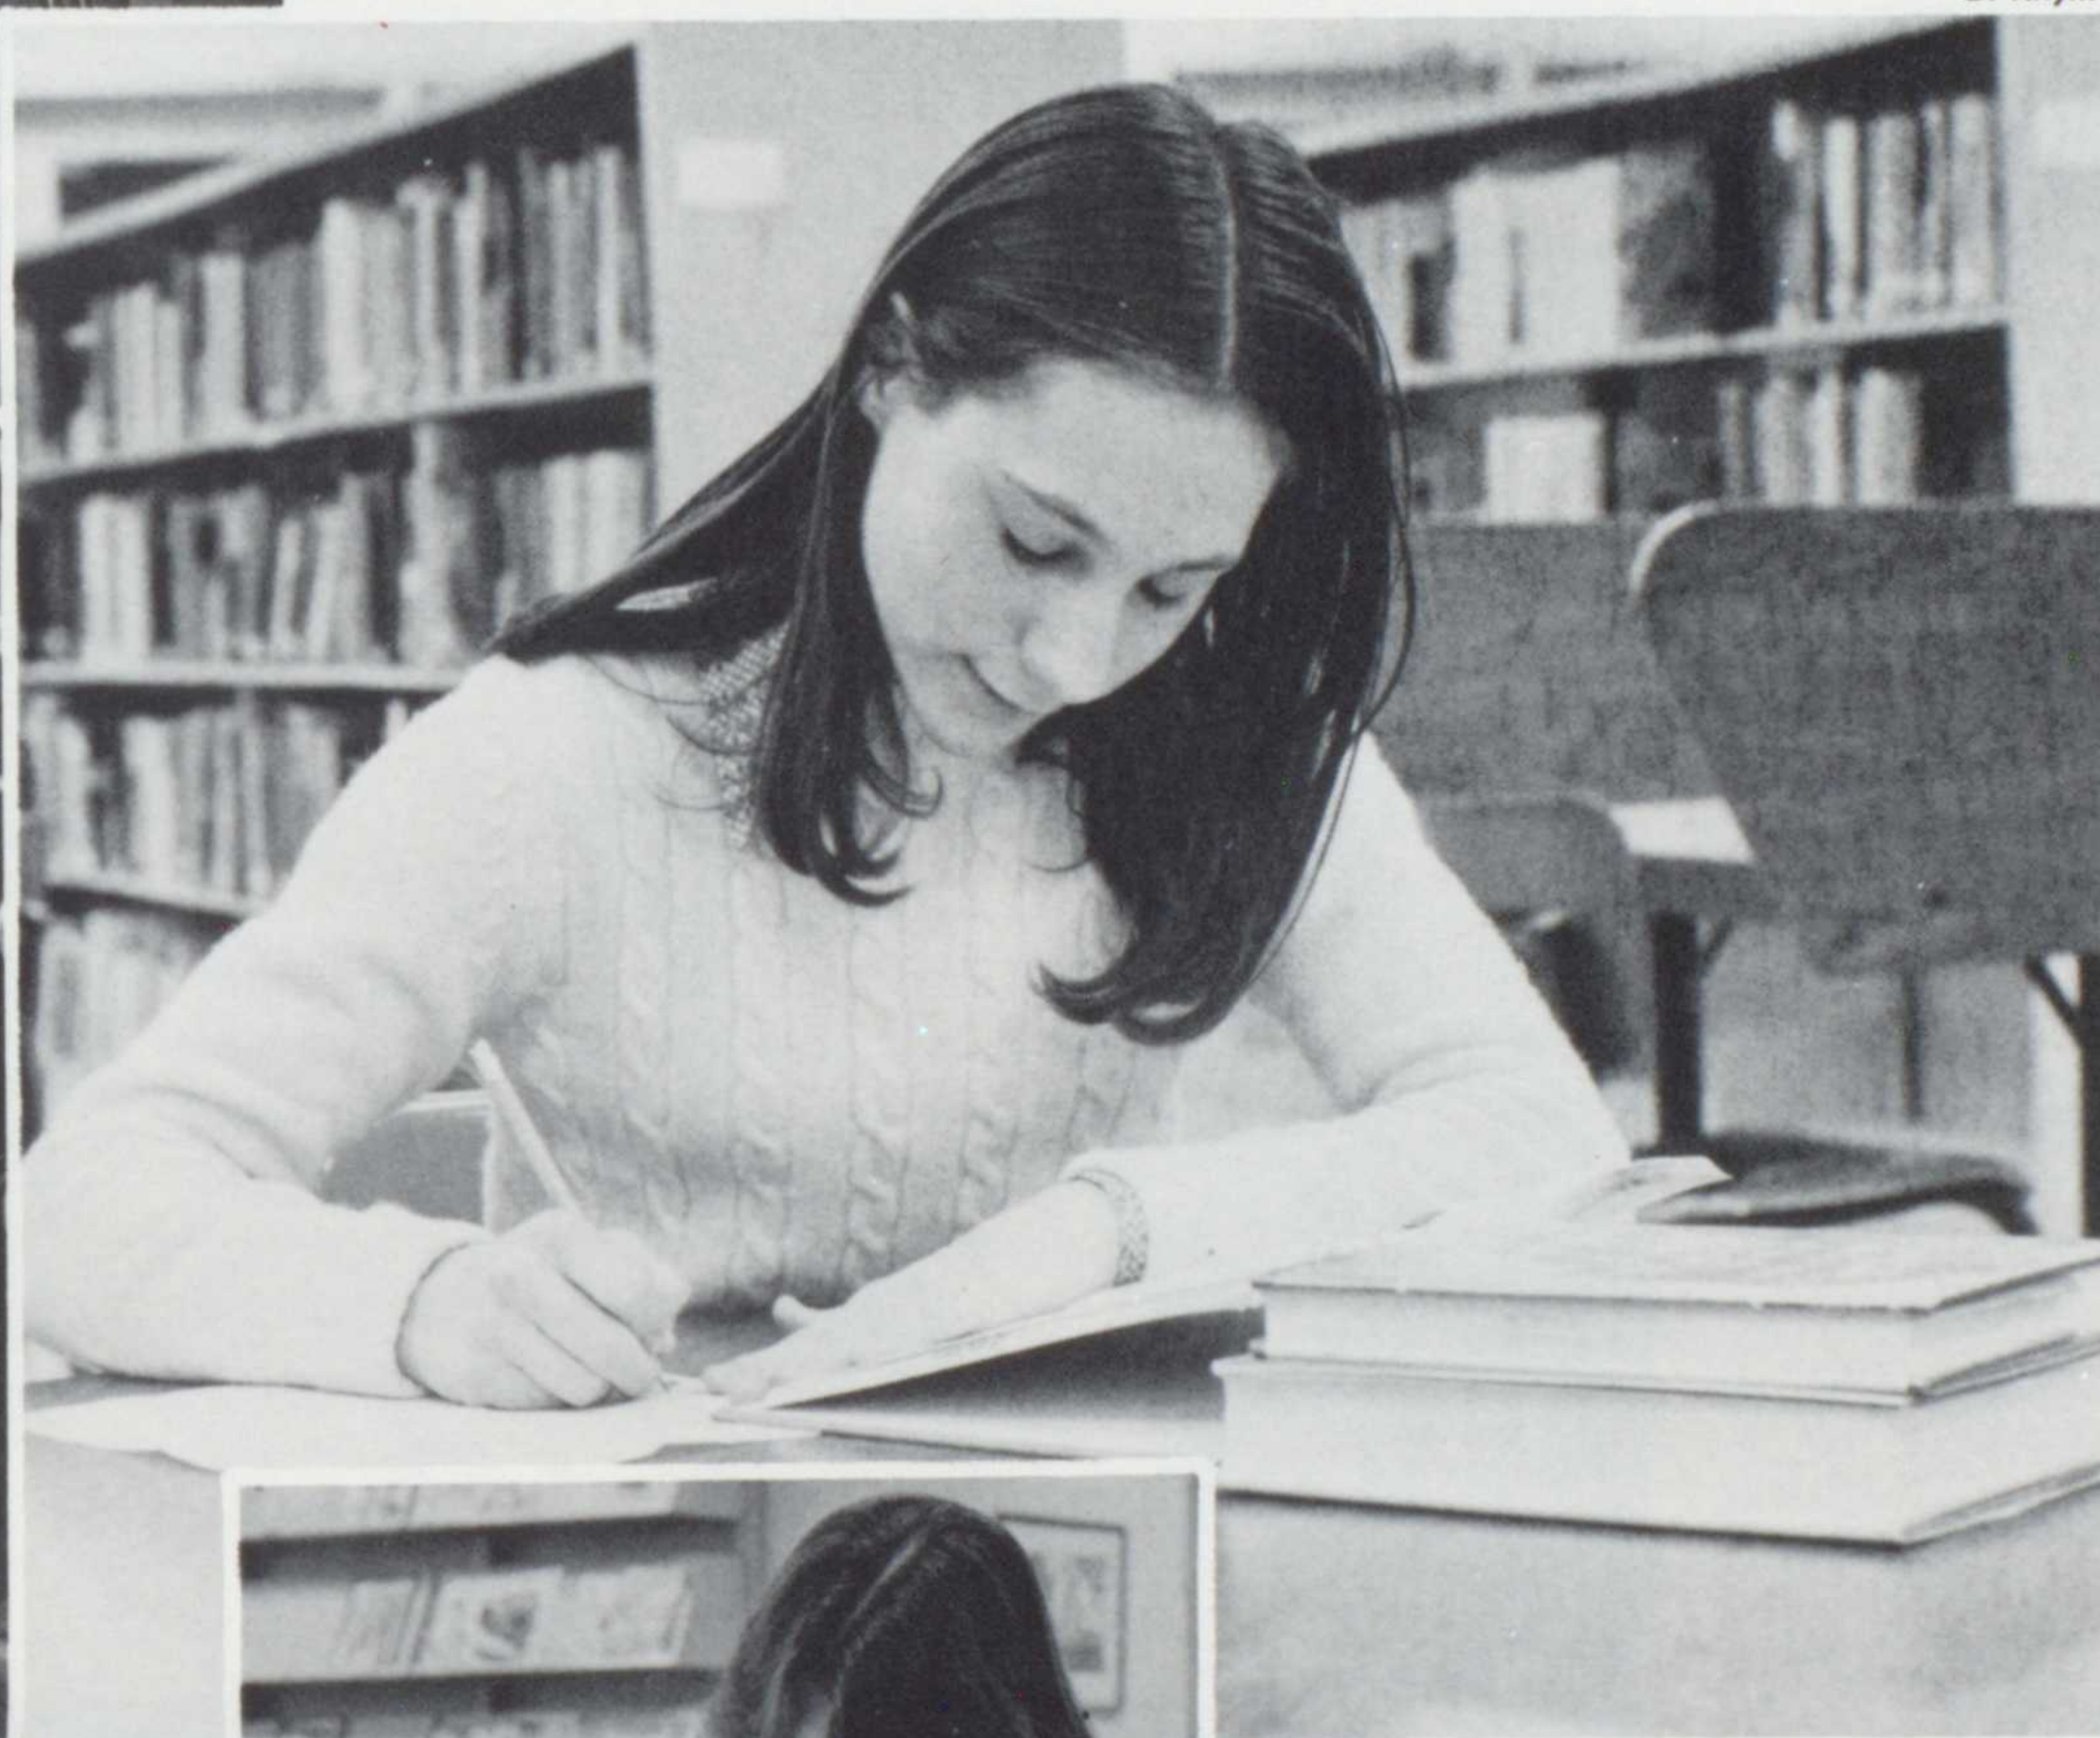

**With an open ear,** Dave Crane absorbs Mr. Wagner's lecture on electricity in Independent Physics II.

**To prevent the state of boredom** during fifth period, John Tsai reads a *Time* magazine to pass the time away.

-D. Khym

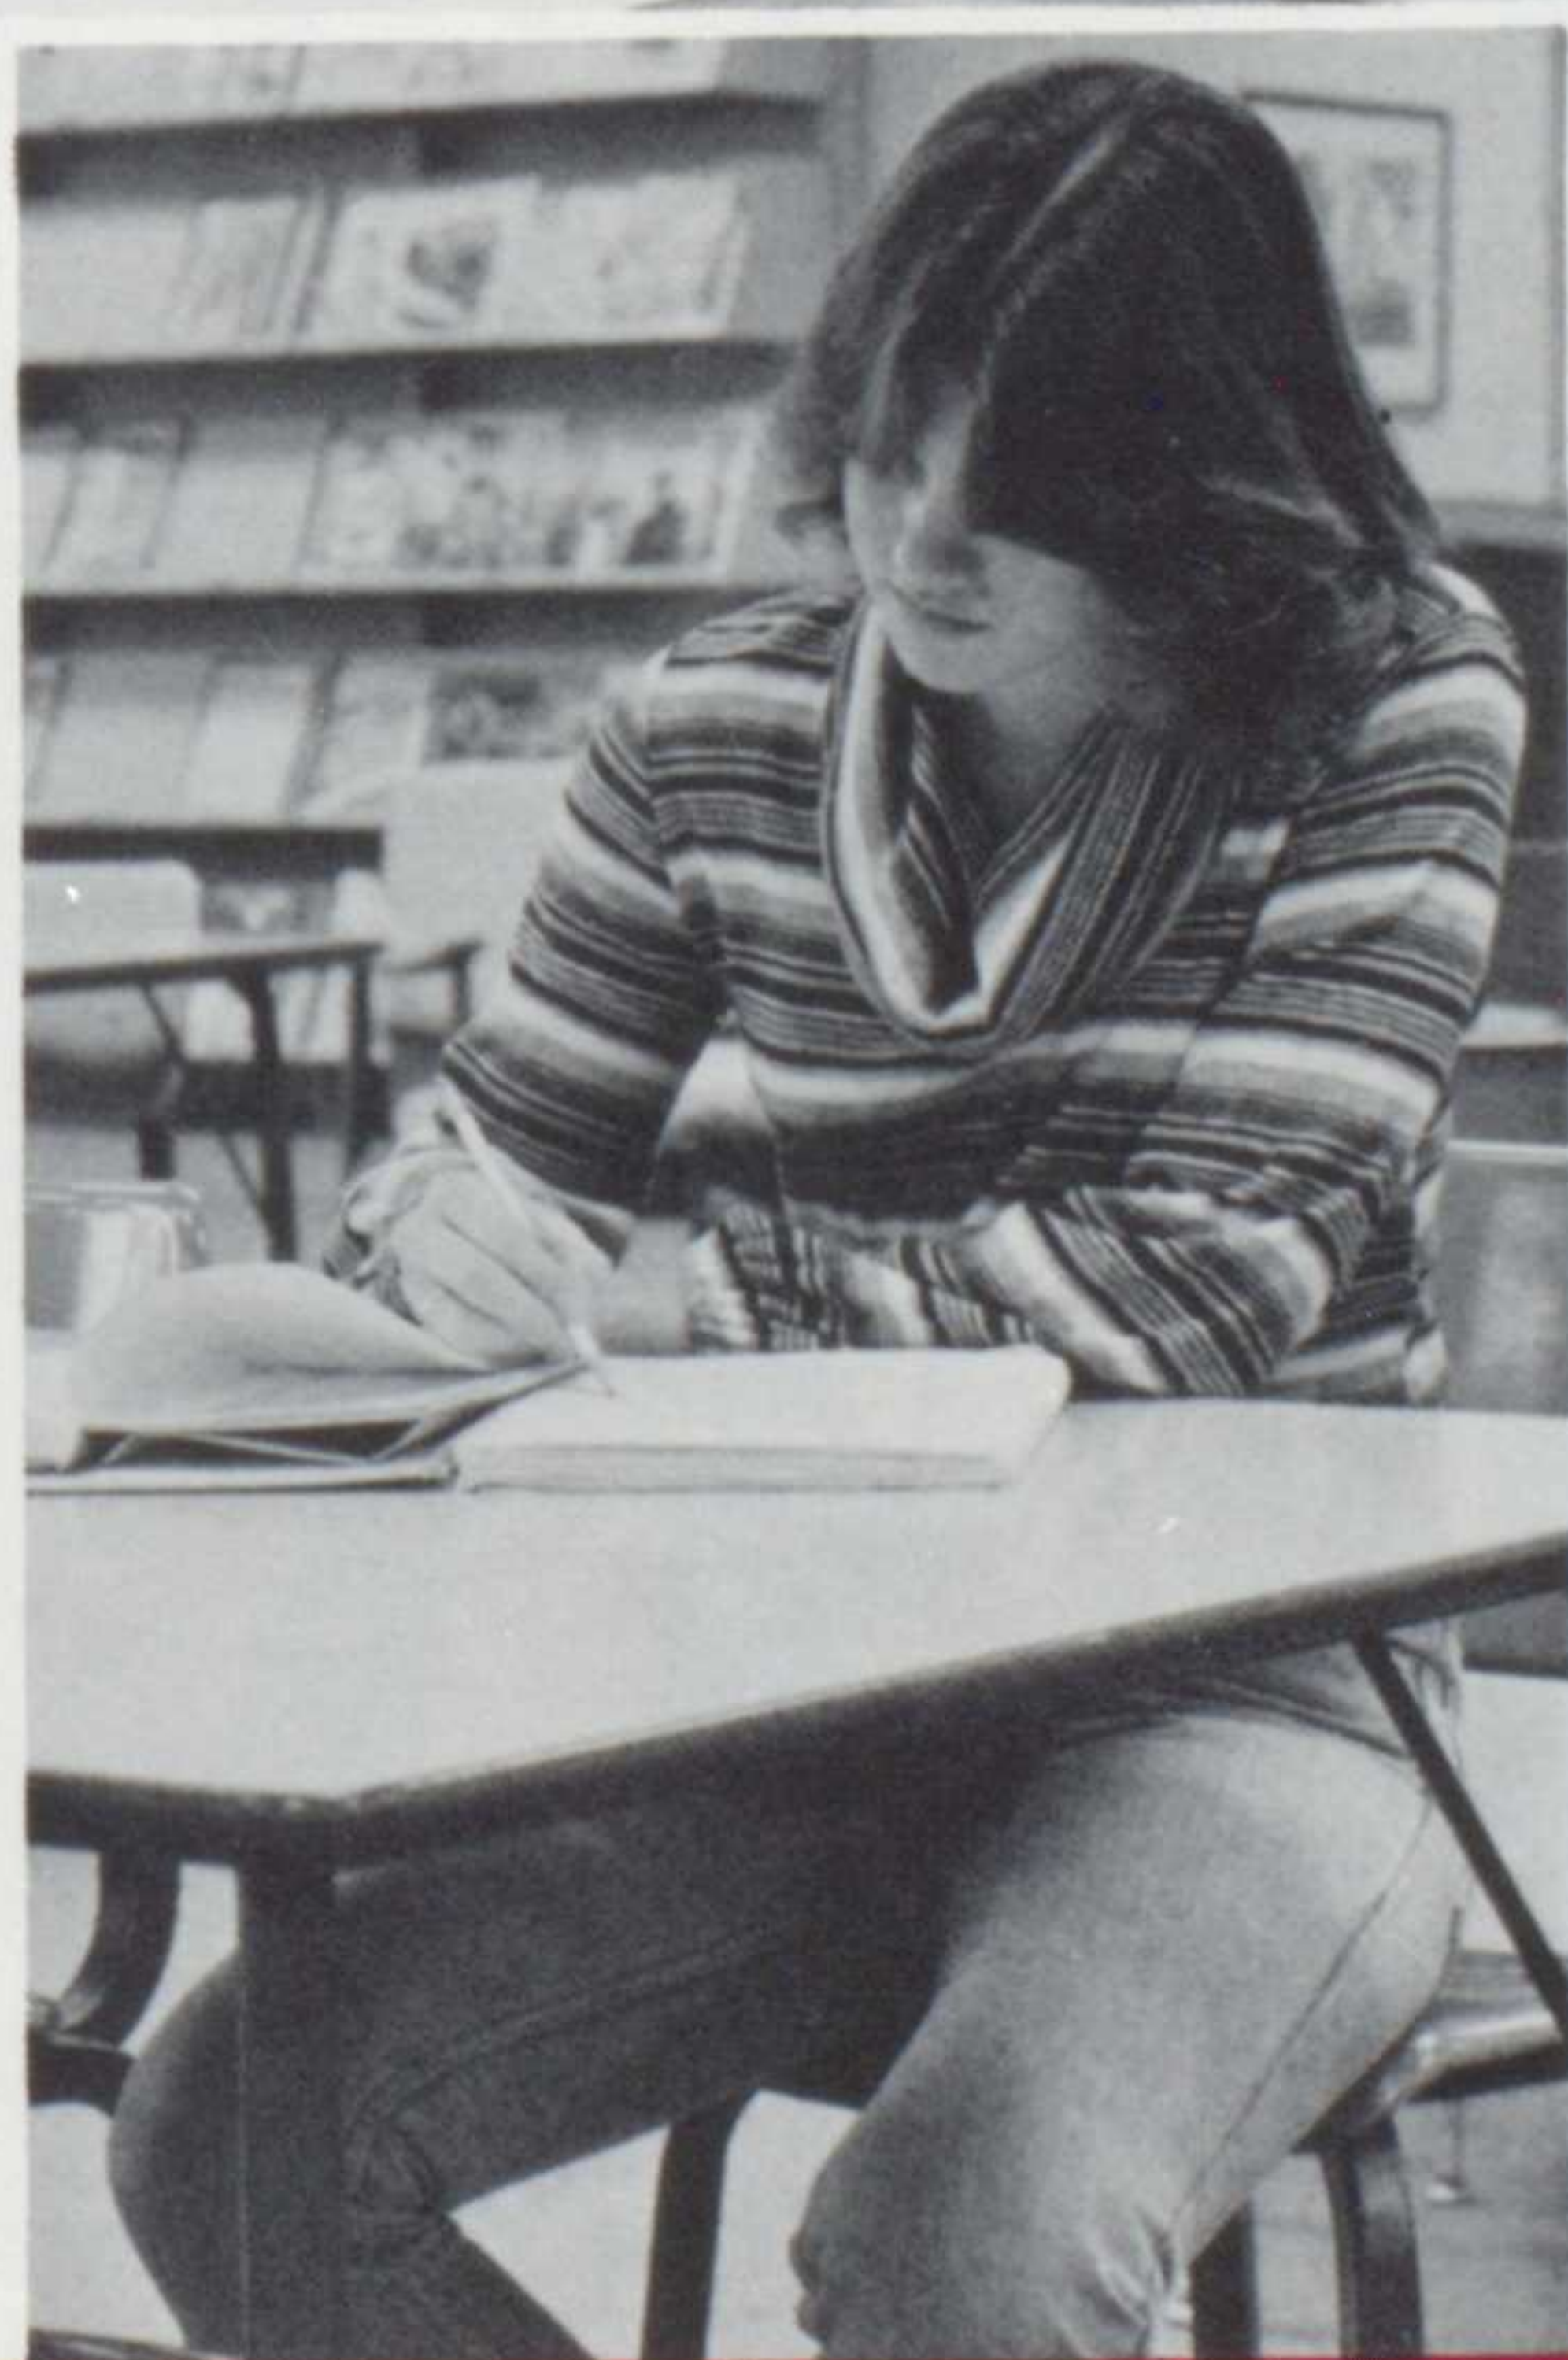

-D. Khym

**In the seventh period** English class Research Paper, Jill Francy takes advantage of the library in order to prepare for her report on food additives.

**By utilizing the card catalog,** Tracey Marlier gathers information for her psychology report on the topic schizophrenia.

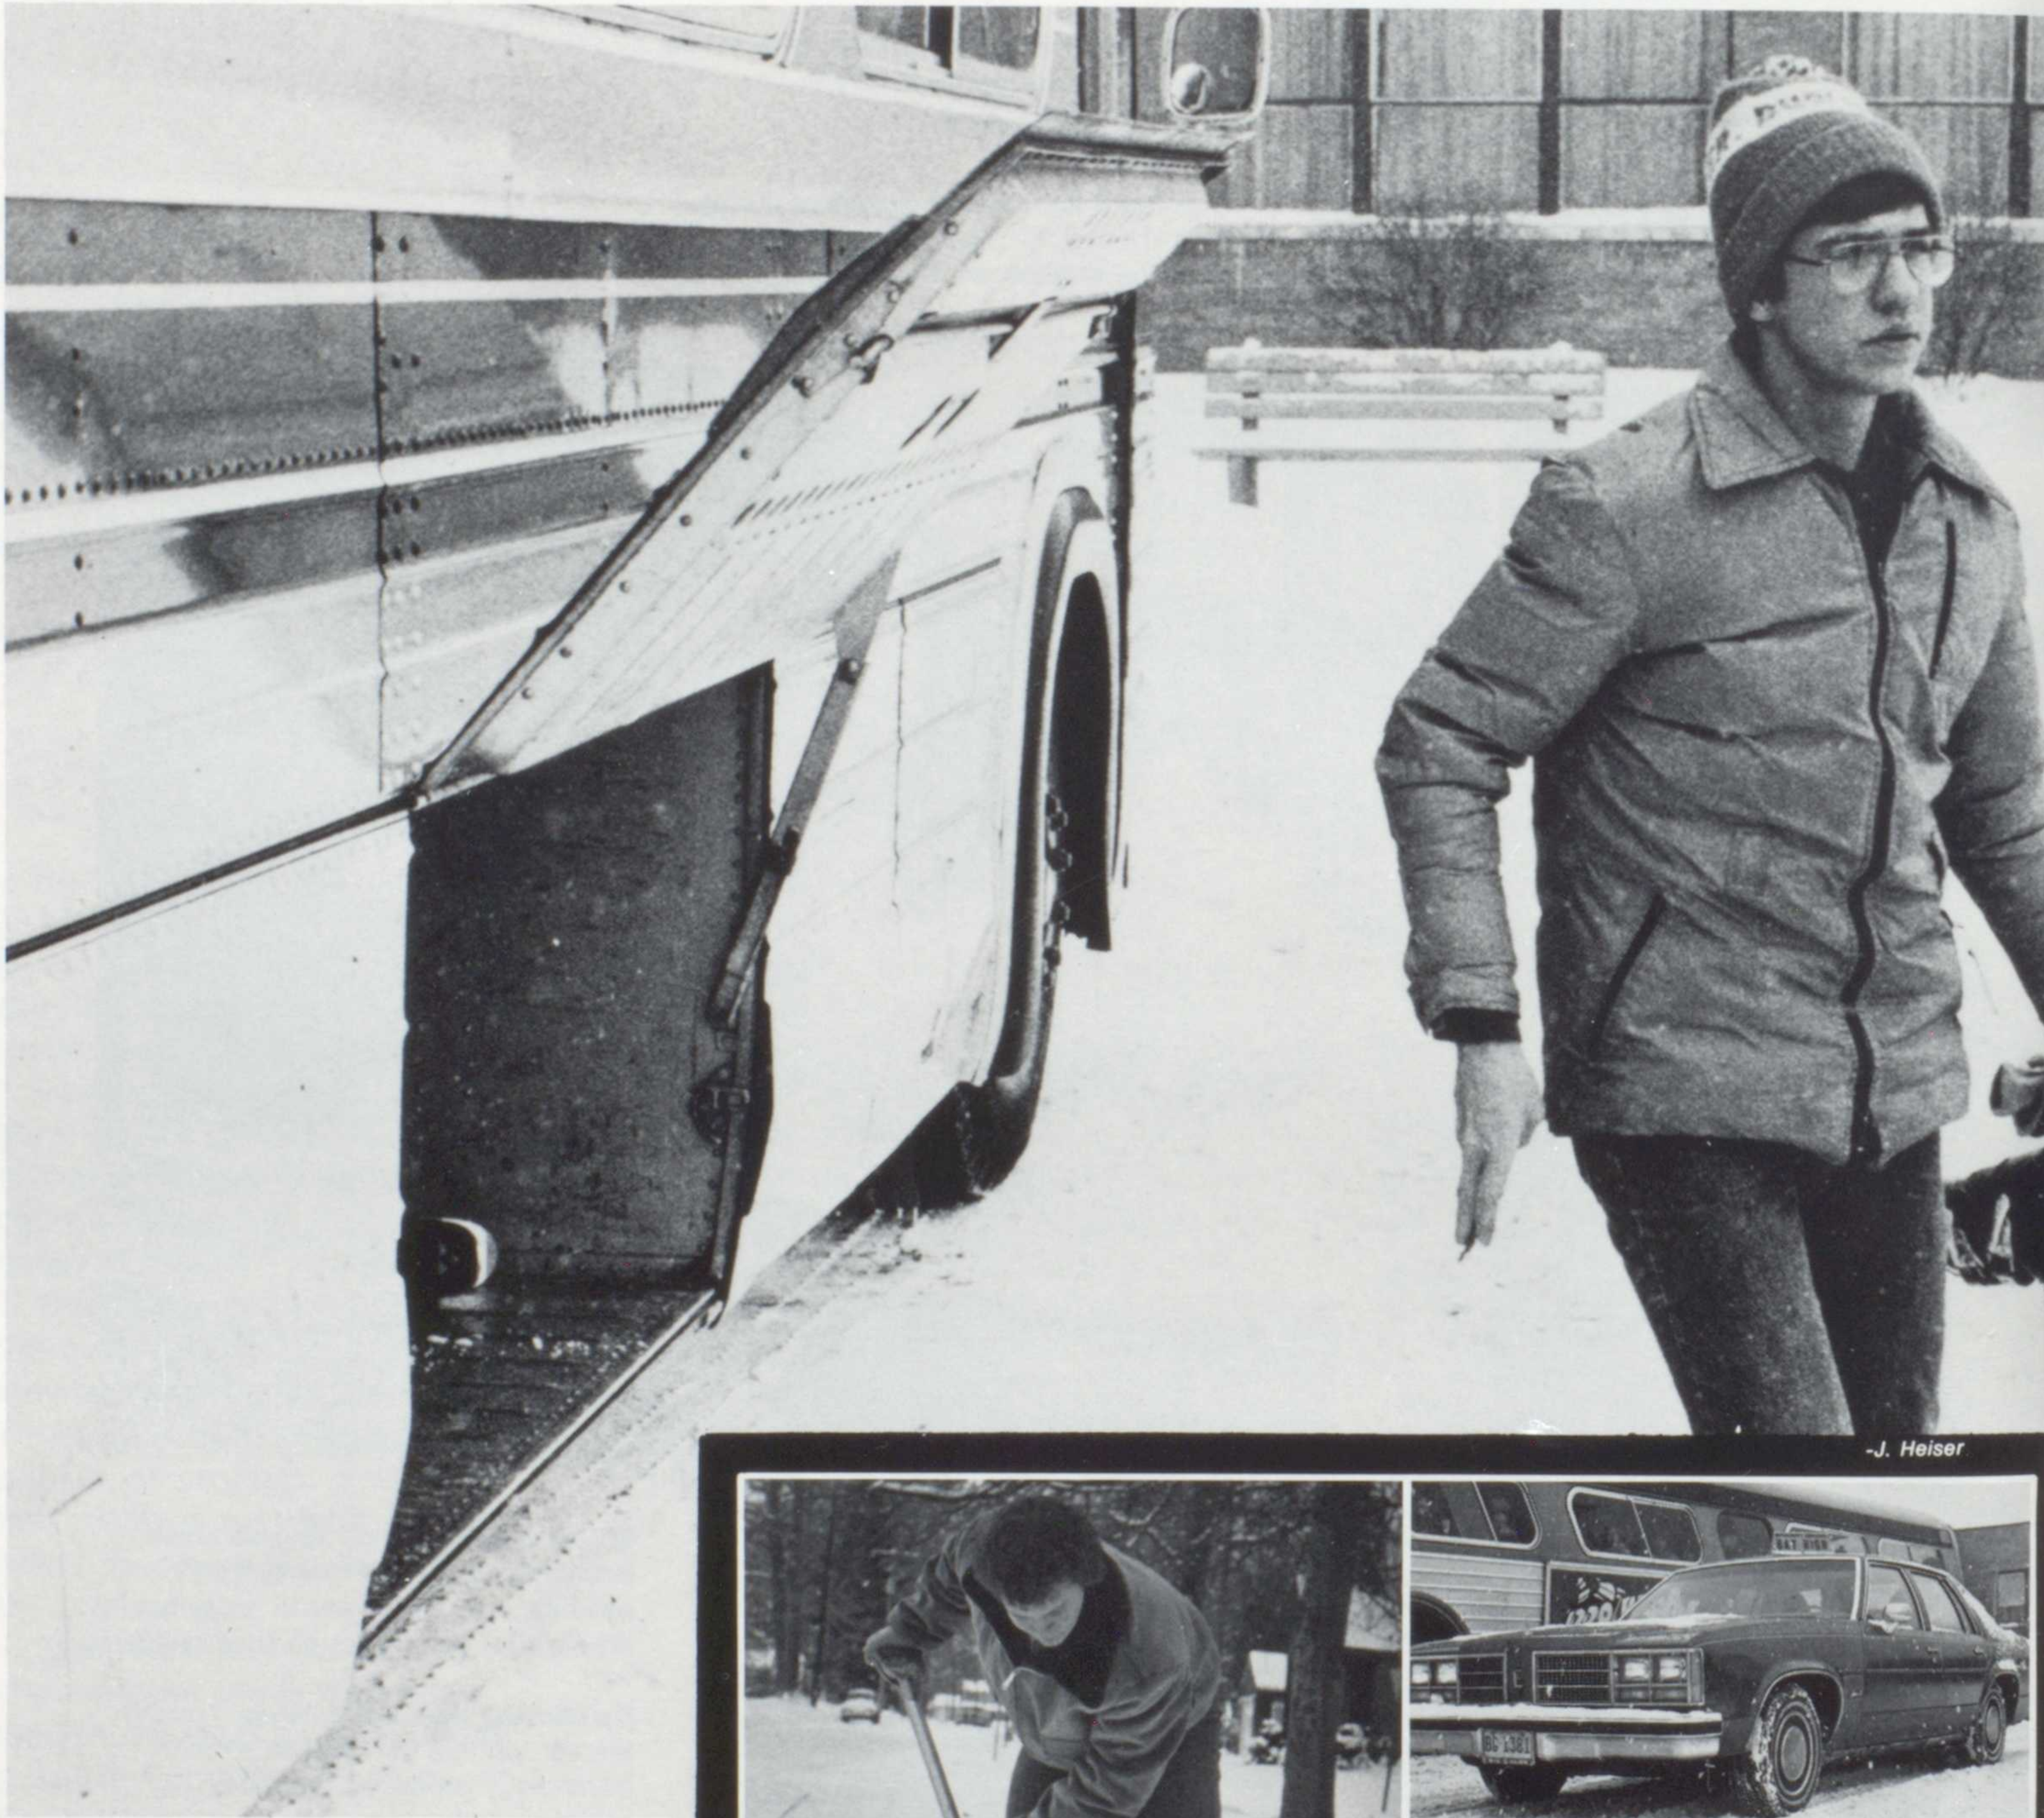

**"All the research took time** and patience to do," said Amy Fritz about her critical problem paper. She spent hours in the library exploring her topic, child abuse.

# It snowed every day but Christmas

After the first freeze, Betsy Hall and Kathy Barker take time off on a Saturday afternoon for a 2:30 skating excursion at Bradley Rink.

**J**anuary 10, 1978. It's hard to believe that we don't live in the snow belt. In a little less than twenty-four hours, ten inches of snow fell on Bay Village, enough to snarl traffic and close the schools for the second time this winter.

However, Bay was better off than many places. Bay schools were the only schools in Western Cuyahoga County that were open on the ninth. This caused much confusion, especially when over 300 students and parents called the school in the early morning hours to find out whether or not there would be classes.

We have had 17 inches of snow so far, compared with 12 or 13 at

## It just kept piling up

this time last year. This year hasn't been as cold though. According to the U.S. Weather Bureau, "Last year,

we had many more days below zero."

Nonetheless, the snow of 1978 has given Northern Ohio its problems. Cleveland's new mayor, Dennis Kucinich, requested that the national guard be sent in to search for stranded motorists. Cleveland Hopkins Airport had to close, and several highways were impassable.

So, those of us who had hoped that this year's winter would be milder than the previous one just had to put on our long underwear, get out our shovels, and patiently unbury our cars.

-D. Khyrn

With the RTA passengers looking on, a load of Driver's Lab sophomores braves the one foot drifts to drive to Amherst. The snow later caused an accident.

In descent down Cahoon Hill, a slope that the city added dirt to for the purpose of making it a sledding hill, Randy Nyerges pursues a fast friend.

**Donned in a Santa Claus hat,** Mr. Knap adds the Christmas spirit to his fifth period class. The hat belongs to Student Congress.

**Every Christmas,** the German IV class decorates Herr Schock's display case. Mr. Schock adjusts an original doll from Germany.

**Angels and wisemen** adorned the walls adding to the theme "The True Meaning of Christmas," while the faculty gathered for their traditional Christmas luncheon.

-B. Hurst

-B. Hurst

When you think of Christmas, your thoughts probably drift

## Christmas: more than just another vacation

to snow, Christmas trees, turkey dinners with your family, presents, church, and carols.

However, the spirit of Christmas was very much alive within the walls of the school.

The office bulletin board was plastered with greeting cards from teachers and alumni, and the cafeteria was adorned with tiny Christmas trees and artificial snow.

But the spirit of Christmas went far beyond the decorations and the ornaments.

The Science Club sponsored a gift shop where students could purchase quality homemade gifts without going broke.

According to junior Gay White, Science Club member, "This year's giftshop was the most successful one we've ever had. I'd say we made about 350 dollars."

The Foods 2 class was also busy; the nine girls planned and served a luncheon for the faculty. The entire month of

December was spent testing recipes and making decorations. Close

to 90 teachers, administrators, and parents enjoyed the ham and Swiss cheese crepes, tossed salad, homemade bread, and buche de noel they were served.

Student Congress spent four weeks planning their annual Christmas project for underprivileged children. Students and faculty contributed 1,190 dollars with which gifts for 60 needy children were purchased.

According to senior Dani Altieri, who planned the party, "It was a very organized party—more so than last year's."

Finally, on the last day before vacation, students exchanged gifts and greetings with their friends.

Even with all of the holiday activities going on at school, most students couldn't wait for vacation, or so they said. But who would admit they still believed in Santa Claus?

# It snowed every day but Christmas

**With a little help** from Kelly Marlier, an inner-city child will soon open a tea set at the Student Congress Christmas Party.

# Almost, but Not Quite

# Keep the ball <sup>B</sup>ou<sup>C</sup>nig

—J. Heiser

I feel our '77 season was a success. Once again we won conference, although it was much more of a challenge than last year.

The highlight of our season was the last match against North Olmsted. It determined who shared the conference title with Avon Lake. We slaughtered them!

We sent two doubles teams to district: Sue Regan and Denise Vosburg; and Colleen Rooney and I. Sue and Denise went on to win districts, and then advanced to state competition and became one of the top four doubles teams in Ohio.

—Lisa O'Donnell

The boys' tennis team also had an outstanding season as we went undefeated in the SWC. The team finished their season as division champions. Also, we placed second in Cleveland while we finished our season ranked sixth in the state.

The team dominated the SWC tournament by having an all Bay doubles final in sectional play. In singles play, I beat River's Drew Forehan and gained the SWC singles title. This win made me the sectional and district champion enabling me to travel to the state tournament. I was defeated in the early rounds, but since it was only my junior year, I didn't expect to get much farther than I did.

—Dave Hook

**Forehand strokes** require much power as Kent Arkes practices in hopes of qualifying for districts in May.

After his strong serve, Tom Jacquet waits for the return volley from Avon Lake's top doubles team.

If you ever wanted to know the meaning of tradition, just check out the cross country teams.

In June the girls' cross country team began training to prepare themselves for the upcoming season. Running ten miles a day didn't seem like much because we wanted to be the best team in the state of Ohio.

During the season, we began to grow as a unit, a strong unit and a winning unit. Many close friendships developed as we worked, hurt, won, and lost together. No one person claimed credit for victory, and no one person accepted the blame for defeat. We were a *team* that won all of its dual meets and four major invitational titles.

—Laura Welch

The junior varsity cross country team also had a winning season even though we lost everybody from last year. The thing that kept us winning was that we wanted to uphold the J.V. tradition of excellence. Composed mainly of sophomores, we proved ourselves to be one of the top teams in the state.

The freshmen put in many miles in preparation for their season. One of our highlights was winning the Tiffin Invitational. We all had a good time and a great season.

—Dave Cousins

Ready to take her place card at the end of her run, Ellen Healy bounds through the finish line in the Westlake meet.

## Almost, But Not Quite continued

# 1700 miles: A great way to run down tread

During our running or before races each one of us has his own way of getting ready. It may be in our rituals or in the food we eat. For example: *Chris*: Eats a big meal of pizza or spaghetti two nights before the race and a lighter meal of the same things on the day before. The day of the race he will eat an English muffin and a little Lawson's fruit juice. *Me*: I follow the same routine as Chris but for breakfast I eat anything from bananas and lemon juice mixed in a blender to wheat germ. *Ross*: Eats the same dinner but the day of the race he will eat a bowl of cereal with a splash of milk.

He goes through a case of wheat germ a week; it's good for the blood. *Ed*: Will eat the same things on Thursday but on Friday, fish and brussel sprouts.

*Doug*: Loves fruits, especially bananas. He has to watch his weight. *Jon*: Will get beat up by Chris because he eats Three Musketeers, fluffy not stuffy.

Everybody differs in the way they prepare for a race. Some say the things they do are for good luck. For example: *Chris*: Must throw up before his race to ensure that he will run well.

*Me*: Cut my fingernails the night before. *Eddy*: Will never wear a pair of matching socks. *Ross*: Wears the same spikes he has had for three cross country and track seasons. Some must even wear a certain pair of underwear or a special T-shirt to feel that they are ready for the race. ■

-J. Heiser

## Skating on thin ice

Ice, ice, ice, inside and outside. One thing's for sure, the hockey team didn't mind the cold weather because there was always enough ice anywhere to play their game.

The team entered the season with 11 returning lettermen, four rookies and four transfer players. The transfer players included senior Derek Fuller from Baltimore, Md., Jim Melcher from Colorado and senior Dan and junior John Murphy from Cincinnati.

The icers started the season with two wins, including a hard-fought win over a tough Euclid team and an easy win over St. Ignatius, and they kept on with their winning ways.

One of the highlights of the season was Dan Murphy's 15-0 shutout against Brooklyn.

Another exciting game was played against Rocky River; the icers had to settle for a disappointing 5-5 tie when River scored with only 24 seconds left to play.

The final game of the season saw Bay against River for the Western Division championship. Marc Fedor explained, "The game was really one of our biggest of the season." In a fast-moving and exciting game, River prevailed by a score of 4-3 to

become division champs. The game featured a great display of team hustle in which a record 814 spectators turned out.

Injuries to the team were not significant, although the losses to Shaker Heights and Padua were suffered while junior right wing Jon Osborne was sidelined due to a separated clavicle.

Coach "H" Williams offered these comments about the season. "The players never gave up in any game no matter what the score was.

They always gave 100 percent. There were many close games."

He added, "It would be nice to have a rink in Bay so that the team didn't have to go to Winterhurst in Lakewood for our practices four times a week."

Many players eat spaghetti before a game because it digests quickly.

Marc Fedor

Next year will be a rebuilding year for Bay as 13 icers will be graduating.

Top scorers for the season were Chris Lowry with eighteen goals, forty-one assists; Marc Fedor with nineteen goals, twenty-seven assists; and Derek Fuller with twenty goals, eighteen assists. The icers ended their season tied for second place in the Eastern Division of the Greater Cleveland High School Hockey League.

# New team makes big splash

continued

## Here & There

Chris Martoglio

Near the end of his lap, backstroker Chris Martoglio obtains his quickest time, 1 minute and 1 second, after smashing through the water at Districts.

After Christmas, blue construction paper swimmers joined the ranks of paper basketballs, hockey sticks and gymnasts lining the walls outside the cafeteria. They were one of the few visible signs of BHS's newest athletic sport, swimming.

Since the Bay Pool was frozen over, the mermen practiced at the West Shore "Y". Practices were from 8:30-10:30 in the evening, and several times there were early morning practices. The schedule was a little awkward for some of the swimmers. Rusty Sage explained, "We never got enough sleep, and since we practiced on Friday nights, we couldn't go out very much."

Mr. Pete Odell, a Bay resident who teaches at Olmsted Falls, coached the teams. "He's a really great coach and the

driving force behind our team," Rich Aronson stated.

The home meets were held at the Y, and the away ones ranged from Rocky River to Mayfield Heights, since not many SWC schools have swim teams. They finished the season with a

record of 9-2. Being a new team put quite a bit of pressure on the guys. "We had to start off well and prove ourselves in the eyes of the school," Rich Aronson explained.

The student body failed to show much interest in the team, possibly because of the distance factor.

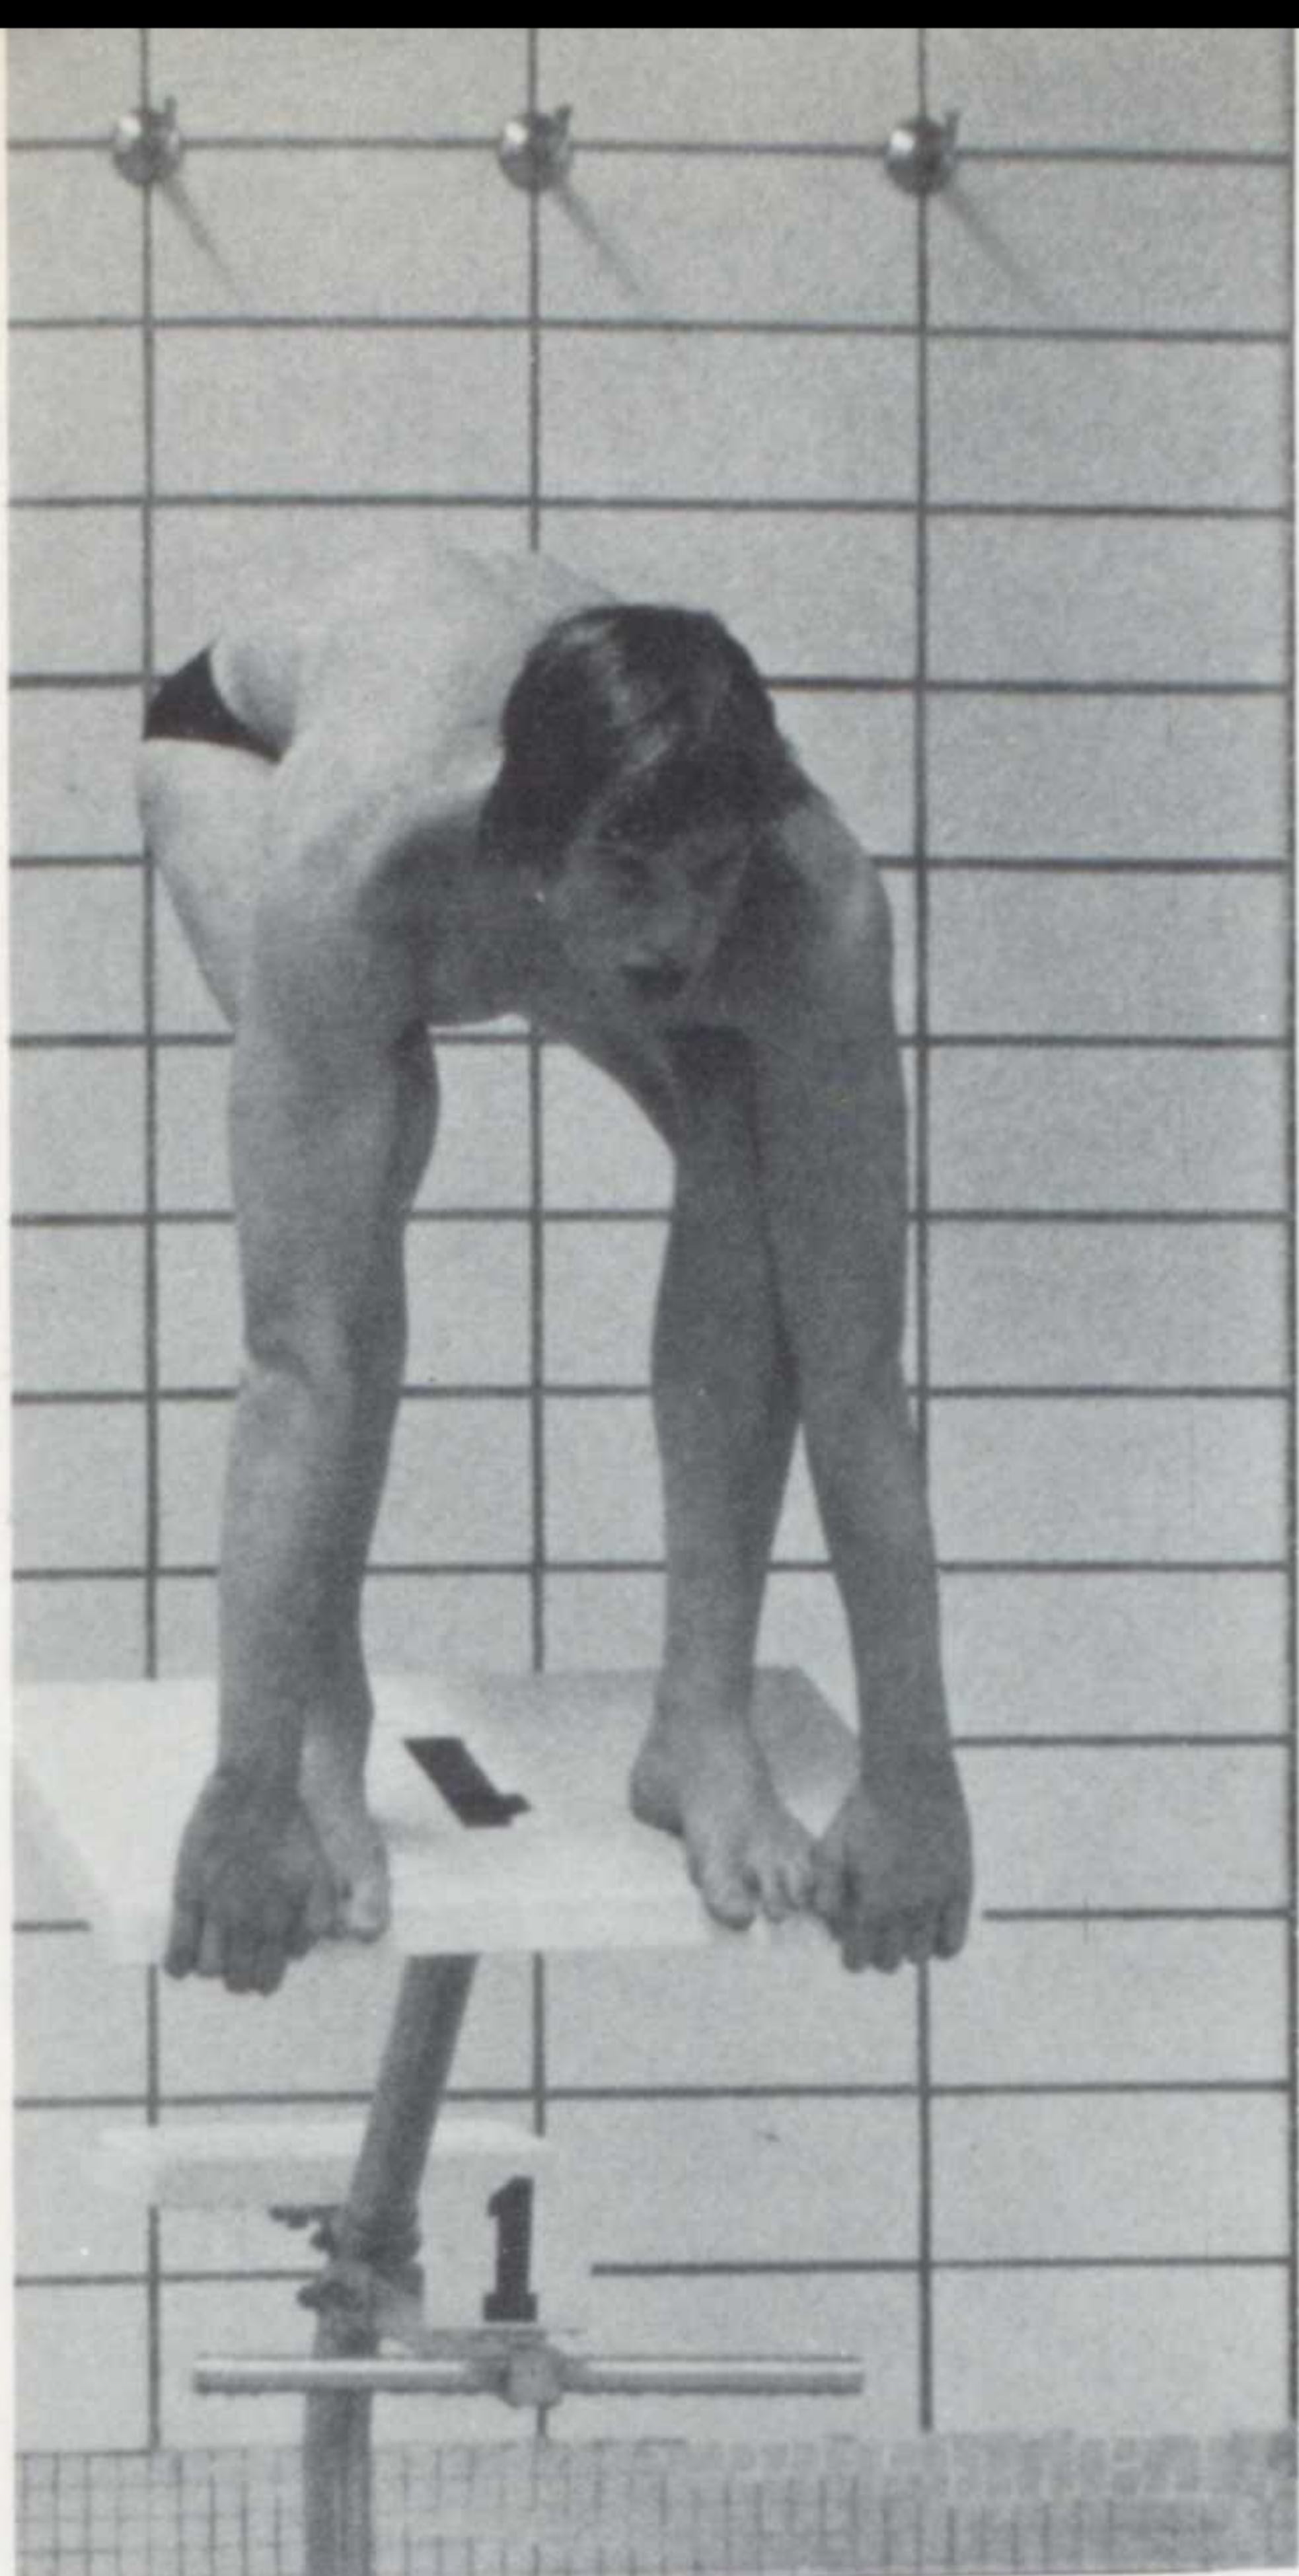

"It was disappointing not to have more fans at the meets," Dave Popp said. "When people hear more about the team, I hope there will be a bigger crowd."

It looks like swimming is one more sport in which BHS has really made a splash!

“The 6:00 a.m. practices took a while to get used to.”  
-D. Khym

# Rolling in the right direction

Who would spend their Saturday mornings in the alleys of Cleveland? Well, the Bay Keglars ventured downtown to Erieview Lanes for all of their matches. With regard to transportation, Dan Kassel stated, "Driving to the downtown area was sometimes a major problem. We were often without a driver, but somehow we always seemed to manage."

Bowling was a sport that required much practice and much time to make improvements. Doug Ramsayer commented, "We really never had an organized practice, but many of us participated in a league at Bay Lanes."

With respect to the poor attendance at the matches, Mike Cahill concluded, "I feel that we did not have much fan support because our bowling team isn't too well known, and it is very difficult for the spectators to go downtown."

Since bowling takes so much concentration, Mike Russo added, "Bowling is a game that requires much patience, and one cannot afford to get disgusted with himself."

Another sport that took much concentration was golf.

Spring practices may not seem unusual for the baseball team, but for the golf team? Well, Vicki Davidson stated, "I usually practice or play golf every day starting in the spring when the weather breaks."

When school started and the team began competition, they had

one of their best matches against Strongsville. Coach Steinhilber explained, "Our first match with Strongsville was the most exciting because their record for the previous year was 21-1, and we were the only ones to beat them this year."

Even though the team played 19 games, each member had his opinion on the most exciting match. John Anderson noted, "My most exciting game was at the SWC tournament until it rained. I was three over when the torrential downpour hit, and then I triple bogeyed."

Nevertheless, the team had a good season. According to Coach Steinhilber, "Some of the coaches thought we'd end up in fifth place, but we ended up in second. I was very happy with our finish." ■

**While practicing for** their last match, Mike Cahill and Karen Fuller improve their style to raise Bay from a ninth place finish in the Alpha Division.

## We found: A badminton team

Badminton anyone? In reply, nine BHS students were involved in the unusual experiment. They journeyed to Westlake to take on some of their students in an informal badminton match. The BHS students who competed were Tom Alten, Doug Barge, Emmy Deidrick, John Griffiths, Barb Jonas, Becky Rothfusz, Shirley Shepherd, Bart Sullivan and

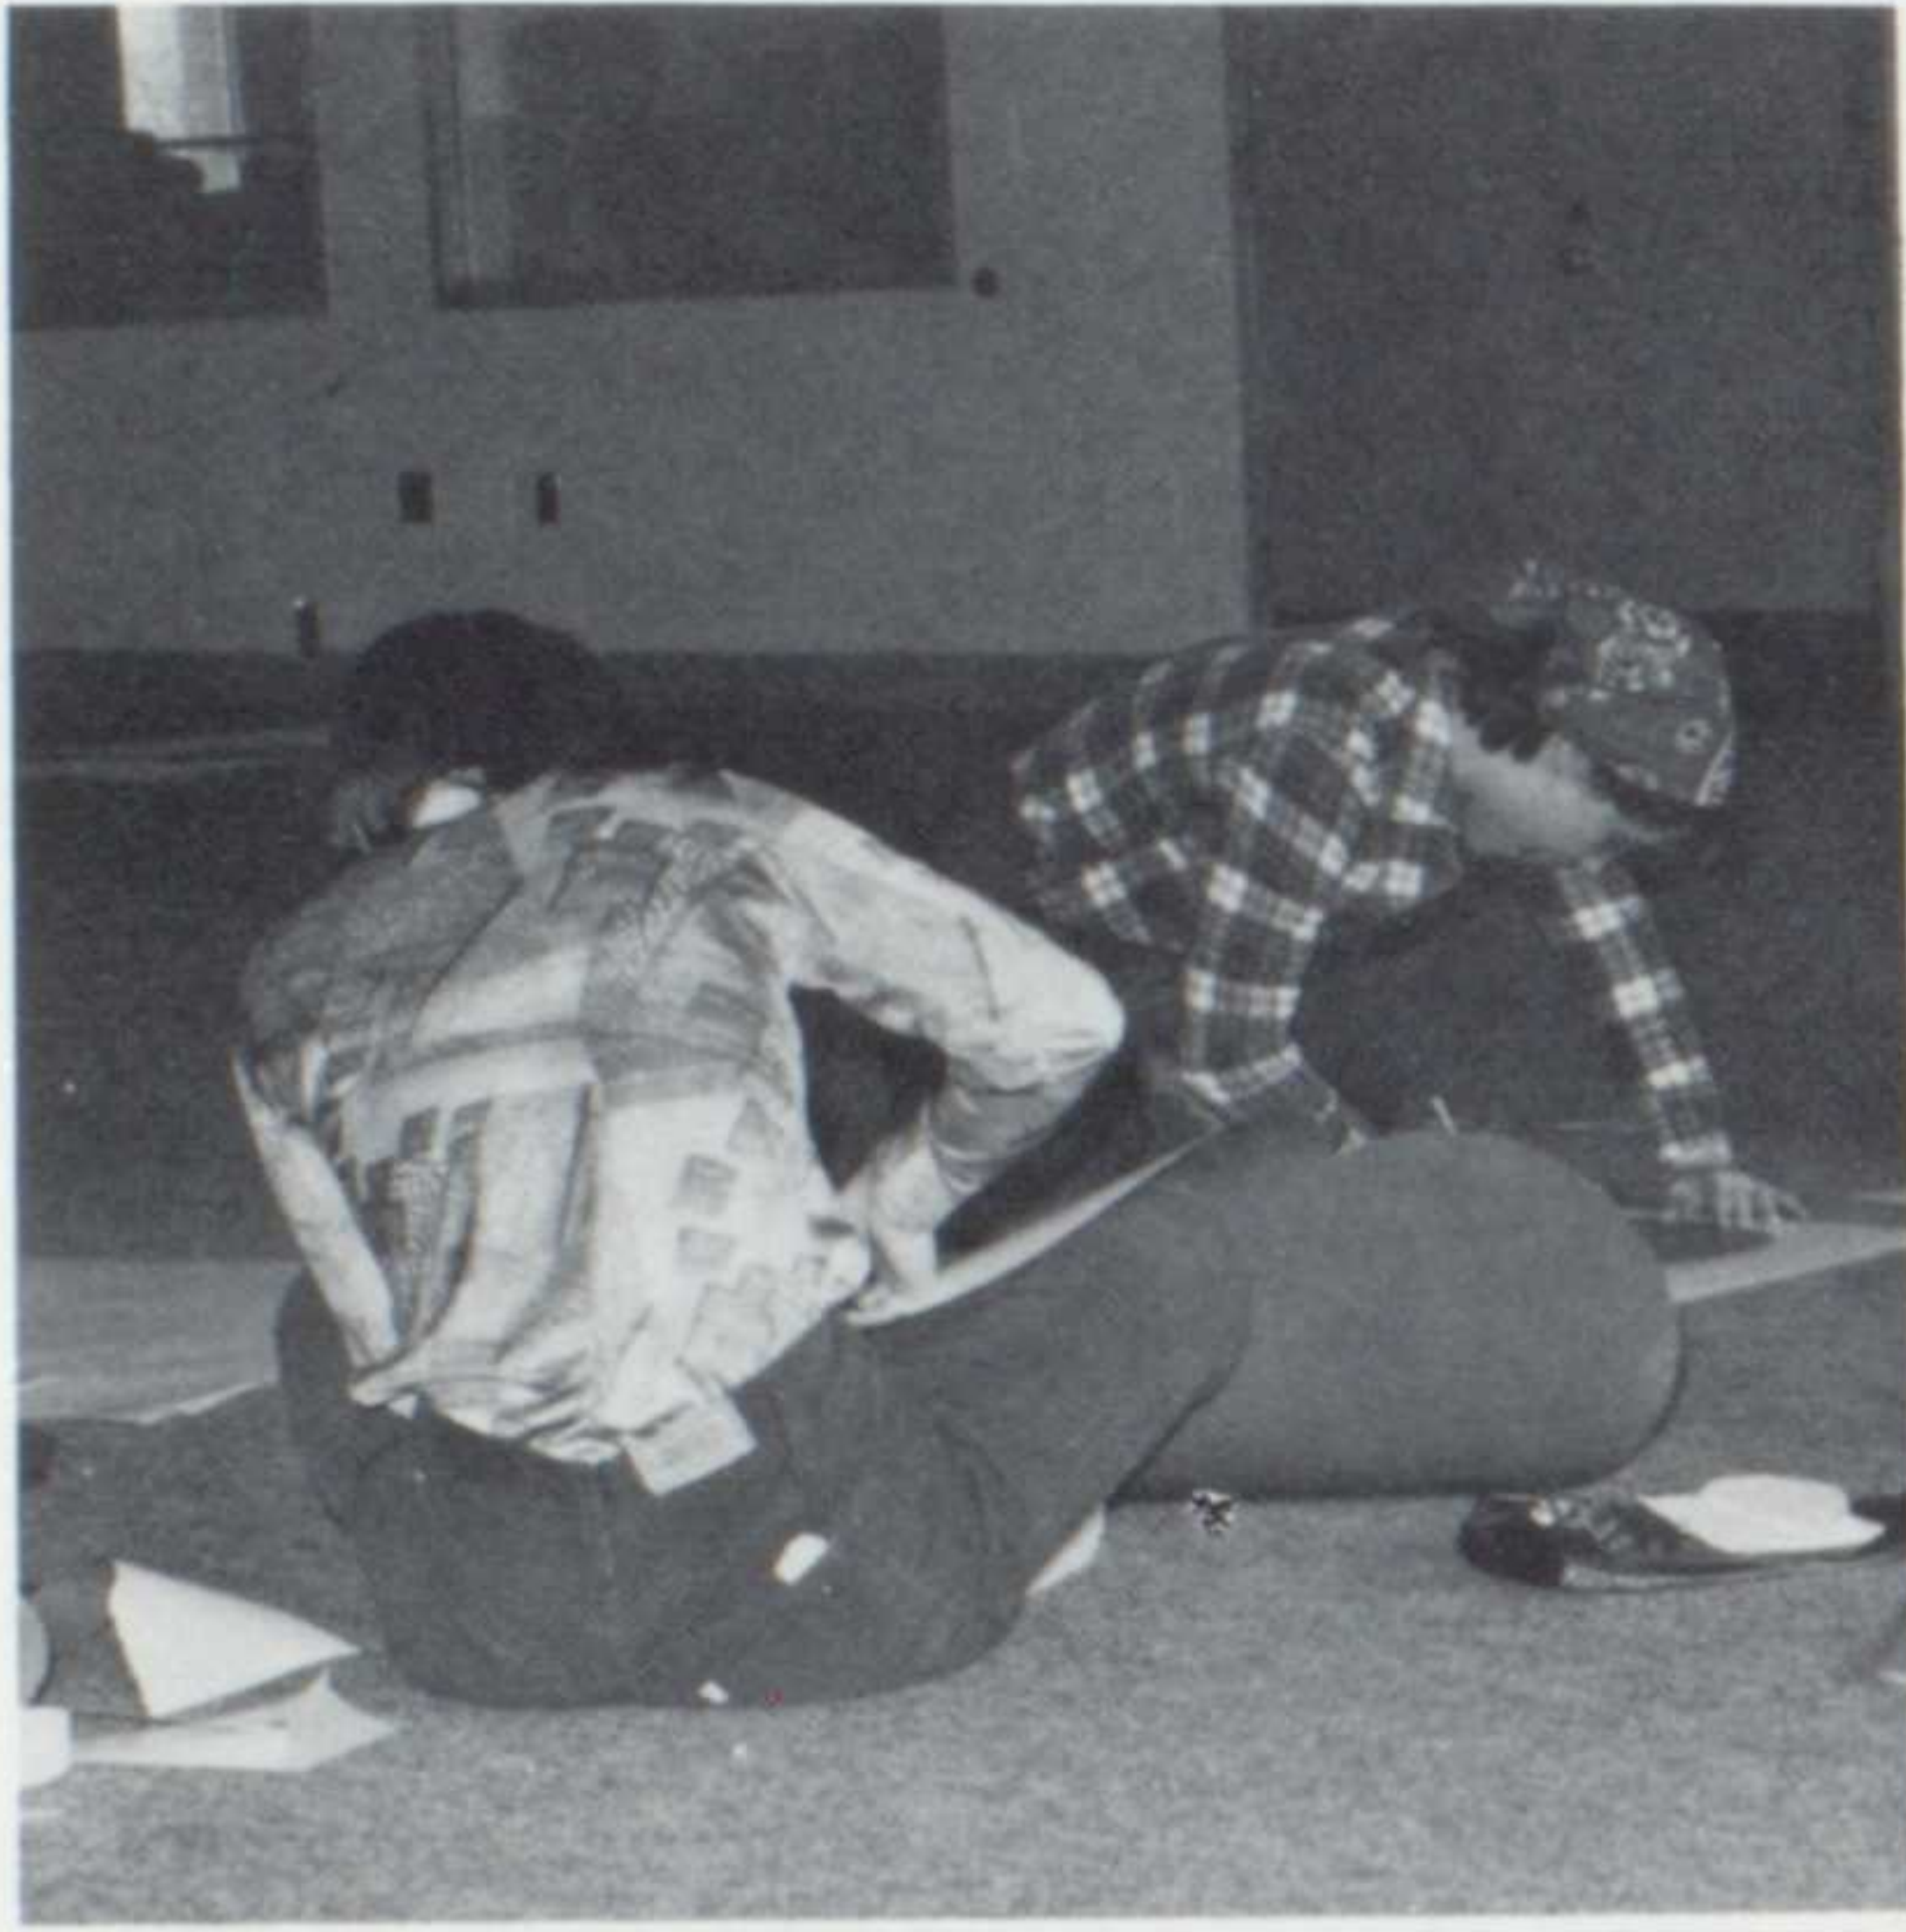

Jenny Webster with Ms. Otto's help in coaching. By the end of the games, the two teams came out fairly even. Emmy concluded, but didn't keep score, but Westlake accumulated a few more points. It was fun, so it didn't matter who won."

-D. Khym

**Ready to hit** the shuttlecock, Emmy Deidrick glances at her opponent. With the serve, Emmy won, 11-6.

# Heart to Heart: *Hearts, Flowers,*

**Hard at work**, Kathy Meyers and Sarah Slaman create red hearts for the Valentine's Day Dance decorations.

**In preparation for the dance**, Sarah Slaman and Pam Scully work at putting up decorations on the morning of the dance.

**In full accordance**, with the festive spirit, Mike Petrillo and his date enjoy a slow dance to the group, "Love Affair".

**Eyes widening**, Doug Barge stares at the 80 love messages printed in the Window supplement, Cupid's Briefs.

**V**alentine's Day, a time when young hearts turn to love and romance once again hits Bay High, in the wallet.

Since February 14th is traditionally a hearts-and-flowers occasion, it seemed only natural for organizations to secure funds by making these symbols available at school. This made it possible for the average Romeo or Juliet to show his/her affections, for a nominal fee.

**15¢** was the price of a red,

heart-shaped sucker that offered sweets to the sweet. Profits for this sale went to a good cause. The Heart Fund made \$129 by selling the lollipops in the library.

**50¢** offered the pint-sized Rod McKuen a chance to compose an inspirational ode, in fifty words or less. The Bay Window made \$40 by publishing the resulting masterpieces in the issue on the Friday before Valentine's Day.

**75¢** provided for the

*and the cost of being in love*

-D. Khym

totally traditional symbolic carnation. Color-coded for meaning, red meant love, blue meant secret admirer, white meant friend, and yellow meant sunny personality. From the sale, AFS made \$350.

**\$4.50/couple** was the price of admission to the first-ever Valentine's Dance. Sponsored by the sophomore class, the dance was a semi-formal occasion with the group "Love Affair" playing. The dance was open to both singles and couples,

but the sponsors barely broke even on gate receipts.

So, Valentine's Day filled hearts with love and also filled treasuries with funds.

**Accepting a friendship carnation** delivered during an extended homeroom on Tuesday, the 14th, Kim Hiles thanks Mr. Smith.

**Sixth period bells** sound the signal for the rush on carnations. AFS sold the flowers for a week before Valentine's Day during the lunch periods.

-J. Heiser

-L. Mead

**We found:  
13 carnations?**

**Four carnations** pose a space problem for Mr. App, especially since he has nine left to pin on.

"My freshmen homeroom was amazed," said Mr. Mark App. "When AFS came to deliver the carnations, I got as many as my whole class. I thought it was a mistake. I was really embarrassed."

Mr. App received the most Valentine's carnations in the school, 11 yellow, 1 white and 1 blue, 13 in all.

"It was a ninth period Chemistry class conspiracy," related Mr. App. "They wanted to see if I would wear them. I did because I thought it was my duty as they were paid for. But this doesn't mean I'm easy."

# Heart to Heart: *The proverbial*

**Settled in front** of the cafeteria for a ninth period chat, a freshmen group decides on weekend plans and obstructs the flow of traffic.

**At the Rocky River basketball game**, Matt Altieri tells his date, Laura DuPerow and Judy Liberatore an amusing anecdote.

**MacDonald's becomes THE spot** on Friday nights when mobs of people crowd into the dining area. Jill McIlvain, Coleman Caldwell and Stacy Griffen enjoy refreshments at Mac's.

Once, the accepted Friday night activity was to take the favored date to the big game, then home before curfew.

But over the last few years, the dating focus has moved from the individual date to the group outing.

Students with similar interests formed groups which set down the rules of behavior. The group was very unified and dating "out of class" was frowned upon. This created a likes-attract syndrome that was difficult to break.

Yet, Mike Stuckart believed the peer pressure was over-emphasized. "I'm not going out with my friends; I'm going out with the girl."

Even if the couple succeeded in breaking the mold, they still faced a classification that worked something like this: "If you go out with someone twice in a row, you're hooked. If you date other people, you're a mover." Because of these associations, many students preferred to go the party circuit.

"I think that you can get to

# *dating dilemma*

-J. Heiser

-J. Heiser

-B. Calmus

know a person better at a party because you have more confidence when you have your friends around," explained Karen Hagadorn.

Going out with a bunch of friends was another popular alternative to the dating game, especially at sporting events.

So, even though dating does exist, the traditional form is reserved almost exclusively for formal dances. But, on the whole, dating has become more of an individual thing, whether its with a group, or just someone special. ■

## We found: A real concert at Bay

"I'm a skinny little boy from Cleveland, Ohio," sang Alex Bevan, and the crowd milling around the auditorium went wild.

Sounds like a scene from the Coliseum, doesn't it? Well, it's not. Alex Bevan, a well known folk-rock musician sang in Bay's auditorium on February 6th.

Before he appeared, senior Shannon Wyatt and Westlake senior Sam Crews played a half hour of music, mostly their own works. Their titles included "Left this Morning with the Sun" and "Dreams Float".

Bevan's material was mostly ballad type, like "Rainbows" and "Silver Wings". However, he did sing his hit, "Skinny Little Boy" at the end of the program.

The audience was generally receptive and well behaved, but there were moments of rudeness. In the middle of songs, students would get up and walk out. There were also reports of drug and alcohol use, and the general atmosphere was rowdy.

Donna Montgomery had this to say about the concert, "I really liked Alex Bevan; he's a super musician and he did an excellent job. I'm sorry that the kids only came to hear "Skinny Little Boy" and made fools of themselves the rest of the concert."

**An hour before his concert,** Alex Bevan takes time to warm up in the music office.

JUST

## Easily feeds a family of 700

Ever need to feed 700 people at one time? Well, just go to Mrs. Kirk, the managing cook for the Bay High cafeteria, and ask for a recipe. The cafeteria needs to make enough food to fill the bottomless stomachs of the students.

One of the favorite

recipes is the sauce for spaghetti or seashells. Just in case there ever is a wild bash where people want to munch out on spaghetti, use the recipe that follows:

- 115 lbs. ground beef**
- 3 cups onion, chopped**
- 2 cups green peppers, chopped**

- 1 cup Worcestershire sauce**
- salt to taste**
- dash garlic powder**
- celery salt to taste**
- 1 T. monosodium glutamate**
- 1½ cups oregano**
- 2 cups basil**
- 2 cups sugar**
- 12 6 lb. 10 oz. cans tomato sauce**
- 4 7 lb. 2 oz. cans tomato paste**

Brown ground beef. Add onions, green peppers, and Worcestershire sauce. Continue to brown. Add all seasonings and sugar. Mix and simmer. Add tomato sauce and tomato paste. Cook until boils down. Spread over cooked spaghetti noodles or seashells. Serves 700. Eat and enjoy!

# Parting Words: Saying goodbye to a legend

Everyone know Mr. O'Donnell. His leprechauns and characterizations are as familiar to students as their lockers. Words used in his class like nescio, Latin for "I don't know, and jemand, German for "anyone", are part of even the newest freshman's vocabulary.

In fact, in his fifteen years of teaching Sociology, Mr. O'Donnell has become an institution. Consistently elected Senioritis's favorite male teacher, he holds a place of esteem in the minds of his students, past and present.

## Classroom Idiosyncrasies

Perhaps the best known area surrounding Mr. O'Donnell was his teaching methods. Based on memorization and dramatization, soc. was both challenging and exciting.

To demonstrate topics in various units, especially the family living chapter, Mr. O'Donnell dramatized scenes from life. Harry and Mabel were the

parents of Athenagerous, a child who happened to be the thermostat. Mr. O'Donnell carried on animated conversations with Athenagerous explaining to him the facts of life. Other favorites were Siegfried, Pavlov's dog, and Mabel-and-Clara-behind-the-potod-palm, jealousy's demonstrators.

The format of the class was also based on the memorization of definitions which were recited daily in the first few minutes of every class. If the student could not recite, he received a nescio.

Actually, there is a certain amount of preconceived terror about nescios. "If you know the answer, all you can't get a nescio," said Jim Zajac. "He also takes bits and pieces of nescios."

## Afterthoughts

Because soc. is a required subject, most students don't have a choice; they must take it. Yet, they still managed to gain something from it.

Leslie Shoup said, "I'm interested in soc. so it

was a good class for me."

"I never worked as hard as I did on that paper," said Joe Patton, '76.

After awhile, taking notes and memorizing becomes habit. I had the class at eight in the morning, and I looked forward to it," stated Sherry Kennedy, '77.

Tuesday, Jan. 31, 1978

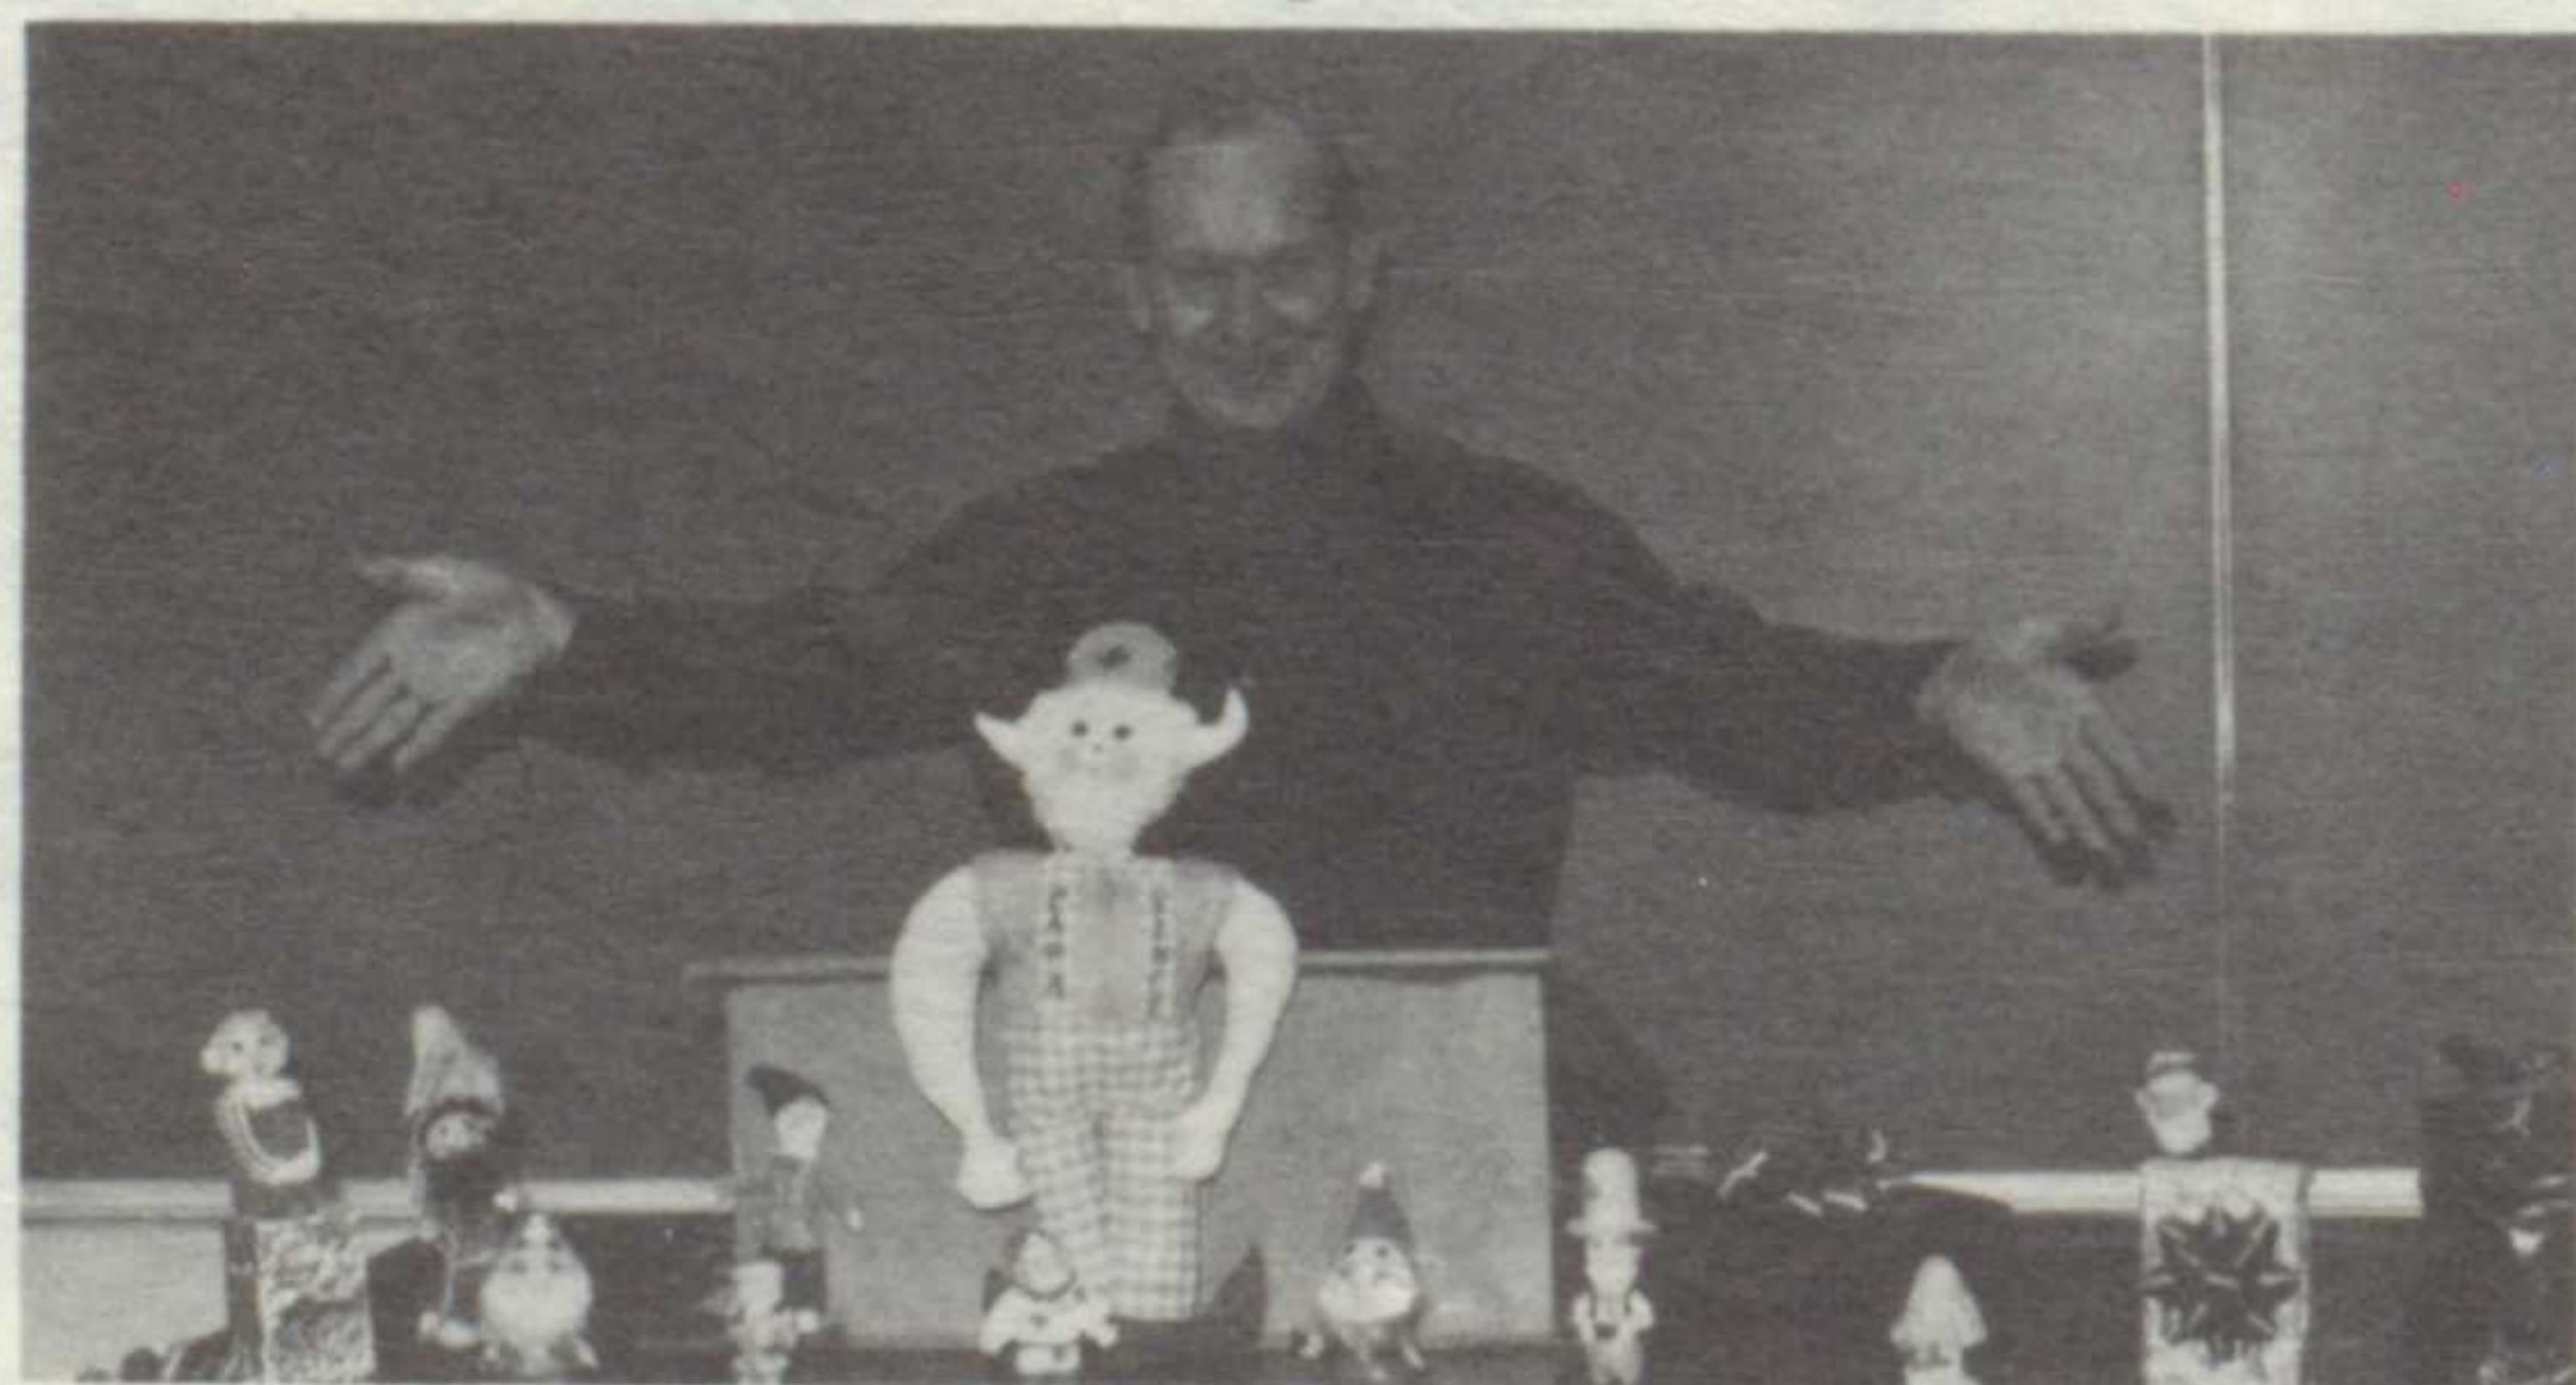

Tuesday, Jan. 31 was not only the end of a semester, it was the end of a teaching career for Mr. O'Donnell. Because of health reasons, Mr. O'Don-

nell retired. In leaving, he had this to say, "If I lived five lifetimes, I could never repay the debt I owe to Bay High for giving me the happiest and most productive years of my life."

When asked why he has stayed at Bay for so long, he replied, "The interest the students take in soc. and the courtesy the students show toward me have kept me here. I say to the students: if you have to go to school, go to Bay. I say to the teachers: if you have to teach, teach at Bay, it's the best.

**Captured in 1974 photos,** the mannerisms of Mr. O'Donnell become well known to his students.

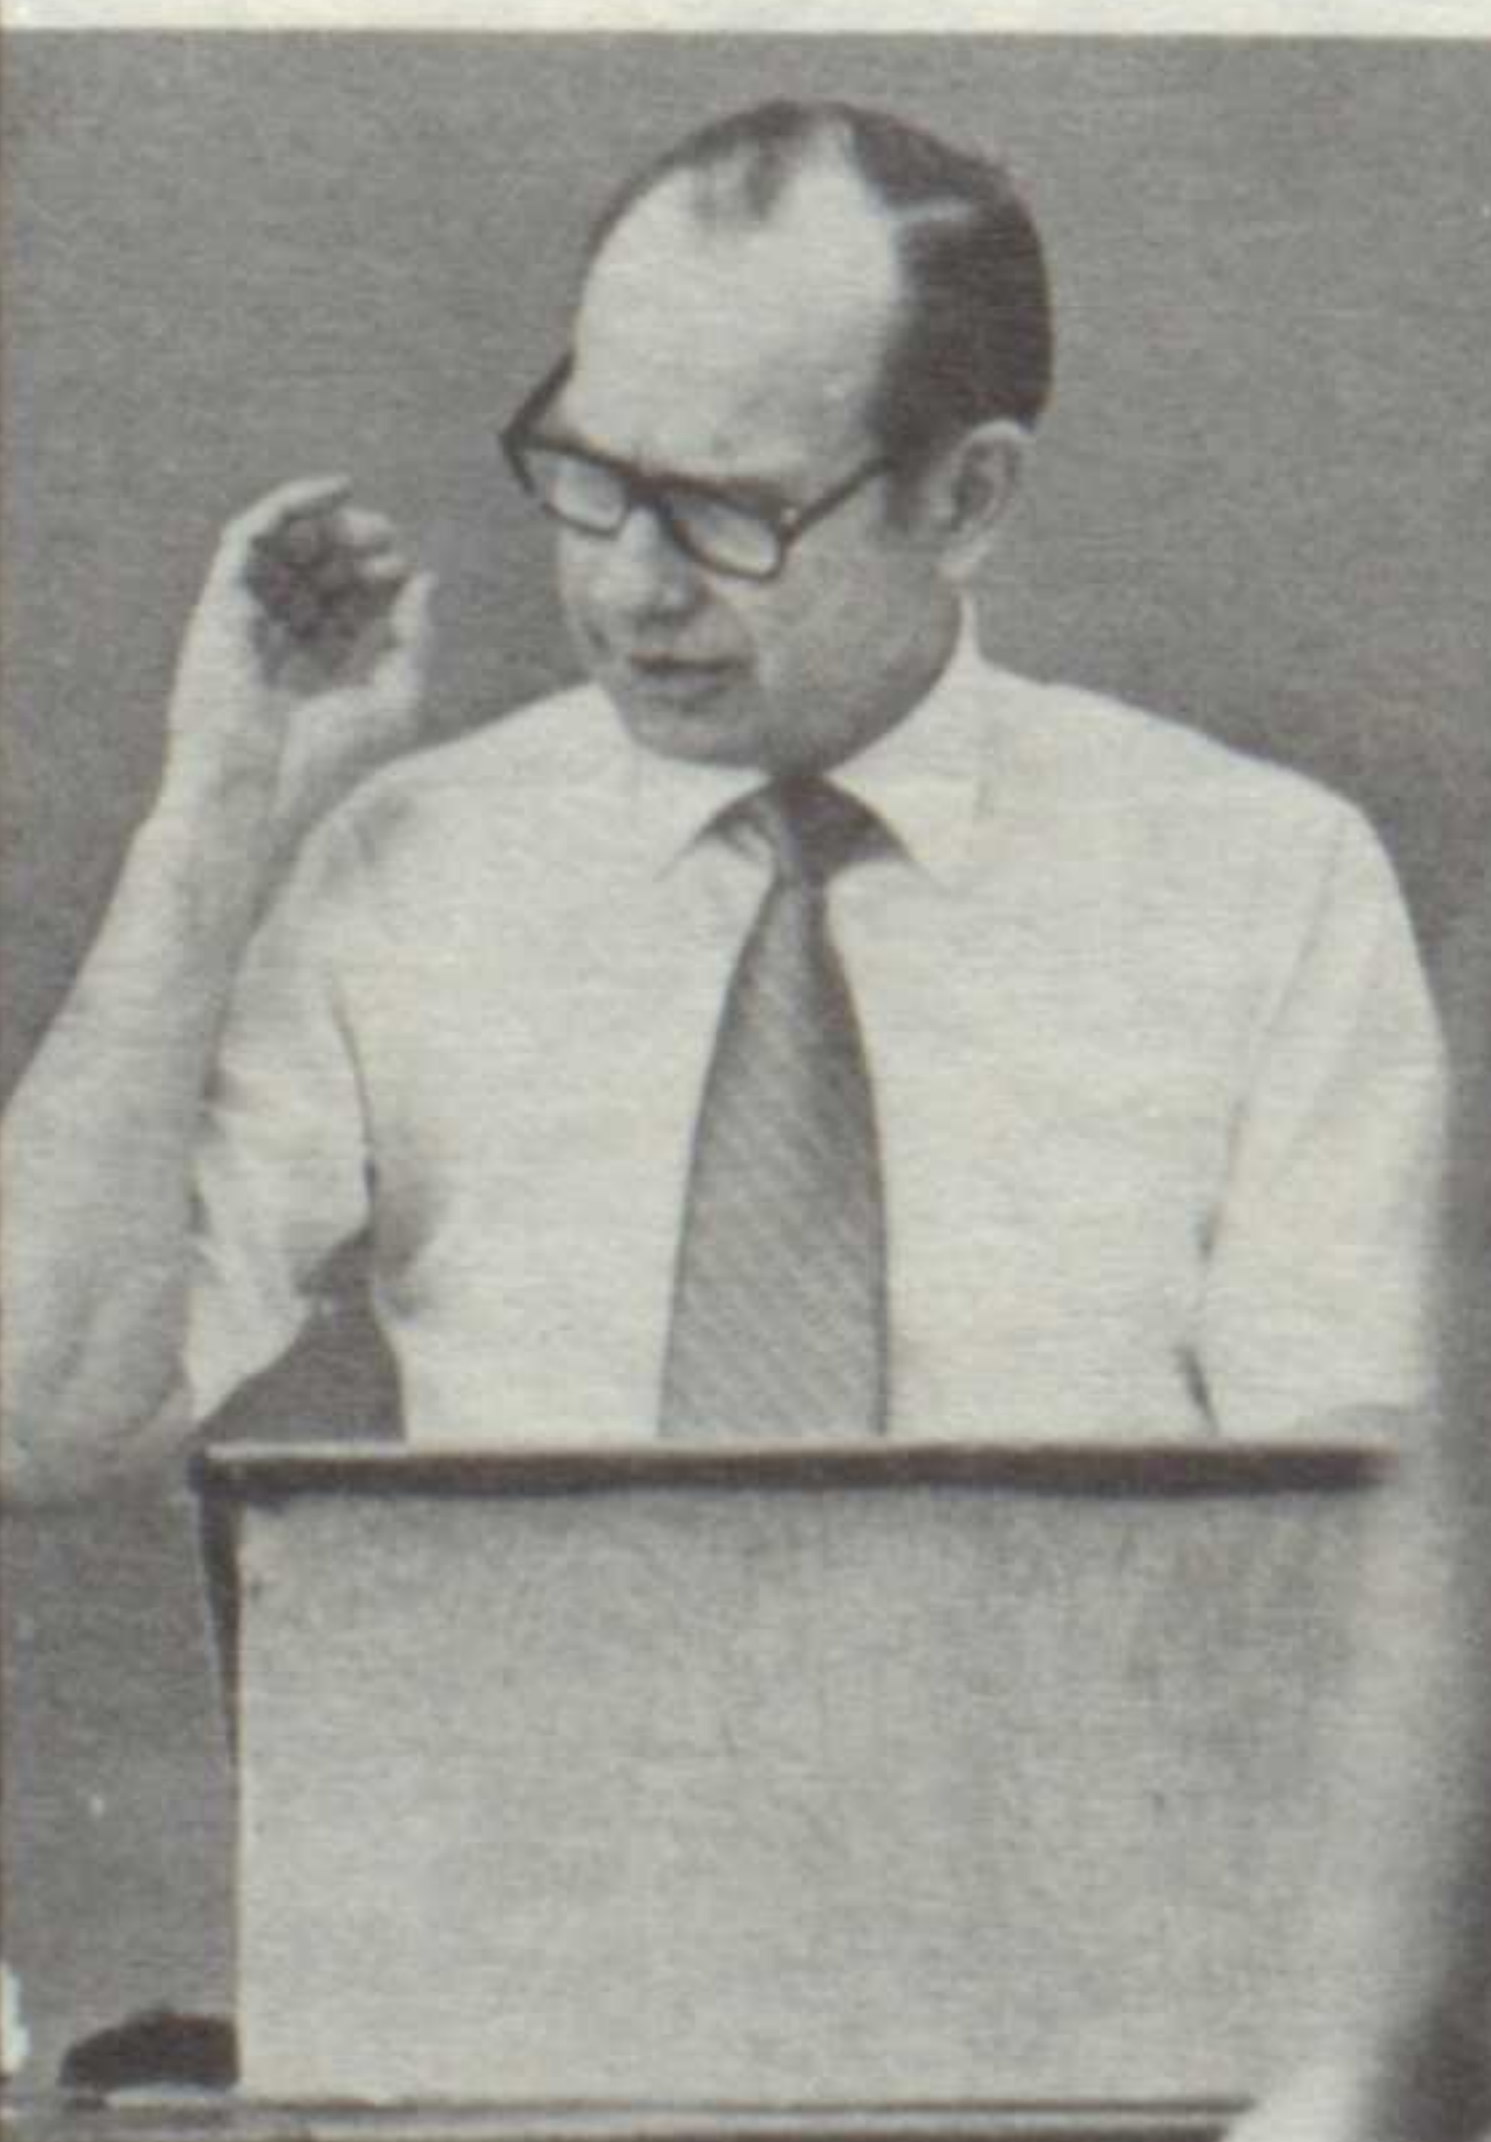

**Allowed out** only on Christmas and St. Patrick's Day, Mr. O'Donnell's leprechauns frolic.

## The Great Stick Pin Stick-up

What's gold or silver, weighs less than an ounce, is sharp at one end, and every girl received at least three for Christmas?

Give up? Stick pins, of course.

You can see them everywhere; livening up a cowl-neck sweater, adding that touch of class to the tie of a blouse, putting a masculine accent to a blazer, and pulling together a fringed shawl.

Stick pins are the newest piece of fashion whimsy since flowers for the hair. They're practical, versatile and just plain fun.

Laurie Wier explained, "They always go with what I'm wearing."

## Long rehearsals Great results

On the weekend of Nov. 18-20, Bay High was host to a very special event. The Ohio Music Education Association's Northeast Regional Orchestra rehearsed and performed in the auditorium.

Tryouts were held on Oct. 15, and eleven students from Bay were chosen to play in the orchestra. Olivia Dorsey, Leslie Perna, Karen Howe, Tim Horner, Peggie O'Neal, Cathy Krawczyk, Liz Jones were all in the violin section. Sue Kier was 2nd chair violist. Marilyn Post and Gale Dorsey were oboists

-J. Heiser

On her way out the door, Shari Borgeson pauses to adjust her stick pin.

and Dave Crane played the piano.

On Friday evening, the conductor, Marshall Haddock of Ohio State, rehearsed the orchestra for three hours. Afterwards, several of the players who lived farthest from Bay stayed at the homes of nearby musicians. "It saved them driving time, and everybody got to know each other better," stated Sue Totten, one of the hosts.

Early Saturday morning, the rehearsals started again. The Band Boosters provided lunch and then more rehearsals. "The rehearsals were long," explained Peggie O'Neal. "But I really learned from them."

On Sunday, after a short rehearsal, the group performed the *Russian Easter Overture* by Rimsky-Korsakov, the *Prayer and Dream Pantomime* by Humperdinck, and the *Firebird Suite* by Stravinski.

Leslie Perna just about summed up the whole weekend. "It was a great deal of work, but the end result was good. I really had a fantastic time!"

## Hare in your stew?

If you find yourself gagging over the thought of ravioli for lunch, (again) you might try wandering down to the shop room for lunch.

Incredible as it may seem, in the fall and winter, Mr. Peregord and Mr. Schneider make rabbit stew on a hot plate in the back of the room for their noon meal. "Mr. Peregord and I both like hunting, and we both like rabbit stew," said Mr. Schneider, "so we make it for lunch."

Cooking the stew is no problem. Mr. Peregord and Mr. Schneider have developed their own recipe:

**2 young, lean, skinned rabbits;** preferably shot in the head so there is no buckshot in the rabbit. Cut the head off.

**Assorted vegetables:** carrots, onions, potatoes, peas, corn, greenbeans, etc.

**Flour**  
**Water**  
**Bay leaf**

**Salt/pepper to taste**

Boil the rabbit with the bay leaf and onions until the meat falls off the bones. Reduce heat, add salt and pepper, and simmer with the rest of the vegetables (except the potatoes) for 1½ hours. Add the potatoes and simmer for 20 minutes more. Add the flour to thicken the gravy and bring the stew to the boiling point. Serve with biscuits or bread and enjoy.

## Closing the brain drain

Strategy, plotted by Miss Sands, prepares the team for the January 14th game.

Being a trivia nut comes in handy, in fact, you can even end up on Academic Challenge if you answer your questions right. John Steward, Doug Barge, and Ellen Fain did. John Davis and John Tsai were alternates.

For the first time in seven years, Bay lost the challenge, 430-315.

Doug Barge explained why, "We could have won, we SHOULD have won, but we were not ready for what happened. We choked."

-S. Teschner

With one of the six answering buttons at her fingertips, Kathy McDermott works sixth period.

## Plug into Bay High

The entire nervous system of Bay High is controlled by one person. She is senior Kathy McDermott.

Kathy works in the main office and mans the switchboard. With over 80 buttons to keep track of, it took her awhile to learn how. "After the first couple of days, I learned about it, but I still had to keep asking how to do certain things," she said.

Connecting inter-school calls, answering the phone, and dialing numbers for teachers are just a few of the chores of the switchboard operator.

"The worst thing that can happen," says Kathy, is when the whole board lights up at the same time."

So, if you're ever walking by the office and see a harried girl pushing buttons like wildfire, you'll know it's a busy time for Kathy McDermott.

## Discover The Silmarillion

ከ ስፐሊንዥን

"What does that say?" you may wonder. Well, if you are a scholar of the elfish language, you would automatically know that it says, *The Silmarillion*.

Hitting the bookstores in September at \$10.95 a copy, *The Silmarillion*, by J.R.R. Tolkien, swept the country as the #1 bestseller.

Composed of five different tales, it tells the story of the elves, dwarves, men, and many others in the first and second age of Middle Earth.

Middle Earth was already established in Tolkien's ever popular *The Hobbit* and *The Lord of the Rings*.

After reading the book, however, the fun didn't stop there. The true Tolkien fan stocked his room with Middle Earth posters, calendars, books, dolls, magazines and much more.

For the bookstores, at least, this craze was a veritable Tolkien goldmine.

On display in all bookstores, *The Silmarillion's* cover portrays a Tolkien painting of the path to the lost city of Gondor where Turgon lives.

## Penpals on tape

Most people do not have enough money or time to take a trip to France in the middle of the school year. The second period French IV class, however, solved this problem.

One student, Mary Sheldon, had a sister living in Grenoble, France. She taught English in a private school.

"When Jane (her sister) went to France, she got the idea to exchange tapes," Mary explained.

The first tape was merely an introduction, but students were hopeful of a long correspondence.

Although they did not replace the sunshine on the Riviera, the tapes brought a little stimulation to mid-winter French classes.

## Get your data together

HEX(OE), VAL(A\$)=1, ERROR 27 and more! This language can only be found in a dark corner of Bay High known as the computer room where the Wang 2200 (\$7500 list) lives.

Located next to room 204, the room serves as a great hideaway for Bret Hurst, Dale Pulver, Skip Teschner, Bruce Waljakka, Jim Leonard, and Dave Crane.

Upon entering the room, one enters a different world. Computer paper (\$25 a box), disks (\$5 to \$16), programs, and posters that only a computer genius can comprehend dot the wall along with such graffiti as, "For a good time call 871-9350," and, "Bret Hurst has nightmares about the flying monkeys in *The Wizard of Oz*."

The people who inhabit the room before school, after school, and during free periods do not usually take Computer Math. They are simply students who love the computer and

therefore know everything there is to know about it.

There are, however, other activities involved. While one is playing Star Trek or seeing how many possible three letter combinations of the alphabet there are, the others are playing chess or their original card games.

If you want a place of solitude, mosey on up to the computer room. One word of warning; you better bring along a computer manual, or you'll never understand the conversation.

With his program on the screen, Bret Hurst makes corrections. Because of such errors, the computer has to be cleaned with alcohol.

-S. Ormsby

# JA: Lesson in life

From the one-light space crafts to the mother ship, the movie audience marvels at brilliant color and movement.

## Filmmaking Close-up

One of the biggest fads that hit the country was director Steven Spielberg's "Close Encounters of the Third Kind".

The release of this film in the wake of "Star Wars", the all-time box office hit, was a dangerous gamble. However, it proved successful to the producers of "Close Encounters".

Needless to say, many BHSers saw the film. "I loved it. It had suspense and humor in parts," said Jeff Tiefermann.

"It had the possibility of a lot of fact behind it," stated Debbie Deter.

Both agreed that the special effects were unsurpassed. The major objection to the film was its price: \$4.00.

Was it worth it?

Most seemed to think so. Although they didn't want to pay the price, they did so because the movie was a landmark.

One freshman summed it up by proclaiming, "I'm sure going to see it again."

"Are we having a board meeting tonight?" This is a common question in Junior Achievement offices throughout Cleveland.

Junior Achievement (JA) works just like a large company. At the beginning of each year, a company is formed, office positions are appointed, meetings are held, products are made and sold, records are kept, and pay is given to all employees. The only difference from a large, professional company is that the entire company consists of only 15 members, and the company liquidates after eight months.

Bay High students who belong to JA attend the Rocky River office. They meet one night a week with students from neighboring towns.

Not everyone who belongs to JA has a business career in mind. Junior Shari Monson said, "JA is excellent for college-bound students. And the outside benefits, such as a \$445 Dale Carnegie scholarship, are endless."

Junior Doug Crowe, president of "Ours Beats Theirs", stated, "JA can be a great help to anyone interested in setting goals for themselves, and having fun."

The fun is always there, but the goals come with the achievement.

## Juniors break record

Not only is fall a season of change for trees, but it affects people also. Every September, normal, quiet juniors are transformed into ruthless, door-to-door magazine salespeople.

After an assembly explaining that the magazine drive was the only money-making project for the prom, juniors were turned loose to peddle their magazines, records,

and Westlife.

"At first it was slow," remembered Stacy DePaolis, class president. It looked like the class of '79 was in for a prom at McDonald's.

However, in the last two days, there was an overwhelming response of \$3000 a day. A new school record of \$12,500 was set.

Summing it up, Stacy said, "We all pulled together and came through at the end."

## We found:

### The best place to buy bagels

Bagel-lovers' everywhere have proclaimed the best place in the Cleveland area to buy these culinary delights.

Although it involves a cross-town trip, the true bagel connoisseur should check out Amster Bagels, located on Cedar Road in University Heights. On a given day, they will have around 10 kinds to choose from, including their popular "water" bagels.

Not to be overlooked are the salt sticks and soft pretzels. So if

you're ever on the East Side, stop at Amster Bagels and munch out.

For only 99¢ a dozen, Amster's sesame bagels are easy on any BHSer's budget.

-J. Heiser

## Side 6 Streets

### Now Let Me See . . .

"One morning I woke up and could see again. I thought it was a miracle!" A blind person restored to sight? No, just Jean Ehrbar getting up after accidentally wearing her contacts to bed.

Hard, flexible or soft, tinted or untinted, one or two, many students at Bay wear contact lenses. Laurel Perna got contacts, "because I hated my glasses," and many agreed.

Contacts can be an expensive investment, and sometimes students must pay part of the expense.

In the beginning, the lenses are often difficult to get used to. Stacy

DePaolis remembers, "When I first got my contacts, my eyes were always red and looked like I had been crying."

The problems don't end

after the adjustment is over. Ask any contact wearer about losing a lens and they'll have a story to tell.

Senior Donna Shore

For an option besides contacts, Shannon Wyatt wears her big, round framed glasses.

dropped her contact in the car. "The car had a blue interior, and my contacts are blue-tinted so it just disappeared. When we finally found it, the lens was in a million pieces."

Not everyone has to worry about losing two contacts. Cathy Buchta only has one to begin with. "I only need a correction for one eye, and I got one contact."

Girls don't hold a monopoly on contacts. Senior Jim Zajac got them "because they are much easier to use." However, life with contacts isn't all rosy for Jim. Once he put "both lenses in one eye. It was one of the dumbest things I've

-J. Heiser

**Patience and exactness** by Coleman Caldwell make the contact easier to put in.

### Heard any "Rumours" lately?

1977 came and went just like all the years before it, and it was a year that produced some very good, memorable rock and roll music. As people get "lost in the beat and drift away," what the people are listening to tends to say quite a bit about the listeners themselves.

The winners of any accurate poll to determine the favorite group and album of 1977 had to be Fleetwood Mac and that band's album "Rumours". After surpassing Fleetwood Mac's previous album

that had taken the group to mass popularity, "Rumours" soared to sell eight million copies by the end of the year, several million more than the Beatles ever sold with one album.

Younger, fresher faces continued to replace what some referred to as "old blood". Artists such as Genesis, Steely Dan, Meat Loaf, and Michael Stanley Band, Artful Dodger, the Alan Parsons project, and the Babys were becoming extremely popular in some areas, and some sold more records than the stars that have been marching on the hit parade for many years.

At the beginning of

**While looking through** the top records, Chris Willman chooses an album by the Babys.

-J. Heiser

## Side 7 Streets

### Cowled, kilted, and knickered

A vast assortment of clothes and accessories came into view to accompany the fragile and full look.

Big cozy sweaters and knotted shawls topped kilts, dirndl skirts, and pants. In leg wear,

**Cowled and kilted,** Debbie Hook and Johnna Litschko sport the new styles.

narrow-legged pants, wide-wale corduroy trousers, and pleated pants were popular with sweaters and vests. The cabled tights and leg warmers helped fight off the bitter weather. Also, knickers, cuffed at the knees, looked great. Ann Coulton decided, "The look is dressier and more femi-

nine. There are more skirts, angora sweaters, and poly-silk blouses."

News about the fashion trends included the peasant dress, and their billowy, three-tiered skirts added a new dimension. Brightly colored ribbons, white lacy eyelet, and ruffled flounces on the hems brought a fresh, new, romantic look to clothes.

Also, more people bought the glittery ankle bracelet to accent any style.

On the other hand, most students did not go along with *Vogue's* idea of the latest fashion. One reason was economy. Carol Schaeffer mentioned, "Everybody's wearing boots, but they are too expensive, especially Frye."

Another reason was personal taste. Some girls preferred to dress conservatively rather than experiment with unknowns, or they simply hated what fashion dictated. "I would not be caught dead in gauchos!" exclaimed Colleen Gallagher.

What's in for guys?

According to John Aldridge, "All kinds of sweaters are in. The

V-neck sweaters and sweaters with collars are definitely in."

Basically, male fashions tended to be casual. Levis and corduroys with sweaters and shirts were school attire. "You can wear cords any place and any time," stated Tom Hitchcock. "They are comfortable."

The trend was almost Harvard. Neatness counted as Phil Bronson observed, "Not as many people are dressing

**Boots and corduroy** knickers add to Lorraine Dorsey's fashionable look.

as slobs."

Kris Johnson summed up the fashion feelings for both sexes, "The style is not as ugly as last year!"

ever done."

-J. Heiser

Of course, contacts aren't the only alternative for eye correction; eye glasses are the most common. Carolyn Wallace wears glasses and she says, "sometimes glasses are a problem in sports."

Tracy Priest is also bespectacled, and her lens is personalized with a "T" sticker. Tracy "likes glasses. I was scared of putting contacts in my eyes and besides my doctor didn't recommend them."

Glasses and contacts aren't the only choices for those with bad eyes—one could always go without either and take the chance of running into a wall!

-S. Ormsby

-J. Heiser

1977 rock fans wondered what new trend could possibly follow reggae and disco. The answer was more of a lifestyle and philosophy than music: "punk". Though quite a rage in England, true punk didn't quite catch on in

the United States, with a small portion of the "lunatic fringe" and a number of rock critics.

As diversified as it's ever been, rock music took no general direction in 1977. Fleetwood Mac may have gained much of its popularity

because of its refusal to be tied down to one set music style. Hard rock, soft rock, folk, jazz rock, country rock, space rock, punk rock—it was all there, but nothing predominated. Since rock has been a fairly accurate barome-

ter of the youth culture for the last twenty years, 1977's music may very well reflect the attitudes of the young people of that year: not unified in any way, somewhat passive, and very individual.

-Chris Willman

## In the Pink

8:00 a.m. September 7th. Everyone's seated in homeroom again for the start of another thrilling year. Papers, government forms, and lunch schedules are all passed out to be filed somewhere, and probably never looked at again. It's the same old routine.

But not quite. Among all those forms, a pink one stands out. An obnoxious pink sheet, which lists the "Regulations for absences, tardiness, and class cutting, 1977-1978."

Crime	Consequences
<b>ABSENCES</b>	
5 days absence	contact parents
7 days absence	parent conference
10 days absence	plan of action (loss of school credit)
<b>TARDINESS</b>	
3 tardies	parent contact
5 tardies	parent conference
7 tardies	follow-up parent contact
10 tardies	disciplinary action (possible suspension)
<b>CLASS CUTTING</b>	
1st cut	parent contact by teacher
2nd cut	parent conference (with teacher and counselor)
3rd cut	3 days suspension from class (possible loss of privileges)
4th cut	10 days suspension from class
5th cut	removal from class with no credit

The "Pink Sheet", as the new policy was soon called, drew a variety of responses. Student Congress president Pam Baker said, "The pink sheet didn't really upset me, and I don't think it changed the average student. Most kids weren't tardy and didn't rip classes very much anyway, and it was about time that the administration cracked down on the ones that did."

However, not all students shared Pam's views. According to senior Phil Brown, "BHS now has more tyrannical 'thou shalt not's' than the Old Testament".

Apparently these rules and regulations were needed. "We were noticing an increase in class cutting and tardiness," said assistant principal Mr. Loomis, "and we felt that we had to take some kind of action."

"The policy seemed to work best with the freshmen, and be least effective with the seniors," Mr. Loomis commented. Overall, the regulations make a great difference, particularly with tardies. The total tardies for the first nine weeks of 1976 were 1,995, and for 1977, 1,540; a difference of 555 latenesses.

Although many students were dissatisfied with the new rules, the regulations left the administrators feeling "in the pink".

## Soap: wash your mouth out!

"Did you see 'Soap' last night?"

"Yeah, and I couldn't believe that Jessica."

Such a conversation can be heard in the hallways of BHS on a typical Wednesday morning. The new show created a stir because of its open, risqué format. Here's a rundown of the action.

First, the Tates are quite wealthy. Chester, the head of the household, runs around behind his wife, Jessica's, back.

Corrine, their daughter, is in love with a priest, while the rest of the fam-

ily adds to the confusion.

On the other side of town, the Campells have their own problems. Mary and Burt's sex life is in sad shape. Their three sons, Peter, Jody, and Danny, are a tennis pro, a broken-hearted homosexual, and a hit-man for the Mafia respectively.

"Soap" was generally liked by students. "Sometimes it's so stupid that it's funny!" exclaimed Dawn Daso.

**Members of the Tate and Campell families pose for a "Soap" portrait.**

## Not a hole in one

"I wouldn't get my ears double-pierced because I wouldn't want all those holes in my head," stated single-

pierced junior Maureen Keliher. However, this was not necessarily the case with many girls who have the double-

pierced look. "I got my ears pierced again at a Halloween slumber party. I like them because I can wear different color earrings

to match my outfits," said Gail Christofferson.

Some people compromise between the two looks.

Pat Sannit observed, "Everyone else had two double pierced ears, and I wanted to be different, so I only have one ear with an extra hole. It comes in han-

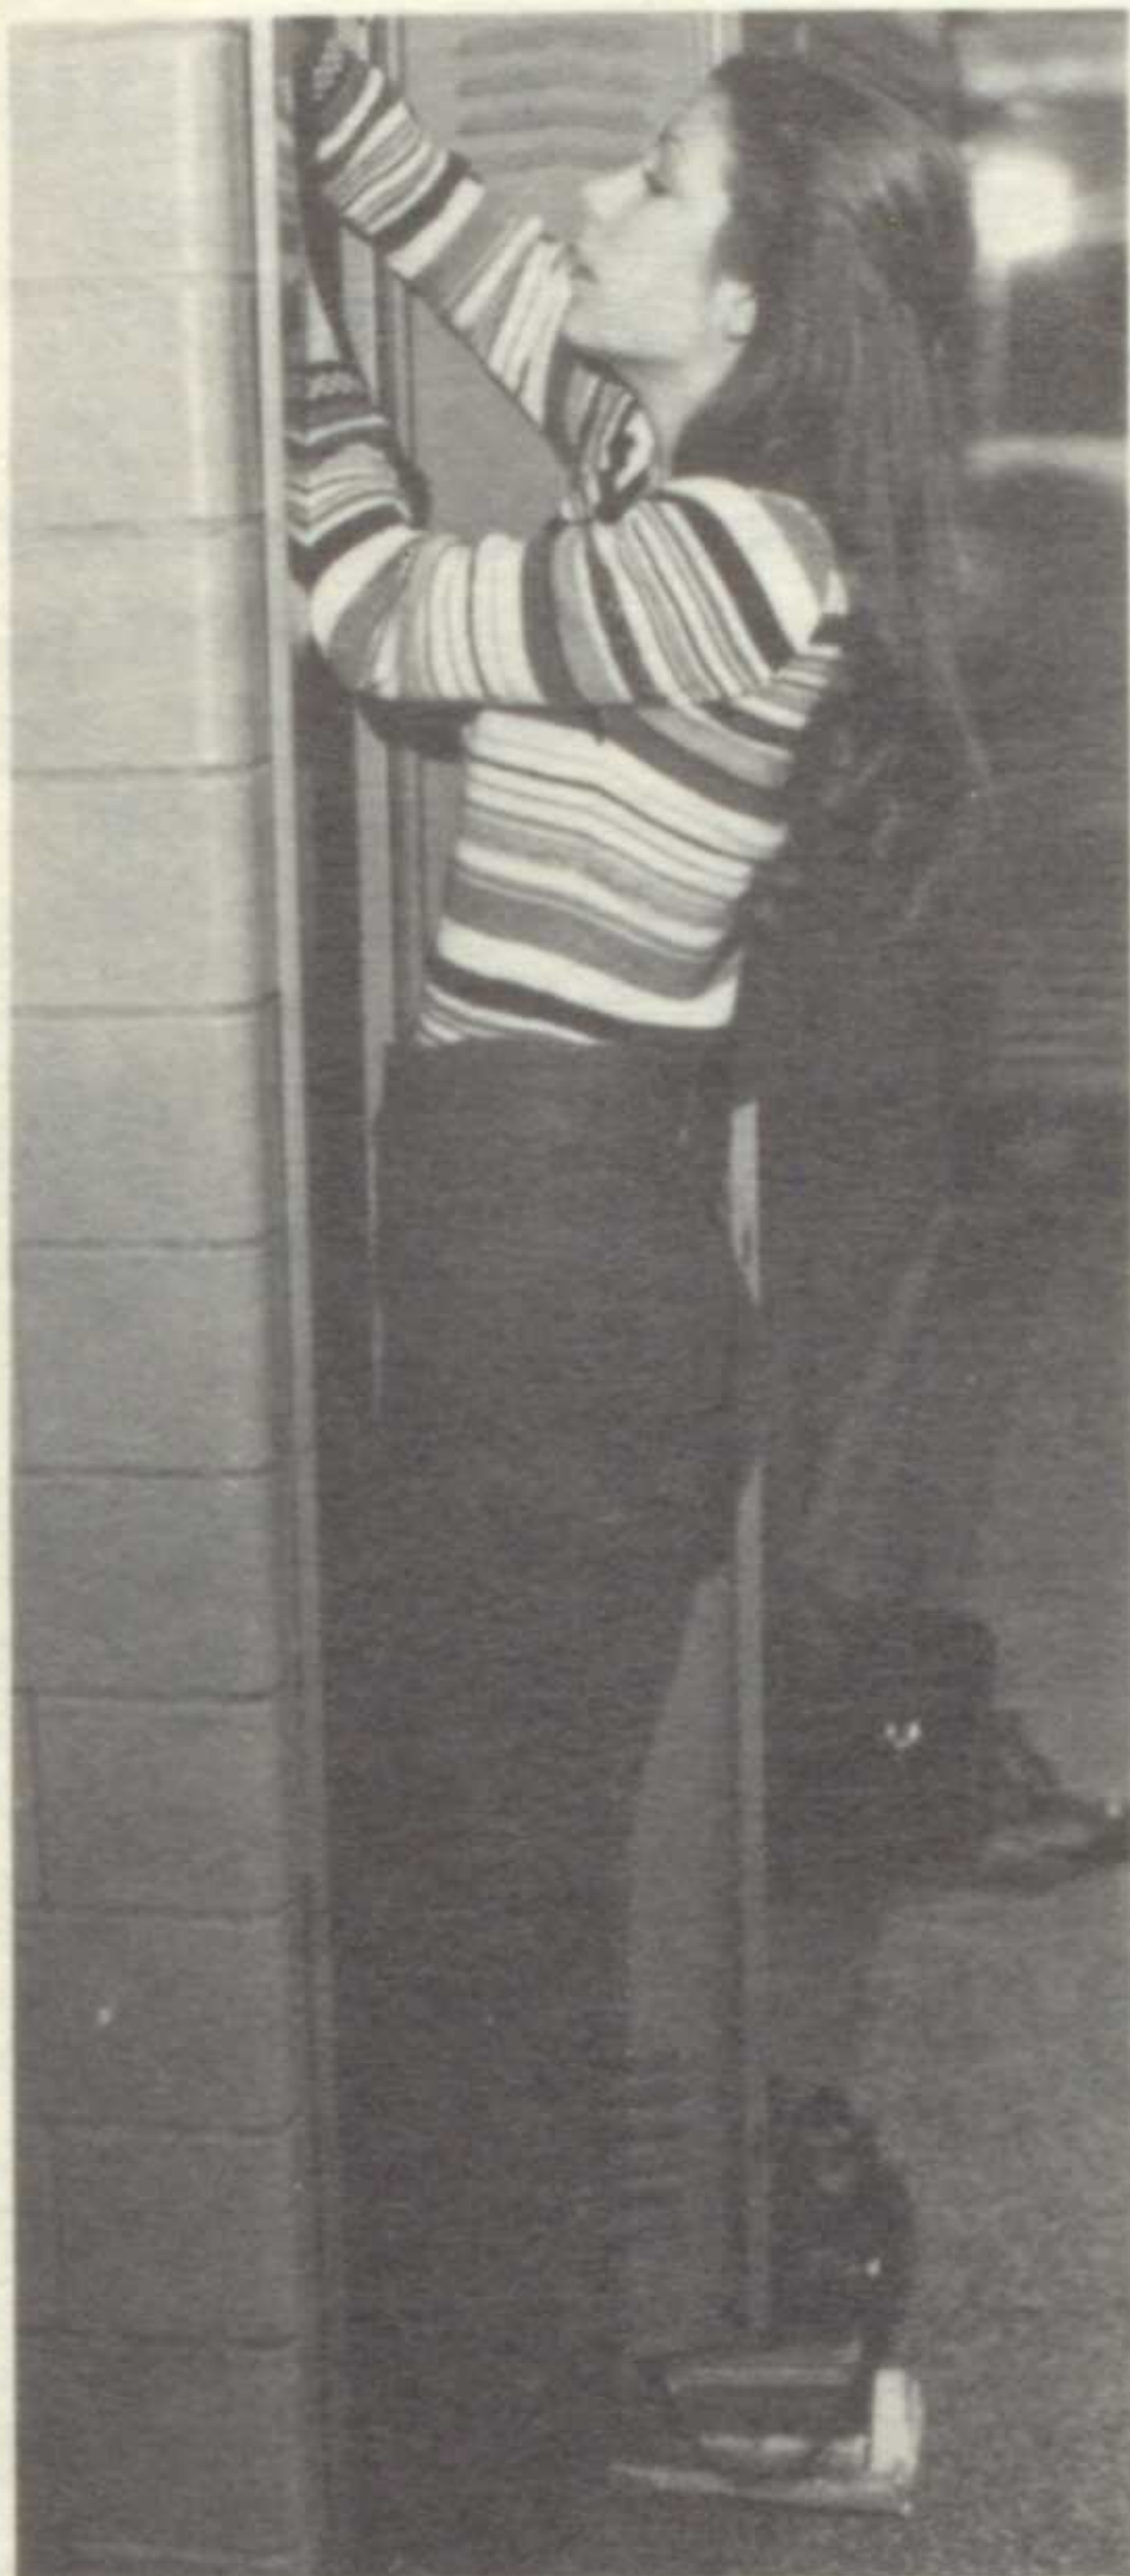

-J. Heiser

**In the mirror,** Melissa Morgan fixes an earring.

dy. Now I can wear all my mismatched earrings."

Two, three, or four holes? A piercing question.

## Good things come in small packages

-J. Heiser

Only a mere 5'1", Judy Newcomb must climb in her locker to reach her books.

Are you considered to be smaller than a bread-box? Do you know every kneecap in the school personally? Do you have to sit on telephone books to see over the steering wheel?

If you answered yes to any or all of the above, you are (hopefully) still growing or doomed to face a future of shortcomings.

Most short people don't seem to mind their fate; in fact, being short has its advantages. Freshman Mary Seed, who is 4'9", explained, "Sometimes people underestimate your age, which can get you into movies for half price."

Being short doesn't bother the small people themselves, but apparently they aren't liked by Randy Newman, who wrote

the hit single "Short People". In his song he says that "short people got no reason to live." In addition, he lists all their qualities that irritate him. He can't stand their "little noses," "their tiny little feet," "their grubby little fingers," and "dirty little minds". He even says, "You got to pick them up just to say hello". Obviously he doesn't want any short people around.

"Little" students have mixed views about the song. Jim Leonard, 5'3", thinks "it's stupid and strange," while on the other hand, Wendy Griffin, 5'0", "thinks it's funny".

Despite his disapproval of all their traits, Randy Newman does admit that "short people are just the same as you and I". Remember that the next time someone asks you how the weather is down there.

## Brace yourself

"It tasted like raw pizza dough," said Linda Pascoe. No, it wasn't a loaf of the Foods I's bread; it was an impression taken for Linda's braces.

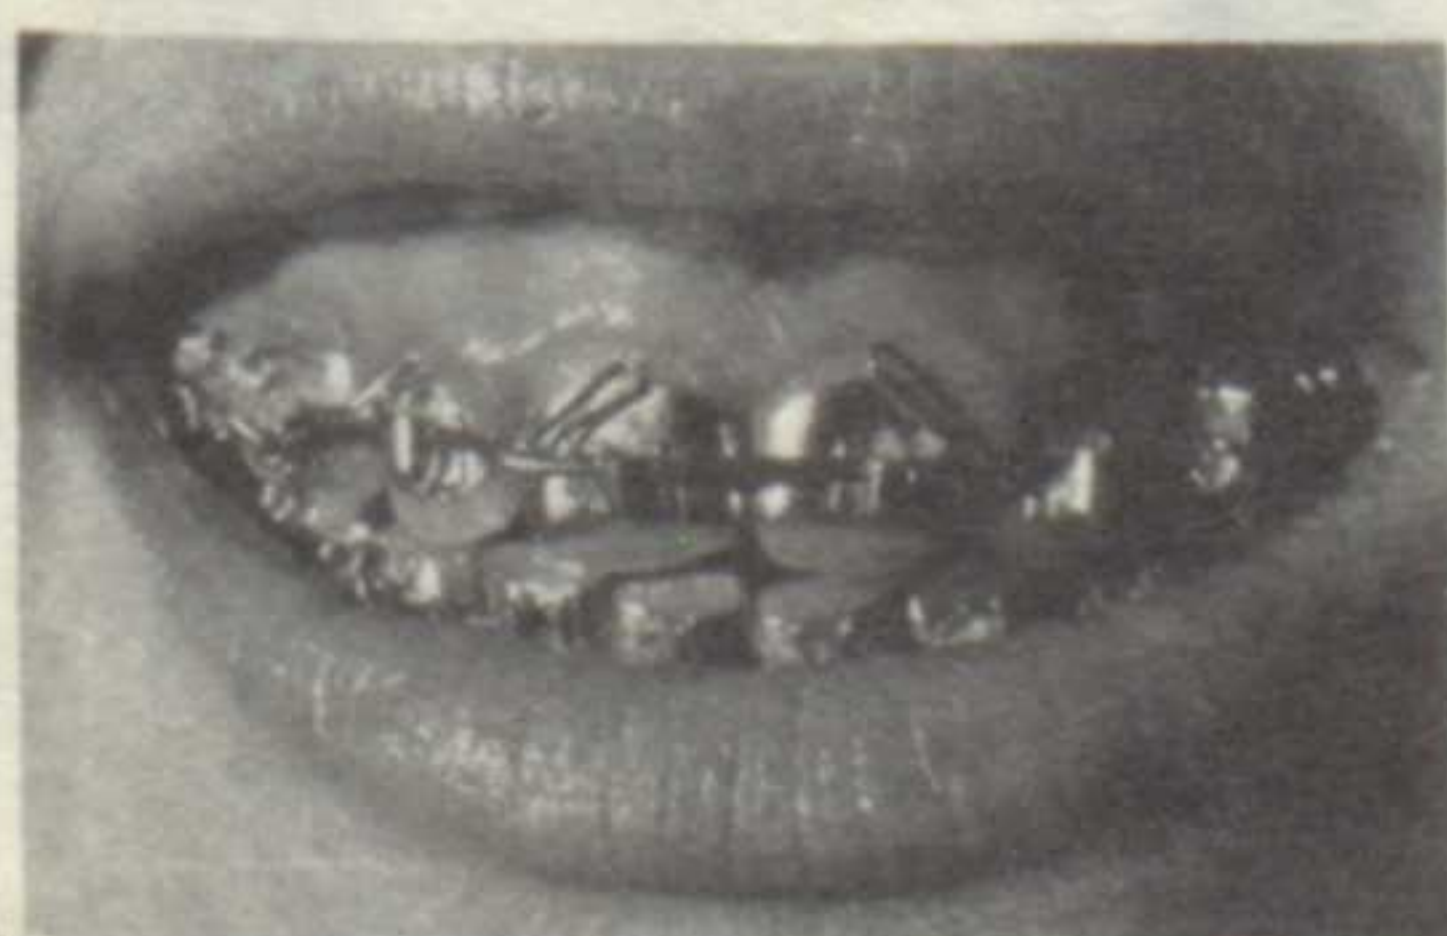

The impression, which involves taking a mold of the mouth, is only one of the many steps involved with getting braces. There's the pulling-extra-teeth stage, the nightbrace stage, the putting-the-

bands-and-wires-on stage, the rubber-band stage, the periodic tightenings, and the retainer stage. All this is just for straight teeth.

Not only do braces cause a pain in the mouth, they also take a big bite out of the budget. Braces can range from \$1000-\$2000, depending on the particular problem.

However, braces aren't all that bad; they do straighten your teeth. "The best thing about braces," says Lynn Crumbaker, "is getting them off."

Full of wires, a mouth with an overbite can wear braces up to three years.

-J. Heiser

## We lost:

### A red mitten

It happens at least once every winter. Your favorite pair of mittens or gloves gets lost somewhere. Or more irritating still, you lose just one, so you have the other one hanging around without a mate. Usually just when you go out and buy another pair, the missing

mitten shows up.

The logical place to look for a missing mitten would be the **Lost and Found**. However, students very seldom check it out, because there are about four pairs of mittens and seven loners just waiting to be claimed.

**The Lost and Found**, however, contains more than just mittens. Scarfs, jackets, and hats are there, as well as books and purses. Retainers are often turned in, and so are glasses. But, any valuables are kept in a secretary's desk until they are claimed.

Go check out the **Lost and Found** sometime—it's in the office. Maybe the other mitten to your pair is just waiting to be found.

Behind the counter, office monitor Janet Durfey searches for a lost mitten.

-J. Heiser

## Hungarian crown stirs up heated argument

Controversy, controversy: 1978 had its share of it.

The most debatable question that took place was the issue of the crown of St. Steven. This 977 year old Hungarian heirloom, along with a scepter, sword, and golden orb, came into U.S. hands at the end of WWII.

Supposedly, the man who turned the crown over to the U.S., Col. Ernest Pajtas, gave the condi-

tion that the crown shouldn't be returned until Hungary had a "free" government.

President Carter, however, decided that this would be a good time to return the crown. Immediately after his announcement, protest broke out all over the country.

Ohio Congresswoman Mary Rose Oakar led the cries to keep the crown in the U.S. "It's a kick in the teeth to the Hun-

garian people," she said.

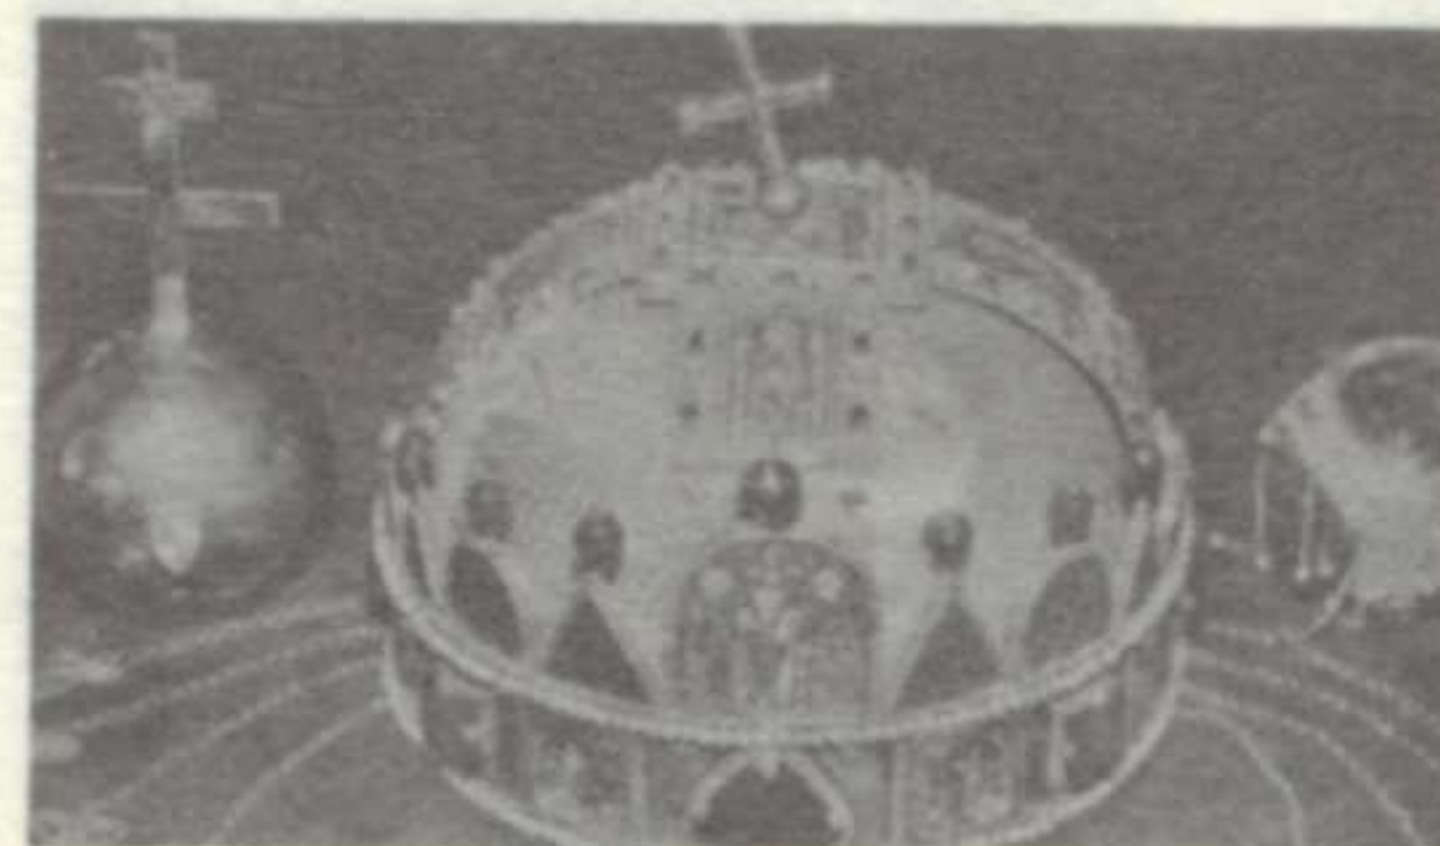

Senior Laura Mogyordy is half Hungarian. She feels that, "giving Hungary back its crown was a kind gesture."

Once Carter committed himself, he was determined to proceed with his intention. Some agreed with him. Alison Clark reasoned, "It was theirs in the first place."

Despite the protest marches and 9000 phone calls against the move,

on Jan. 5, 1978, the royal regalia was finally returned to Budapest, Hungary in a small, non-public ceremony.

**Pictured on display** in Fort Knox, the priceless Hungarian Royal Regalia rests there like it has for 33 years.

## Great green globs . . .

Who says there aren't any more original products on the market? Whoever it was certainly has not heard of slime.

First introduced on the market when summer practices began, slime worked its way into the hearts of numerous BHSers.

**Cold and clammy** to the touch, slime slithers down its exclusive trash can.

-J. Heiser

Selling for \$1.29, slime is a blob of a green, oozing, jello-like substance. It comes in its own green garbage can and can perform many amusing tricks.

To begin with, just get to know your slime. Flatten it on the table, poke it, cup your hands and let it dribble through your fingers.

Once you have mastered the art of molding it without letting it stick to your hand, you are ready for some advanced feats.

Get a friend and play catch with it, let it ooze from a three-story window, put it on a plate and serve it to your grandmother. Whatever you decide to do with your slime, keep one thing in mind. If it gets in hair or clothes, it never comes out! So have fun, but be careful.

## The great decision: A ring with class

What's one way to spend \$70 in one lump sum? Buy a class ring, of course. Whether it be silver, gold, or even precious white gold, the price does not usually drop below \$45.

The steep price tag prompts many sophomores to react negatively to the end of the year temptation. "By the time I would have gotten my ring, I'd only be in high school one and a half years," stated Doug Crowe. "Besides," he added, "everyone would laugh if you wore it in college."

Despite Doug's reasoning, about one quarter of the class of '79 braved empty wallets and purses to purchase a class ring. "It gives you long-lasting high school memories," Cindy Cash explained.

After first deciding to get one, the easy decisions were over. There

were literally hundreds of choices of stones, cuts, sides, and extras. Each cost from \$2 to \$6 extra so many chose to stick with good old Bay blue and no extra items. One popular item did go over big, though. Students were able to "select-a-side" for their ring. Any activity in the school from drama to color guard was available.

And then again, some had more trouble choosing the ring than paying for it.

**Band select-a-side** panels cost six dollars if the student desires them.

-J. Heiser

## Tests stump upperclassmen

Bzzzzzzzzzzzz!!!!

All over Bay Village, 256 alarm clocks went off at 7:00 on Saturday, Oct. 22.

What's the reason?

For three fourths of the junior class, it was the date of the PSAT and the start of their college testing career. The PSAT is the first test given by the College Board Admissions Testing Program. Mainly for practice, the scores were returned in December. Results showed that three students had scored above a 200 which is considered a good score.

After a two month rest, juniors and seniors showed up Feb. 11 for the ACT which is required by most Ohio schools. Finally, on March 11, the SAT was first given along with the separate achievement tests.

The last test, the SAT, is important for students who plan to apply to a highly competitive "Eastern school," according to Ms. Betty Jane Hull, guidance counselor.

For some, the worst part of the tests was not the difficult questions or the final results. The hardest task was paying the combined fee of \$30!

## Peace for Middle East

Undoubtedly, the biggest news story of the year took place at the beginning of winter. At this time, the Egyptian President Anwar Sadat carried out his "sacred mission" and flew east to talk peace with Premier Menachem Begin of Israel.

This bold move, after years of war, was proclaimed throughout the world as a heroic gesture. As a result, *Time* magazine, on Jan. 2, named Sadat "Man of the Year".

"There's a willingness on both sides to have peace," pointed out Stan Sak after the story broke.

"They could reach an agreement, but they're going to have to make some compromises and withdraw their demands," projected Jeff Field.

Despite Arab criticism, Egyptians and Israelis talked publicly about such problems as the Suez Canal and the Sinai Peninsula. Representing America, newsman Walter Cronkite served as a sort of mediator for a short period.

In America, there was much rejoicing. Some speculated that President Jimmy Carter's human rights policy had an effect on the meeting.

Sadat's move was a bold step indeed. It alone started people asking the question, "Could 1978 be the year for peace?"

**After making his peace stand,** Anwar Sadat defends himself against anti-Israeli Egyptians.

## Raise a racquet

Ever wanted to play a game that combines the best features of tennis, handball, squash, and badminton? Numerous BHS-ers have discovered the game of racquetball, an easy game to try because of The Backwall, a club in Westlake which has nine enclosed courts.

Played in a court 20 feet wide, 40 feet long, and 20 feet high, racquetball needs only two pieces of equipment: a racquet (selling from anywhere from \$18 to \$60) and a ball (selling for \$1.50 each).

"It's a fun sport, and it's easy to learn," said freshman Mike Davis, a member of The Backwall.

"It's great exercise," added Brian Pontius.

Other Bay High racquetballers include Tom Reynolds, Pam Clark, Amy Hession, and more.

Not only is it fun to play, but it's also been proven that it's good exercise. An hour of racquetball equals two hours of tennis in physical exertion. Besides, it costs less!

**After just returning** a forehand smash, Tracy Marlier watches the ball travel to the front of court 6 at The Backwall.

-J. Heiser

## Kidnapping in room 220!

"It was the most dastardly crime ever committed in the annals of mankind," stated Mr. Paul W. Brandt, history teacher.

He was speaking of the kidnapping of the portrait of George Washington which hangs in room 220. The portrait, idolized by Mr. Brandt, was discovered missing on December 14.

In its place was a ransom note which read, "If you ever want to see Mr. Washington in one piece again, you must meet the following demands: . . ." The note proceeded to tell Mr. Brandt to place \$50,000 in unmarked Monopoly bills in a trash can.

Students immediately

responded to the plea and donated funny money to the cause. More notes followed giving detailed instructions. The administration set to work to discover the kidnapers.

The ransom was finally delivered and the portrait returned with the names of Stan Walker and Toby Jones on the last note. Said kidnapper Jones, "We never would have done it if we didn't know Mr. Brandt would take it in good humor."

The final result of this crime story was the trial which took place seventh period on December 21. Both were sentenced to dress up as George and Martha Washington for a day.

# Side 12 Streets

## There's a mummy in 221!

Blah! What a super word to describe the walls of Bay High, but wait a minute. Just look around, and you'll find out this is not true.

west gym, around the first floor, up the library staircase, and continue to the second floor for further examination. The agenda is as follows:

and painted the year in which Bay was the champion in that event.

2. Gym corridor. Student Congress added

gave the publications people a jolly representation of Ms. Coolidge and Ms. Bush in op art. Also Marisa Broka ('75)

-S. Ormsby

In almost every corner of the school you can see an originally designed mural. To make sure that all the decorative walls are given due credit, a geographical tour is needed to explore every nook and cranny in the school. The tour group will move from the far

1. West Gym. The artist, Mr. Meyers, painted an enormous 16 by 10 foot sign that lets you know that this is "Rocket Country". He also added the Olympic sporting event graphics to the side walls above the bleachers

pizzaz to the blah institutional oatmeal color of the corridor. Rita Begnaud ('75) gave special assistance in the design and painting of the modern collage.

3. Publications' Room. Kurt Teske ('77) and Paul Kassel ('77)

**Egyptian Sphinxes** and pyramids liven up the walls of room 221.

painted a serene version of a countryside in browns and neutral colors.

4. Room 109. The imagination and creativity of Andy Cepulo ('75)

# Side 13 Streets

designed the black and white abstract with two Blakean revelations scrolled into the middle of each half of the wall.

5. Room 104. Mr. Millheim's creative writing class pondered for days to come up with poems and inspirational sayings to put on the baby blue walls.

6. Library Conference

Rooms. The moonscape was drawn and painted by the dual talents of Ken Votruba ('72) and Paul Leopold ('72). A Boston waterfront sketch was colorfully produced by Rick Tornatzky ('72). Linda Lindstrom ('71) and Debbie Krueger ('71) used their innovation to add a fall countryside to

the wall.

7. Room 213. A medley of wild, jungle beasts was delicately stroked on the wall in brown by Stacy Saunders ('78).

8. Room 215. The rock strata formation of the Grand Canyon is a combined creation of Mike Teiberis ('81), Pat Walsh ('81), and Larry Taranto ('81).

9. Room 221. Geometric

designs were dreamed up by John Ershek ('77) and Eileen Romano ('77) who both added some mummies and Pharaohs to the porous brick walls of Bay High.

Hopefully, the tour inspired some people to further examine the murals that were painstakingly drawn by the talented hands of the Bay High School students.

## No gain, no pain?

A desire to shed pounds in a matter of days prompted Americans to buy over forty million dollars worth of liquid protein. Bay High students were also active participants in this diet.

One student, Joan Maurer, lost 30 pounds in 25 days on the controversial diet. The plan had advantages as Joan stated, "I didn't have to waste time eating, and there was no overeating at parties. Also, it saved on food bills around the house." She also said, "There was no pain involved. I felt better, slept better, and was more awake in the morning." As to the taste of the protein, she noted, "It was not bad, and it tasted like Koolaid, but the potassium wasn't too good."

On the other hand, Andrea Auman had some different views about the liquid protein plan. With regard to the pluses of the diet, Andrea declared, "I didn't have to worry about eating only certain

foods. I just ate nothing at all." Andrea noticed many disadvantages as she stated, "I lost some hair and was always cold. I was draggy and not in a good mood sometimes. The protein tasted awful, and the potassium was even worse." When asked if she would recommend this diet, she explained, "I wouldn't recommend this because of the deaths and warnings." Andrea lost 40 pounds in three months.

One of the drawbacks to the plan was the chance of dying while on the diet. The number of people who have died while on the diet were not great, but the FDA was looking into over thirty of these cases. As a result of the deaths, the FDA required label warnings against unsupervised use of the liquid.

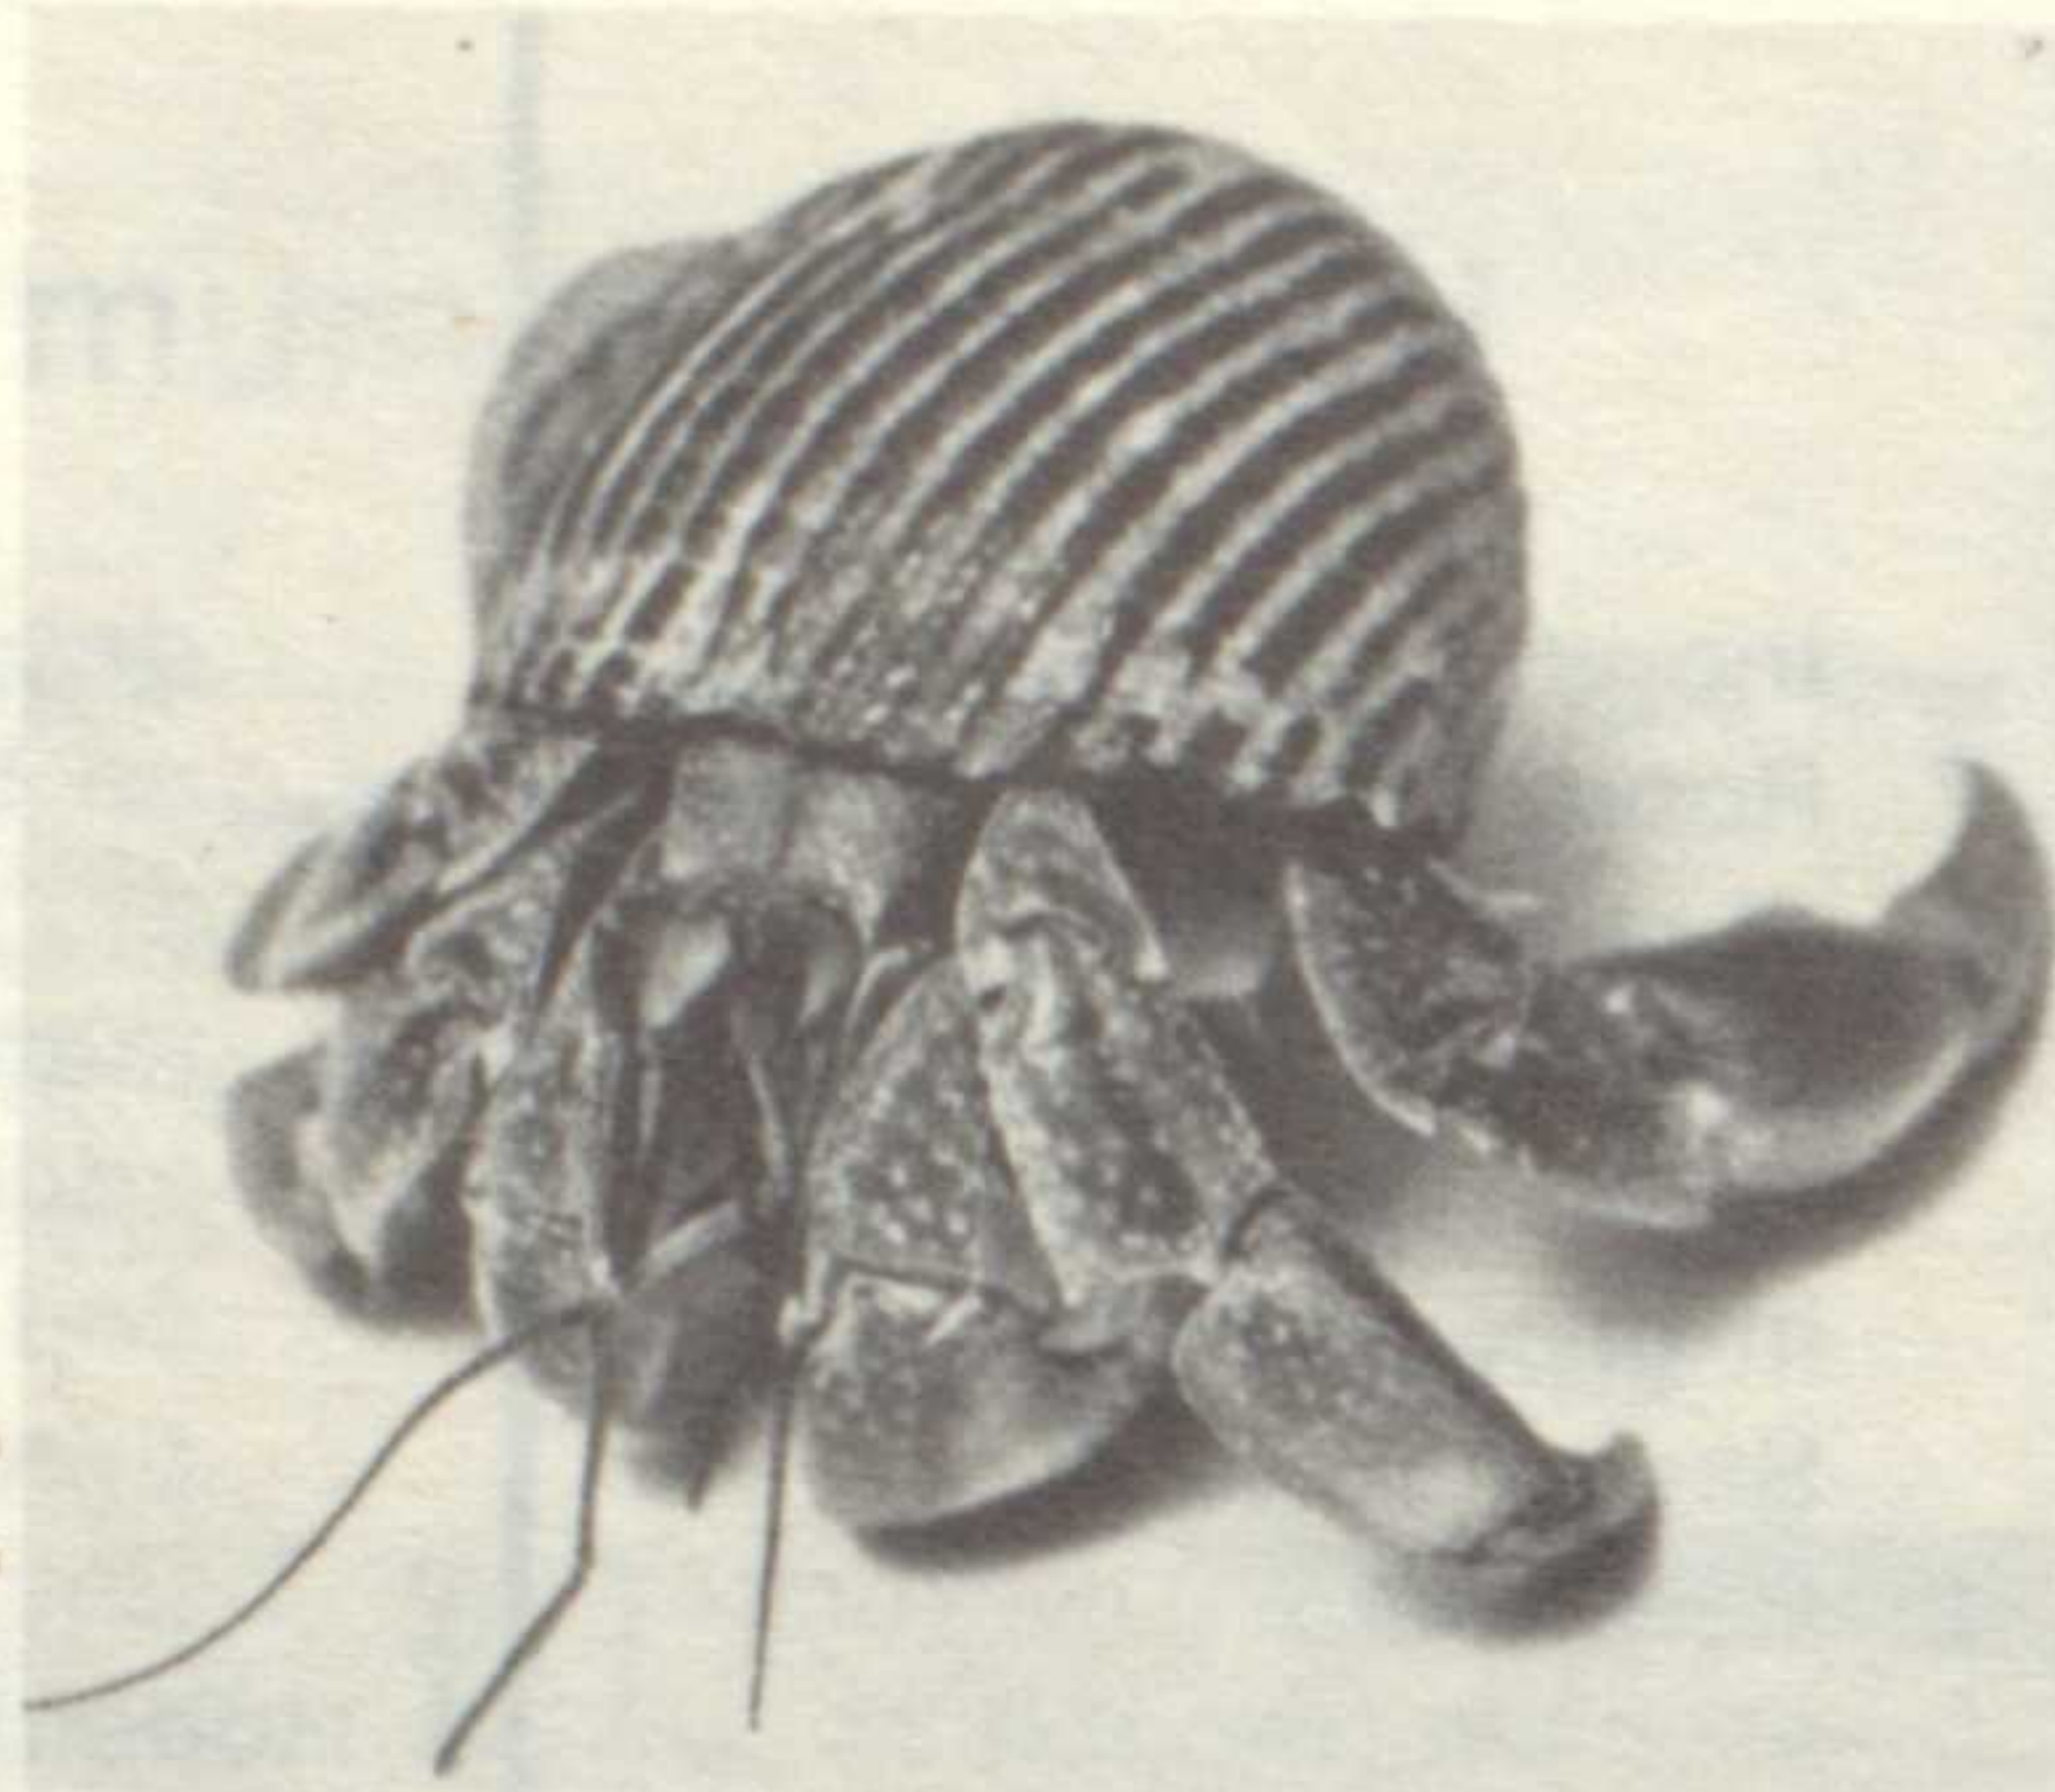

So, if you wanted to start on the diet, it was necessary to prepare your taste buds for chemically predigested cow hide and tendon, artificial flavor and sweetener. **Yuk!**

Junior class motto, "Life to the fullest," bursts from the wall as Mark Mutch and Mark Chomba walk by.

-S. Ormsby

## What to do with crabs once you get them

-J. Heiser

When's the last time you had a crab, not to eat, but to cuddle up with? Doesn't sound too exciting, does it?

Well, unbelievable as it may seem, some people even collect crabs, hermit crabs. Mike Crook has 15 of them. "They're something you can control," said Mike. "Besides, they're inexpensive to maintain and interesting to watch. I started collecting them while I was in Florida: you can pick them up on the beaches there."

Florida's not the only place to get hermit crabs. Docktor Pet Center at Westgate has them for \$2.49 apiece. However, in the past year, they have sold hundreds of them and they are usually sold out.

If you're in a dilemma as to what to feed your new crabs, don't despair. Crabs eat everything from lettuce and cornmeal to birthday cake. "They love peanut butter," Cindy Cash said. Sometimes they even sit in it."

They can live in a terrarium with sand and a little water. But they are rumored to be little Houdinis that can escape from anything, so be sure to cover the container.

Now aren't you feeling a little crabby?

## A change of face

Thinking of growing a beard? Well, you might be in for a traumatic experience.

It is not uncommon for guys who grow beards to encounter such discouraging comments as "Did you wash your face this morning?" during the initial growing period. But some guys experience some unusual problems.

The hassle of shaving led Kurt Zillman to grow a beard, an act which was regarded jokingly in his house as a "sign of laziness and decadence." However, he only had about three weeks growth when he shaved it off for a role in a play.

Varsity swimmer Don Sprosty noted that his beard "Slows me down." He also receives no encouragement and has been called "Abraham, Jesus, and Fuzzie" by his swim coach, Pete O'Dell.

Are beards and moustaches worth the trouble? While some males grew a beard to avoid the shaving hassle, Don Sprosty came up with his own reason for starting a beard in November. "I had nothing to do and it was cold outside."

In search of dinner, Cindy Cash's hermit crab Herbie crawls around.

## Live, from New York; It's Saturday Night!

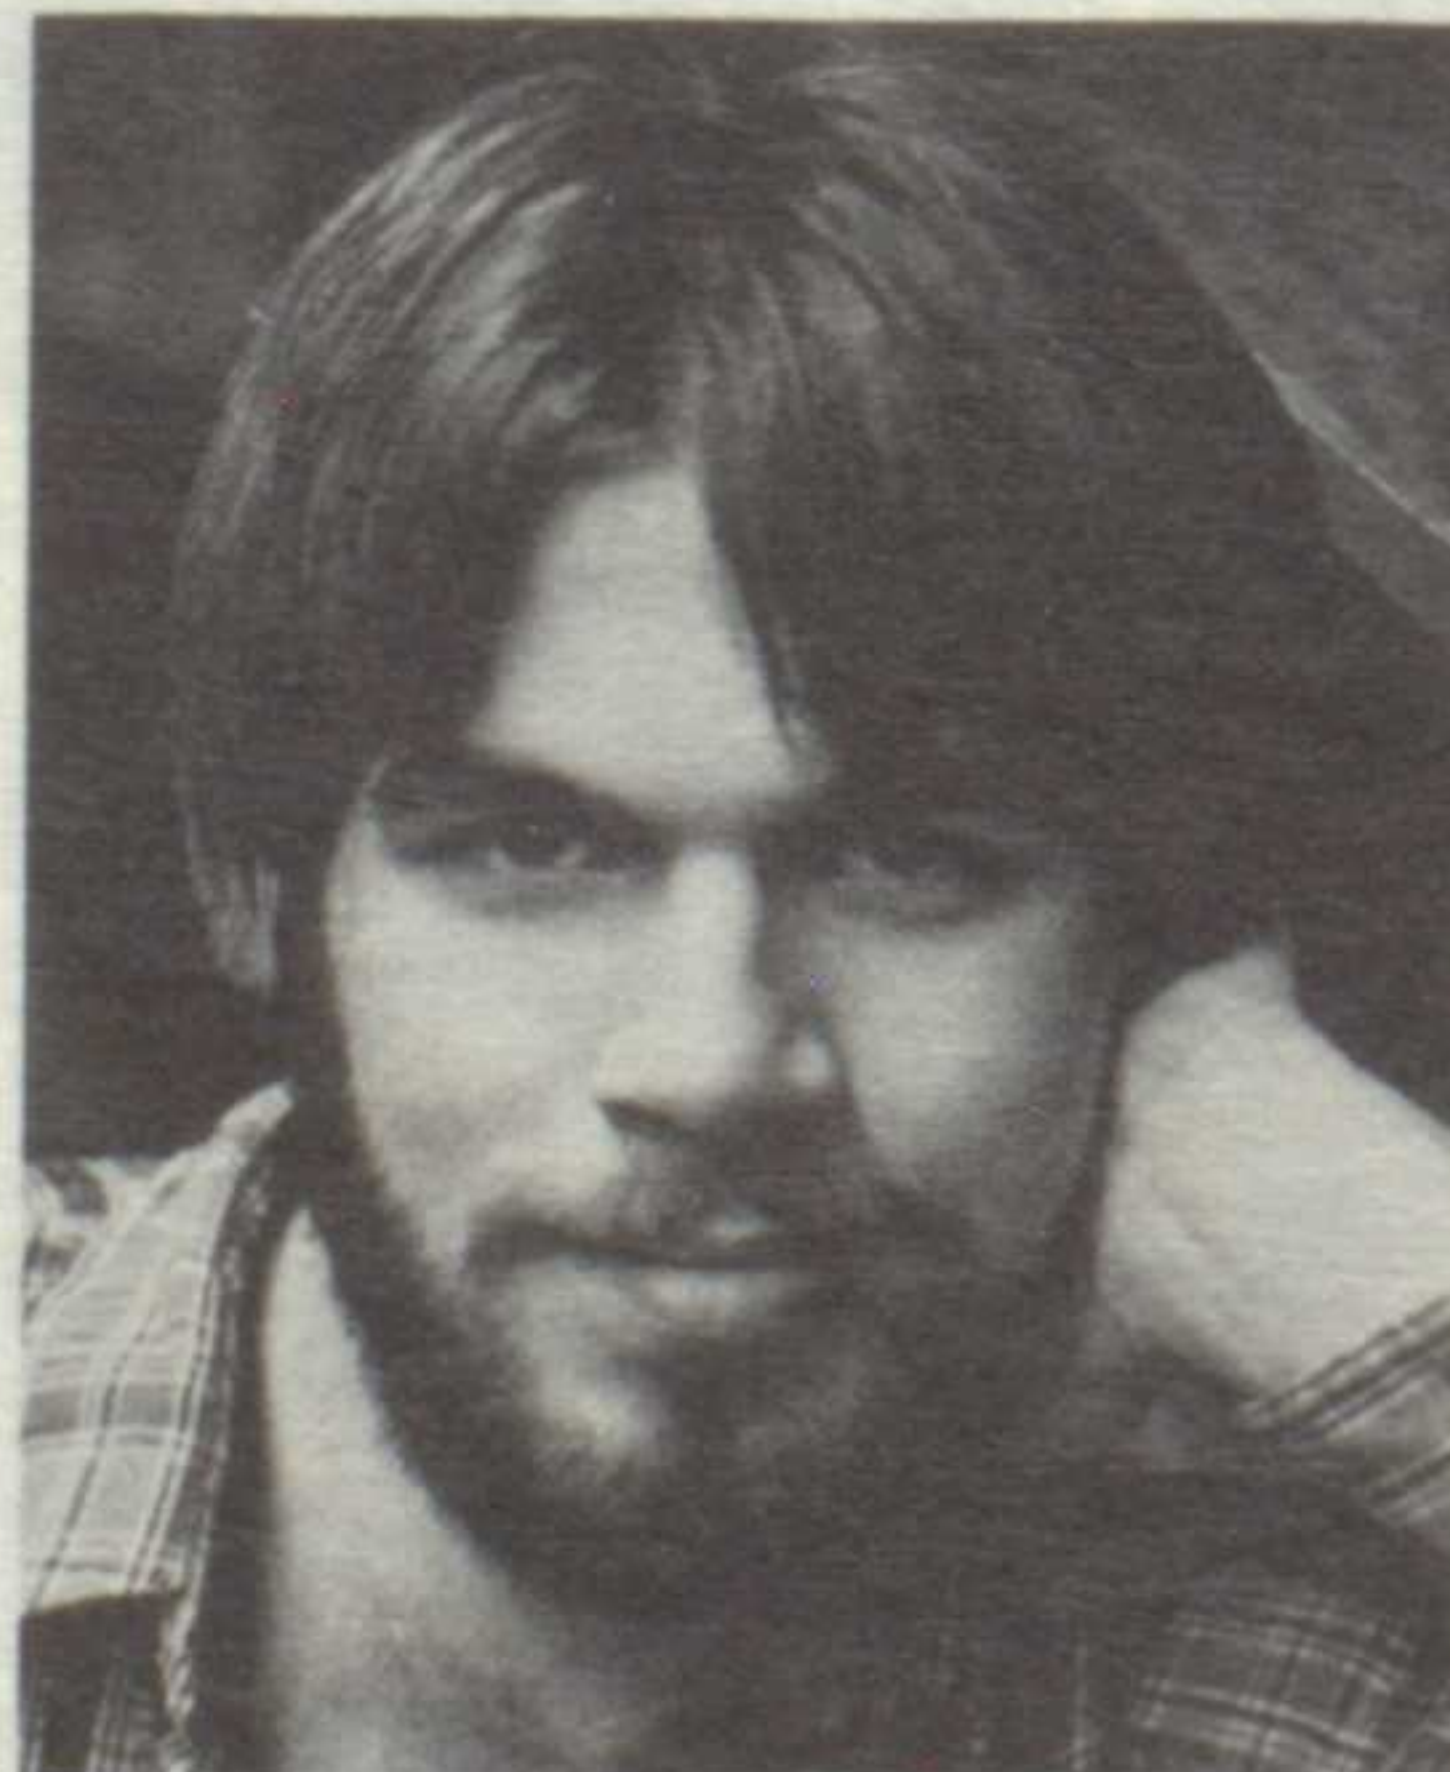

Just clowning around, the NRFPTP appear in their book, Saturday Night Live.

It's bad news when people stay home on Saturday night. But it's good news when they stay home to watch *Saturday Night Live*.

*Saturday Night Live*, an off beat comedy show that had its beginnings in 1975, is responsible for the coneheads, Weekend Update, and a censorship fervor the likes of which is rare on prime time.

It is also the home of the Not Ready for Prime Time Players. This group of talents bounce, shuffle, and occasionally fall across the live television program that is shown three Saturdays a month.

After only two weeks of growth, Dennis Pontius sports a new beard.

-J. Heiser

Students have mixed feelings about the material used on *Saturday Night Live*. Even though the show is well liked by most students, there are a few that feel it is not worth staying up for. Debbie Gorman says, "Sometimes they're funny, but sometimes they're just too satirical to be funny." Leah Neal added, "I don't understand some of their skits; they lose the point trying to be funny."

However, some of the seniors enjoy it. They plan to use a conehead skit in the AFS Talent Show.

The transcripts for some of the skits, commercials, Weekend Update segments and other *Saturday Night Live* material is now available in book form.

For \$6.95, Avon Books presents *Saturday Night Live*, edited by Anne Beatts and John Head. This collection includes the Slumber Party (that's disgusting), Idi "VD" Amin, Jaws II (Land Shark) and Mr. Mike Meets Uncle Remus.

Now, it's not necessary to stay home on Saturday night!

## The year in black

It was a bad year for show business, in fact, you might even go so far as calling it deadly.

Eight of the greatest personalities in the field of entertainment died in 1977.

"I just couldn't believe all those people died in one year," said Mark Ferror. "It's not even strange; bizarre is the word."

These stars come from all types of entertainment; from rock and roll to the silent screen. They are:

**Joan Crawford 1908-May 1977.** More than 80 movies to her credit and an Oscar in 1945.

**Charlie Chaplin 1889-Dec. 1977.** The little tramp, star of the silent screen.

**Elvis Presley 1935-Aug. 1977.** Rock and roll superstar who sold 500 million records.

**Bing Crosby 1903-Oct. 1977.** The Crooner made 70 movies, 850 records and *White Christmas*.

**Leopold Stokowski 1882-Sept. 1977.** Disney's *Fantasia* conductor and maestro for 68 years.

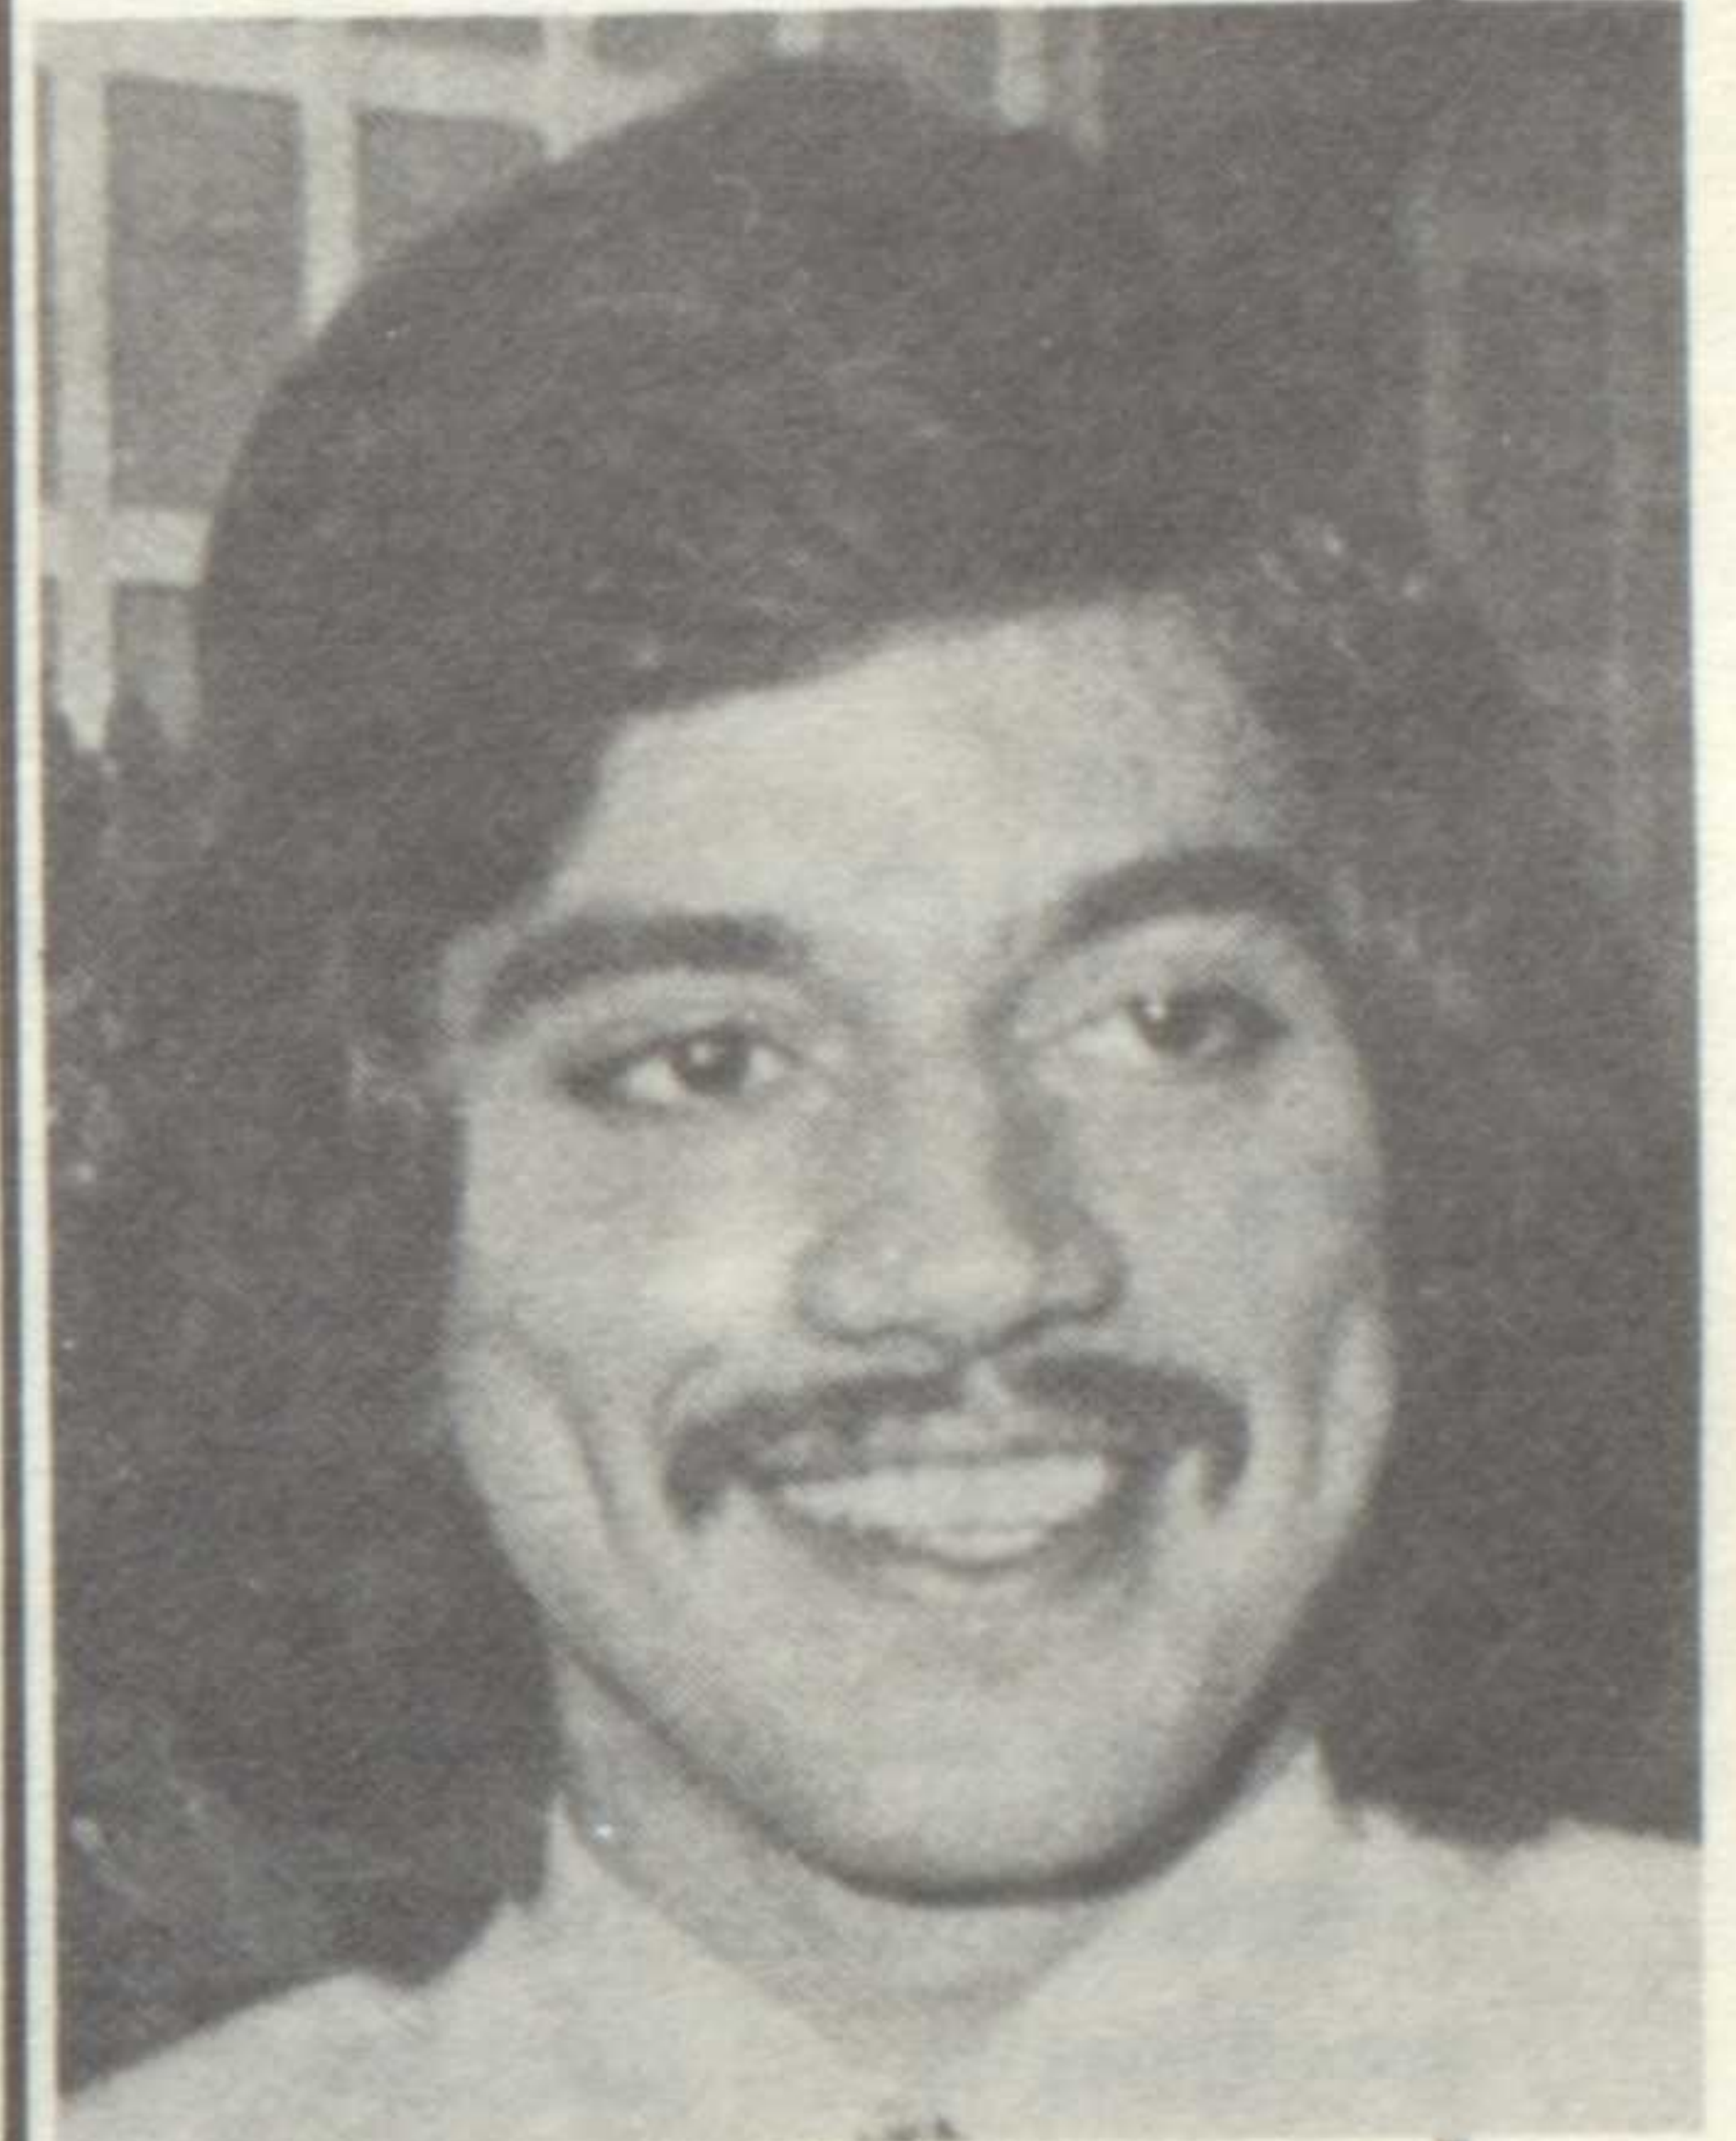

**Guy Lombardo 1902-Nov. 1977.** 48 years of leading Americans in *Auld Lang Syne*.

**Groucho Marx 1891-Sept. 1977.** The King of Insults and the Marx with the cigar.

**Freddie Prinze 1955-June 1977.** Tragic suicide after a 3-year hit, *Chico and the Man*.

Politics also lost a respected member when, on January 13th, Hubert H. Humphrey died of cancer at the age of 66.

In the political arena for some thirty years, Humphrey started his career as a Democratic senator from Minnesota and went on to be Lyndon Johnson's vice president in 1961 and a presidential nominee in 1968.

## The British are coming!

Imagine glancing through an encyclopedia and finding your name. For freshman John André, this is a very common experience.

The first John André was a French general during the American Revolution. When Benedict Arnold offered to surrender West Point to the British, they sent André to accept.

Although he has no plans to become a spy, today's John André is proud of his famous ancestor. All the same, we'd better make sure he doesn't try to surrender the cafeteria to the British.

**Seated in his living room,** freshman John André explains the activities of his famous ancestor, who besides acting as a liason for Benedict Arnold, also played the flute.

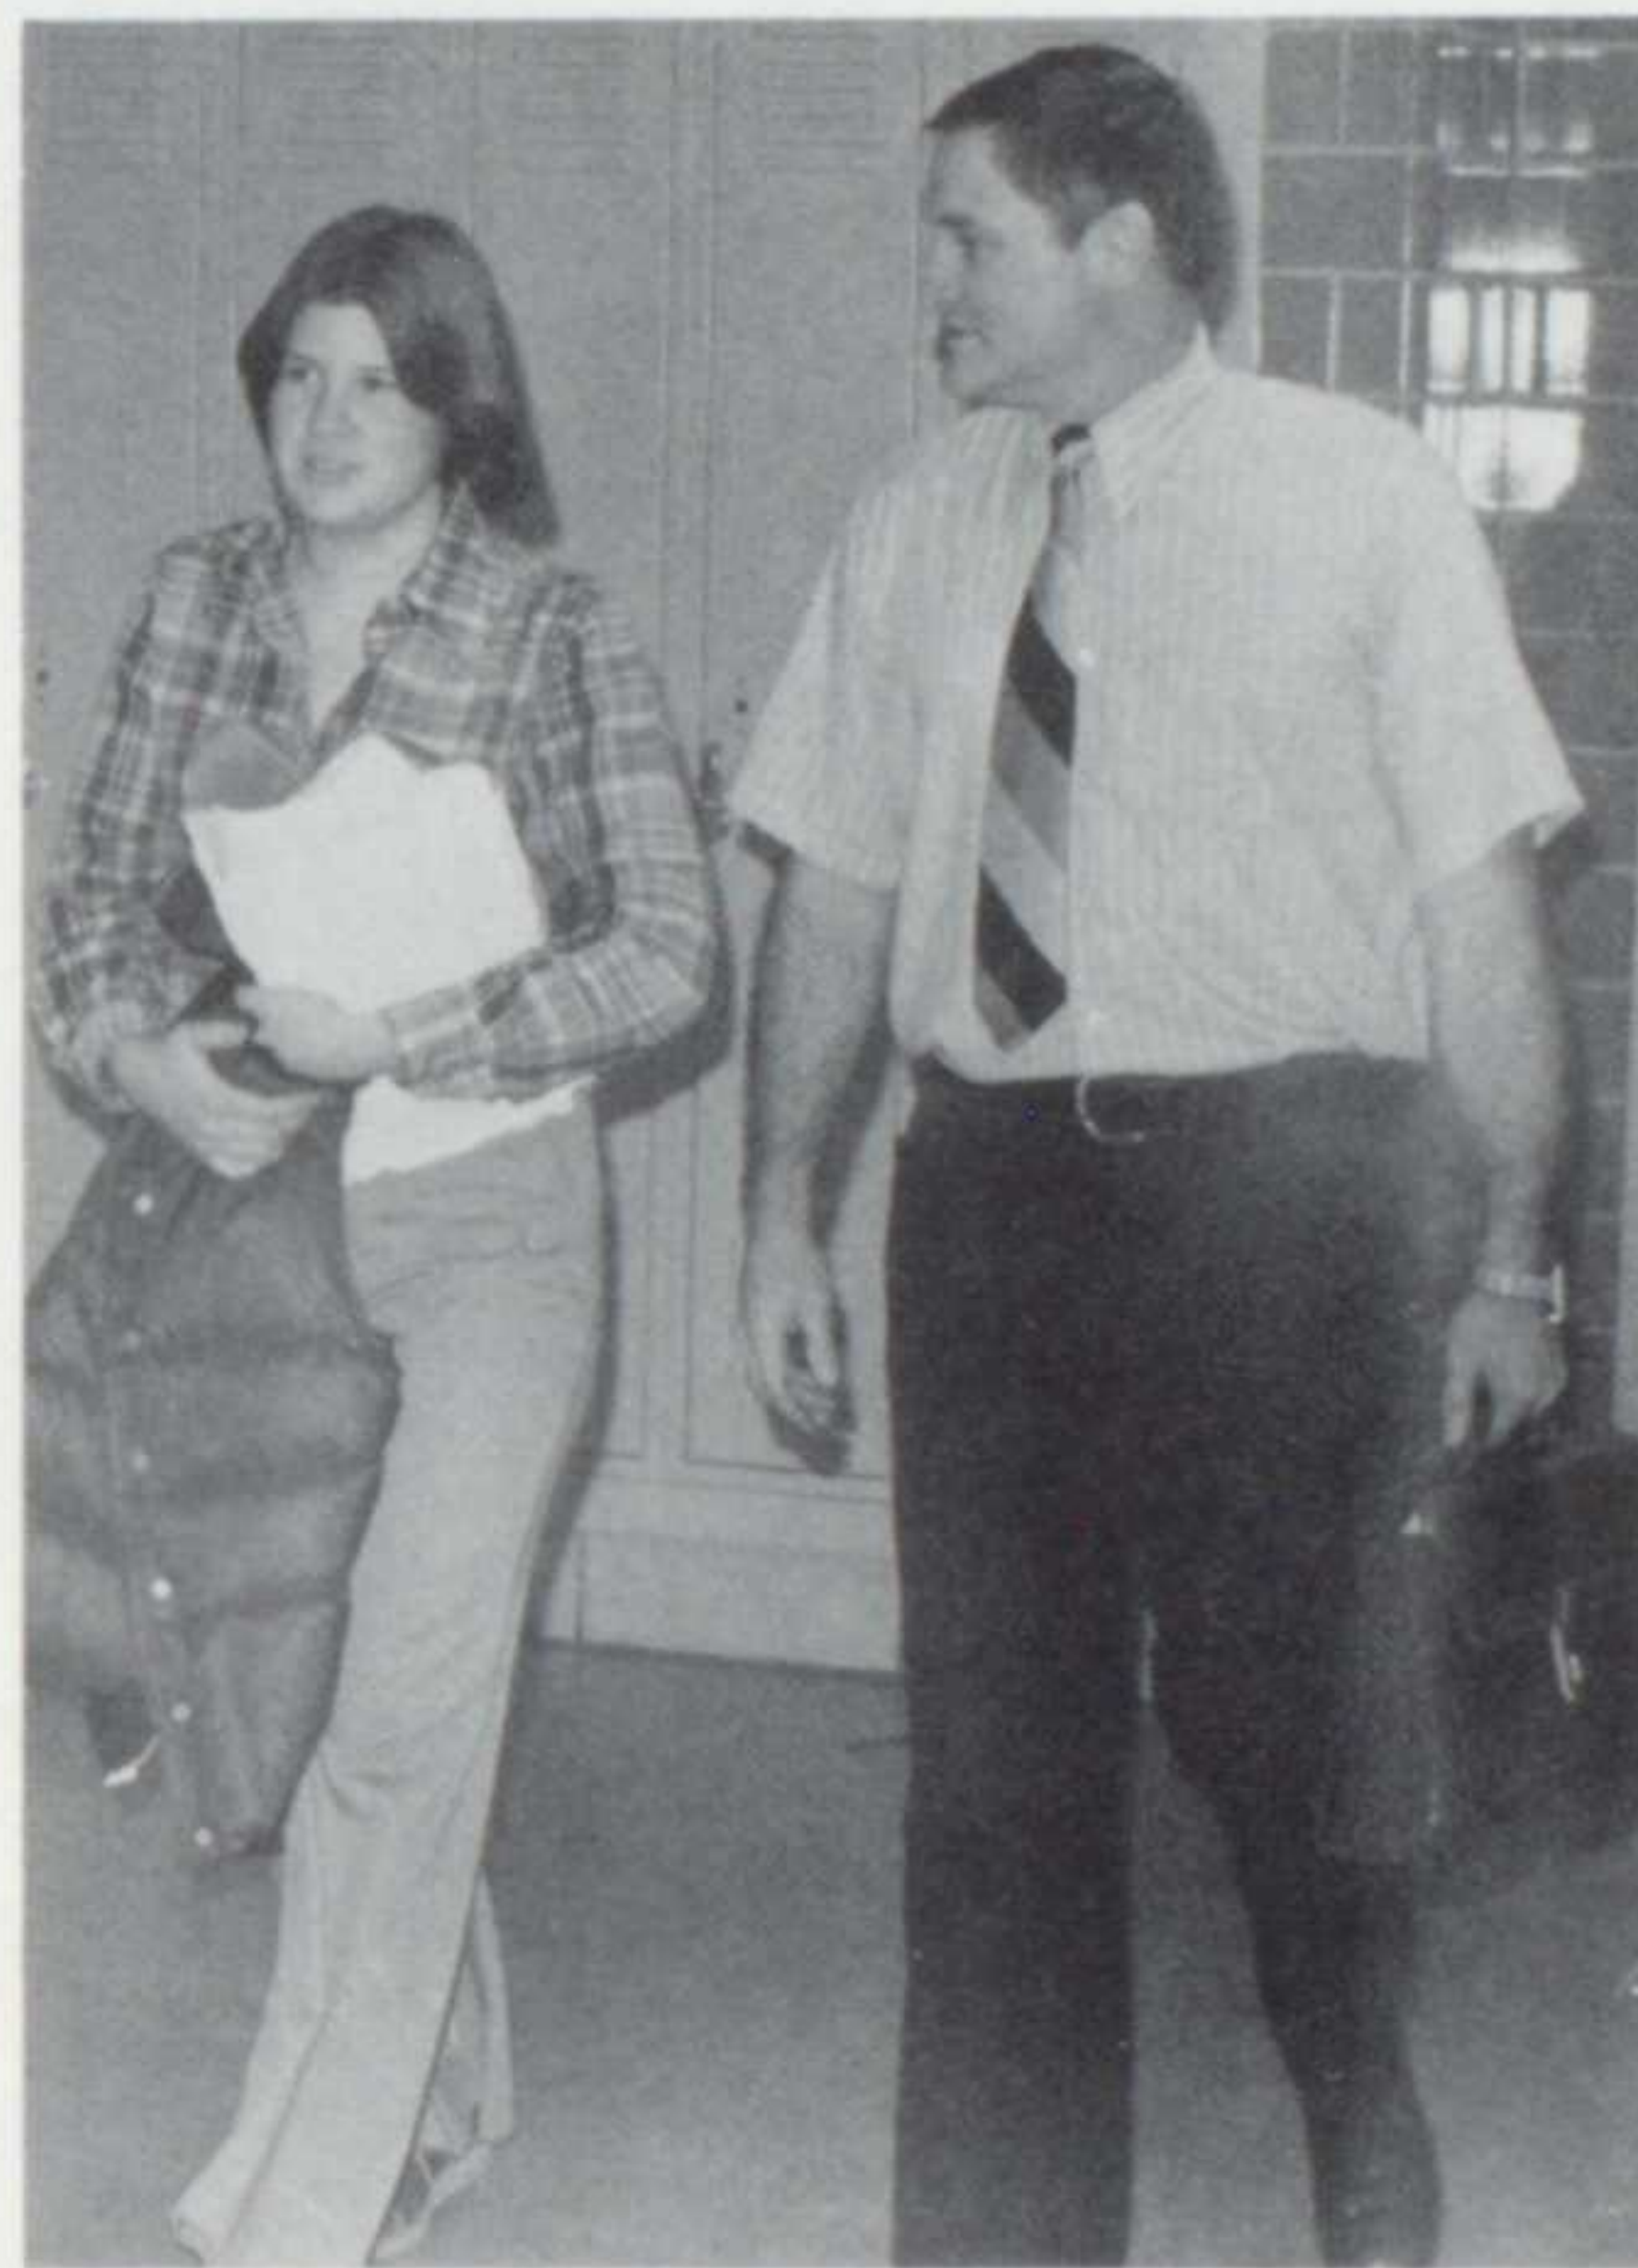

# Freshmen:

## Individuals with class

### Coaching on the home field

—D. Khyrn

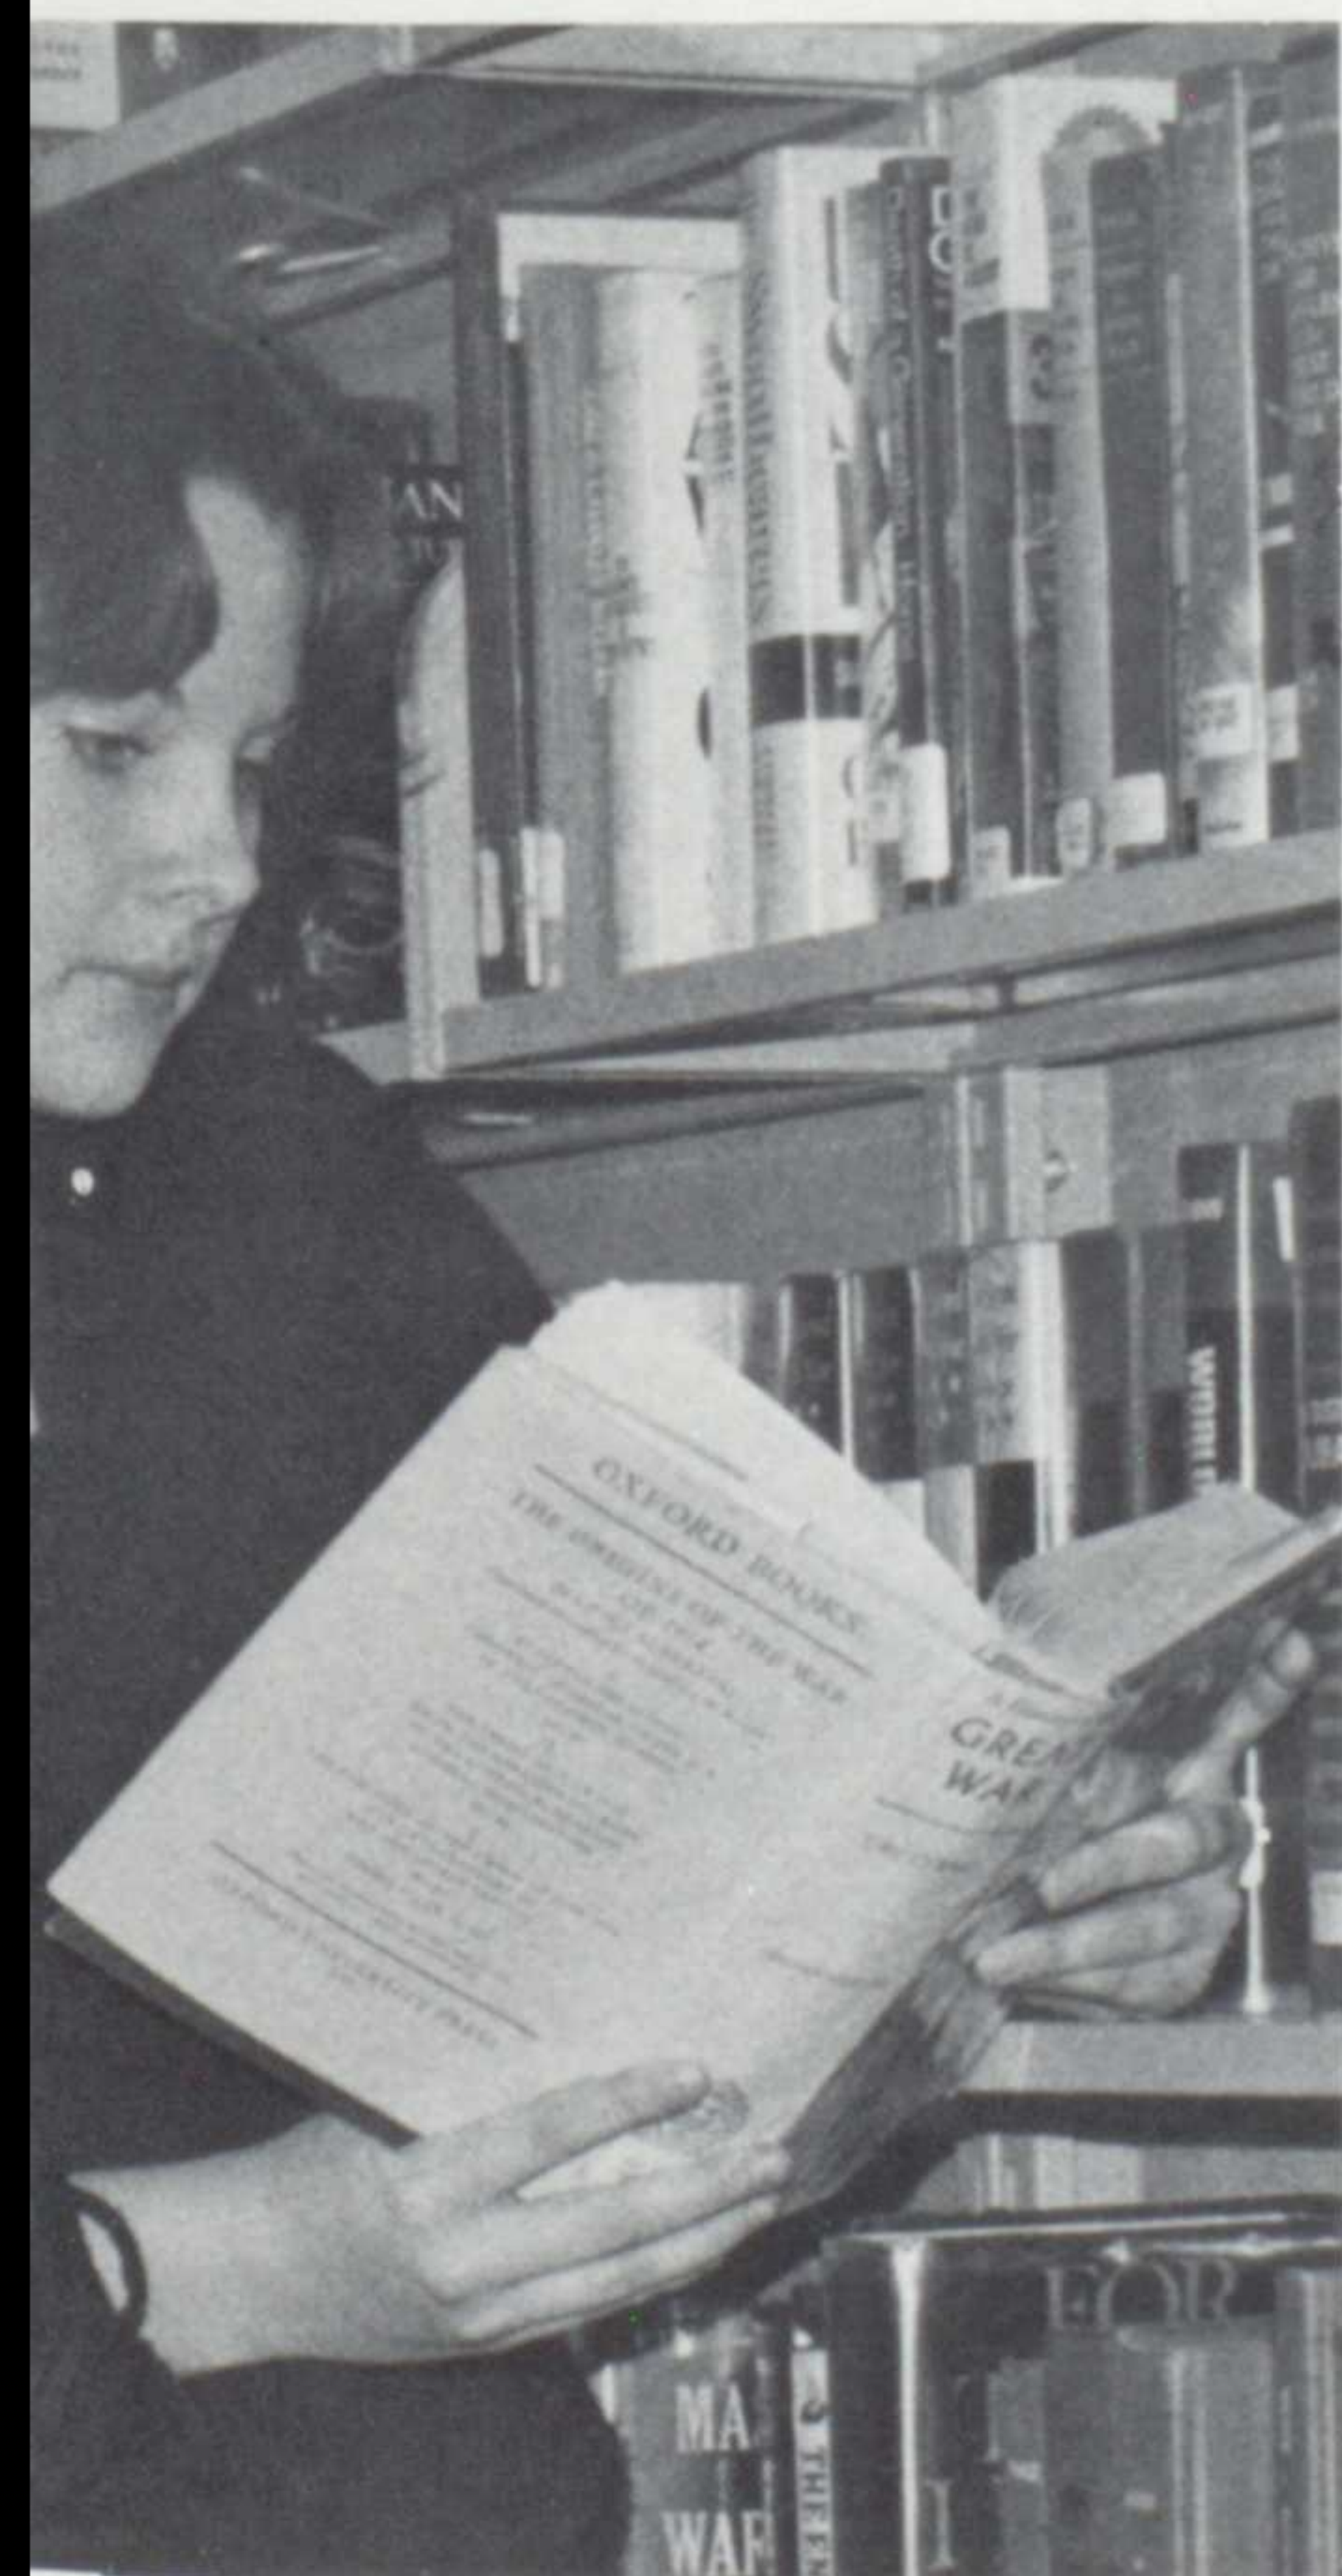

—D. Khyrn

**After a long day** of school, freshman Amy Chadwick and her father, teacher Mr. Chadwick head for the car to return home.

"Hey, Dad, what's on the test?" Freshman Amy Chadwick is one of the few people in the school that can ask this question. Of course, Mr. Chadwick wouldn't tell her, but it's nice to try.

What's it like having your father teach at the school you attend? "I feel like my dad is watching me all the time," Amy said. "Besides, it's weird calling a teacher 'Dad' in the hall." There is a bright side, though. Amy can always get help with a difficult homework assignment.

If she had a choice, Amy said she would want her Dad to stay at B. H. S. "I like having him here," she said, "and during football season, the only time I get to see him is at school."

—D. Khyrn

## In touch with the past

What do Ulysses S. Grant and Robert E. Lee have in common? As commanding officers on opposite sides in the Civil War, they had nothing at all in common, but fate has changed all that. Freshman Karen Anderson is related to both generals.

"Robert E. Lee is my great, great, great uncle, and Ulysses

**Civil War history books** in the library provide a cross-reference for freshman Karen Anderson's research into her family's "roots".

S. Grant is a very distant relative," Karen explained. She discovered this surprising fact when her uncle traced back their family tree.

Perhaps the greatest advantage is that Karen's mother is now very interested in Civil War history. Because of her involvement, the Andersons have gone to almost every important battle site, including Gettysburg and Bull Run.

And you thought you knew all about family feuds. Hatfield and McCoy, eat your hearts out.

## Cultures live through travel

Bay Village is a transient community; many people move in and out several times. Few, however, move to such exotic places as Indonesia, Brazil, and Argentina.

When she was seven, freshman Karen Laurson's family moved to Argentina. Karen quickly learned to speak Spanish, and then found out that they were moving to Brazil. Two years later, the Laurson's moved again, this time to Indonesia.

Karen found the language, Bahasa Indonesian, difficult to learn, but she made many friends. She attended a school with students from several different countries, and learned first-hand about their cultures.

"I liked living in the other countries," Karen concluded, "but it was nice to come home."

**Indonesian puppets**, a momento from her home in Jakarta, occupy freshman Karen Laurson's attention during a spare moment.

# The more the merrier

Some sociologists have done research on the effects of birth order on children. However, not many have given statistics about a seventh child such as freshman Joan Kennedy.

In spite of everything, Joan would not give up even one member of her family. "You always feel like you belong," she said.

Although the Kennedys normally get along very well, sometimes tempers snap. Joan elaborated, "When all nine of us are fighting, it's like World War III."

**Together for the first time** in months, the eleven Kennedys sit down to their 23 pound turkey dinner.

—D. Khyrn

## We found:

### Gnomes

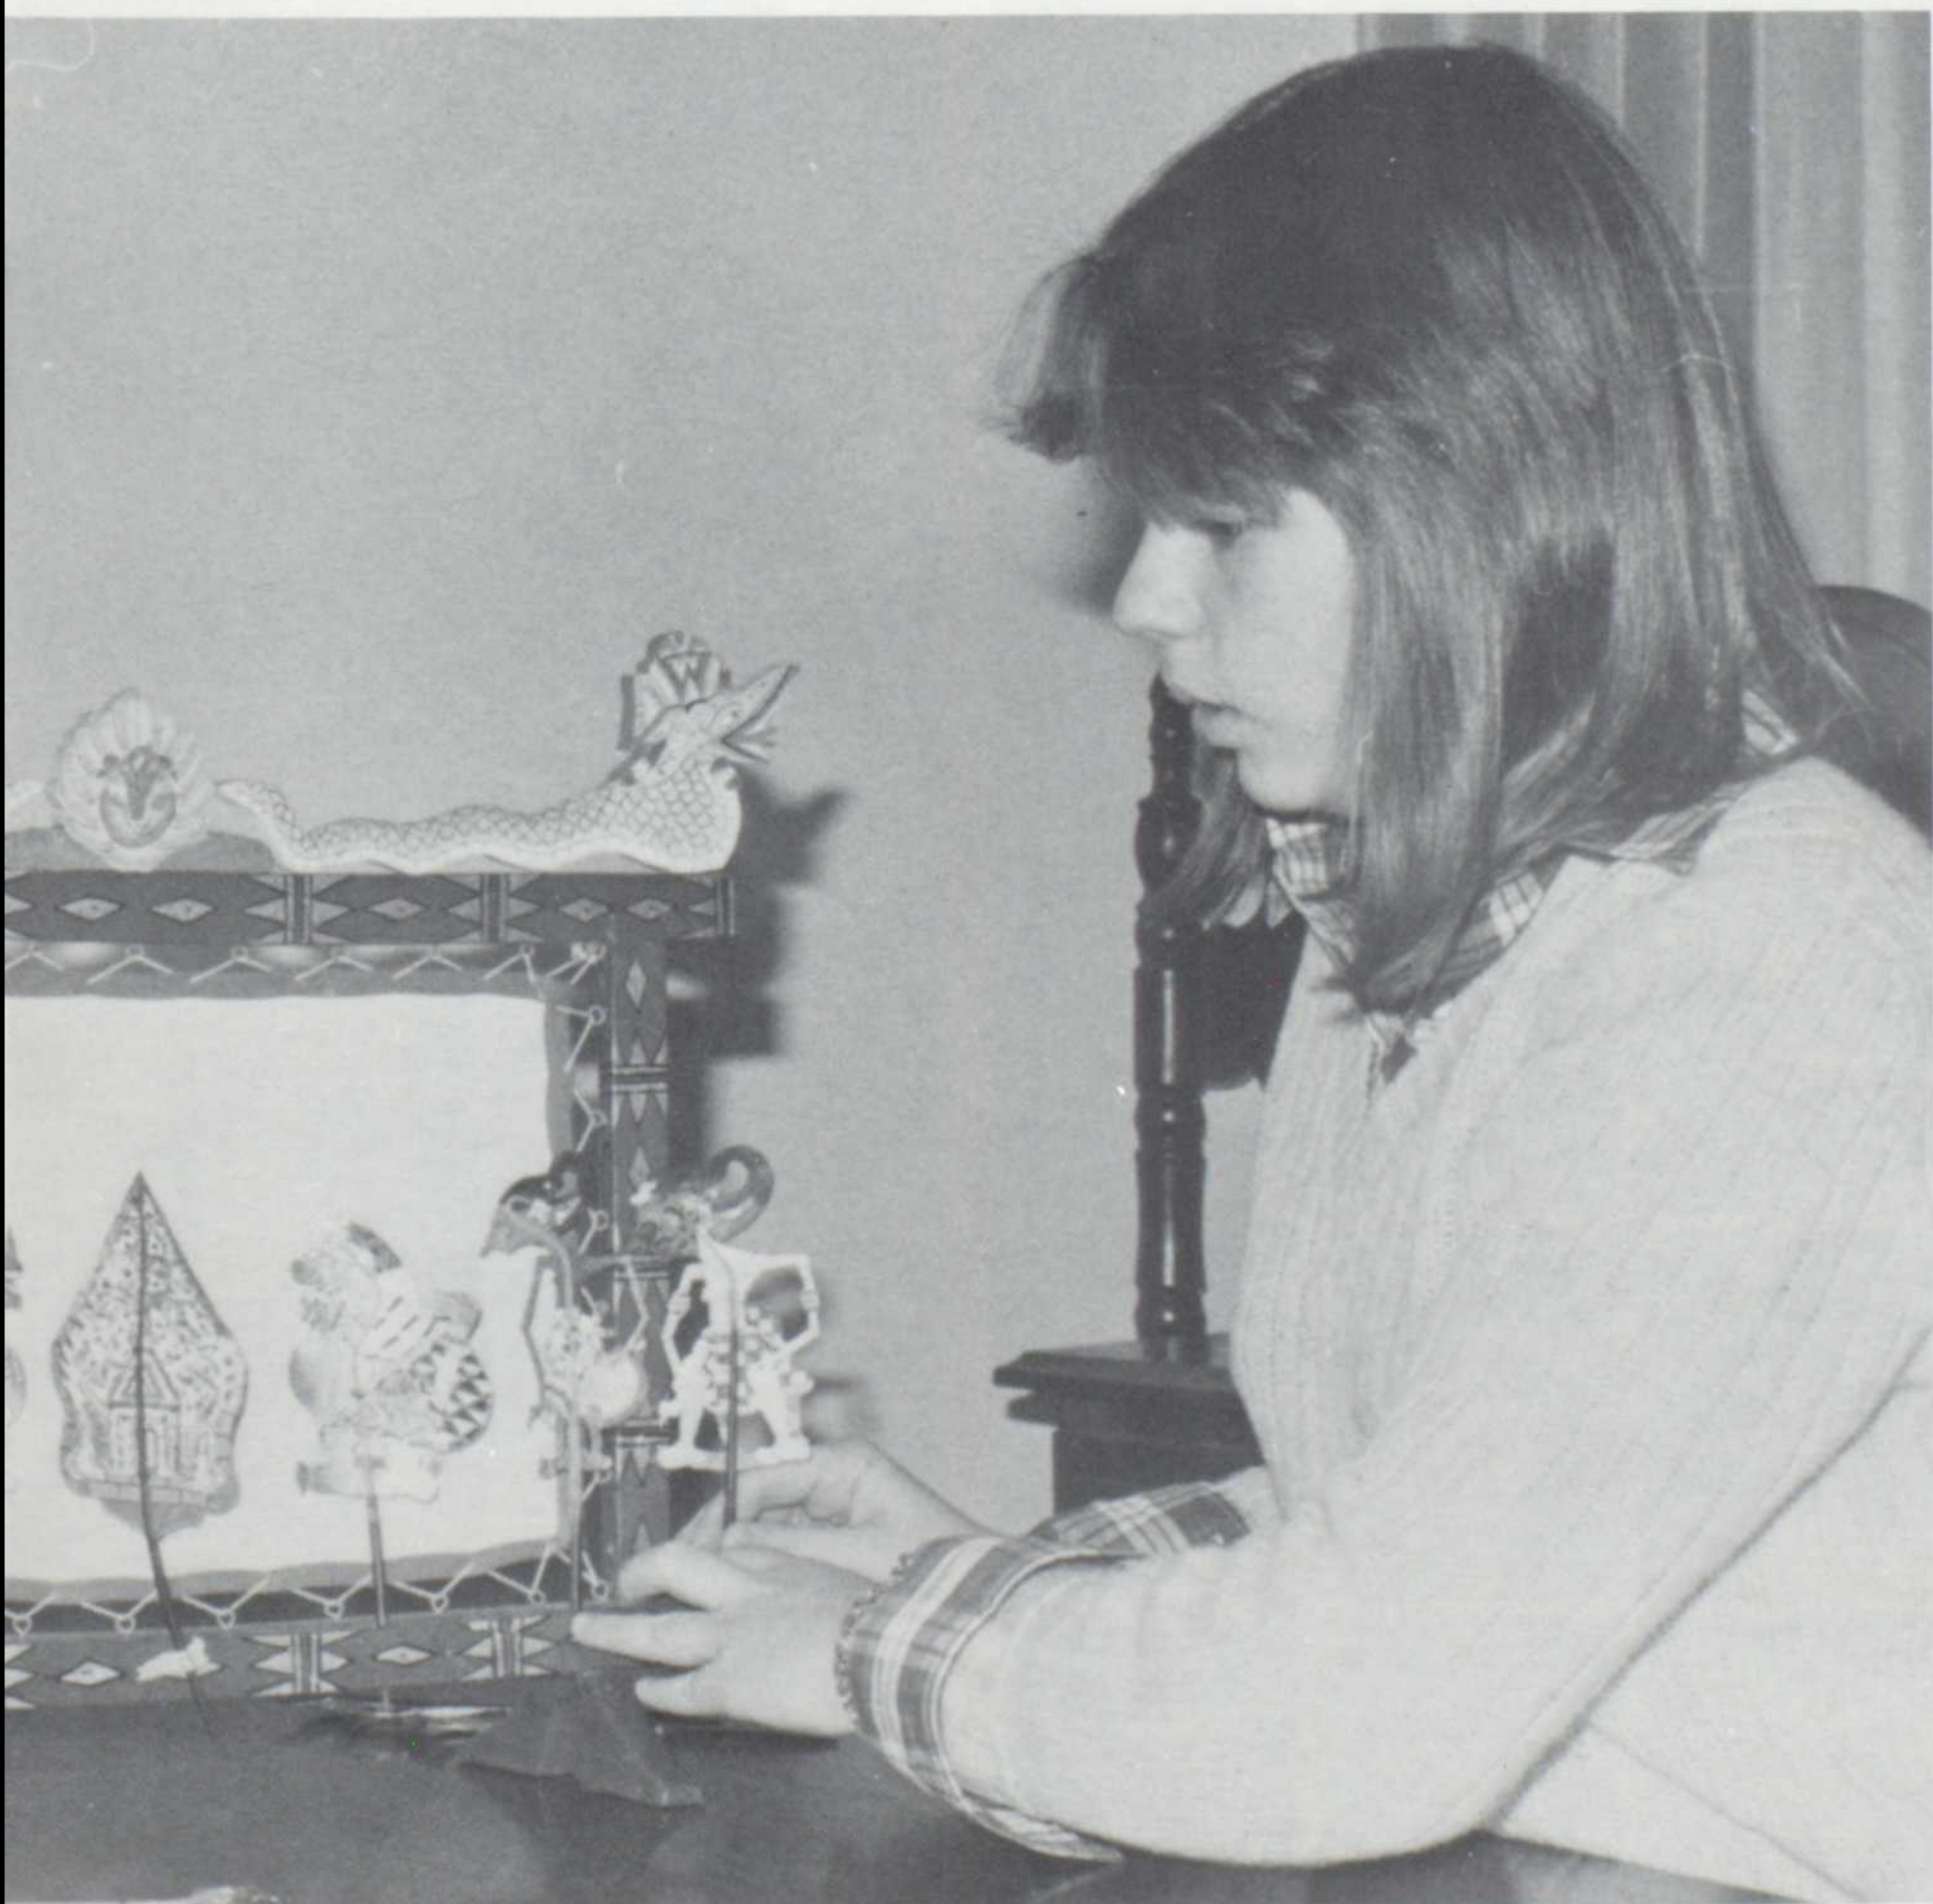

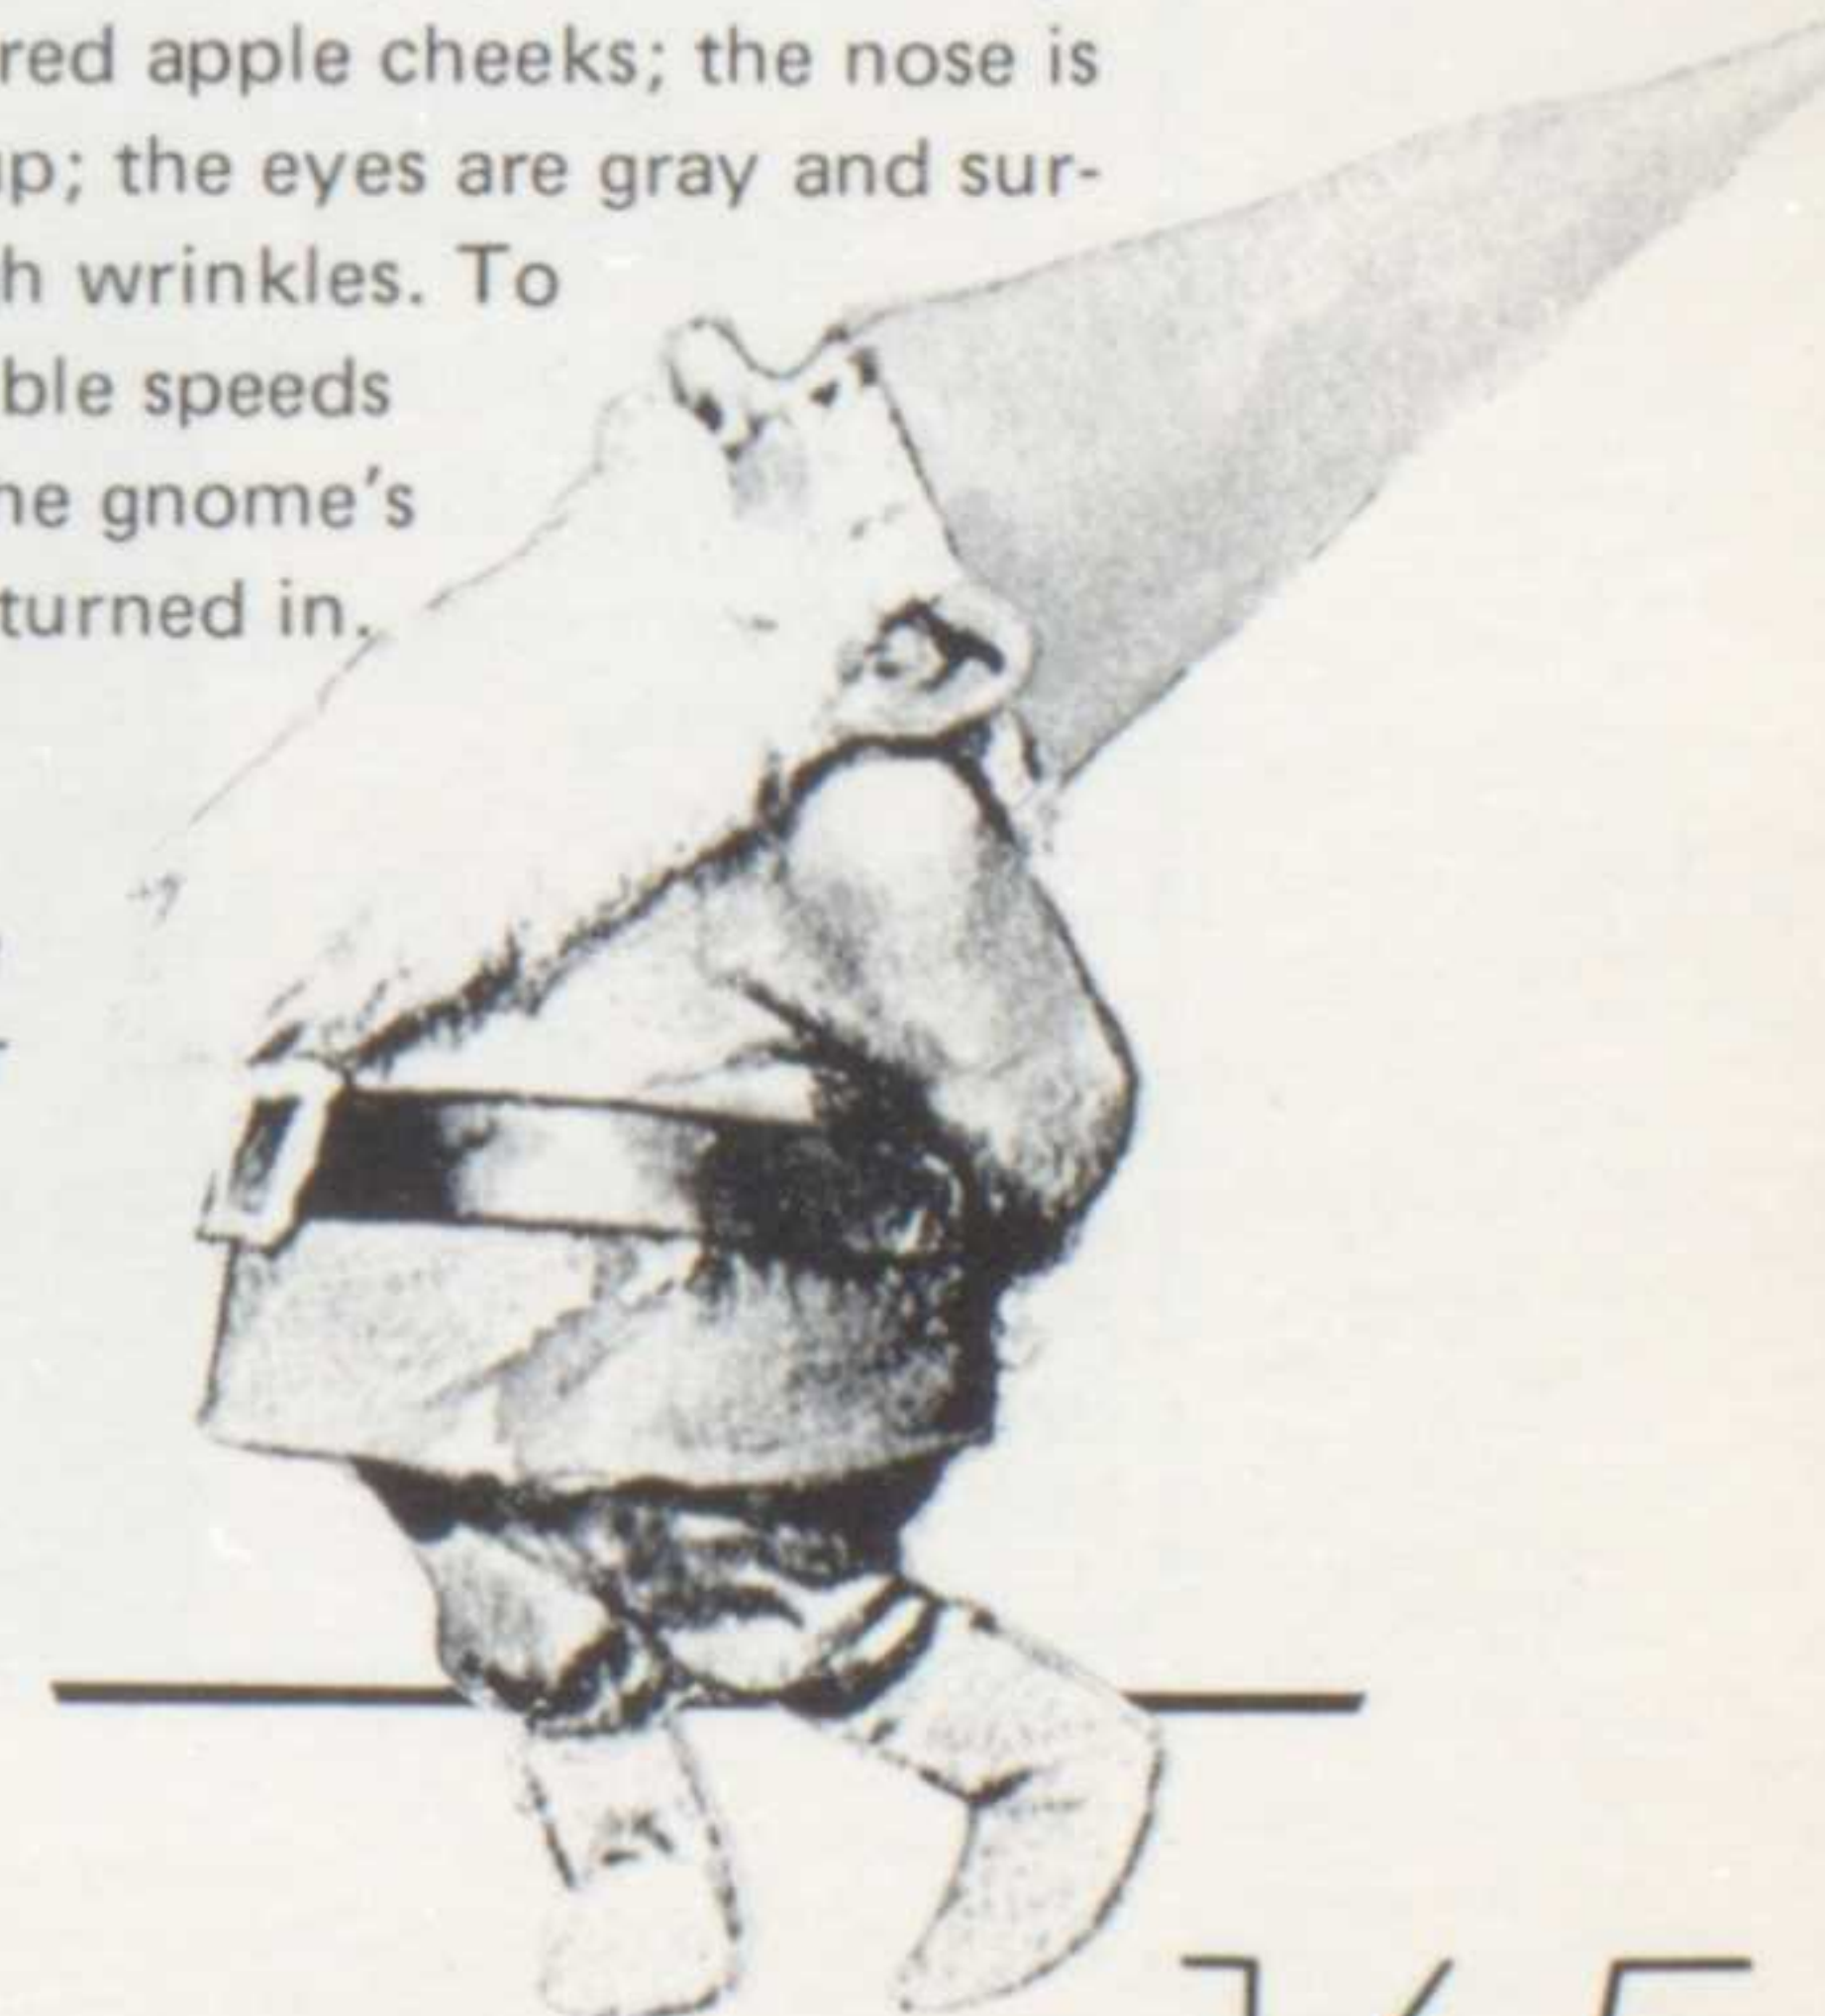

Are you bewildered by the presence of little people? Well, no more; gnomes exist. In fact, a whole book has been devoted to them. Its called GNOMES and was written by Wil Huygen and illustrated by Rien Poortuliet.

Gnomes are wee creatures, about 15cm. tall. They weigh between 275 and 300g.

There are male and female gnomes. (How else would there be gnome babies?) But, because of her dark gray attire, the female generally stays underground to avoid being captured by owls.

Gnomes generally look the same. The few variations are due to crossbreeding with trolls in primeval times. Anyway, gnome-coloring is fair, but with red apple cheeks; the nose is slightly turned up; the eyes are gray and surrounded by laugh wrinkles. To facilitate incredible speeds while running, the gnome's feet are slightly turned in.

And you thought those wee people were figments of your imagination.

## She spikes through thick and thin

Who says freshmen aren't good for anything? Mary Seed has certainly proved that theory wrong. She was the only freshman member of the varsity volleyball team this fall.

Mary has been playing volleyball since eighth grade. Someone suggested that she try out for the team, and she made it.

Since she is so short, and also the youngest member of the team, Mary often gets teased.

Her teammates call her "shrimp," "shortie," and "seedling," but nonetheless, she did her share of the work. She is a setter, which means she hits the ball into the air in the proper position for the girls in the front row to spike it over the net.

Mary also appreciated the spirit shown by the school this year. "I think more people came to the games than last year," Mary said, "and the cheering section really helped when we were behind."

Although the team's season was not outstanding, they are expecting great things in the future. "I had fun this year, and am looking forward to our S. W. C. championship next year." With that sort of attitude, they are sure to win.

**Although she stands only 4'10" tall, very short for a volleyball player, freshman Mary Seed returns the ball with precision during a practice session.**

—D. Khyrn

—D. Khyrn

## Wheeling right along

Have you ever gone to the circus and watched in terror as a unicyclist rolled slowly across the tightrope? Well, although they're not in the circus, freshmen Bob Brass and Carter Craft do ride unicycles.

Both Bob and Carter started riding within the past year. Carter bought his unicycle about eight months ago. A unicycle costs \$80 to \$90, almost as much as a regular bike. Fortunately, Bob's brother left one behind when he left for college.

**Perplexed basketball players** watch while freshmen Bob Brass and Carter Craft unicycle down the gym corridor.

Although it looks difficult, Bob said that learning to ride was not very complicated. "It wasn't very hard, I just had to try to go a little farther each time."

Carter agreed with him. "All you have to do is learn to balance correctly."

There are several problems, though. Riding can be dangerous, but neither boy has been hurt so far. "The dangerous part is that you don't have any brakes," Carter explained.

Isn't it ironic that we go from a three-wheeled tricycle to a two-wheeled bicycle to a one-wheeled unicycle? Ah, such is the cycle of life.

## Living right next door

Wouldn't it be nice not to have to eat the cafeteria food every day? Since freshman John Belles lives next door to the school, he can go home for lunch whenever he wants.

The advantages of this arrangement are obvious: he can sleep late in the morning, he never has to worry about parking at football games and if he forgets homework assignments, he can just go home and get them. Unfortunately, living next to the school is not as pleasant as it sounds. There is always lots of noise, especially during football games. In addition, people constantly pull in and out of their driveway.

So, while other people ask the teacher if they can go to their locker, John simply asks if he can run home.

**After digging a pathway** through the deep snowdrift, freshman John Belles has easy access to school from his house next door.

## Stamp collecting:

### The lick of the trade

When you get a letter, you probably open up the envelope and throw it away. To at least one person, freshman Dave Snyder, the stamp on that envelope is even more interesting than the letter.

Dave has a collection containing 50,000 stamps. He started the collection at age three after he saw his grandfather's stamps. That was twelve years ago; now he has stamps from every country in the world. His collection also contains every stamp issued in the United States since 1918.

The stamps are arranged in twenty-six books which he will someday pass on to his children. His collection is the most complete

in the Cleveland area, and is very valuable. His stamps come from friends and relatives, or are purchased in specialty shops.

It all sounds pretty good, except I'd hate to have to paste them in the books.

**Before starting work** on his collection, Dave Snyder peruses a new album. Stamp hinges mount the stamps on album pages.

—D. Khym

### A head above the rest

"Hey, how's the weather up there?" This commonly asked question is the bane of freshman Dave Sweet's existence.

Dave, who is 6' 2", is the tallest person in the freshman class, and he hasn't stopped growing yet. At this point, he is even taller than his father who is 6'.

Being tall sometimes causes problems for Dave. "I always hit my head on doors," he laughed. There are all sorts of advantages, too. He can always reach anything on top shelves, and can see above crowds.

Dave has grown four inches in the past year, so you can imagine the trouble he has buying clothes that fit. His shoe size is a 12 medium, and he wears a 34" inseam in pants.

So, if you need something from the topmost shelf, just ask the guy with his head in the clouds. He'll understand.

**Taller than even his father**, freshman Dave Sweet easily lights a high candle. Strangely enough, Dave's sister, Diane, measures only 5' tall.

## Candy Striper sweetens stay for patients

"Nurse, get me a bedpan!" This call of distress, not often heard in the halls of B.H.S., is quite a common sound to freshman Nancy Coffin. She, along with several other students, is a junior volunteer at Bayview Hospital. The girls are called

candy striper because they wear pink and white striped uniforms while on duty.

Nancy's duties include distributing mail, carrying water and meals, arranging flowers, and giving cheerful companionship to the patients.

The volunteers work from 4:00 P. M. to 8:00 P. M. one day a week. The hospital provides dinner for the workers. "The food is OK if you use lots of ketchup," Nancy said.

By the way, she doesn't really have to carry bedpans.

**Making sure not to damage** the roses, Nancy delivers them to a waiting patient. Altogether, the volunteers put in 2,629 hours of work in 1977.

-S. Teschner

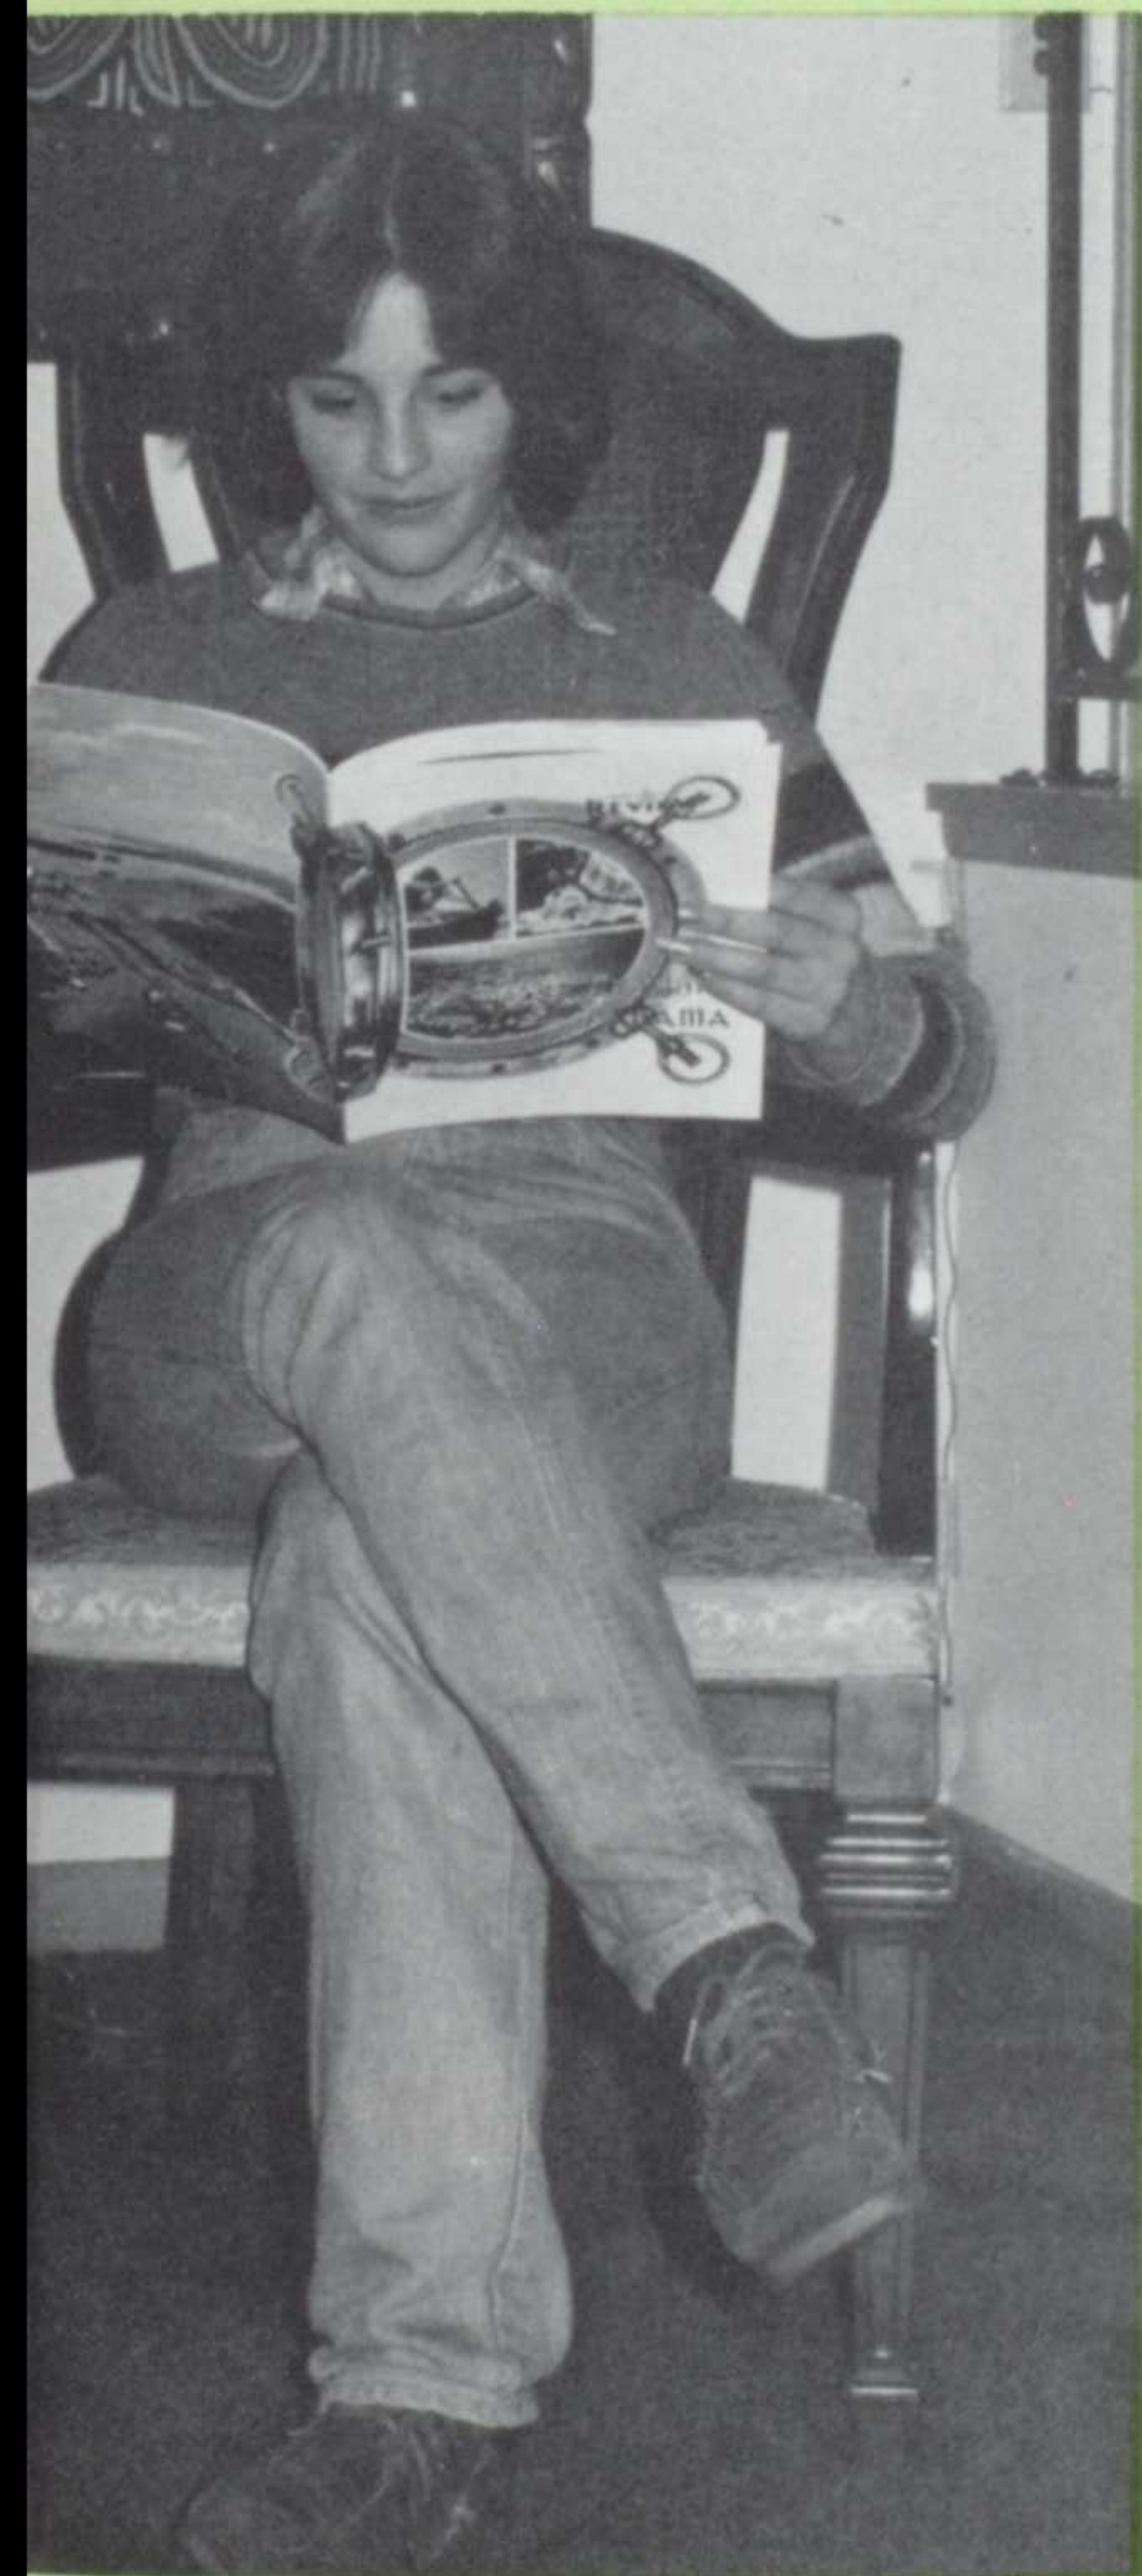

## At the top of the class

In this age of computers, it seems that everything is done in alphabetical order. Freshman Lisa Abad bears the brunt of all this alphabetization. Lisa's name, which is Spanish in origin, is the first on her class list, and also in the entire school. Such a situation has, of course, its own advantages and disadvantages. She always gets to sit in the front of the room and can see what is going on.

On the other hand, Lisa is often the first to give a report or project, and is sometimes confused about the assignment.

Oh well, maybe she'll marry someone named Zephyr.

**Since her name** also originated in Panama, Lisa Abad finds a pamphlet about her birthplace in South America extremely interesting.

-D. Khyrn

## Actress sets high goals

Stage fright, a disease common to high school students, is no problem for freshman Denise Bailey. She has learned to cope with such nervousness by becoming an actress.

Denise started acting when she was in the seventh grade. She has taken drama lessons at Huntington Playhouse, and been in several plays at the Middle School.

So, if you are a knock-kneed report giver, try talking to Denise. She'll know how to solve your problem.

**From the side** of the stage, Denise Bailey takes a turn prompting actors in the spring play, *Stage Door*.

-D. Khyrn

# Sophomores: Middle of the road originality

## Around Ohio in 80 days

"You're full of hot air!"  
"I hope so!"

To sail in a hot air balloon has been the dream of nearly everyone. Sophomore Sarah Slaman has had this dream become a reality. Sarah's father owns an enormous hot air balloon!

Why would anyone want to own something as large and expensive as a hot air balloon? "It's different," said Sarah. "Not many people have been in one, let alone owned one. It's just a very exciting thing to do."

Sarah's father bought the balloon about four years ago. He is part owner, sharing expenses with three other men. Usually Sarah and her family fly the balloon in the summer when the weather is calmest.

"It always depends on the weather. You can never make plans to go out in the balloon; it has to be a last minute decision," remarked Sarah.

"Sometimes we'll go across the highways and the cars will stop right in the middle of the road and watch us go by. It's really fun and it draws a lot of attention."

With the attention comes a way to make a little money off the balloon. The Slamans sell tether rides in the balloon. During the rides the balloon is tied securely to the ground.

"We've never had any real accidents," acknowledged Sarah. "I can think of one particular funny incident though. Once we were at a race in Michigan and my dad flew the balloon into a tree and really ripped it. We have a rule that whoever rips the balloon buys dinner for the whole ground crew. That day there were a lot of people and my dad had to spend about \$50."

"It's so much fun to have something so out of the ordinary," said Sarah. "I really love to fly!"

Early Saturday morning, Sarah Slaman and the crew prepare for a full day of flying in their hot air balloon.

# Tree-sitters monopolize world record

Who would be crazy enough to give up warm, homecooked meals, TV, parties, sleep, and everyday living for over two days? Sophomores Denny Hansen, Andy Van Nest, Kurt Kagels, Scott Ormsby, Fred Steiner, and senior Scott Johnson would and did as they sat up in a tree for 50

hours straight playing Monopoly.

Why did they do it? "It was for charity," explained Andy. The boys got sponsors for the WCLV Cleveland Symphony Orchestra Fund-raising Drive, by going door to door. They made a total of \$300.

Besides earning money for charity, the boys were trying to make a new entry to the *Guinness Book of World Records*. There is not any previous records in the *Guinness Book* in this field. They have had several practice runs, but 50 hrs. is the longest they have been in the tree.

The group tried to submit their record, but the *Guinness Book* would not accept it. "They insist on a

notice in advance, and we must have coverage by two medias," explained Denny.

During the 50 hrs., two people were in the tree at a time. They played for two hours and then had four hours rest. The games were played until they were completed.

"We were exhausted by the end of it all and were so glad when it was up. Next time we do it we'll let the *Guinness Book* know before hand." concluded Denny.

**Out of their tree?** Certainly not. In the hope of making an entry to the Guinness Book of World Records, Denny Hansen, Andy Van Nest, and Scott Ormsby play Monopoly in their tree.

# A model of success

—D. Khyrn

—D. Khyrn

Early in your life, modeling is confined to "Play Doh". However, as little girls grow up, they shift from modeling "Play Doh" to modeling as a career. Though still young, sophomore Jill Snyder is part of this exciting profession.

Jill's first modeling experience was for Halle's in the Seventeen Road Show. Seventeen Magazine Editors tour the state and organize the show with several stores, one of which is Halle's. Though the road show was for girls 18-21, Jill got in when she was 14.

So far Jill has modeled for Halle's, Higbee's, and the Press.

"I don't model too often," said Jill, "just every now and then when they have shows. I think it's good to be in front of people like that."

"I encourage all girls to try it," concluded Jill. "It's something all girls should experience at least once in their life."

**In preparation** for a modeling assignment for The Press, Jill Snyder practices showing off her clothes. She also models for Seventeen and Halles.

# Big, fat, beautiful hair

"Who's the kid with the hair?" all the students want to know when they get their first glimpse of sophomore Dave Messina. Afros aren't all that uncommon nowadays; in fact, one out of every forty kids has one.

It took Dave four years to grow his hair to its present length of six inches. "My dad doesn't like

**Fluffed up, Dave Messina's** "crowning glory" distinguishes him from his "flat" friends.

it", said Dave, "because I've got more hair than he does. My mom doesn't care, as long as it's clean."

Dave is proud of his afro and takes good care of it. He washes and dries it daily, and uses one of his five picks for fluffing it up. But when it gets humid outside, his locks go completely limp!

"My hair is super curly, and this is the only way it looks decent," remarked Dave. "Besides, I like it."

Middle of the road originality continued

# Brown bagging it each day

While most people throw away paper bags, sophomore Pam Scully has been collecting them for two years.

"It first started out as a joke," remarked Pam. "I received some nice bags around my birthday, and I did not want to throw them away."

Her first bag was from Geneva-on-the-Lake. This bag has a cat on it and says 'Hang in There Baby!'

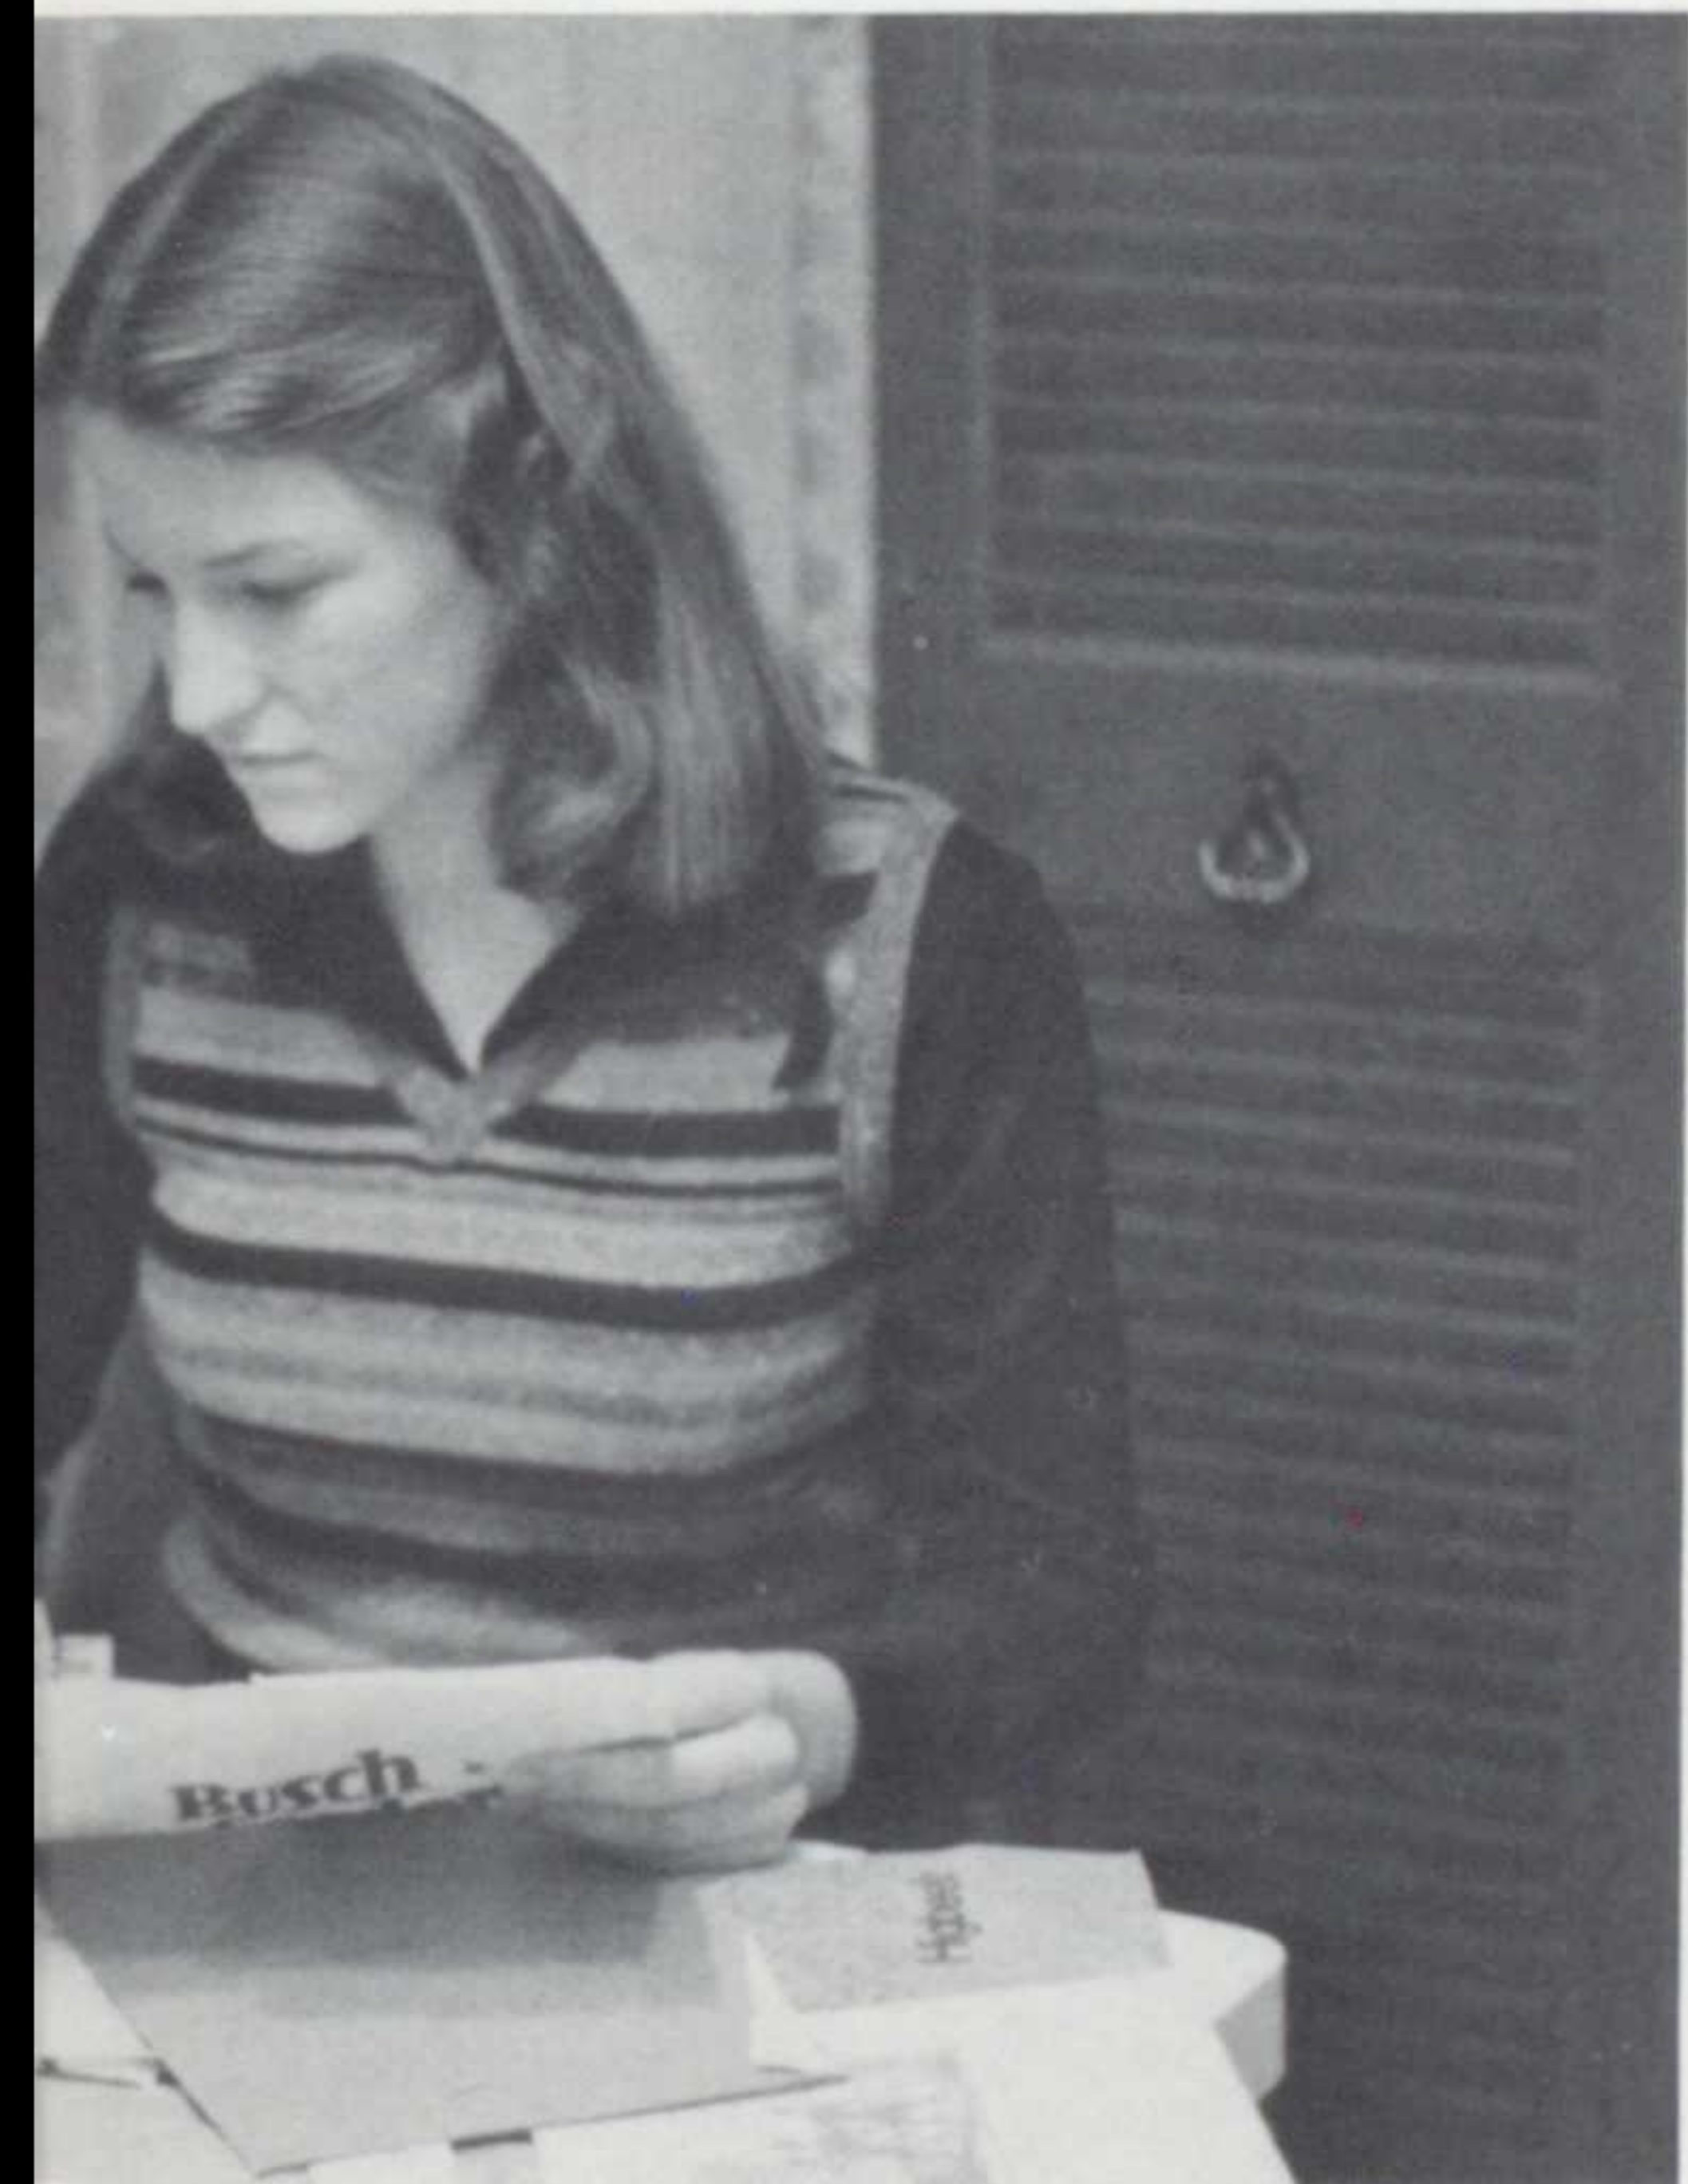

In her collection, Pam has bags

**With paper bags** from all over the world, Pam Scully searches for some from Mexico which she plans to use in a report.

from England, Canada, Mexico, France, Columbia, Washington D.C., and New Mexico. Her favorite bag is from Picadilly Circus. On the bag there is a picture of Picadilly Square, which Pam likes.

When Pam is picking up a new bag to add to her collection, she looks for certain things. Original designs and colorful motifs are the two basic requirements for a good bag. "My favorite are the original kind," remarked Pam.

So next time you start to throw away a bag, remember it could be a collector's item.

# Button up 256 times

"Button, button; whose got the button?"

Sophomore Margaret Sabol does. Margaret, in fact, has a collection of 256 antique buttons.

When asked how she got started on this unusual hobby, Margaret replied, "My grandmother got me hooked on it. I thought it was interesting. Buttons in the past were important to fashion styles."

Margaret said her buttons ranged from silver and brass to rocks and ivory. "These are not just little round things. There are trains, cameos, unicorns, and other things imprinted on the buttons," added

Margaret.

Most of the buttons were given to Margaret by her grandmother. The buttons range from 50 to 125 years old.

Margaret is also adding some new buttons to her collection. In 2077 these buttons will be antiques!

"I am planning on keeping up this hobby, and someday passing my collection on to my children and grandchildren. I hope they will keep it up also," concluded Margaret.

**Home with her antique button collection,** Margaret Sabol closely examines a new addition which is about 100 years old.

# Lend me a couple hundred ears

Getting your ears pierced is one of the country's latest fads. Most girls with pierced ears have anywhere from 10 to 40 pairs of earrings. Sophomore Angie Petrillo, though, has 99 different pairs of earrings.

"I was given many for my birthday, and I also bought several multi-

packs," explained Angie.

Two of Angie's sisters also have their ears pierced. The three girls share 40 pairs between them.

"It's fun being the youngest, because I like sharing things as earrings with my older sisters," said Angie.

Angie concluded, "Earrings are fun to wear, and I like having so many because I can always find a pair to match my outfit."

**After searching through her 99 pairs of earrings,** Angie Petrillo finally finds her favorite duo of gold hoops misplaced on her back porch.

# Practice makes perfect

It is possible that in a few years sophomore Lindsay Yount will be competing in the Olympics. She is a dedicated gymnast and has already participated in state competition three times. In each trip, she has done very well.

Lindsay started gymnastics several years ago. She first took lessons at the Lakewood YWCA, and then completed her training at Bodner Bell.

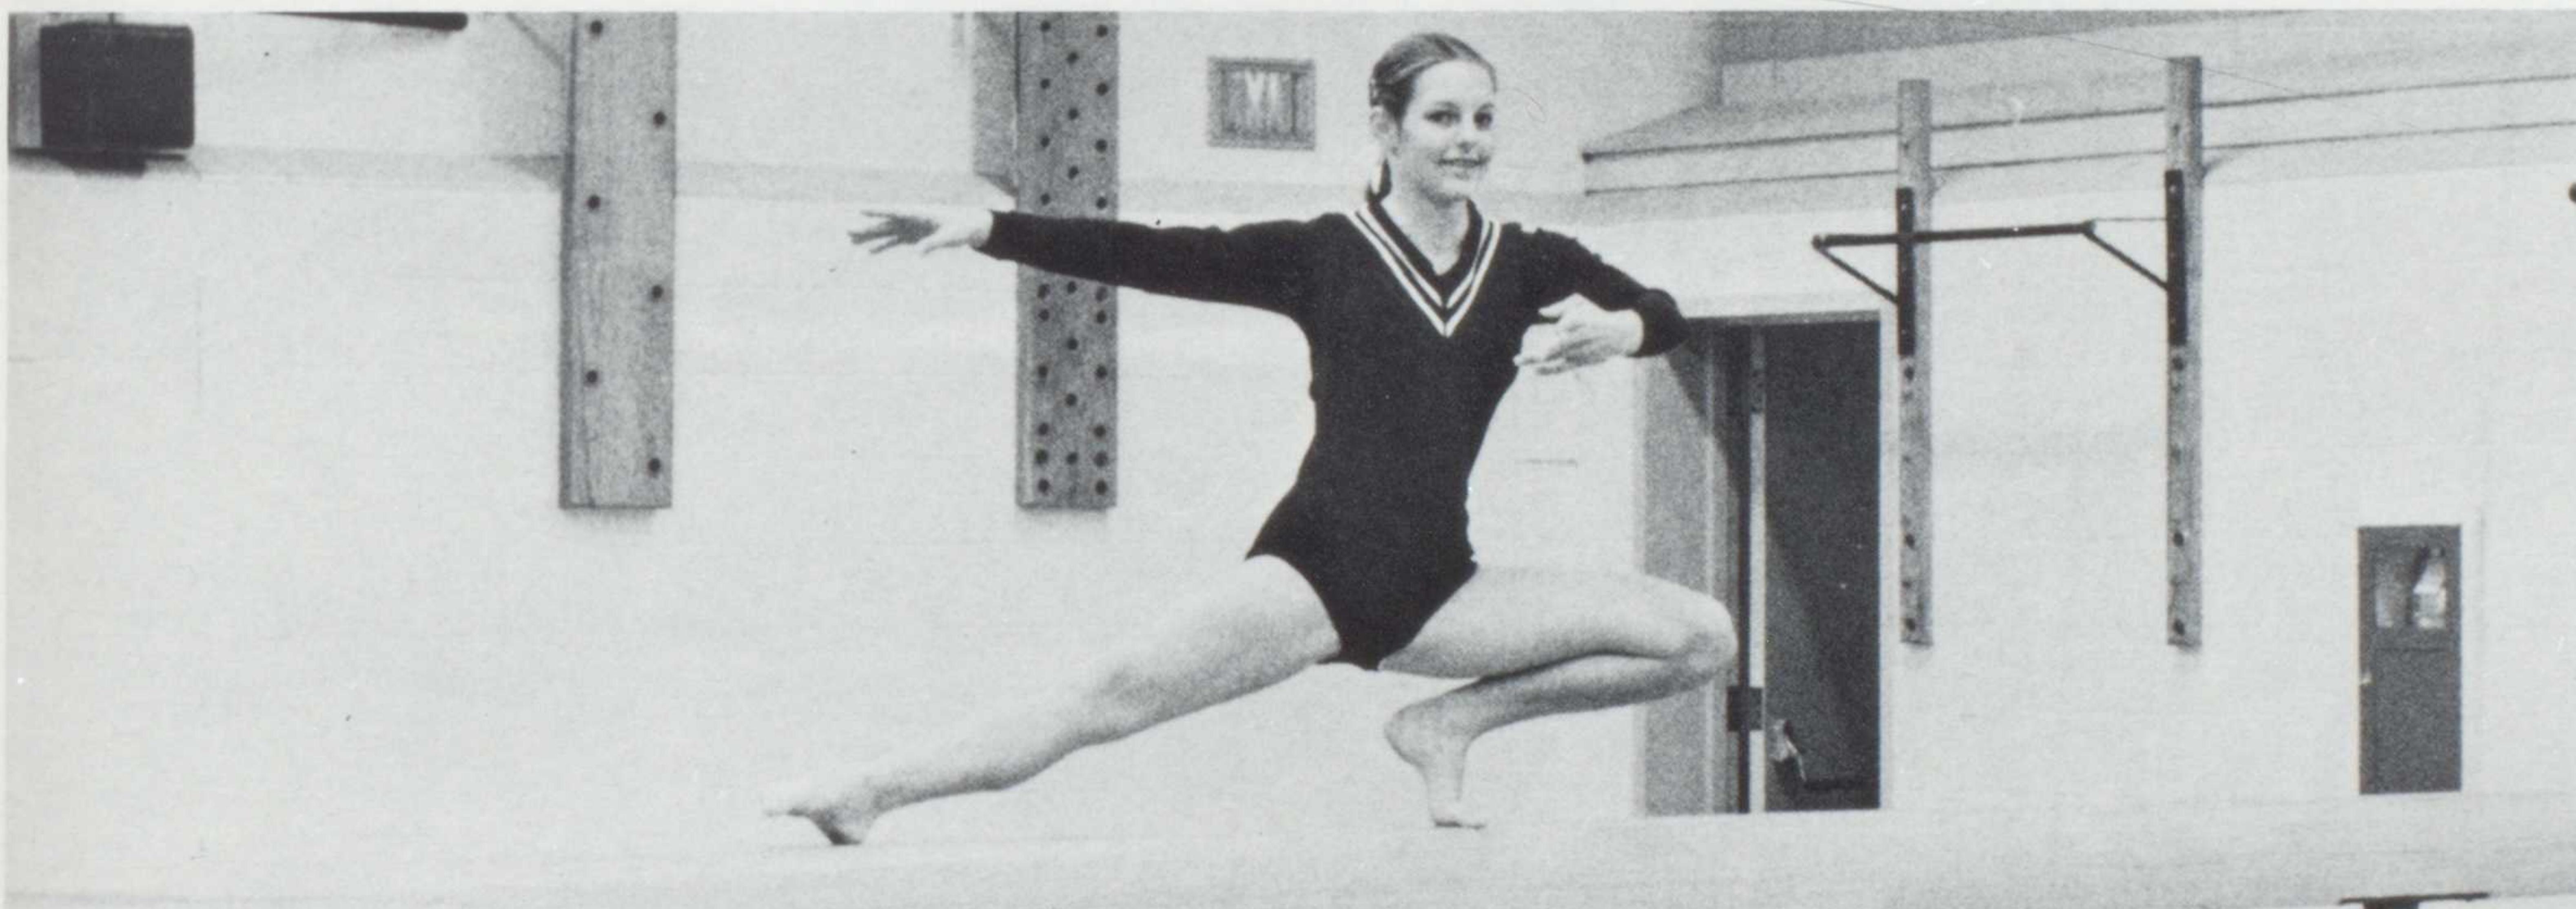

"My first competitions," said Lindsay, "were in the Junior Olympics, when I was ten years old. I went to State for the first time when I was twelve."

Most often, Lindsay competes in the bars, beam, floor exercises, and the vault. "Beam and bars are my strongest areas," she said.

"You have to be really dedicated to gymnastics if you want to be good. I work out twice a week for three hours at a time. That really cuts down on my social life," stated Lindsay.

She concluded, "Gymnastics is hard work, but very worthwhile."

**At an after-school** gymnastics practice, Lindsay Yount perfects the beam routine that she uses each meet.

# Sock hop 365 days a year

**In the morning**, Sue Grimes searches endlessly through her socks to find a pair that matches the outfit she wears.

"Sock it to me" is not just an old "Laugh In" expression. Imagine waking up in the morning and finding that you have to choose your day's socks out of a collection of 140. Sophomore Sue Grimes wakes up to this dilemma every morning.

"I got my socks at different stores and for gifts. I love socks!" stated Sue.

Sue's socks fill up three drawers in her bedroom dresser. "I have one pair to go with every outfit," said Sue.

With 140 pairs of socks, it would seem easy to lose a pair or two, and not notice they were gone. "I always know when a pair is missing," answered Sue.

Sue has been saving her socks since sixth grade. "I mend all my socks, so I can still wear them," said Sue.

Sue concluded, "I like all kinds of socks, in any color. They are good to collect because they are inexpensive and are definitely things I can use."

—D. Khym

# Angels we have heard on high

Has music ever lead you to meeting a famous dignitary? For sophomore Sarah Stinchomb it has. Sarah is a Singing Angel and she has sung with the group before several important people.

The last dignitary she sang for was Prince Charles of England. "I was very nervous," Sarah said, "because he is supposed to be the world's most eligible bachelor. I just stood there and couldn't move or say anything to him."

To become a Singing Angel, Sarah had to go and try out by singing a song for a selection board. The board then lets the person know if they made it in ten days. Sarah found out in three days that she had made it.

"You spend your first year as an apprentice. The apprentices learn all the performing group's music, so that when they move into the performing group, they will know all the music."

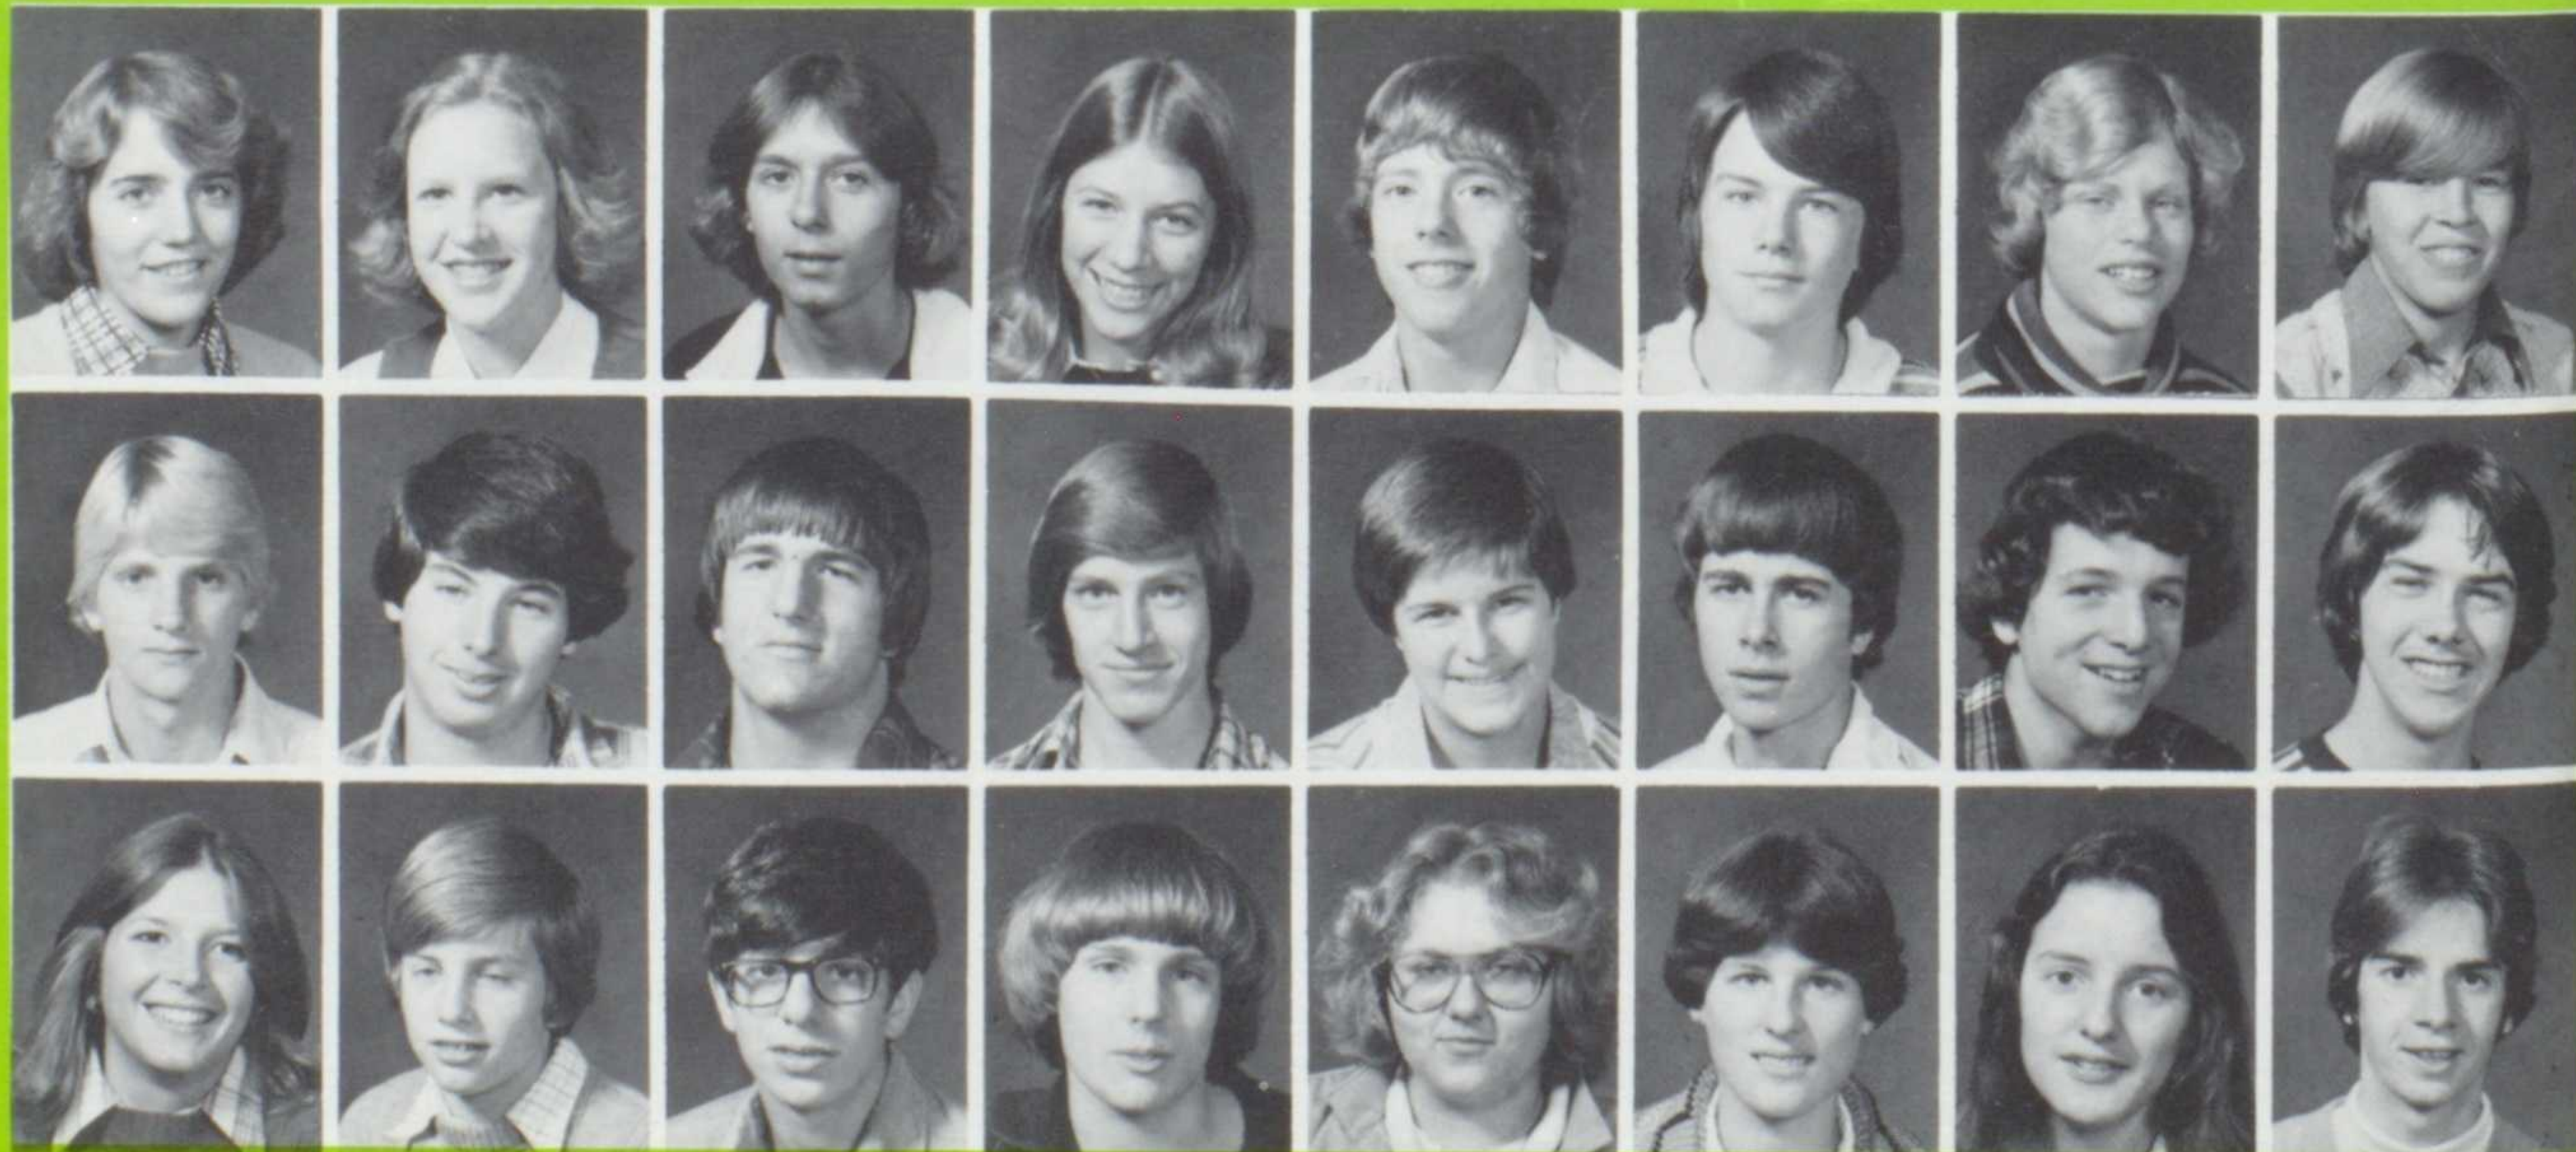

Though hard work, Sarah felt singing with the Angels is a great experience.

## Have suitcase, will travel

Everyone has a craving for travel, but few ever have the chance to visit the place of their dreams. Sophomore Laura Purdum has had the opportunity over the past four years to travel extensively to countries of her dreams.

Included in her travels are most of the 50 states, South America, Mexico, Canada, Jamaica, Nassau, Virgin Islands, Puerto Rico, Caracas, Bermuda, and Martinique.

"I liked Hawaii and Jamaica

the best," stated Laura. "The weather was fantastic and the people were very friendly."

Laura traveled with 13 members of her family to all these places.

"I hope to go to Australia in the future, and I want to keep on traveling as much as I can," concluded Laura.

**That Barbados beat!** Laura Purdum examines a metal drum from Barbados. She bought it while visiting the island with her family.

# It's Greek

The closest most people get to being "Greek" is to join a fraternity or sorority in college. Sophomore Bobbie Pournaras, though, is all Greek. Many of her relatives live in Greece, and the Pournaras family has made several visits to their homeland. When Bobbie was in third grade she took lessons in the Greek language and can now

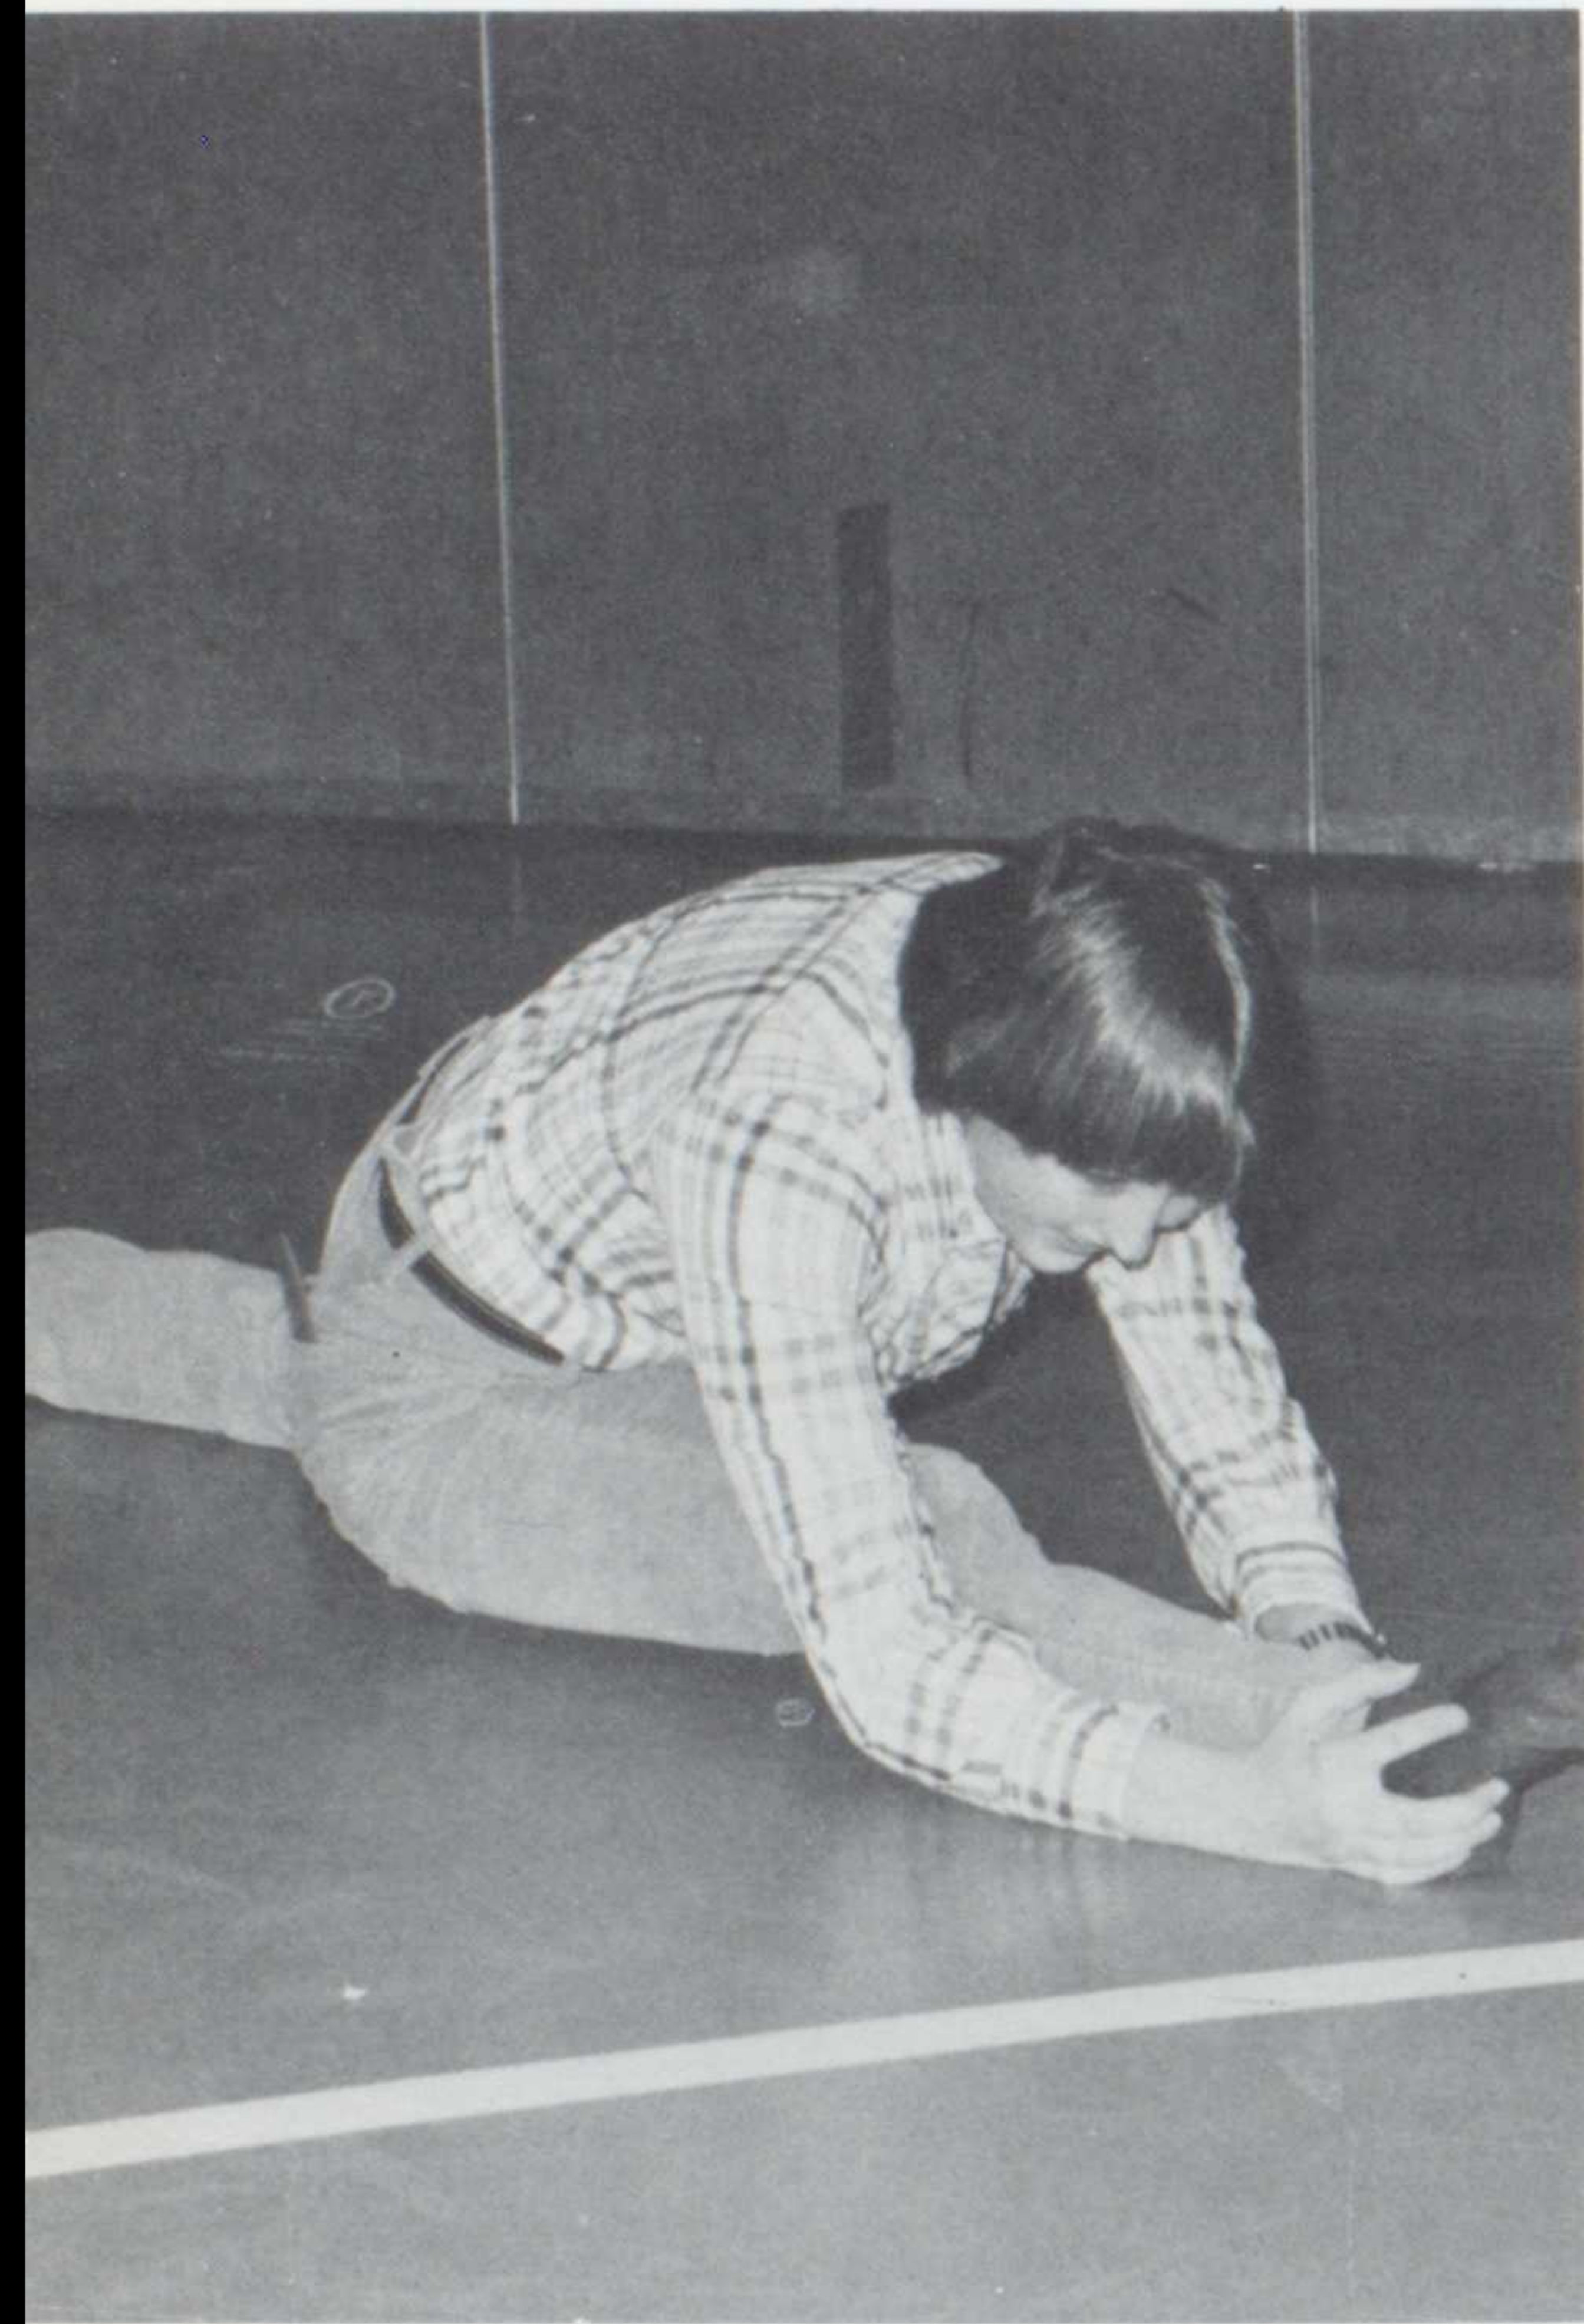

# Skating: good for the figure

Last winter most people watched Dorothy Hamill in the Olympics and wished they could figure skate too. Sophomore Alison Thomas was not in that position, since she already knew the rudiments of the art.

Alison has been skating most of her life. Two years ago, she started taking figure skating and ice dancing lessons. She now spends six hours a week at her lessons and many more hours practicing.

"I have made many friends at the rink," remarked Alison, "and I have also had a lot of fun." All the other members of her family skate, so don't be surprised if you hear about Alison or one of her sisters competing in the 1980 Olympics.

**In anticipation of the long hours** of practice, Alison Thomas warms up. Alison also knows how to ski.

# to all of us

Speak it fairly well.

While most people are just now trying to learn about their own "roots", Bobbie and her family are already quite familiar with theirs.

**Greek pastry, known as Bahklava,** augments any traditional Greek meal. Bobbie Pournaras shares her delicacy with friend Ann Moss.

—D. Khyrn

—D. Khyrn

**Invisible dogs show up** very seldom nowadays, and Tammy Lisy's dog has a hard time understanding it. Mr. Lisy uses the act in his show.

# Middle of the road originality

continued

# A look under the big top

Sophomore Tammy Lisy sometimes wishes that her dad would stop "clowning around". Actually, her father is a professional clown.

Mr. Lisy began as a clown with the Knights of Columbus. Now he works with the Grotto Circus. When Tammy was small, she also became a clown with her father. He would make her up and they would both perform in parades downtown.

"Being a clown is really interesting," Tammy said. "I love to make people smile."

For Tammy, the song "Send in the Clowns" is special.

## Reserve your fun early

Do you ever get tired of sitting around Bay Village all summer? Sophomores Betsy Hall, Carla Campbell and Carol Sullivan found a way to solve the problem. During the summer of '76 they went on a workcamp to an Indian Reservation in New Mexico. Freshman Nancy Coffin, Bay High alumnus Paul Bauer and Reverend Woodruff accompanied them.

At the Navaho reservation, the group painted dormitory rooms at the school on the reservation, and fixed some old furniture. They even built a porch onto one building that was in very poor condition.

The best part of the trip, they all agreed, was that they learned how to have fun and be helpful at the same time.

**Exchanging pictures of** their Navaho trip, Carol Sullivan, Betsy Hall, and Carla Campbell reminisce in the LRC.

## Stringing up a tune

The only thing most BHS students have known how to do since second grade is read. Sophomore Tim Horner, though, has played the violin for almost that long.

Tim now plays in the orchestra and he also plays with the Youth Orchestra of the Cleveland Institute of Music, with whom he hopes to continue.

Think how good he'll be in the future if he continues playing!

**In the solitude** of the bandroom, sophomore Tim Horner stretches to fourth position to play a passage from Bach's "Fugue in G Minor."

# Juniors: Year of expanding

## Have a piece of Pi

Although he looks like an ordinary student, junior Skip Teschner has some very astounding talents. He has memorized pi to 121 places. Pi is the circumference of a circle divided by its diameter, as every math student knows.

"To memorize it," he said, "you just repeat it over and over again." He can say it in 17 seconds, and also knows it in Korean.

By the way, pi is 3.1415926535 8793238..4..6...2. . .

Oh, well, if you want to know the rest, go ask Skip.

—S. Ormsby

**The Lore of Large Numbers** provides Skip with the square roots of 2 and three, which he can type to 15 places.

## Rest in peace every night

Many teachers give students extra credit for projects which they make outside of class. Not many students, though, get quite as involved as junior Tom Reynolds. He built a coffin for his Death Perspectives class.

The coffin, which is over seven feet long, only cost five dollars to build. Built in his basement last October, the coffin is made of plywood and lined with a lively plaid.

On Halloween, he lay in the coffin to pass out candy. He dressed up like Dracula; it was a huge success.

**Procrastinators pop up** everywhere, but junior Tom Reynolds does not believe in waiting until the last minute.

The coffin is large enough to sleep in, which Tom does on occasion. Has anyone read Poe's "Premature Burial" lately?

## Time to move over, Rover

Nearly every American household has a pet or two. Most homes have a dog or cat, and perhaps some goldfish or even some mice. Junior Mike Farhart has both mice and goldfish. He feeds the mice to his boa constrictor, and his goldfish make a delicious meal for his pet piranha.

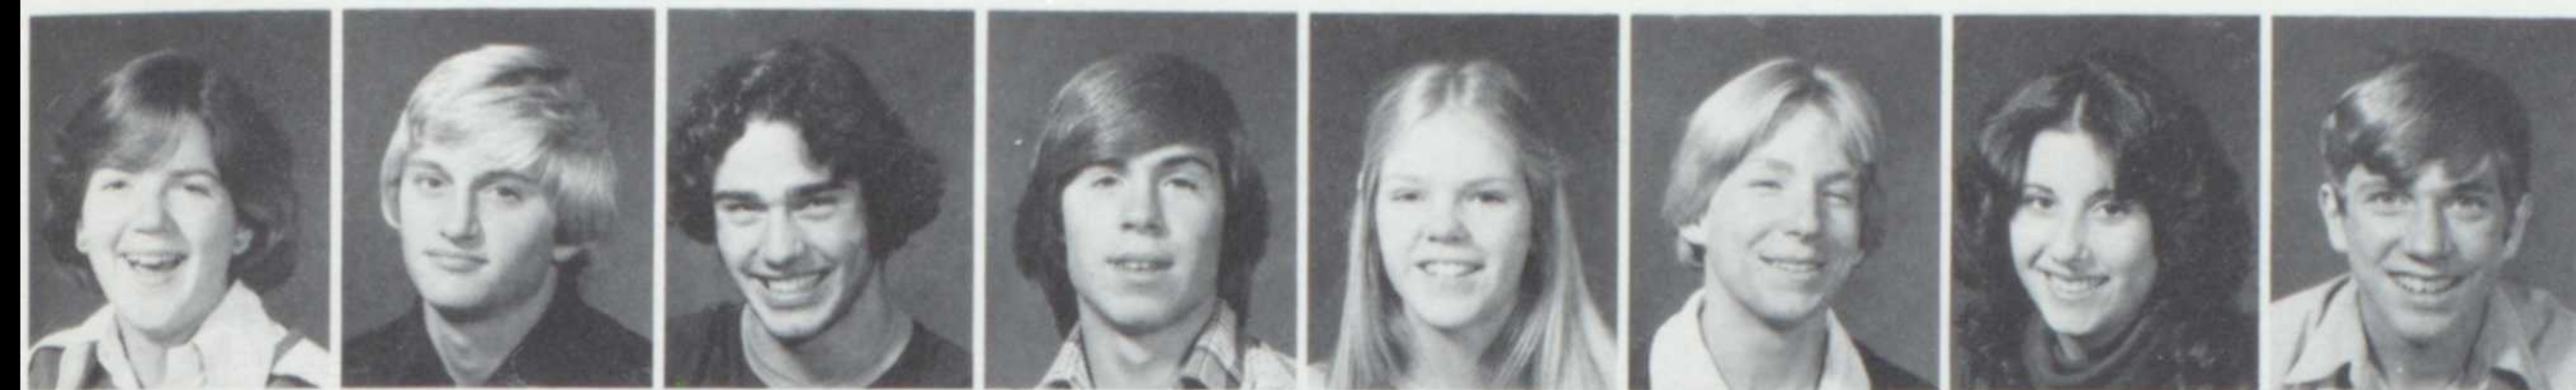

As previously mentioned, his boa eats mice. To feed them to his six foot long reptile, he puts the mice into a paper sack and raps it on the floor. When the mice die, his boa has a feast.

In another part of the house,

a vicious-looking piranha swims around in a glass aquarium. It feeds only upon goldfish. "When he was smaller," Mike said, "the goldfish were just as big as he was. He could only get it in halves, and there would be blood all over the tank."

So, should you ever want to take a gory trip down the Amazon River, save yourself some money and go to Mike Farhart's house instead!

**In order to avoid** a bloody scene, Mike Farhart must keep a wary eye on both his pets. Snake meat makes a delightful meal for a hungry piranha.

## The sky's the limit with MM Co.

The flame of the once-alive Christmas tree grew to a tremendous height as the hero, John Coleman, ski-jumped over 35 sleds aligned in a barricade. He was escaping from the evil Johann Funn and his daughter Lotta Funn.

This was just the opening scene from the new Mediocre Movies film, "A Spy Story".

The people who were responsible for the antics in the movie company's previous flicks, "Pyro" and "Stygian Island", were Doug Crowe and Jeff Tiefermann. They were the writers, directors, producers, and stars of all three films.

In the new film, Doug played the hero James Coleman, and Jeff played the millionaire super-bad guy, Johann Funn.

Other members of the Mediocre Movies (MM Co.) company were Mike

Von Glahn, John Davis, Dale Pulver, Skip Teschner, and Steve Ellison. Scott Totten made a cameo appearance. The marching band helped with the ski-chase and pie fight scenes. Even band director, Mr. Doug Day, performed the feat of crashing through a billboard on a motorcycle.

The film made its debut at band camp in August, and was shown sometime during the school year.

Several of the unique effects used in the film were the pie fights, a real robot, and the blowing up of a car.

So, the next time you are walking by the auditorium, be sure you don't look up. If Jeff and his friends are on the roof filming, you never know what may come flying over the edge.

**His entire life** flashing before his eyes, Doug Crowe pleads with villain Jeff Tiefermann to spare him. Doug finally managed to escape unharmed.

**In a scene** from the movie "A Spy Story", four ruthless criminals attempt to escape from the hero while Dale Pulver operates the camera.

## Cross country runs in the family

Most people at B.H.S. can hardly make it through the 12 minute walk-run every nine weeks. Not so with juniors Brigid, Mary and Chip Nilges. All three run cross country, and to them, running the 12 minute is nothing new.

Chip started running in seventh grade. His sister Mary joined him, and soon after came their cousin.

"I thought it would be a fun thing to do, so I tried it," explained Mary. "Birge and I were hurdlers at first."

Although Mary had "gimpy" knees this year and could not run, she has been on the team in years past. The boys and girls teams run separately, but each team runs 5-10 miles, three times a week.

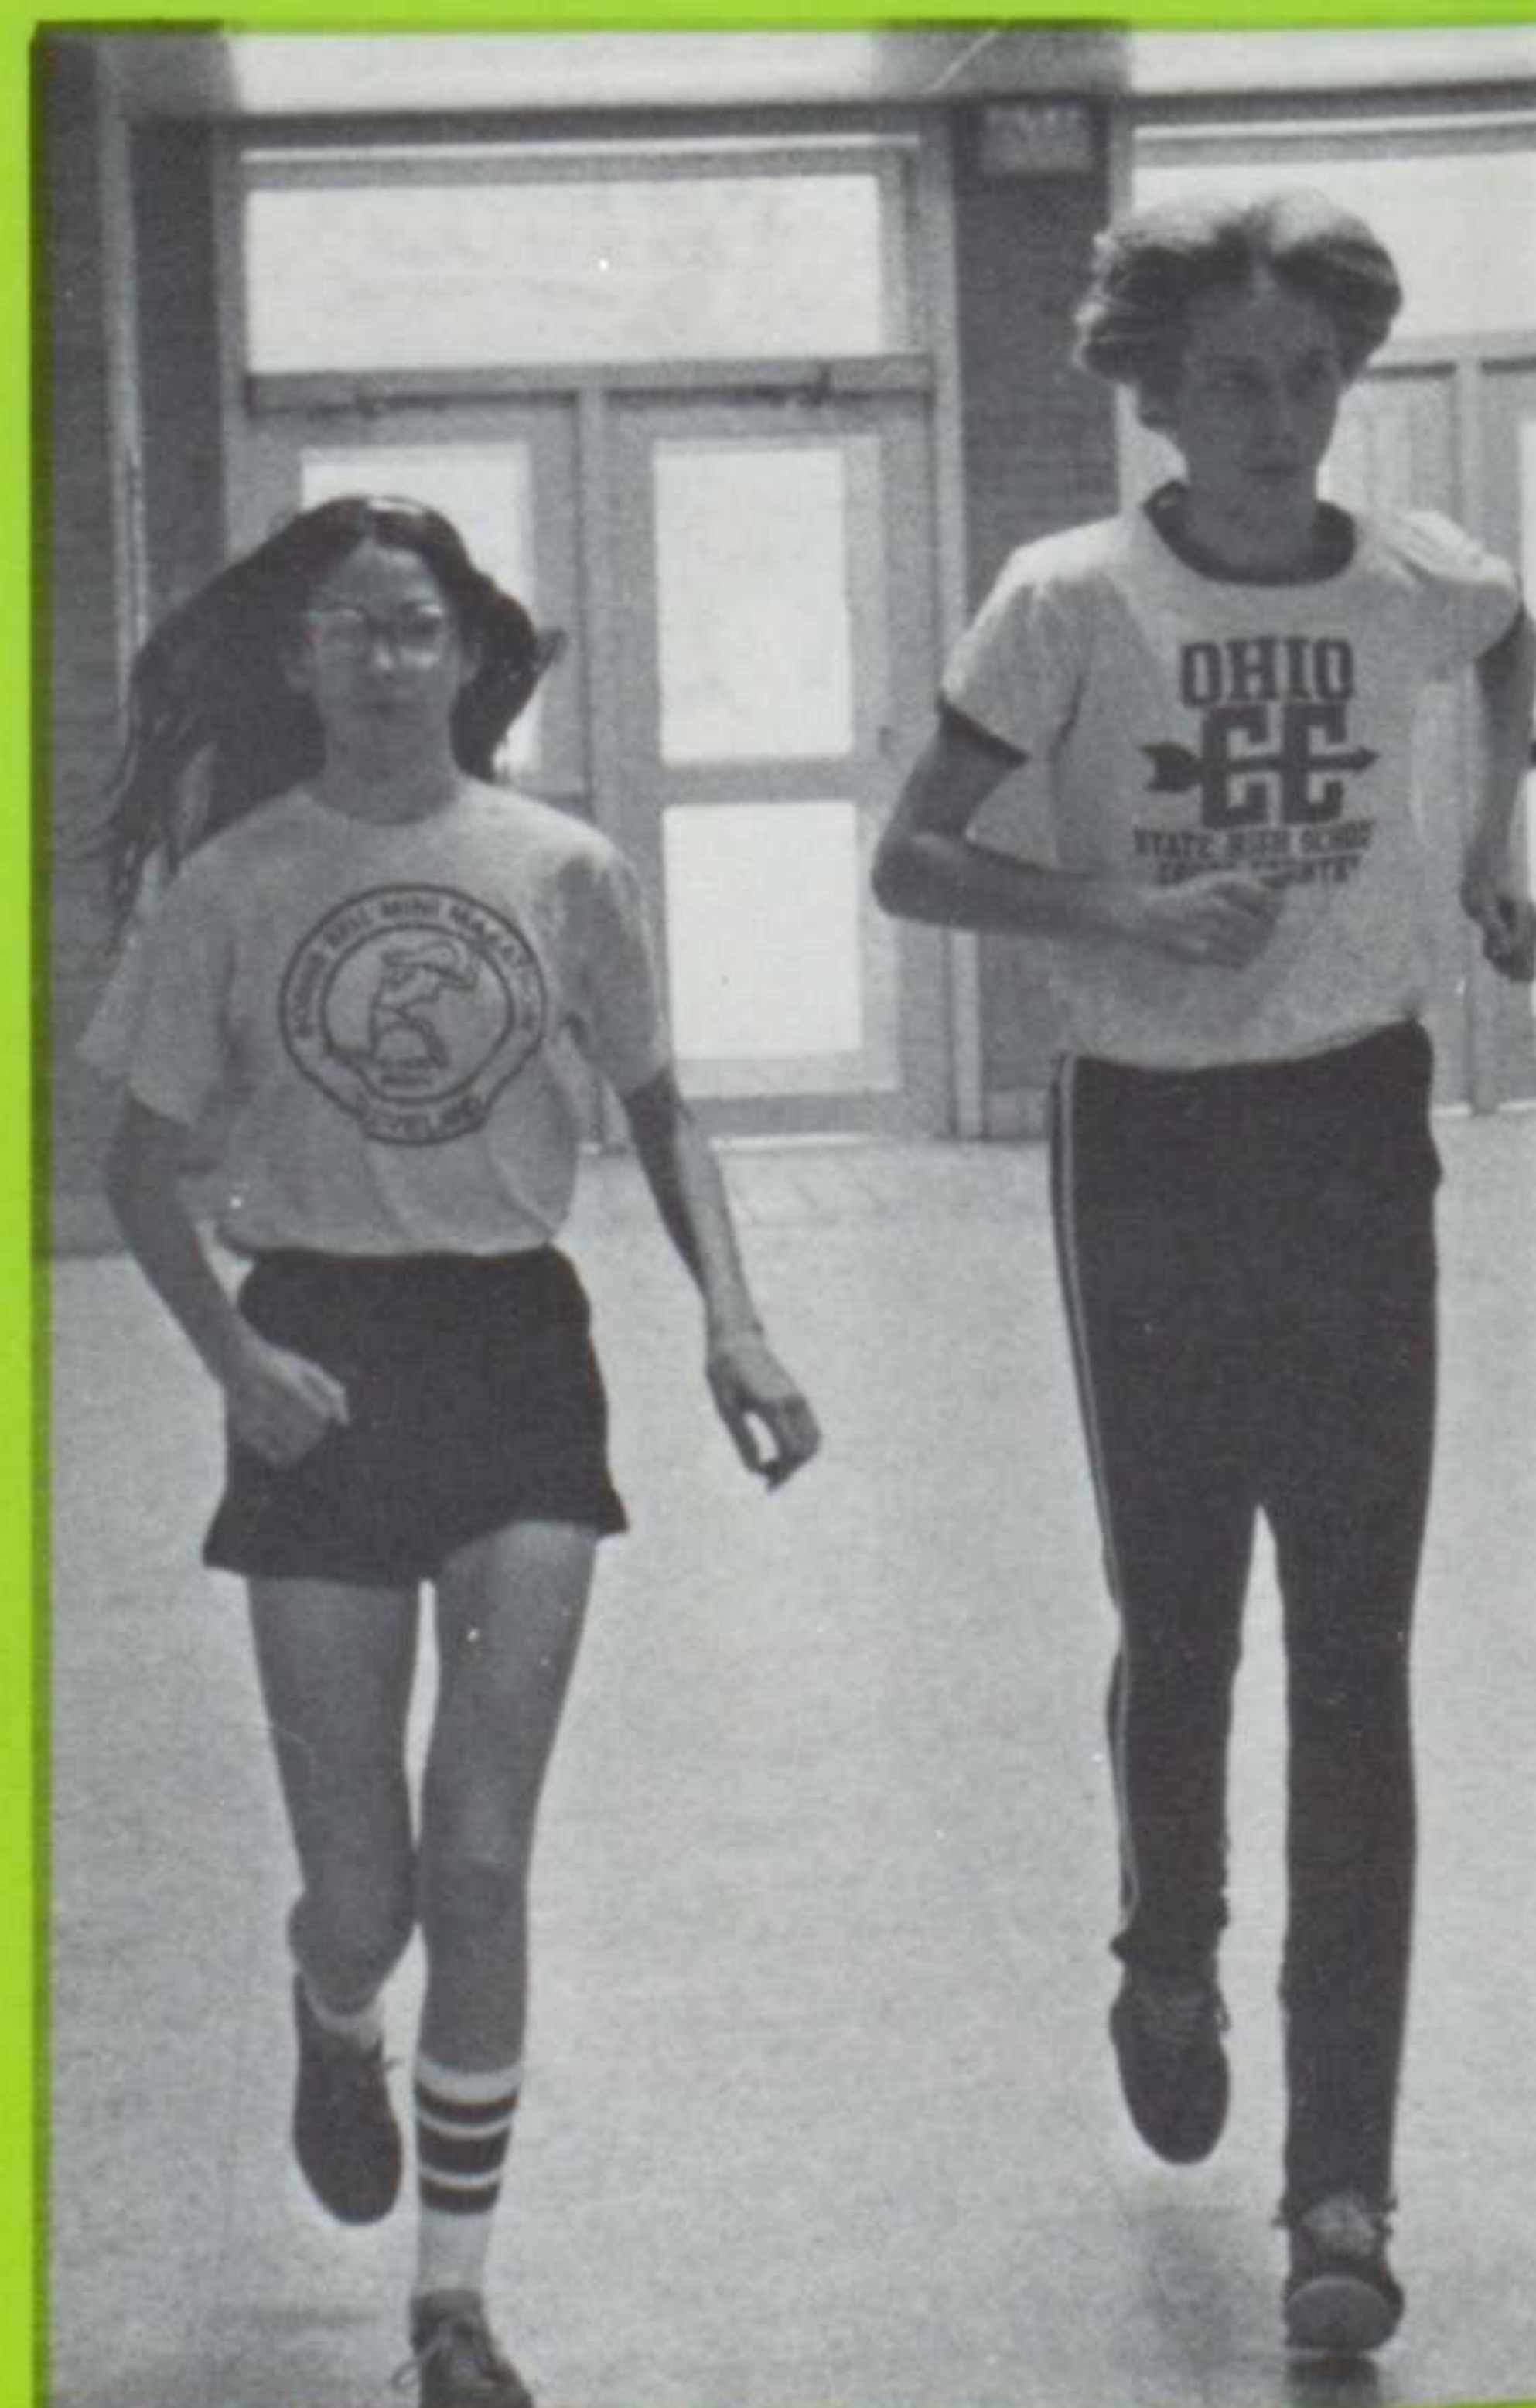

There is, of course, competition between the three. "That's what it is, trying to do better than each other, no

matter if it's your brother or cousin or a stranger that you're running against." Mary said.

The Nilges' make a rather spectacular trio if all three compete in a meet together. "When both the girls and the boys teams run in a meet, sometimes all of us win something. Then when the places are announced and there are three Nilges' in a row; we get a lot of attention." Chip said.

Brigid just about summed up the whole experience. "You don't remember the bad things, just the good. It makes it all worthwhile."

**To avoid cramped muscles** while running their usual 5-10 miles, Brigid, Mary and Chip Nilges warm up at school.

## Engine, engine, No. 9

Remember watching the model trains in the toyshop windows of long-ago Christmases? Junior Jeff Field has his own model railroad. He became involved in the hobby because his dad works for a railroad.

The layout he has today was started in eighth grade. The table has been contoured to make hills, valleys and rivers. "The best thing to remember is to keep it looking realistic," said Jeff.

Jeff's train has about 300 cars, although he uses only about twelve. Each winter, he changes the scene by sprinkling dry plaster over it, to make snow. So even if we don't have a white Christmas, Jeff will.

**Even a model train** can break down, but Jeff Field can easily fix his cars. He spends up to 20 hours a week in repairs alone.

—D. Khyrn

## Work a little, skate a lot

How to Build an Ice Skating Rink  
by junior Craig Little

- (1) Find several large pieces of cardboard and place on ground. Pack snow around cardboard. Make sure snow is smooth.
- (2) Spray the snow with water, being sure to cover the entire area. Make sure it is below freezing outside.
- (3) Form a border around the outside of the rink with snow.
- (4) Continue watering snow down with spray until a layer of ice 2-3 inches thick has formed. Then, take a garbage can,

- fill it with water, and dump it on the ice. This last layer helps to smooth out the bumps.
- (5) Keep building up the border around the rink, until it is as high as desired.

This ice skating rink will last as long as the temperature stays below freezing. It is easy to build, fun to use, and best of all, it's free!

**In anticipation of** the cold winter ahead, Craig Little and his brother Scott begin to work on another skating rink.

## Academics challenge

What's the only city in the world that's on two continents at the same time? If you knew the answer was Ankara, Turkey, you should have tried out for the Academic Challenge team.

Ellen Fain, the only junior on the team, has a family history of "Academic Challenge-itis". Her brother Tim was on the team in 1975. Ellen tried out because, she said, "I wanted to leave Bay with a sense of doing something."

On the night of tryouts, questions were fired at the hopeful intellectuals, and the top three students were Ellen, and seniors John Steward and Doug Barge.

The show was taped on Nov. 20. "I'm glad people came to the taping," said Ellen. "Academics are just as important as athletics."

**With air time** only a few minutes away, Ellen Fain crams before testing her knowledge. Ellen answered more than half of the questions on the show.

## The girl with the hair

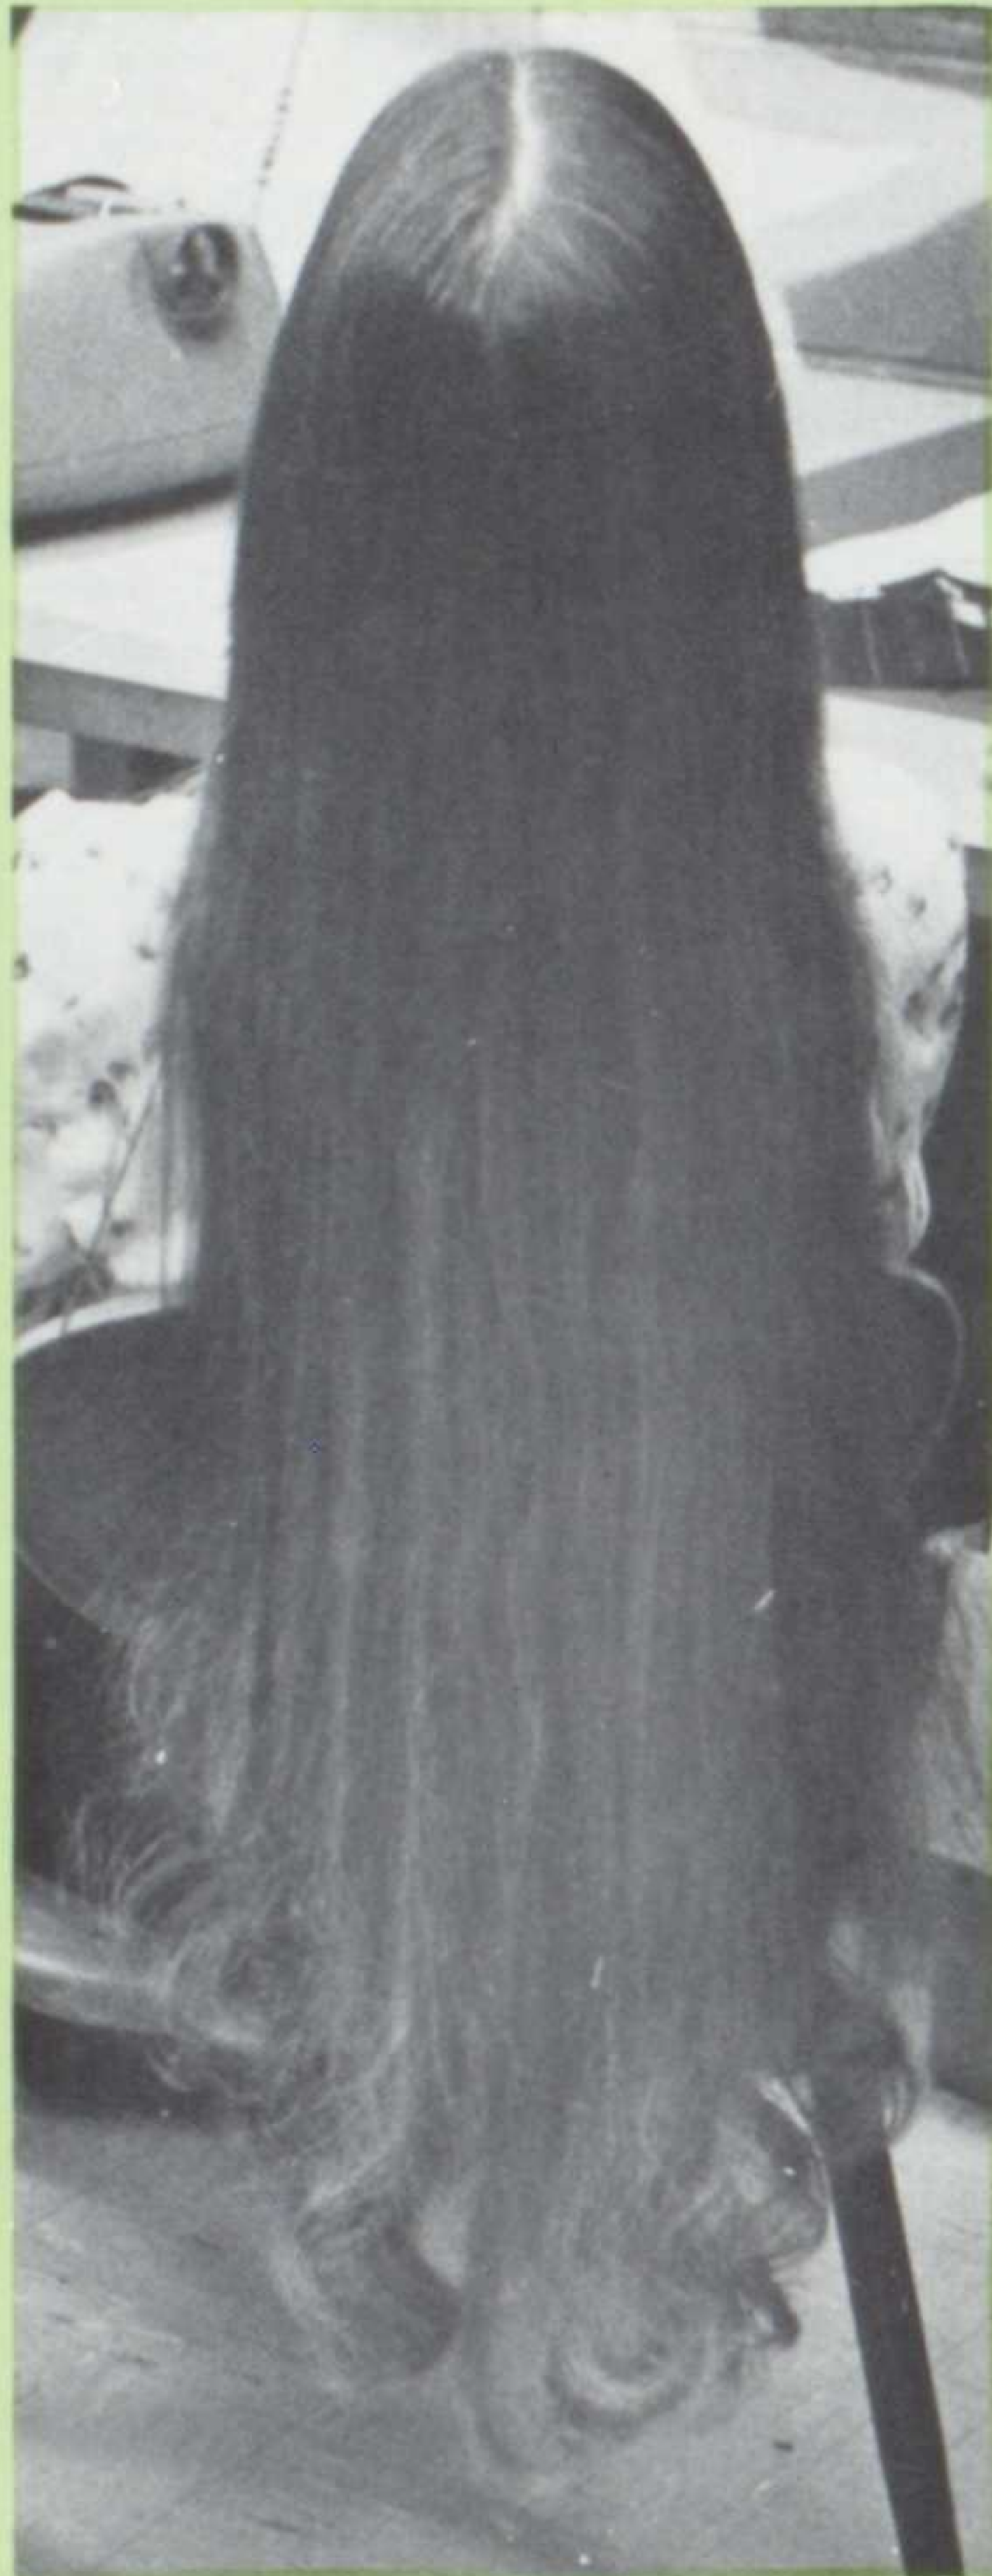

Rapunzel, the girl with the long golden tresses, has a rival at Bay High. Junior Sue Carlisle has the longest hair in school, and probably the longest hair on the west side of Cleveland.

She has been growing her hair since she was 5 years old. It has only been cut once since then. Now it is to mid-thigh length, approximately 36 inches.

When she finally decides to cut her locks, she plans to sell her hair. "When I was in Williamsburg a lady who made wigs offered me \$250 for my hair," Sue said, "but I wouldn't sell it."

I guess Rapunzel wouldn't have sold hers, either.

**Amazingly enough,** Sue Carlisle has the very same hair that grew on her head eight years ago. Hair grows from the scalp, and the longer the hair, the older.

—S. Ormsby

## Twins share

## She doesn't horse around

"I've always loved horses, so it was natural that I'd start showing them," junior Lynda Bell explained. In the past four years, she and her horses have managed to win a closetful of trophies and ribbons and even a championship.

Lynda's career has included five different horses during the past nine years. She has had Moonshadow, the most recent horse, for about eighteen months. Lynda described her. "She is a registered thoroughbred, and very gentle."

Moonshadow is stabled at Holly Hills Farm, where Lynda goes every day to care for her and to practice.

Lynda competes with the Central Ohio Saddle Club Association (C.O.S.C.A.).

At the end of the year, all the points a rider has are totalled, and the one with the highest amount wins. Last year, Lynda was Champion!

**With the ease** of a professional, Lynda Bell guides her horse, Moonshadow, over a jumping rail at a C.O.S.C.A. competition, which she won.

# identical views

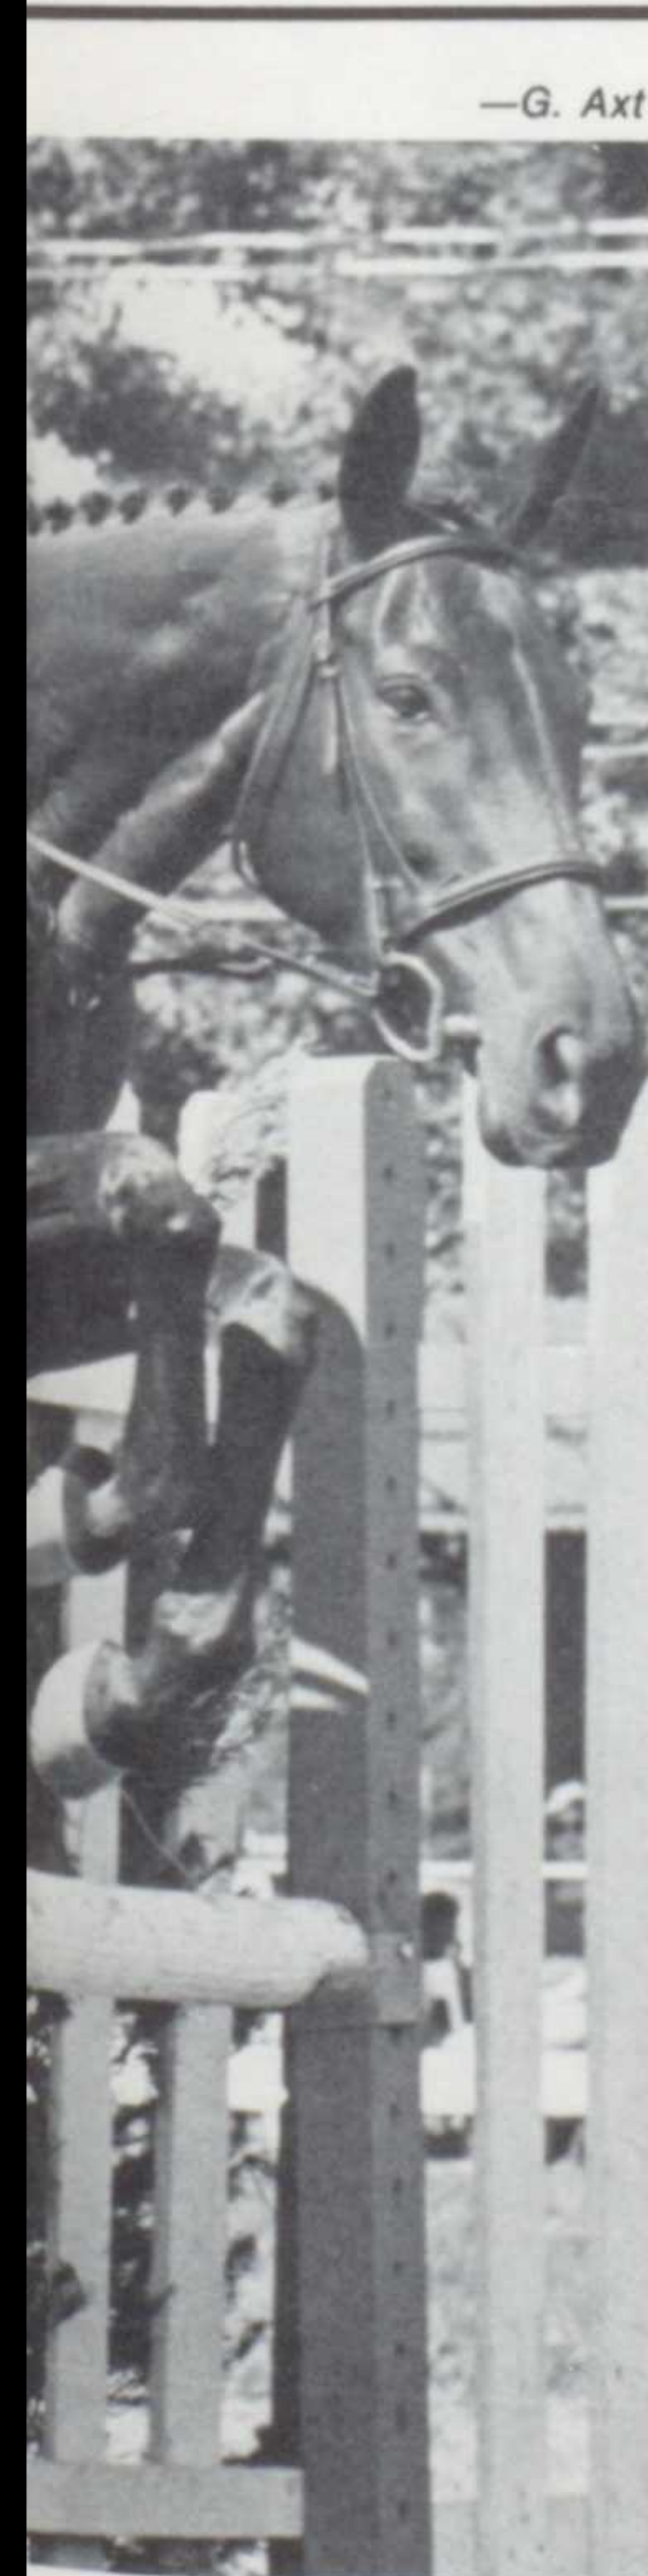

Have you ever met your double? Twins Dawn and Dori Kile have. They are so much alike it is almost impossible to tell them apart.

There are advantages and disadvantages to being a twin. One advantage is that they can share things—clothes, chores, and friends. The main disadvantage is that people always get them mixed up. "I hate it when my parents get us mixed up," Dori said. "By now they ought to be able to tell us apart!"

**Although Dawn and Dori Kile** look almost exactly alike, they were born only fraternal twins.

## Kayaks for work and play

At one time or another during the past winter, everyone at Bay High bore some resemblance to an Eskimo. Junior Tom Berneike, however, has taken this one step further than most of us; he also builds kayaks.

Tom has built five of the canoe-like boats in the past three years. An average kayak costs about \$100 and is built of fiberglass, nylon cloth, and polyester resin.

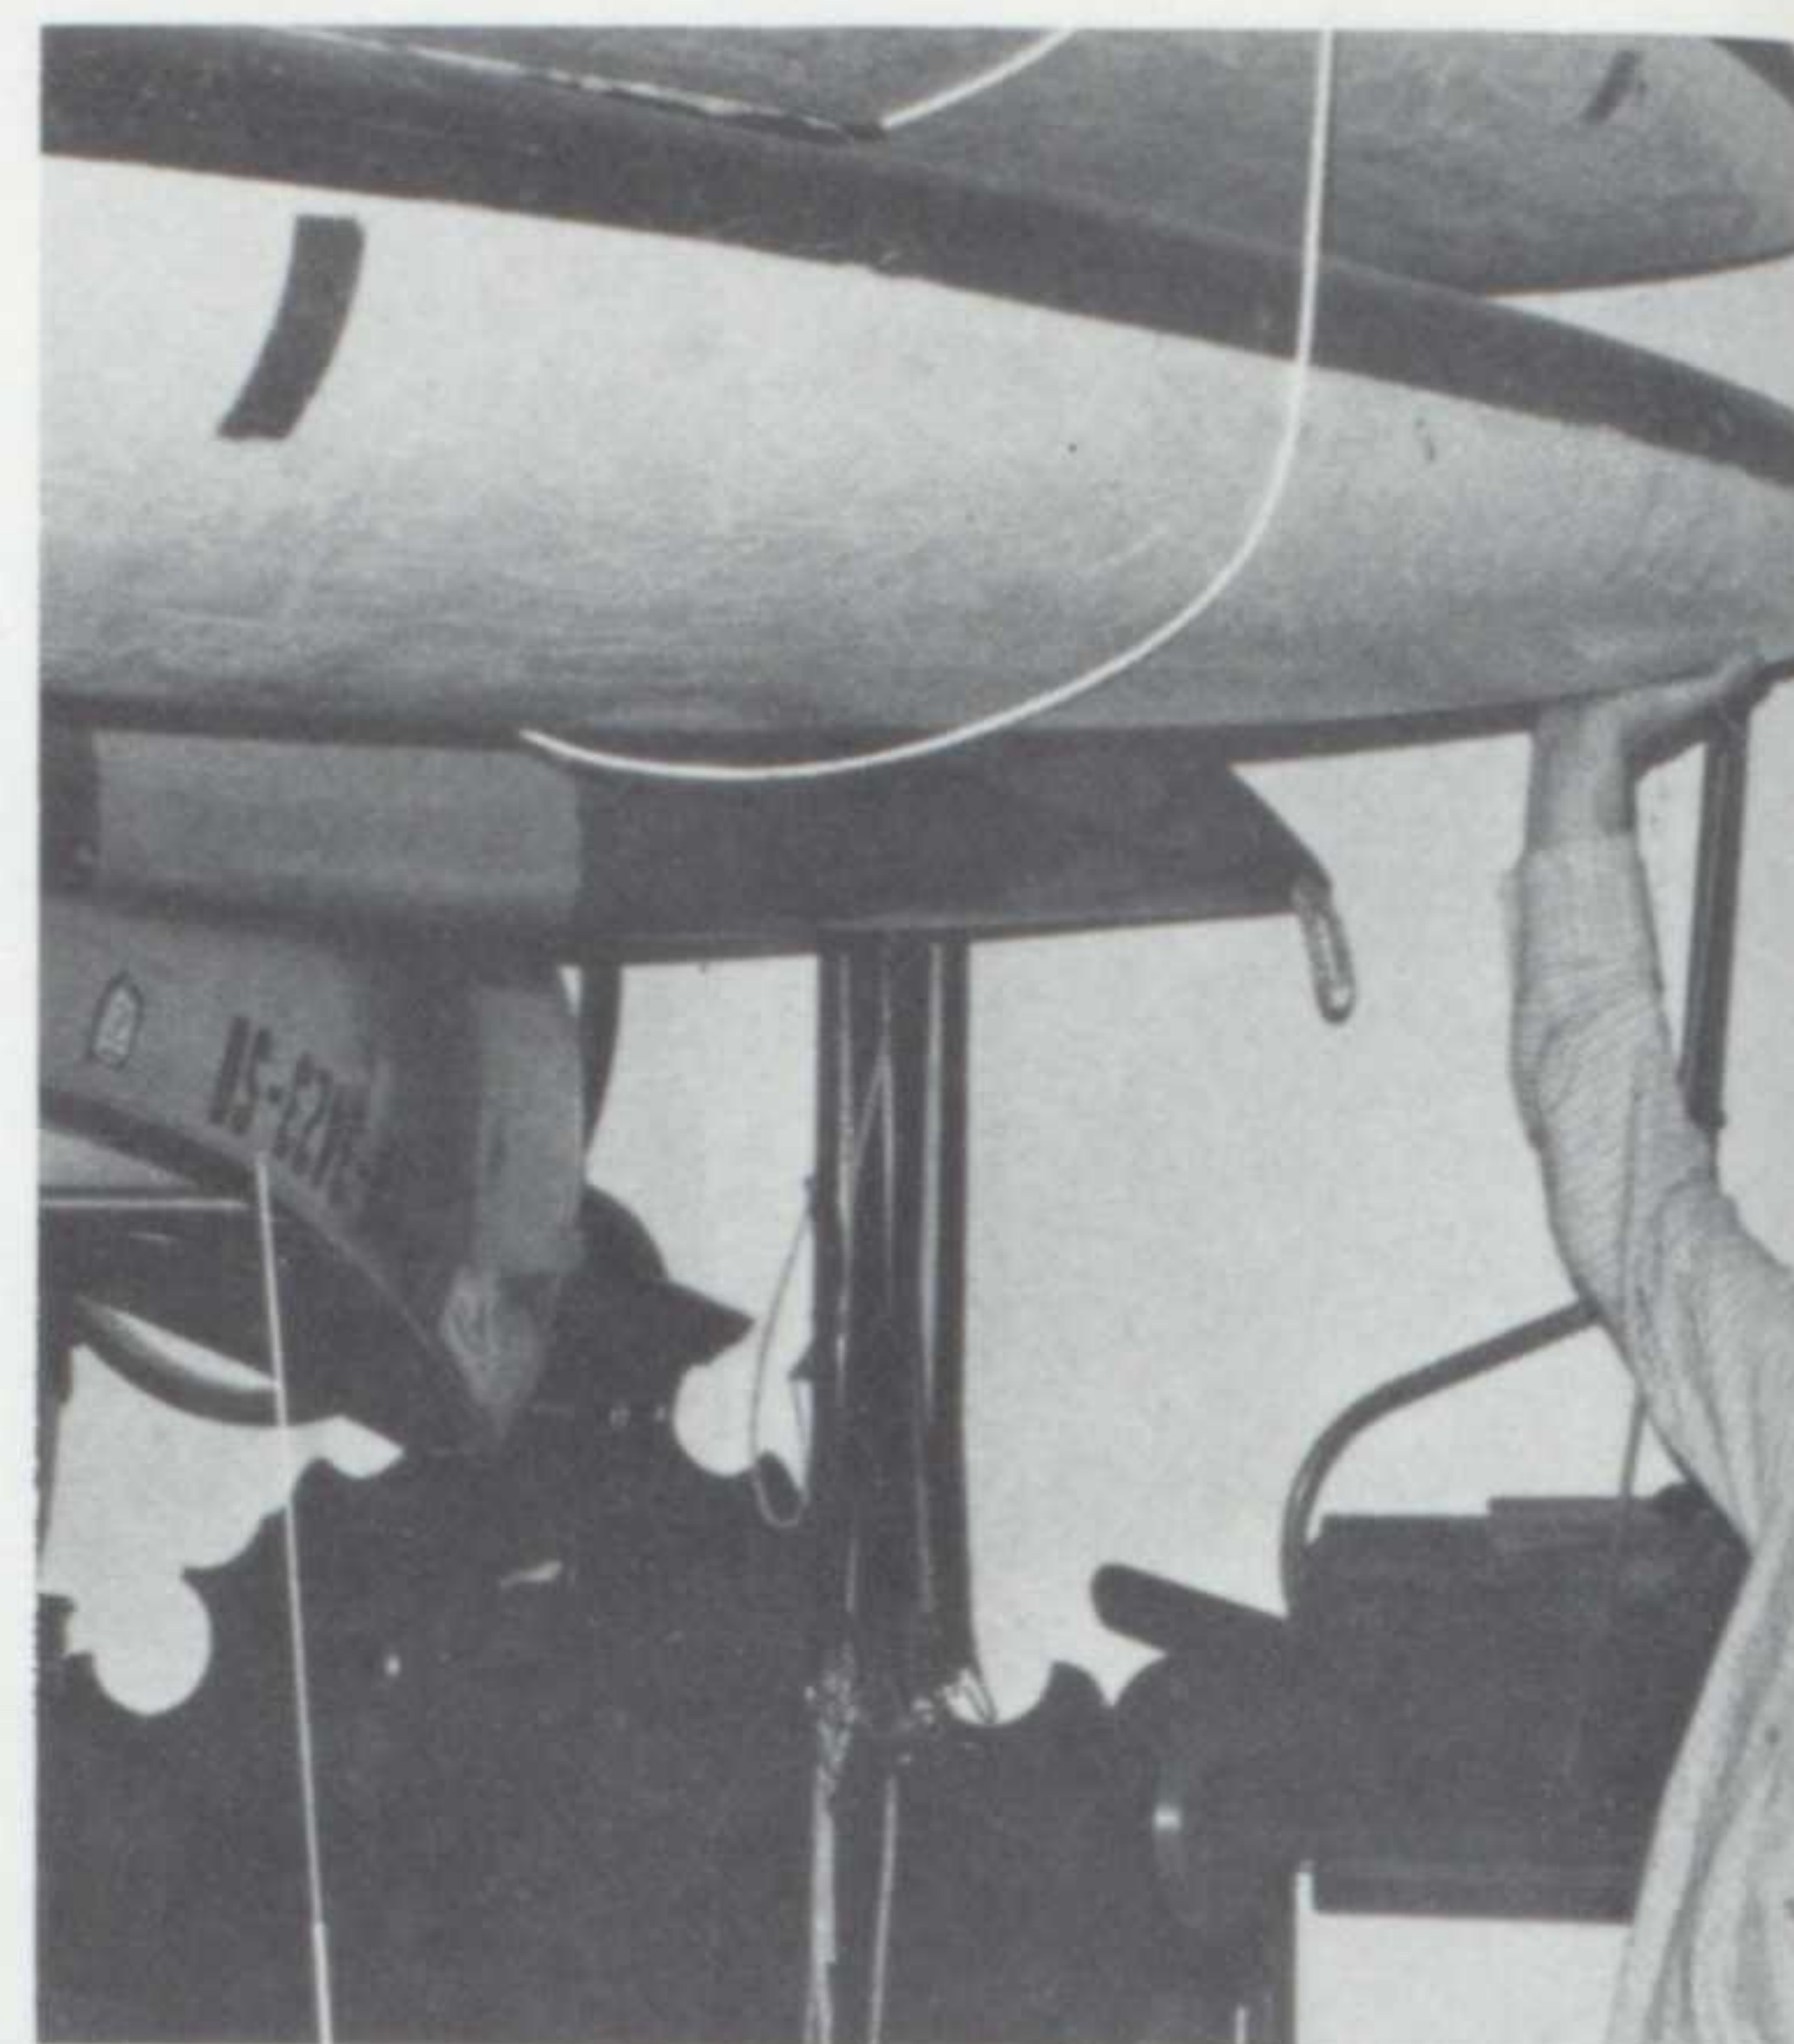

Tom's family uses the kayaks

to take trips in Ohio and the surrounding states. They also participate in races on the Vermilion River. Tom's favorite use for the kayak is "hot-dogging." This is the name for special stunts which are done with the kayak.

Canoe canoe?

**Suspended by ropes,** Tom Berneike's kayak took about three days to build. Tom used a fiberglass mold to construct it.

—D. Khym

## Doug and children: a magical combination

With a tap of his magic wand, he produces rabbits, pigeons and money. Sounds good? Well, junior Doug Crowe has the amazing ability to do all of this, and more!

Doug started his magic career in the seventh grade after reading several books on Harry Houdini. "The easiest tricks are those found in magic kits," Doug explained. "The most difficult involve slight of hand." If an illusion for some reason does not work, the easiest solution is to turn the mistake into a comedy routine. Fortunately, such a ruse is usually successful.

Doug's shows are given mainly for children. He charges approximately \$30 per show. On the average, a show contains ten illusions and lasts between fifteen minutes and one and a half hours. Doug also gives many charity performances, and he always entertains at the Student Council Christmas

**Seemingly out of nowhere,** Doug Crowe makes a dove appear. Much to the delight of J.J. and Andy Clark, Doug uses the dove in several of his tricks.

parties for underprivileged children. "These children have always been my most enthusiastic audience, and I love them all," Doug remarked. These shows are usually his favorites because he can be free and creative.

"The biggest part of a show is entertaining the audience. The magic and the illusions are

secondary," Doug explained. "I try to let them have fun, participate, laugh, and wonder."

## Life in the deep freeze

Some people wish that days were longer, while others wish that nights were longer. Alaska, where junior Laurie Mittag lived from 1970-1972, has something for both types of people.

Laurie and her family lived on Annette Island in the southern part of Alaska. To go shopping for anything other than food, they had to take a boat or an airplane to another nearby island. Quite a change from running up to Westgate all the time, isn't it?

We've all heard about the shortage of women in Alaska. Laurie explained, "There were more guys in my school, but we all did things together and had a great time."

It all goes to show you that there are more things in Alaska than just ice and snow.

### Alaska abounds in wildlife.

Laurie Mittag studies underneath a bear that her father shot when they lived in Alaska.

-D. Khyrn

## Takin' it easy

-D. Khyrn

**Even more than sleeping,** Patty Scarborough likes to eat. These two activities occupy most of her free time.

Haven't you ever wished you could do just nothing? Junior Patty Scarborough spends a lot of her time doing just that. She is one of the few students that are not involved in any school-sponsored, extra-curricular activity for a change.

"I just don't have any time," Patty explained.

Since Patty is interested in traveling, she plans to attend college and then move on, possibly to California.

You can bet that she'll make a big splash!

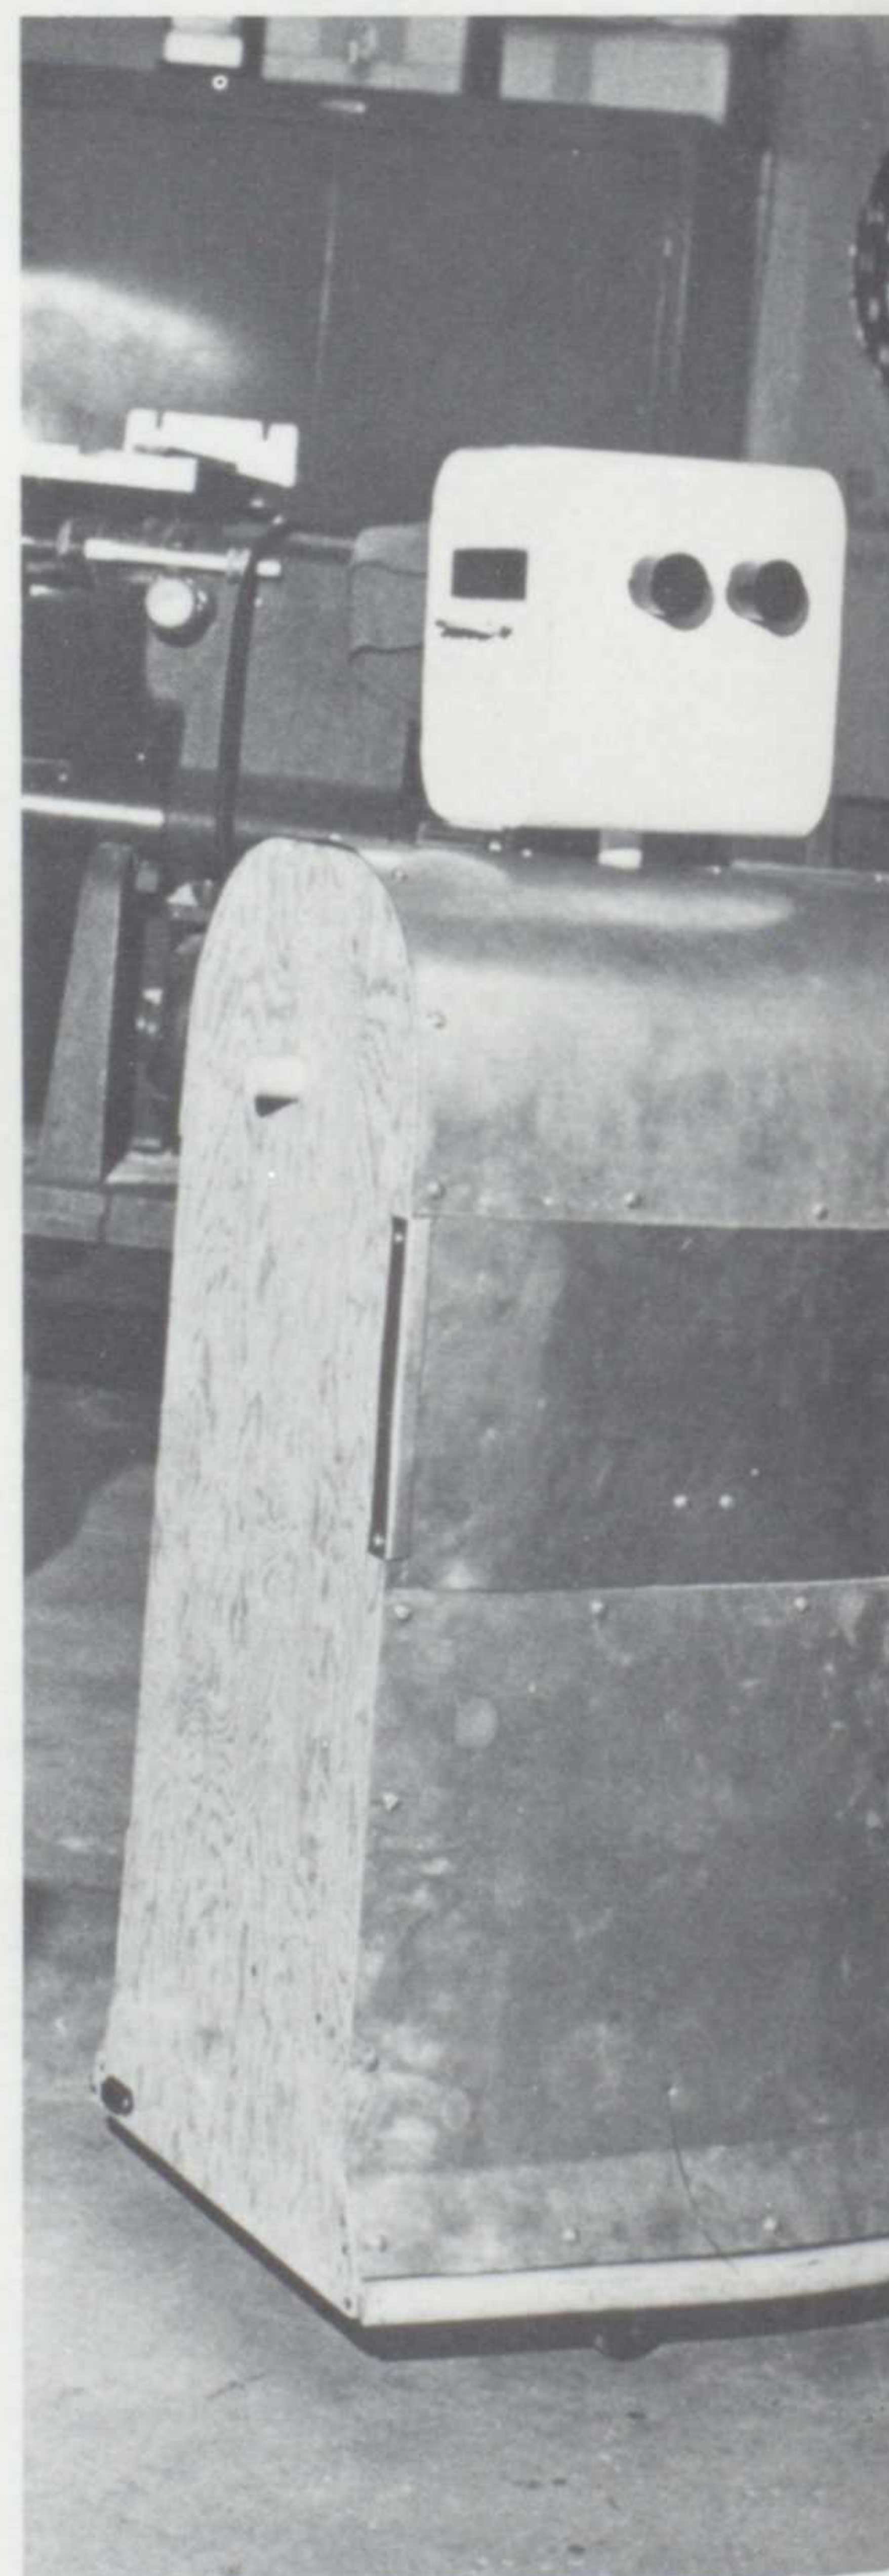

## Inventor and Trac, too

Due to the recent releases of "Star Wars" and "Close Encounters of the Third Kind", interest in UFO's and space technology has increased by leaps and bounds. Dale Pulver is right in step with this latest fad — he is building his very own robot.

TRAC, as the robot is called, is fully mechanized and runs on batteries. It is 40 inches tall, and painted blue, white and black. The head and arms turn and extend. Small wheels, which serve as feet, are fully controllable. TRAC also has special features such as remote control, a transmitter to make it speak, headlights, a clock, and heat, light, water and smoke detectors.

Dale spent five months building TRAC. He hopes that someday he can use the robot for something profitable. Who knows? Maybe TRAC has a future in the sequel to "Star Wars".

**Robots need no anesthesia** for minor operations. Thus, Dale can easily adjust TRAC's remote control system.

# \$ at what price Senioritis?

## And the bills kept piling up

One of the most subtle problems of the senior year is the annoying accumulation of expenses. The drain on your wallet is not always noticed because it takes place gradually over the period of a school year. However, when the total expenses are added up, the amount can be high. Unless the senior or his parents are wealthy, the senior really does need to have a job.

—J. Heiser

# The high cost of earning a living

So, a senior needs employment to pay for all the activities of the senior year. This presents many problems. For one, having a job can cut drastically into social life because of time spent working. Many a senior has had to forfeit a Friday night football game or Saturday night party to hold down a job. While the senior is diligently working away a weekend night to earn a little petty cash, he might be feeling a bit left out as he thinks of his friends out partying.

The assets of having a job

must also be weighed against the fact that it will cut into time spent on homework. The one night the senior doesn't have to work he'll probably end up staying home anyway to write a theme or study for a test in physics or soc. A job really can do a number on the senior's schoolwork and social life.

What's the senior to do, then? Having a job is good experience for a future vocation, as well as being a nice extra to write down on a college application, but it has its drawbacks as well.

One of the assets of holding down a job during school has to include handling your own bank account. A Bay High sales clerk deposits his bi-weekly paycheck into his Broadview savings account.

# A sixty dollar smile

Who needs 95 wallet size senior pictures anyway? Well, when Christmas rolls around, you'll need at least 20 glossy 2x3's to insert in your holiday greetings to remind relatives that you are alive and kicking and have made it through puberty without terminal acne. When sending graduation announcements, you might want to have 10 or so on hand to hint to friends and relatives that graduation (\$,\$,\$ . . .) is on its way. Also, you will need an even 5 dozen to trade with 60 of your "closest" friends.

**What lies behind the faces?** Looking on the flip side of the senior pictures, one finds them wishing the best of luck to their fellow students.

How else will you acquire a bigger stack of senior pictures than anyone else in the school? Besides predicting your present status, a substantial pile of senior pictures also can provide entertainment to deprived individuals who have nothing better to do than perhaps play a round or two of old maid. First, select a picture of a not particularly eminent beauty to serve as the old maid and then use the same color of sweater, style of hair, or type of pose as a pair, and the groundwork is laid for an invigorating card game.

Finally, to make up for a sizeable lack of funds due to the purchase of 95 wallet size senior pictures, you should have 5 left to make available for purchase. Says senior Jim Andrews, "The going rate among freshmen for one Scott Saccany wallet photo is \$10, plus a few extra bucks for an autographed version."

**In the LRC,** Peggy Marquart and Karen Brazell exchange senior pictures. Peggy adds this to her collection to make it an even forty.

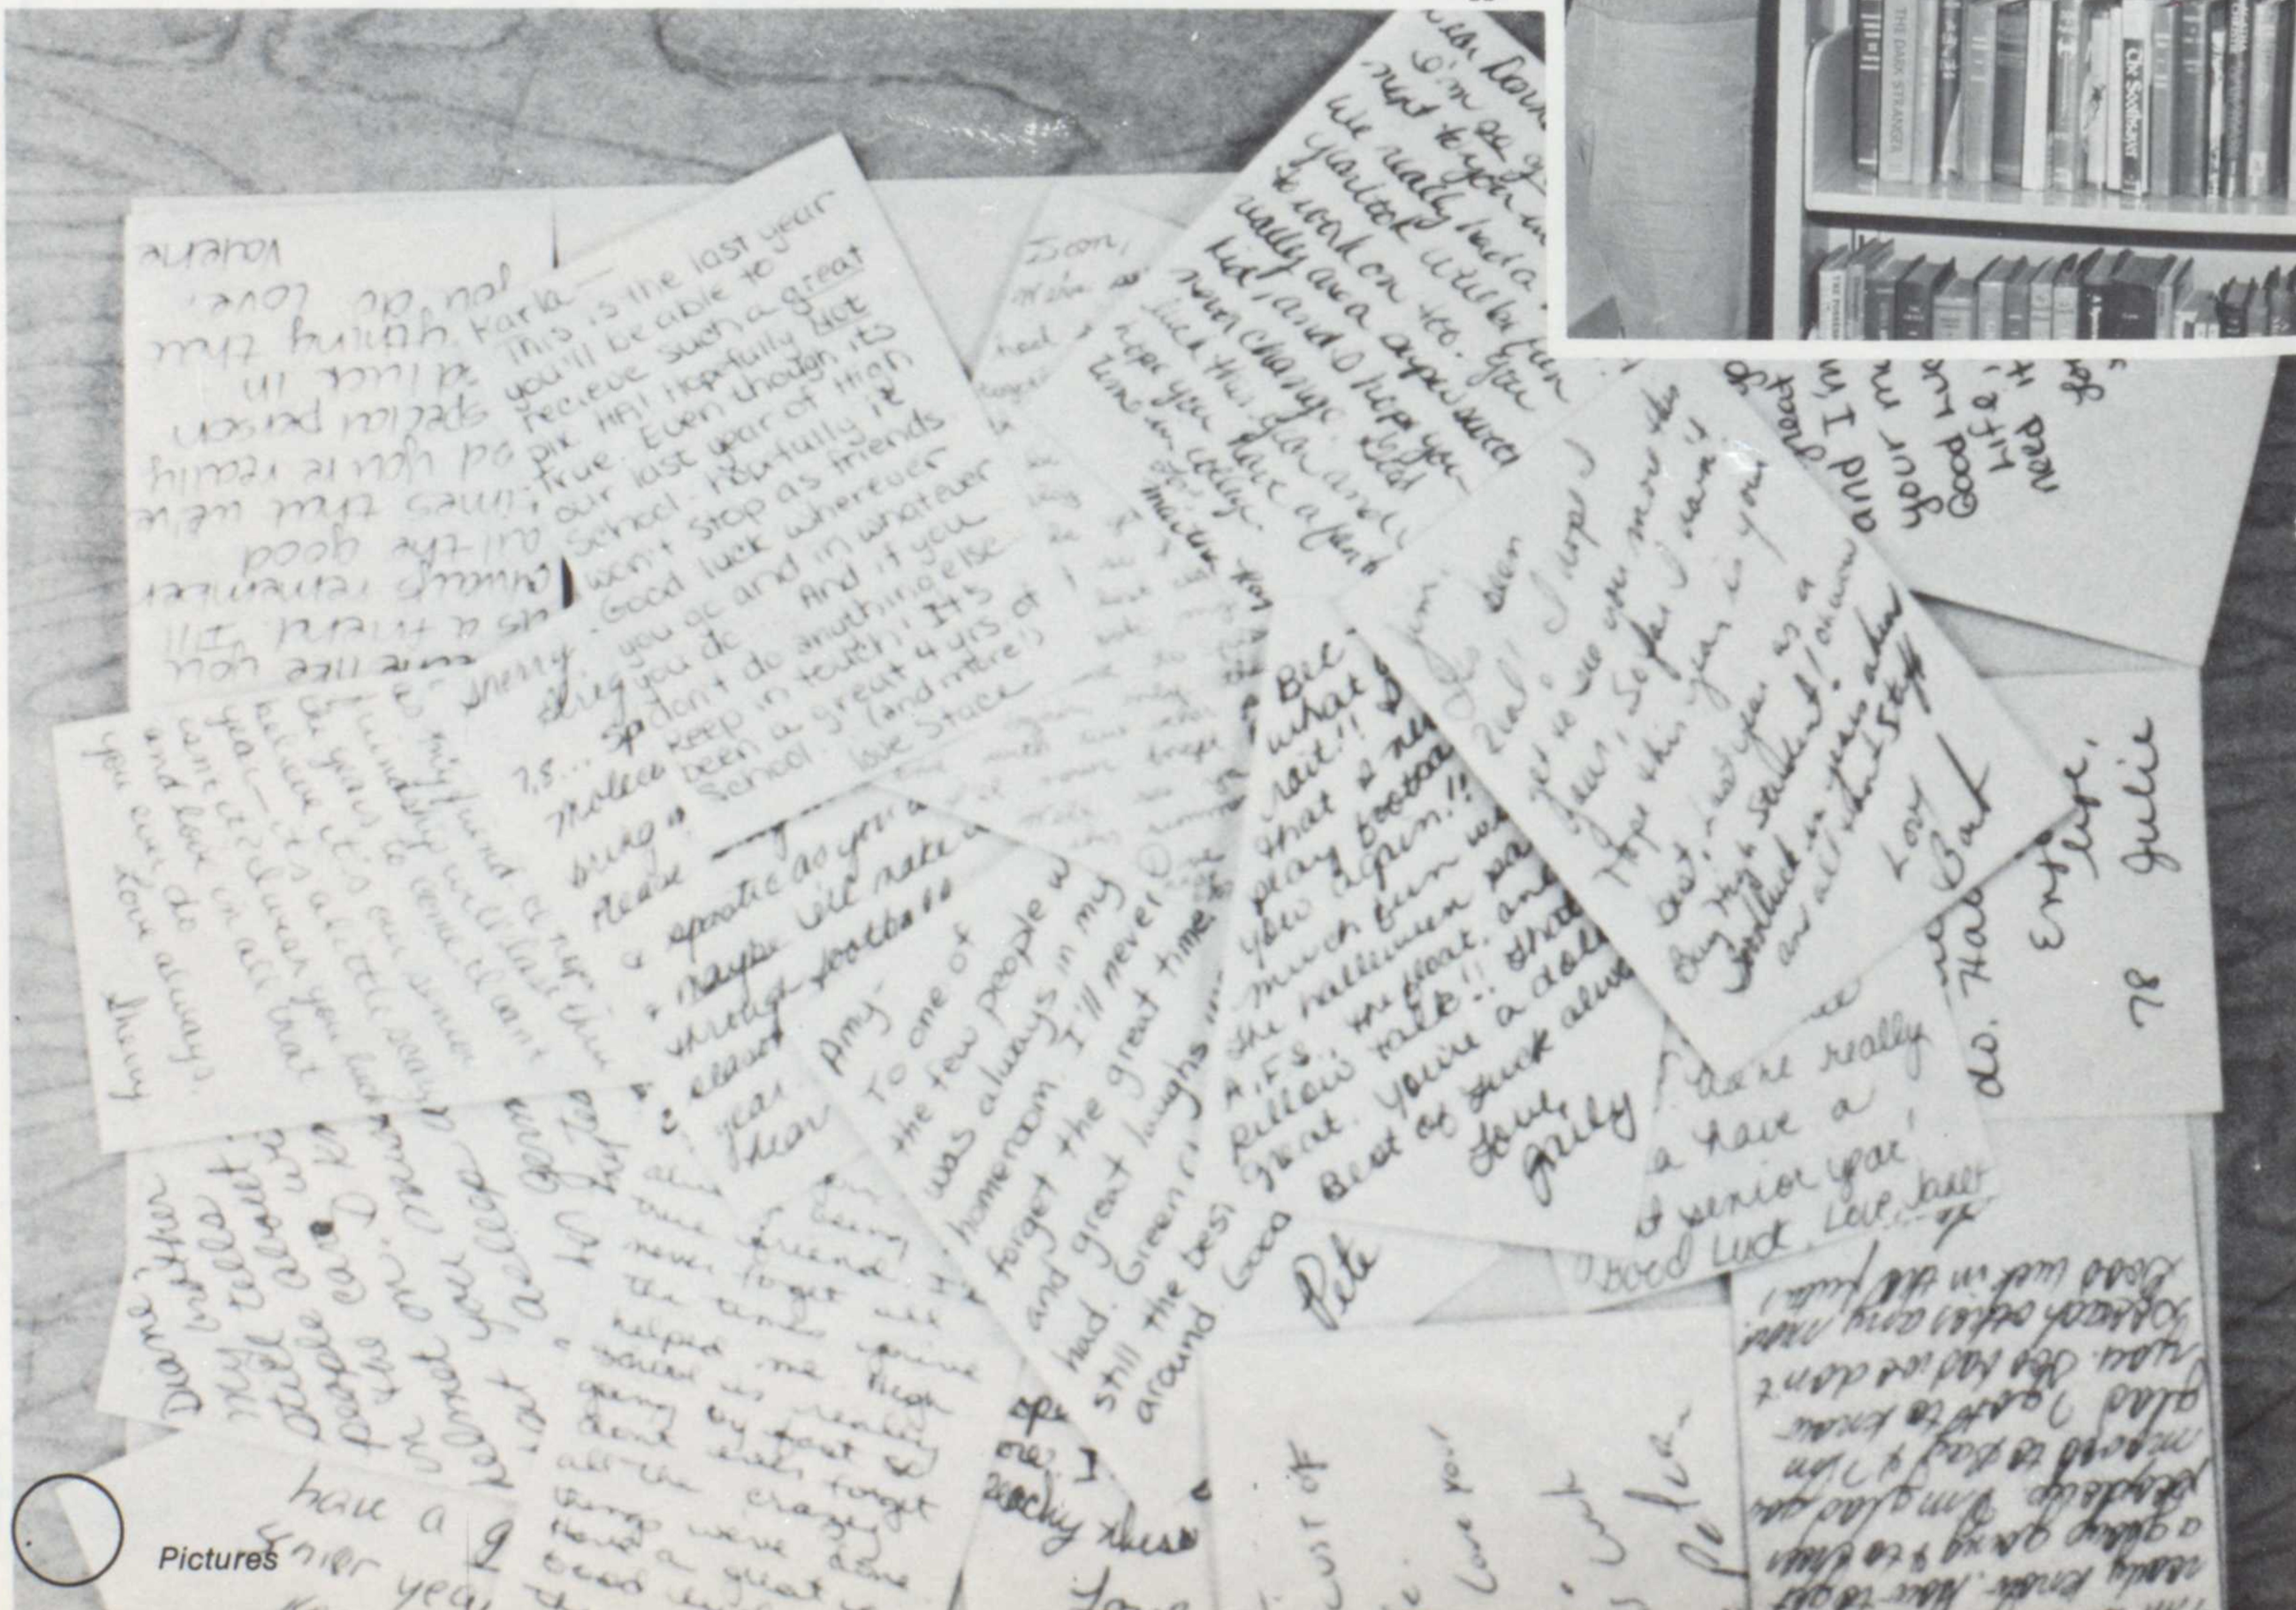

Number 373, Gretchen Mittag smiles as Hal Briggs snaps her picture at his Elyria studio.

'Tis the Season

## Boon to college-bound

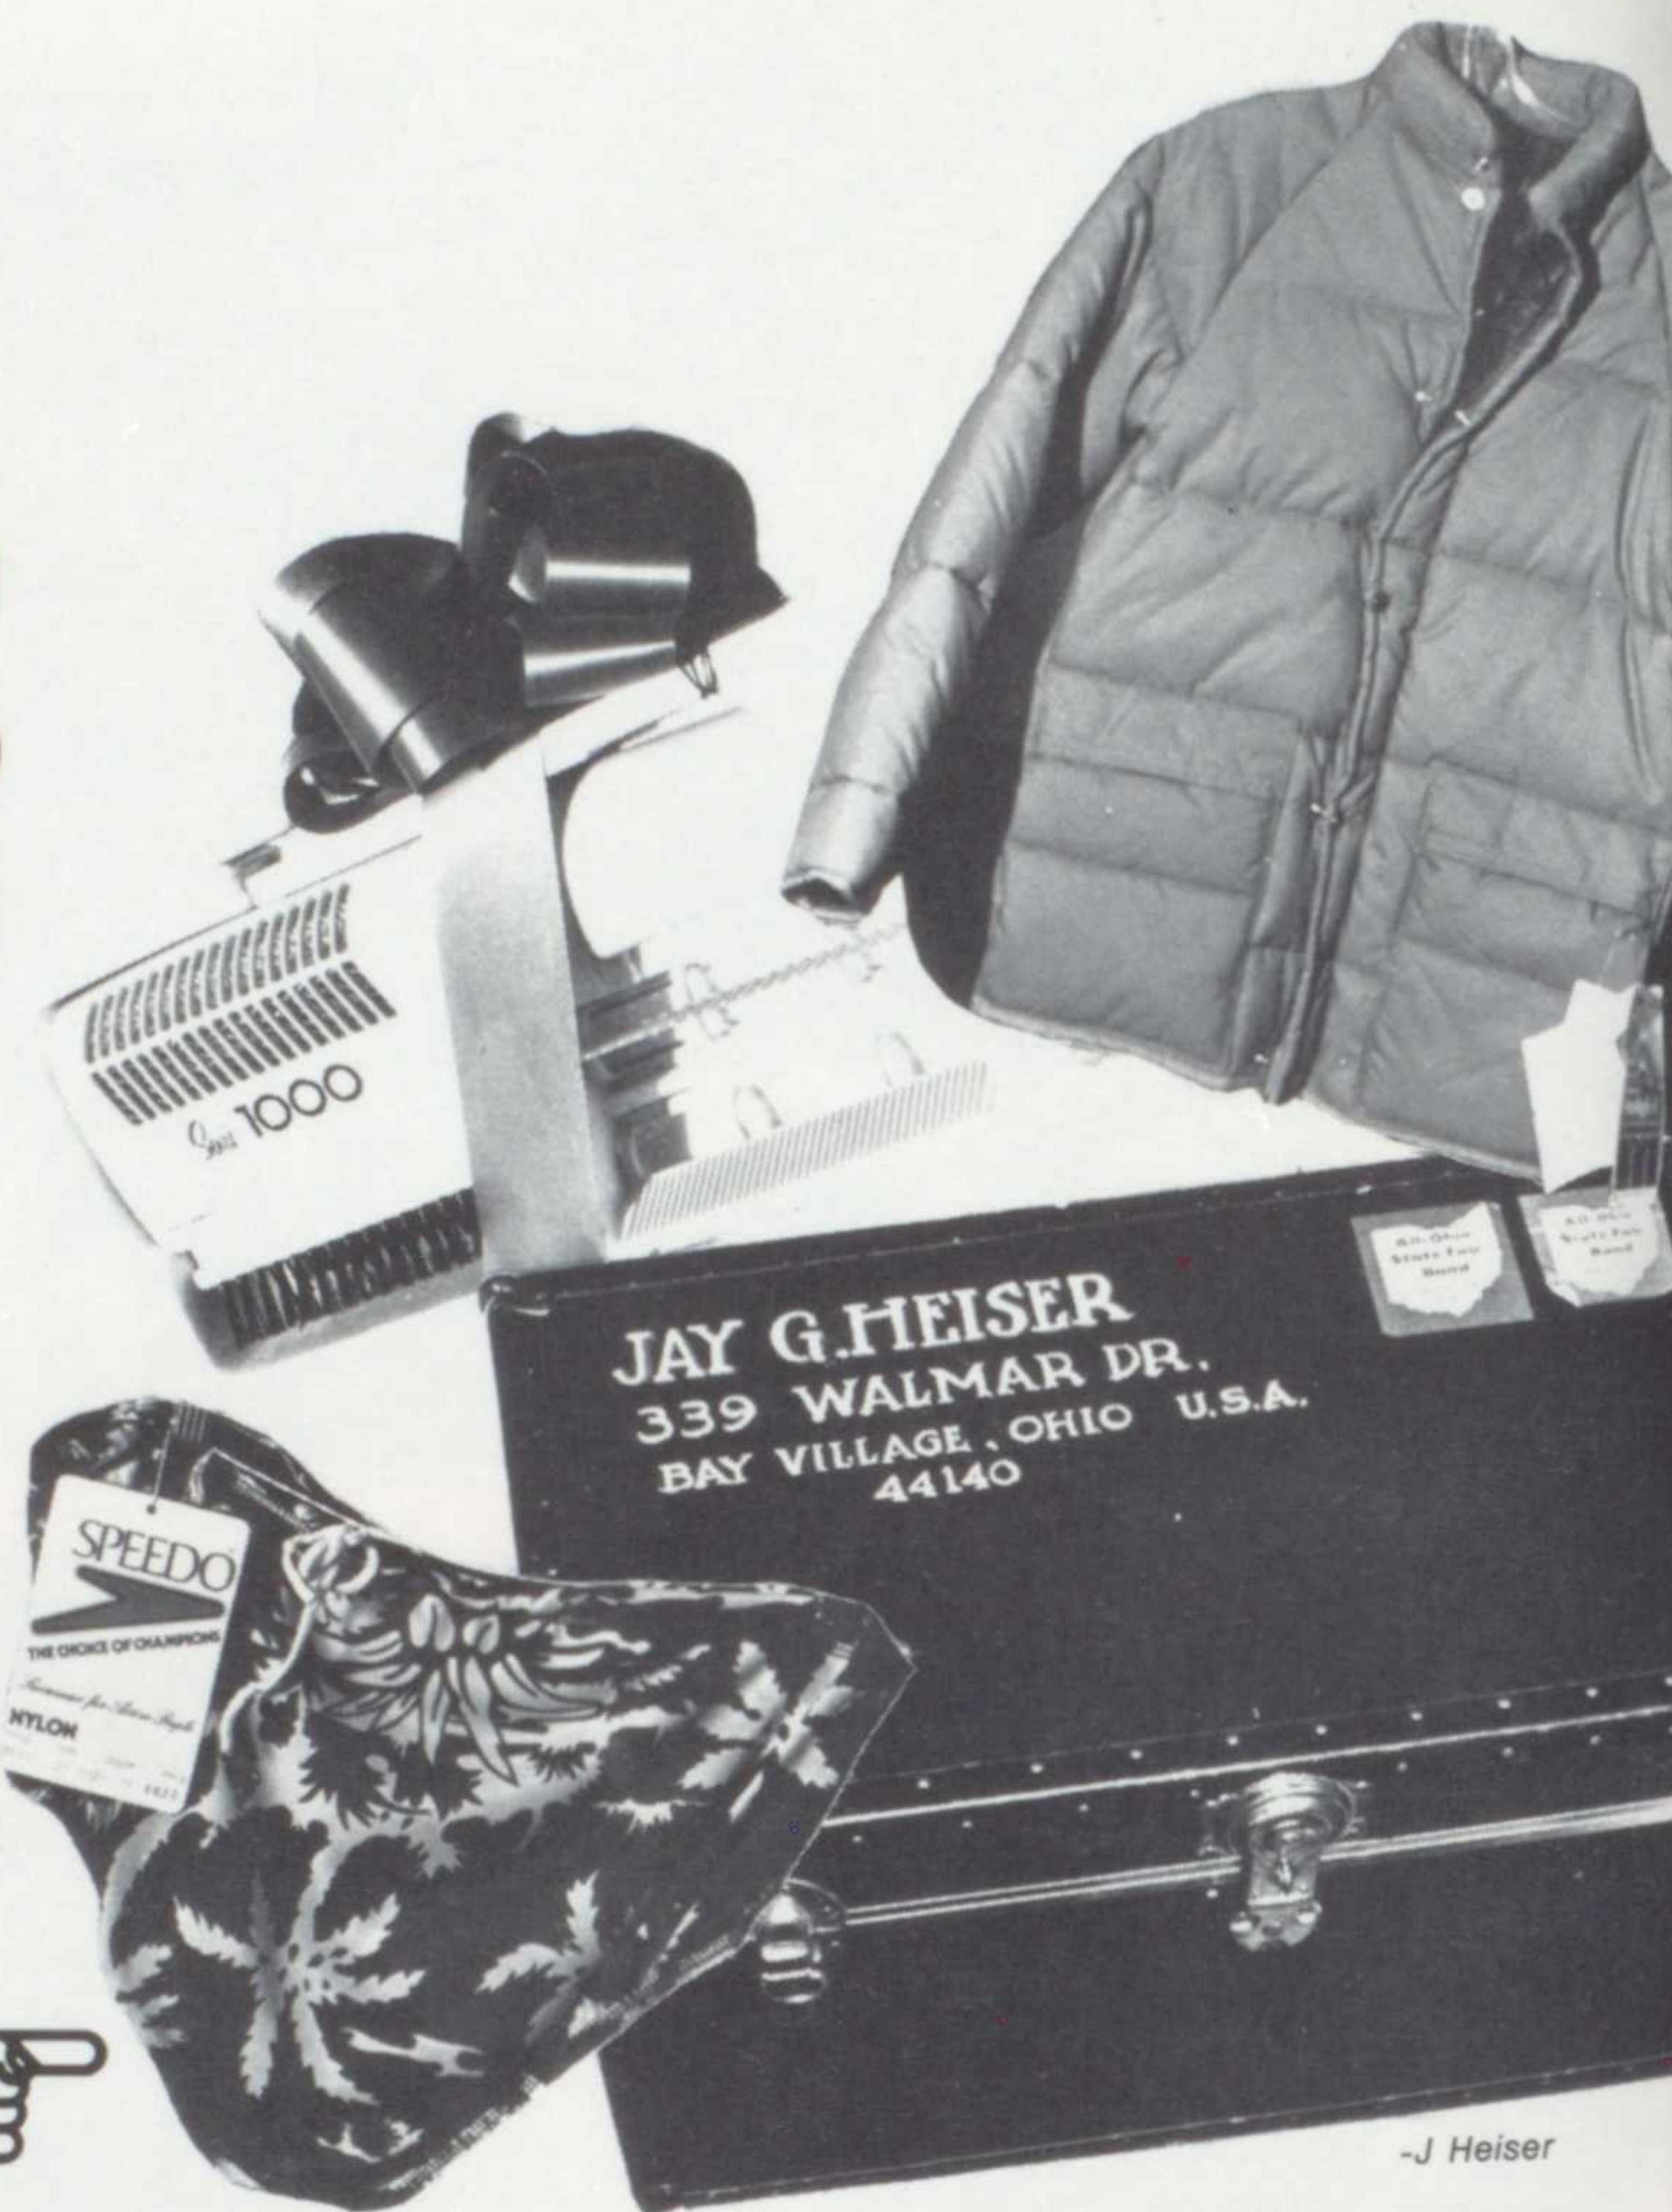

Christmas time, often causing great indecision as to what to ask for presents was no problem for seniors. With the ominous fact of college life looking most seniors in the face, Christmas lists were extended to include the things every college freshmen needs or wants at school.

Everyone knows college dorms get cold, so senior Tom Campbell prepared for frigid university life.

"I got an electric blanket to keep me warm on lonely winter nights," commented Tom.

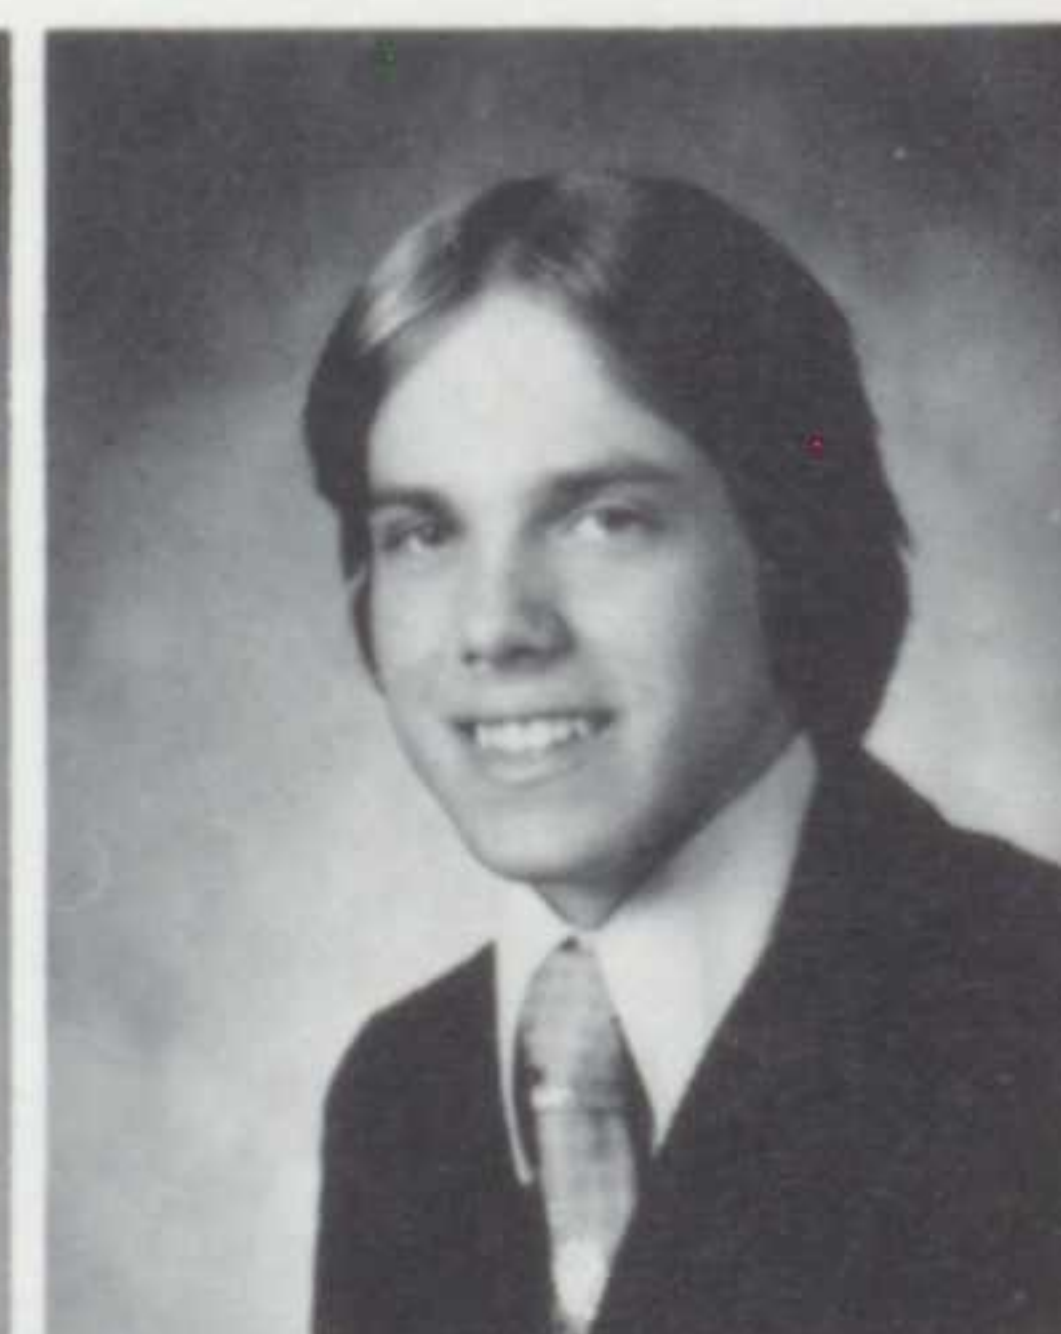

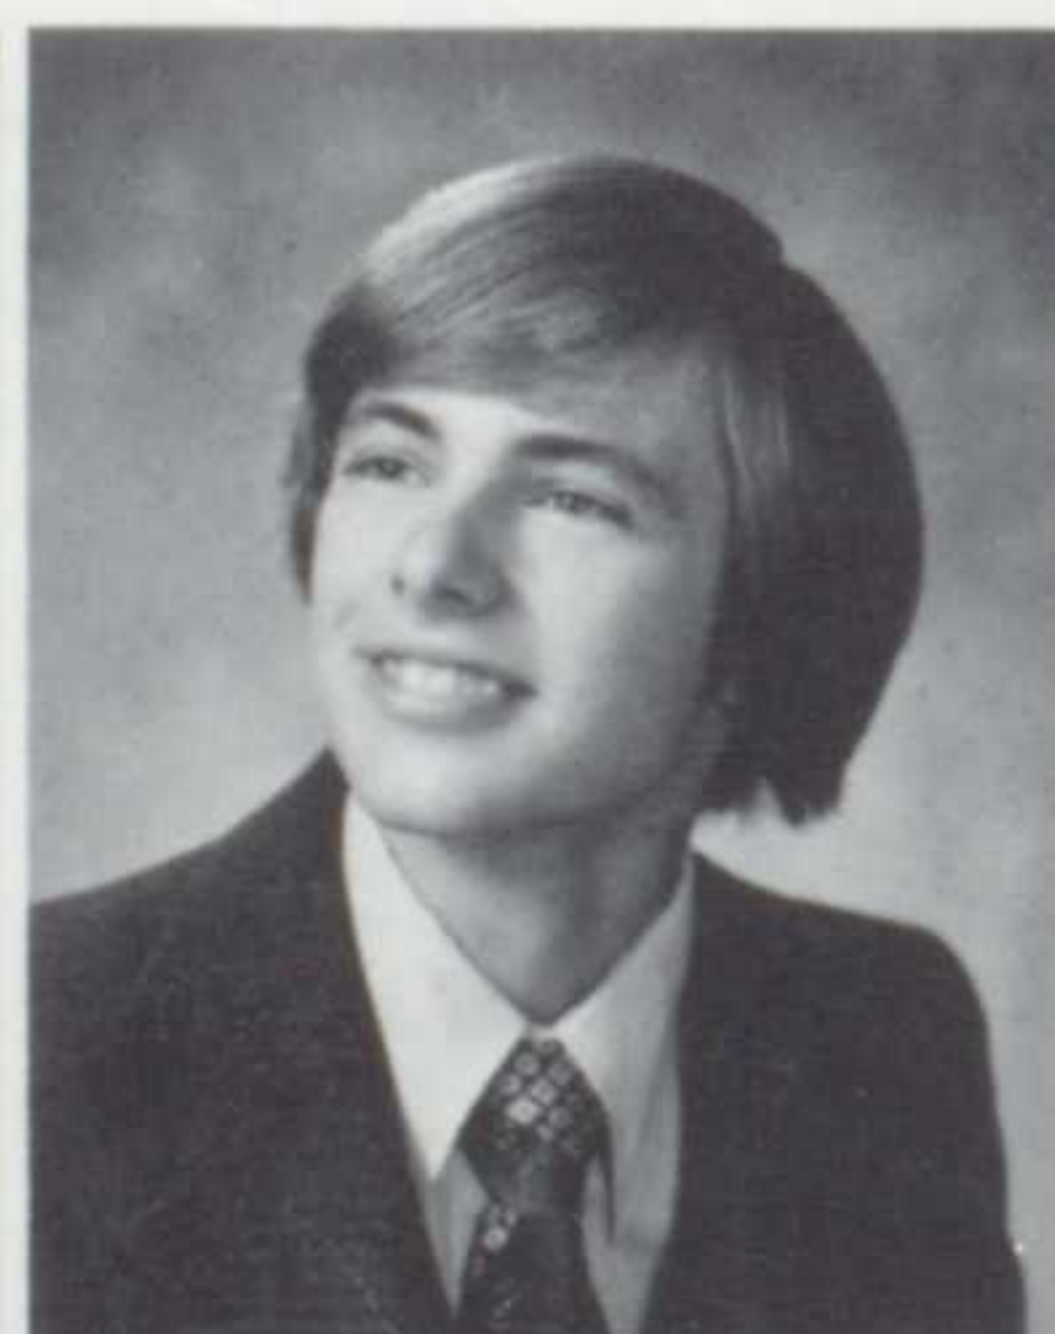

John "Peanut" Crook learned from his two older brothers that one necessity at school is a popcorn popper.

Tops on the list of gifts were clothes; pants, shirts, jackets, and ear muffs were received in anticipation of leaving home.

# the season

## All in practical amusement

Some of the more unusual gifts include Lee Rohlke's footlocker, just in case someone tried to steal his feet, and Jodee Janda's stuffed monkey so she'd be sure to have a swinging time at college.

Seniors who planned to attend colleges out of state also asked for some unusual gifts that related to their future location. Skis to the north-bound and swimsuits to the southerners were two big items.

It is doubtful that everybody got everything they needed for college for Christmas, but many seniors got a good head start on planning for life in the dorm, away from the comforts of home. —Dave Dye

# 4,928 HOURS

## How did you spend them?

**W**hen you sit down and think about it, the four years of high school are quite a large chunk of time in the life of a seventeen or eighteen year old, almost one fifth of their lives.

The way in which those four years were spent varies with each student, as does the student's attitude about the value of that time.

Day-in-day-out, by attending Bay High for four years, missing an average of five days a year for

appointments and sick days, most students spent approximately 4,928 hours within our hallowed halls.

Add to that amount the time spent in extracurricular activities, and that's one big total.

Some seniors felt that they spent their whole life at school. One student stated, "Some days I would stay at school until six, go home to eat and then come right back after dinner. All I'd have to do to move in to the school would be bring a sleeping bag."

*An old familiar spot, even though it stands alone, the tree outside the corridor door is often surrounded by worshippers of the great outdoors. Many students*

*spent their free time sitting under the tree to think, enjoy the weather, gossip with friends, or just to relax.*

"My free periods were spent talking to people and studying," commented John Burnett. "When I think about high school, I think about practicing hockey at 5:00 in the morning before school and catching up on my sleep in math."

—J. Heiser

—J. Heiser

## "My biggest accomplishment was..."

It is a good feeling to know you have accomplished something. For some people the accomplishment is just the sweet taste of success at graduation and the knowledge that they made it through four years of high school. Other students believed that their biggest accomplishment was meeting people and becoming good friends with them during their high school career.

Some of the more tangible accomplishments seniors expressed were acquiring different skills and learning to do new things.

—S. Ormsby

When asked what she believed was her best accomplishment in high school, Amy Fritz, after some thought replied, "I've learned how to set a goal and work toward it, and I've gained self-confidence."

Senior Patty Kossin commented, "I feel I received a good education from Bay High, much better than what I would receive from another school. I also found a career I want to go into."

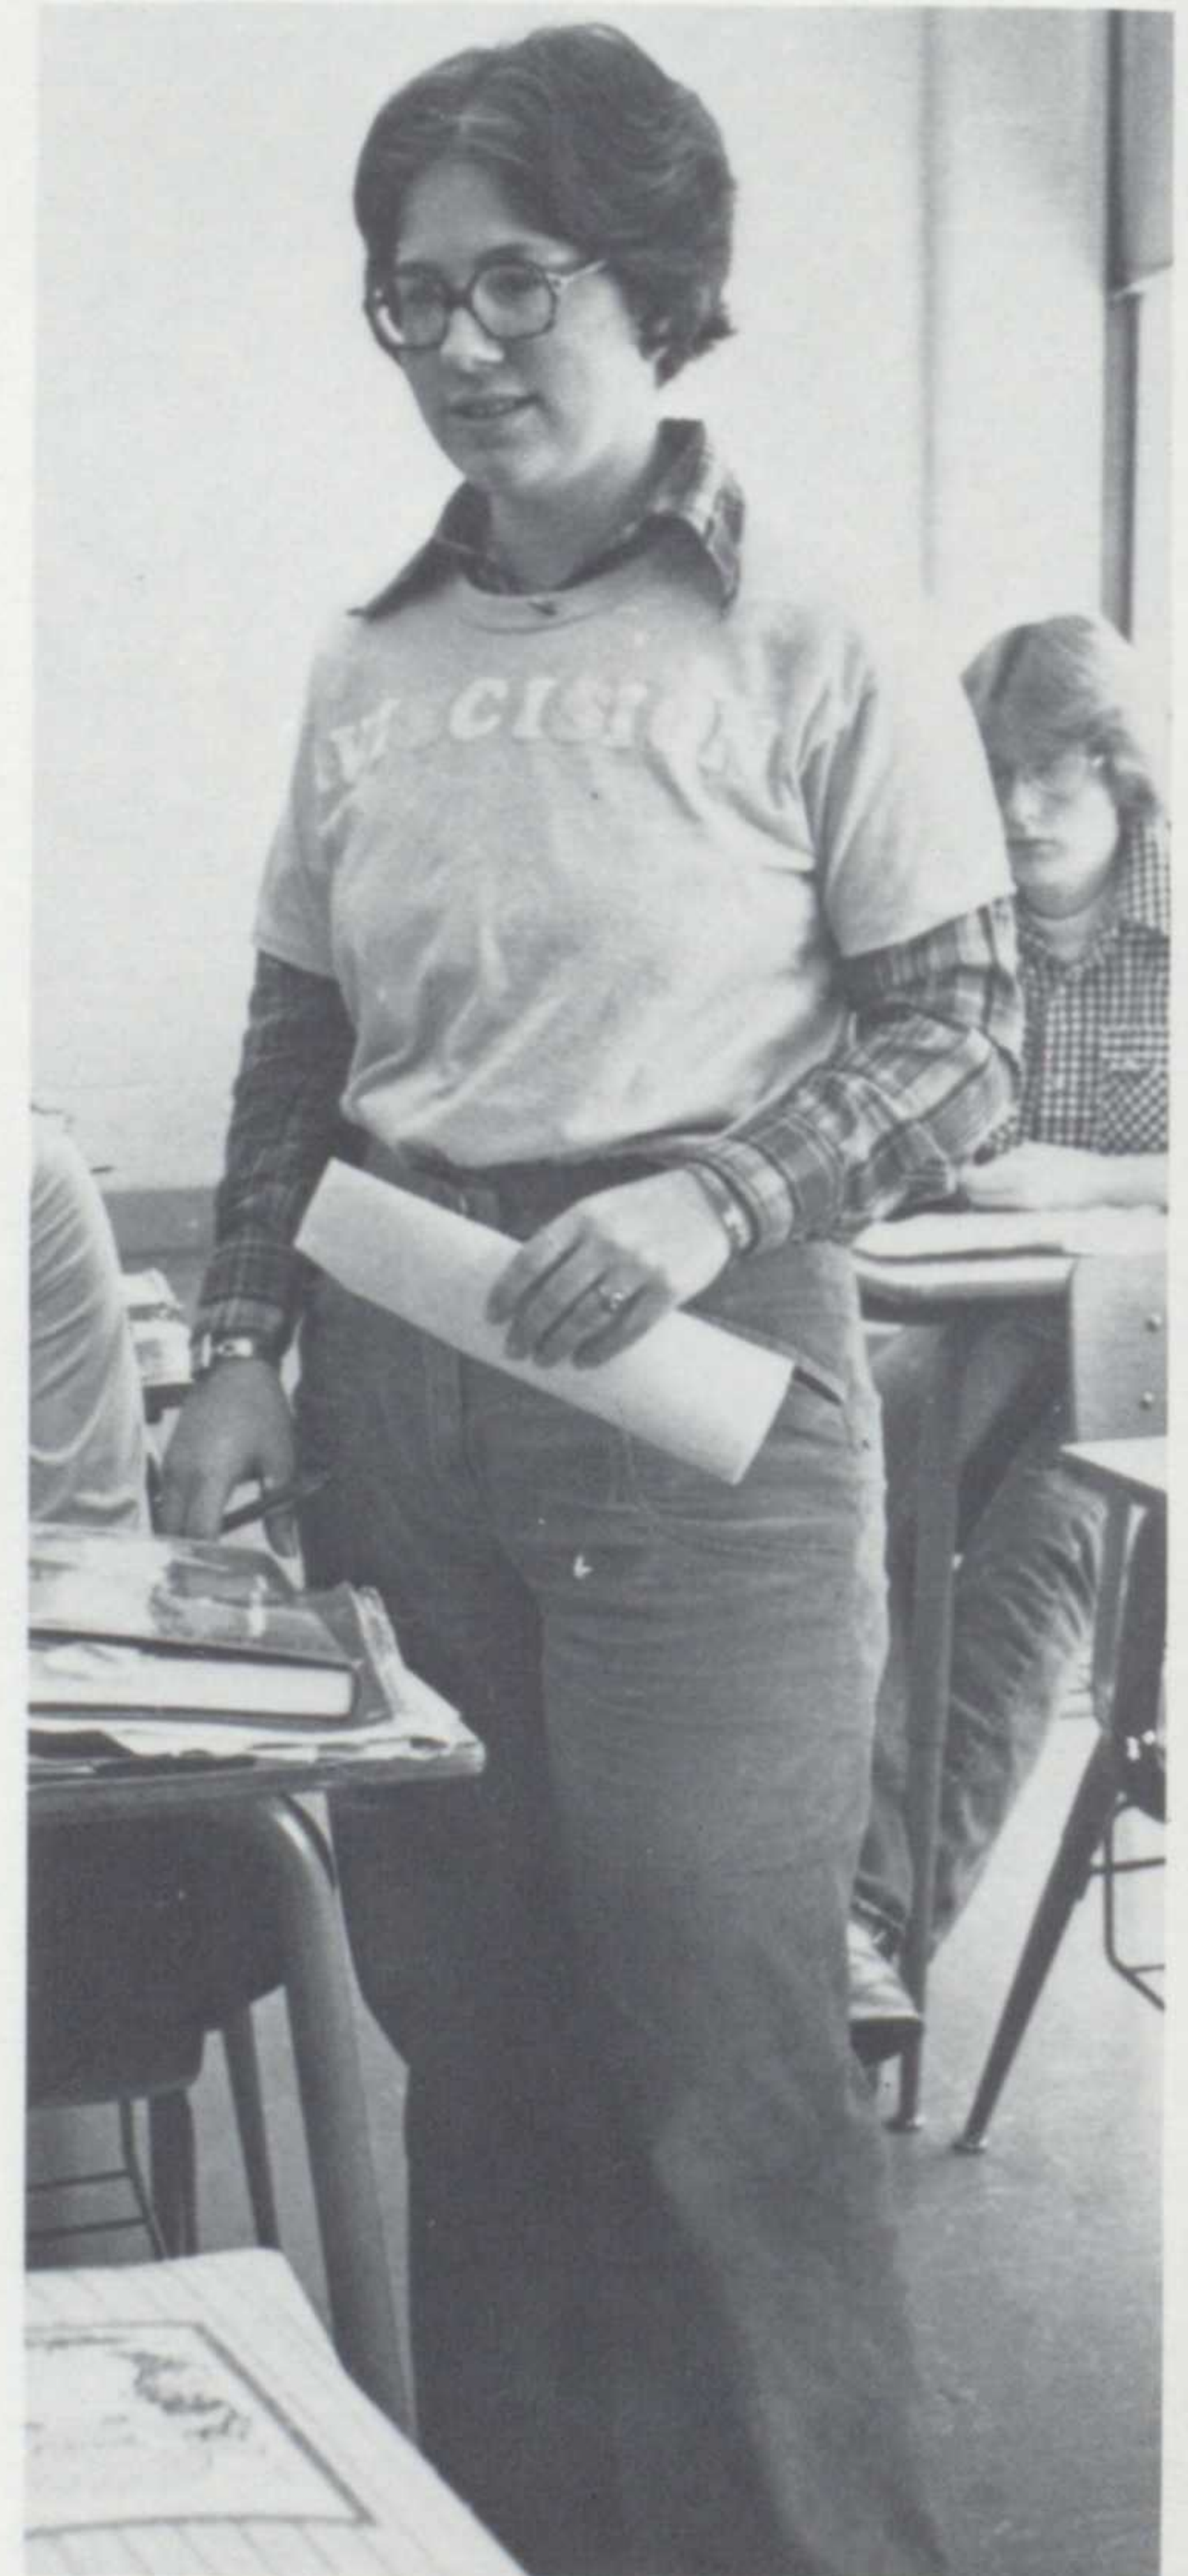

—J. Heiser

—J. Heiser

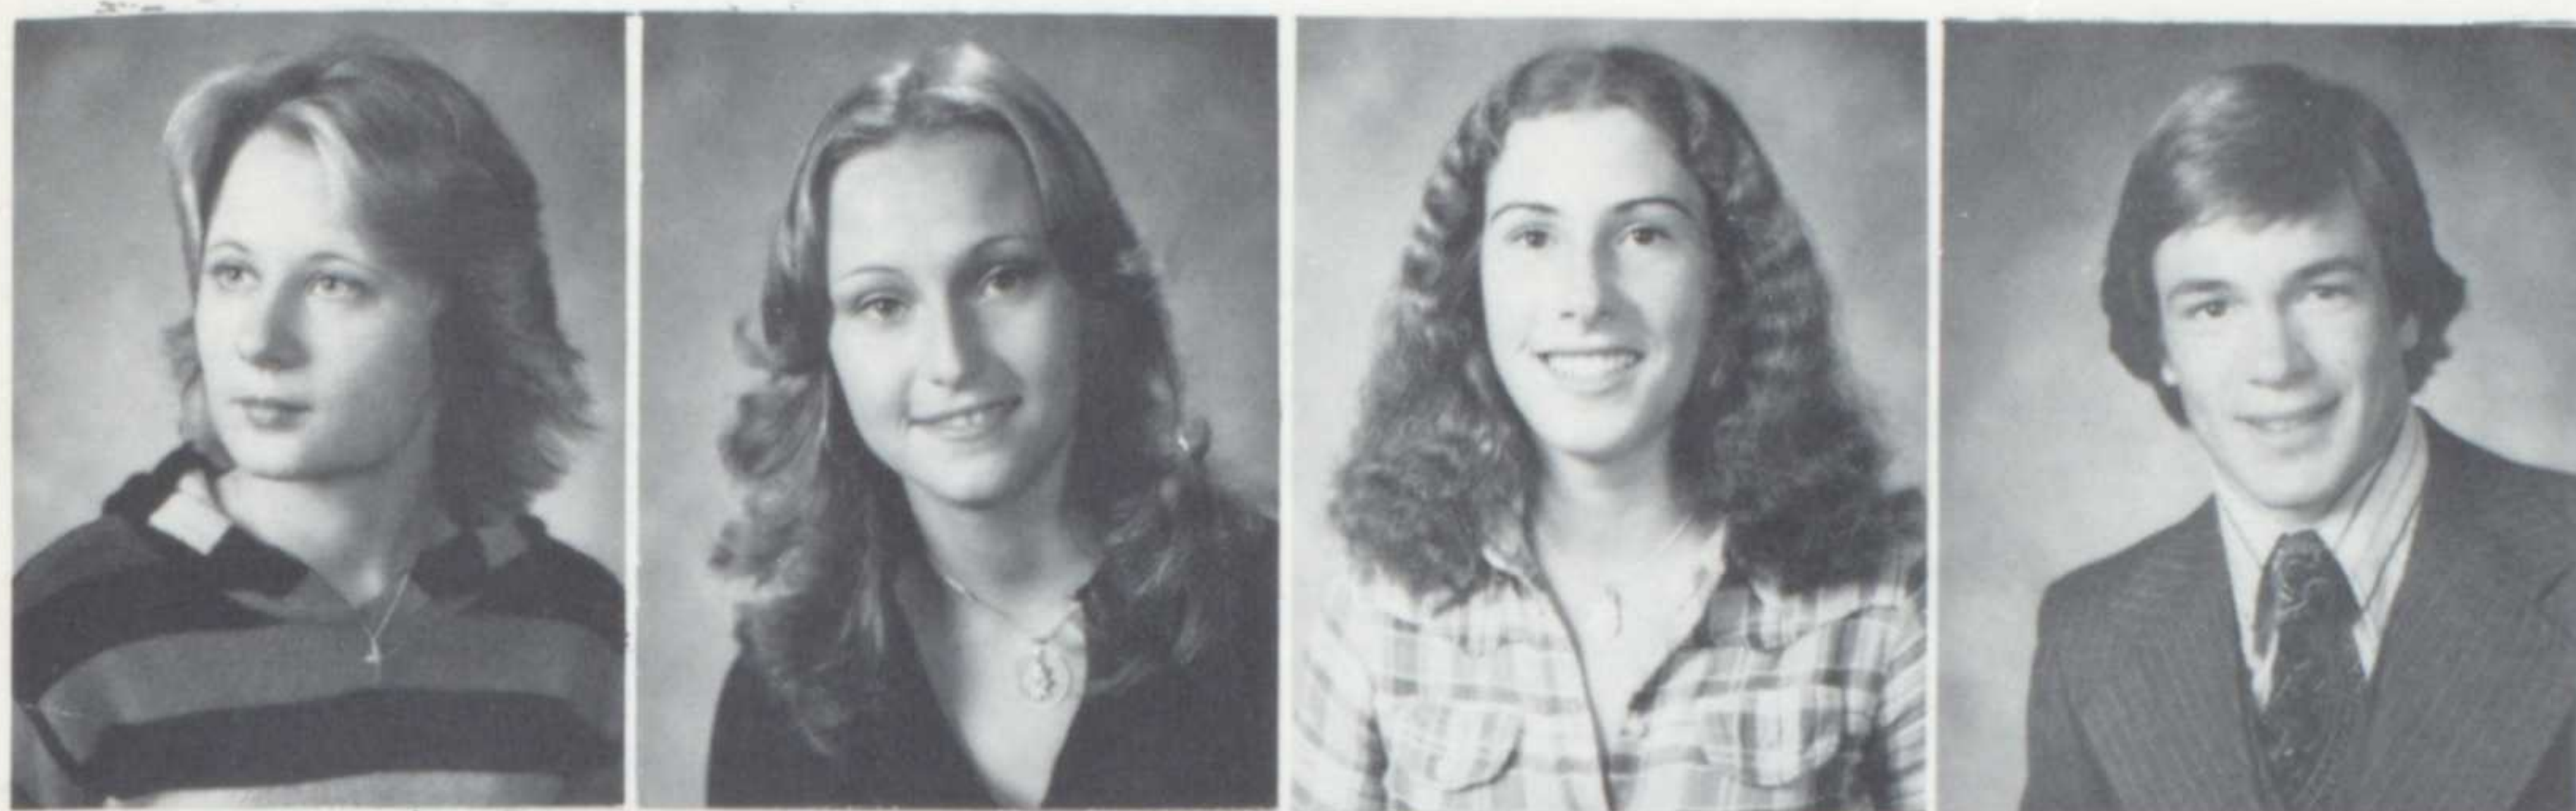

An achievement unique among all others, Gay White stated, "My major accomplishment during high school? Inventing and promoting my word, aviscision."

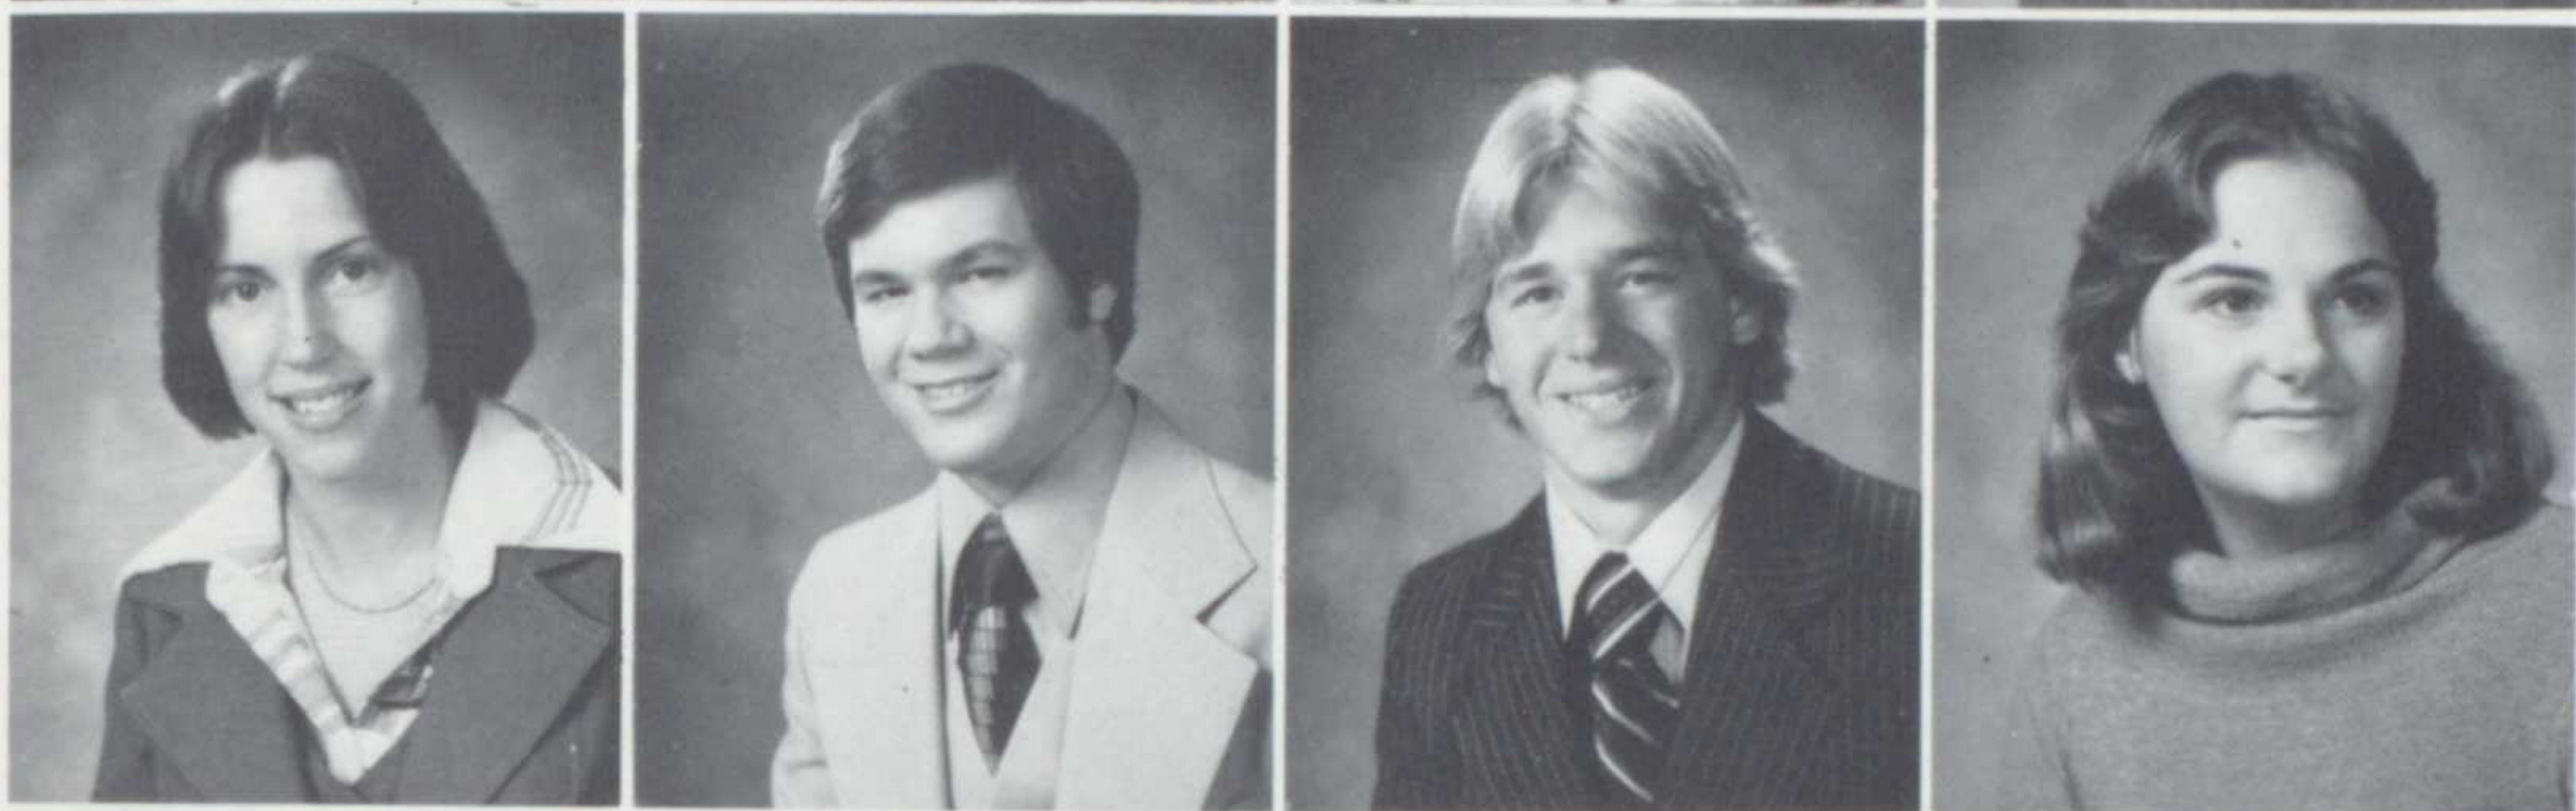

—J. Heiser

New skills rank high on Andrea Auman's list of accomplishments. "One thing I accomplished in high school was learning how to sew."

# What made it special?

The four years between the first day of school as a freshman and graduation as a senior were not spent exclusively at school. The special times that some students remember about those four years took place while participating in various activities away from the school, as well as during a normal 8:00 to 3:08 school day. A camping trip or football game might have been one senior's best experience, while another student's happiest memories may be of the many organizations they participated in. ■

*"The people I met and the things I did; the activities and things I supported made high school special for me." Linda Schultz also felt, "Hockey was good for me. I got to know people instead of just meeting them on the surface."*

*"I tried to have a good time all the time," stated senior Valerie Hogan, "because I realized that what was happening never would happen again. It was always neat to me to go to a sports event and know the people who were participating. The whole trend for me during the four years was a growing up process."*

—J. Heiser

*Friendly games of football, baseball, or basketball make up some of Scott Saccany's fondest memories.*

*"The Turkey Bowl game, played annually against "Security" behind Westerly School was the biggest game of the season. Due to the quickness of our team, we won in the last few seconds; our second victory in three years of Turkey Bowls."*

*"This past summer before my senior year was the best for me," remembers John Gross. "Dave Dye, Pete Horning, Mark Fedor and I went camping Labor Day weekend, out by Put-in-Bay. The fact that our Hot Stove baseball team won the state championship also made it special for me."*

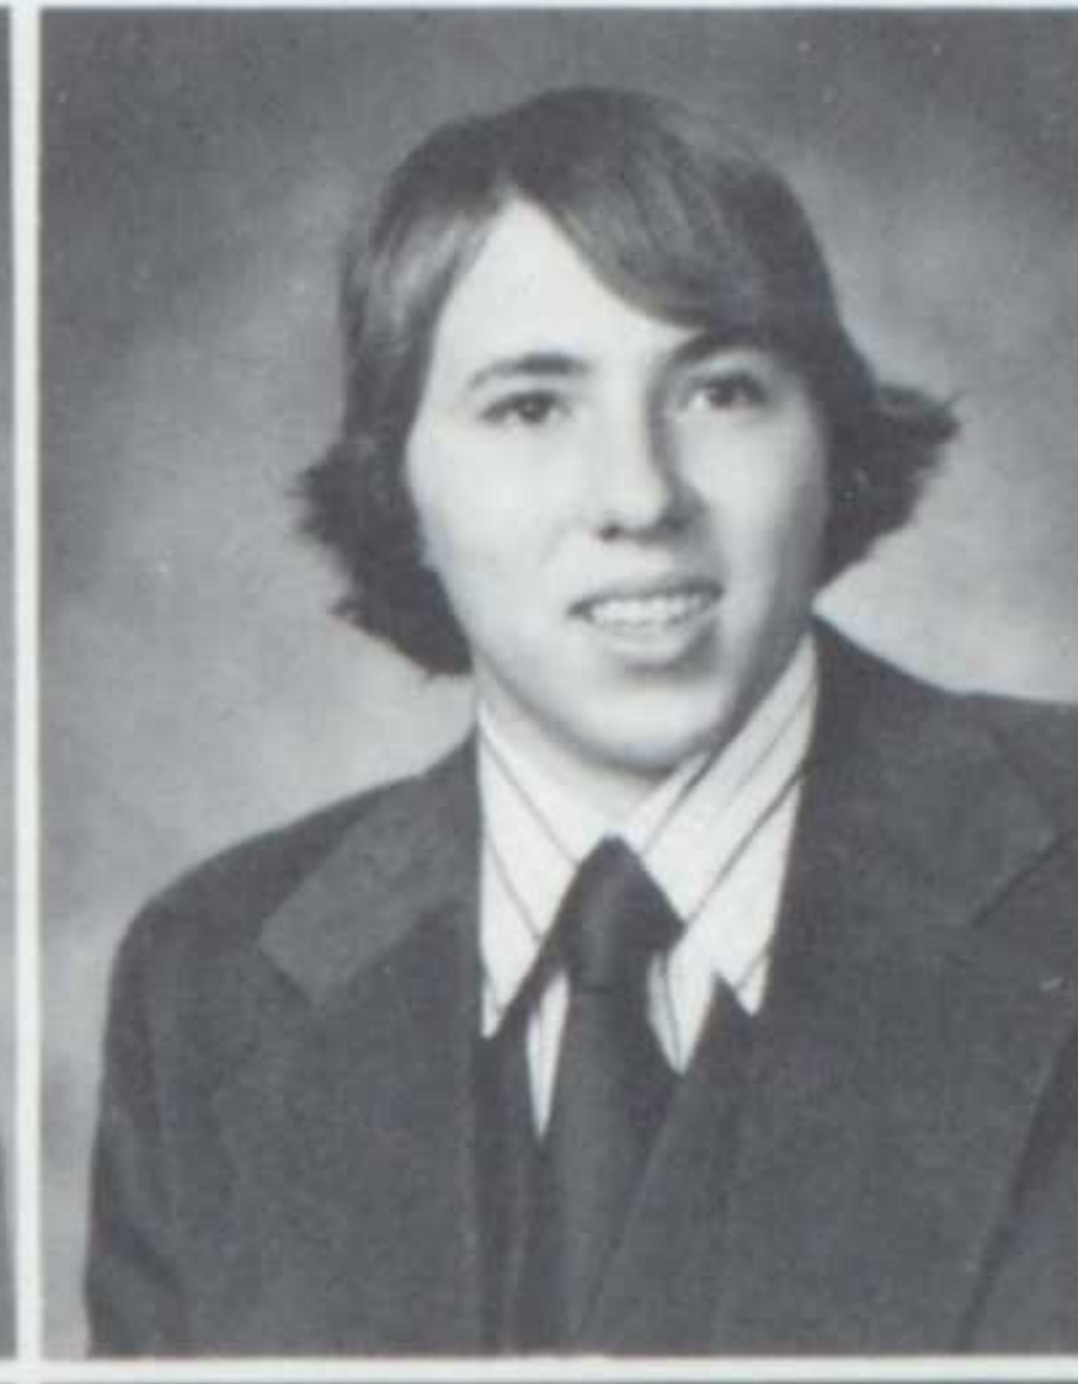

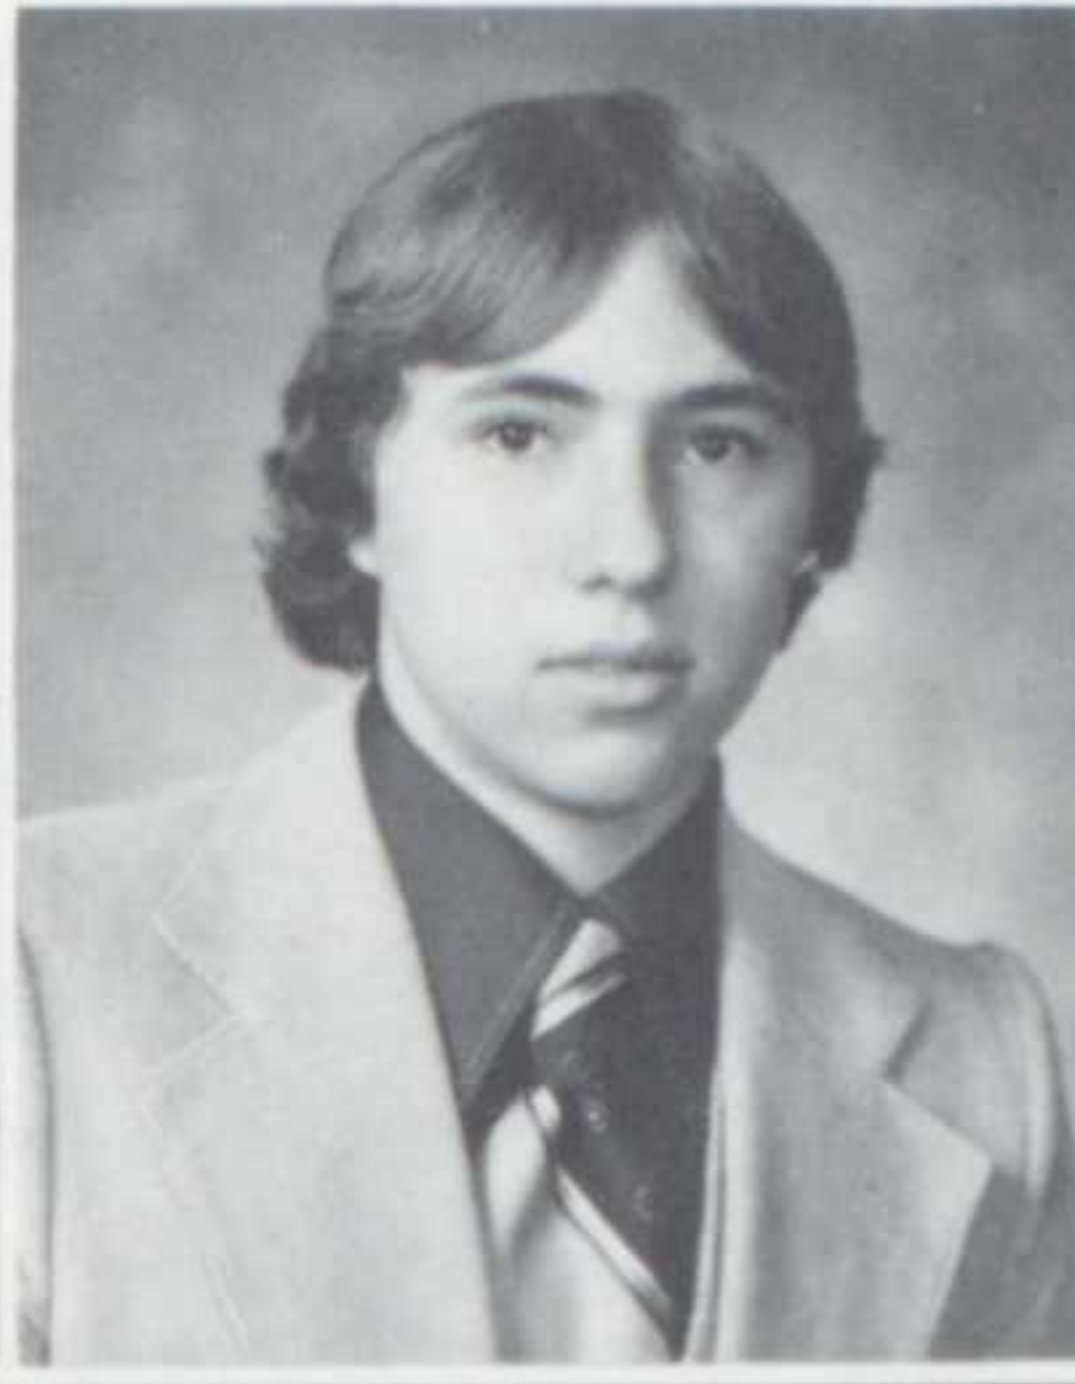

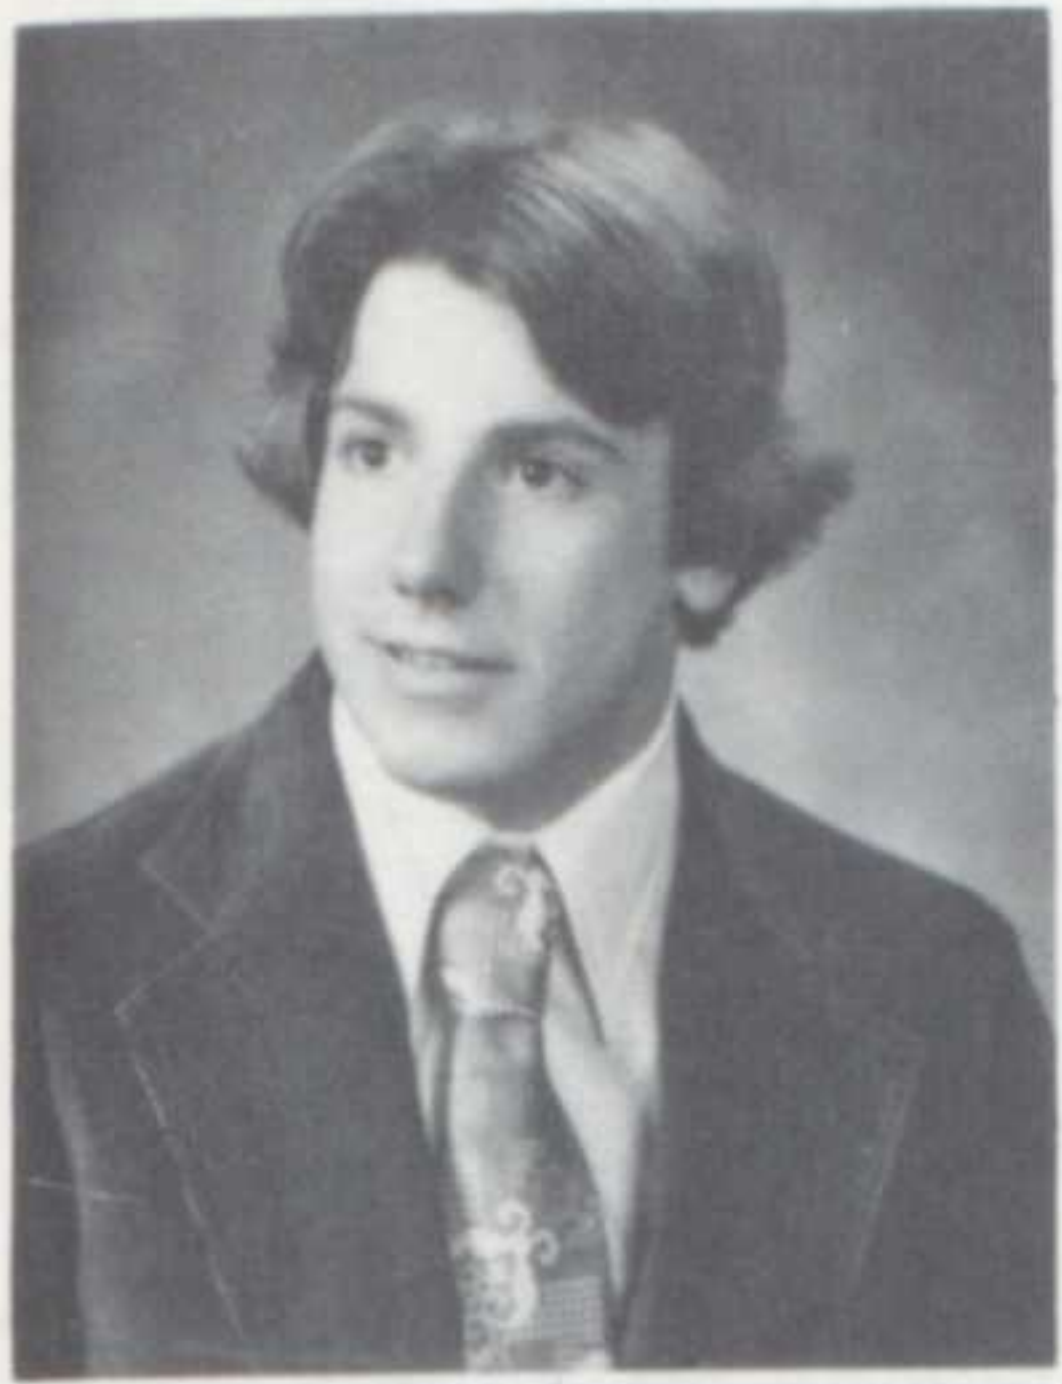

*"After game dances when I was a freshman and sophomore, skeeching and partying were all fun", commented Bonnie Bucher. "Math classes with Mr. Herron were special too."*

# What's fun?

**F**un is in the eyes of the beholder. In other words, fun is relative. To one person anything less thrilling than sky diving is no fun; while to another, fun may be anything more exciting than a cold.

According to senior John Crook, "To have real fun, you have to leave Bay, ski in New York, or go camping with a bunch of guys. To have a good time in Bay, we have to make our own fun, usually starting with parties."

Fun is not limited to extracurricular activities however; many seniors admitted that Bay High had its moments. The library, gym corridor and even the cafeteria have been the scenes of much hilarity.

# Not as boring continued

Class of '78  
earned a reputation  
of its own

Friday's Bay Window provides a second period smile for Joanne Tornatzky.

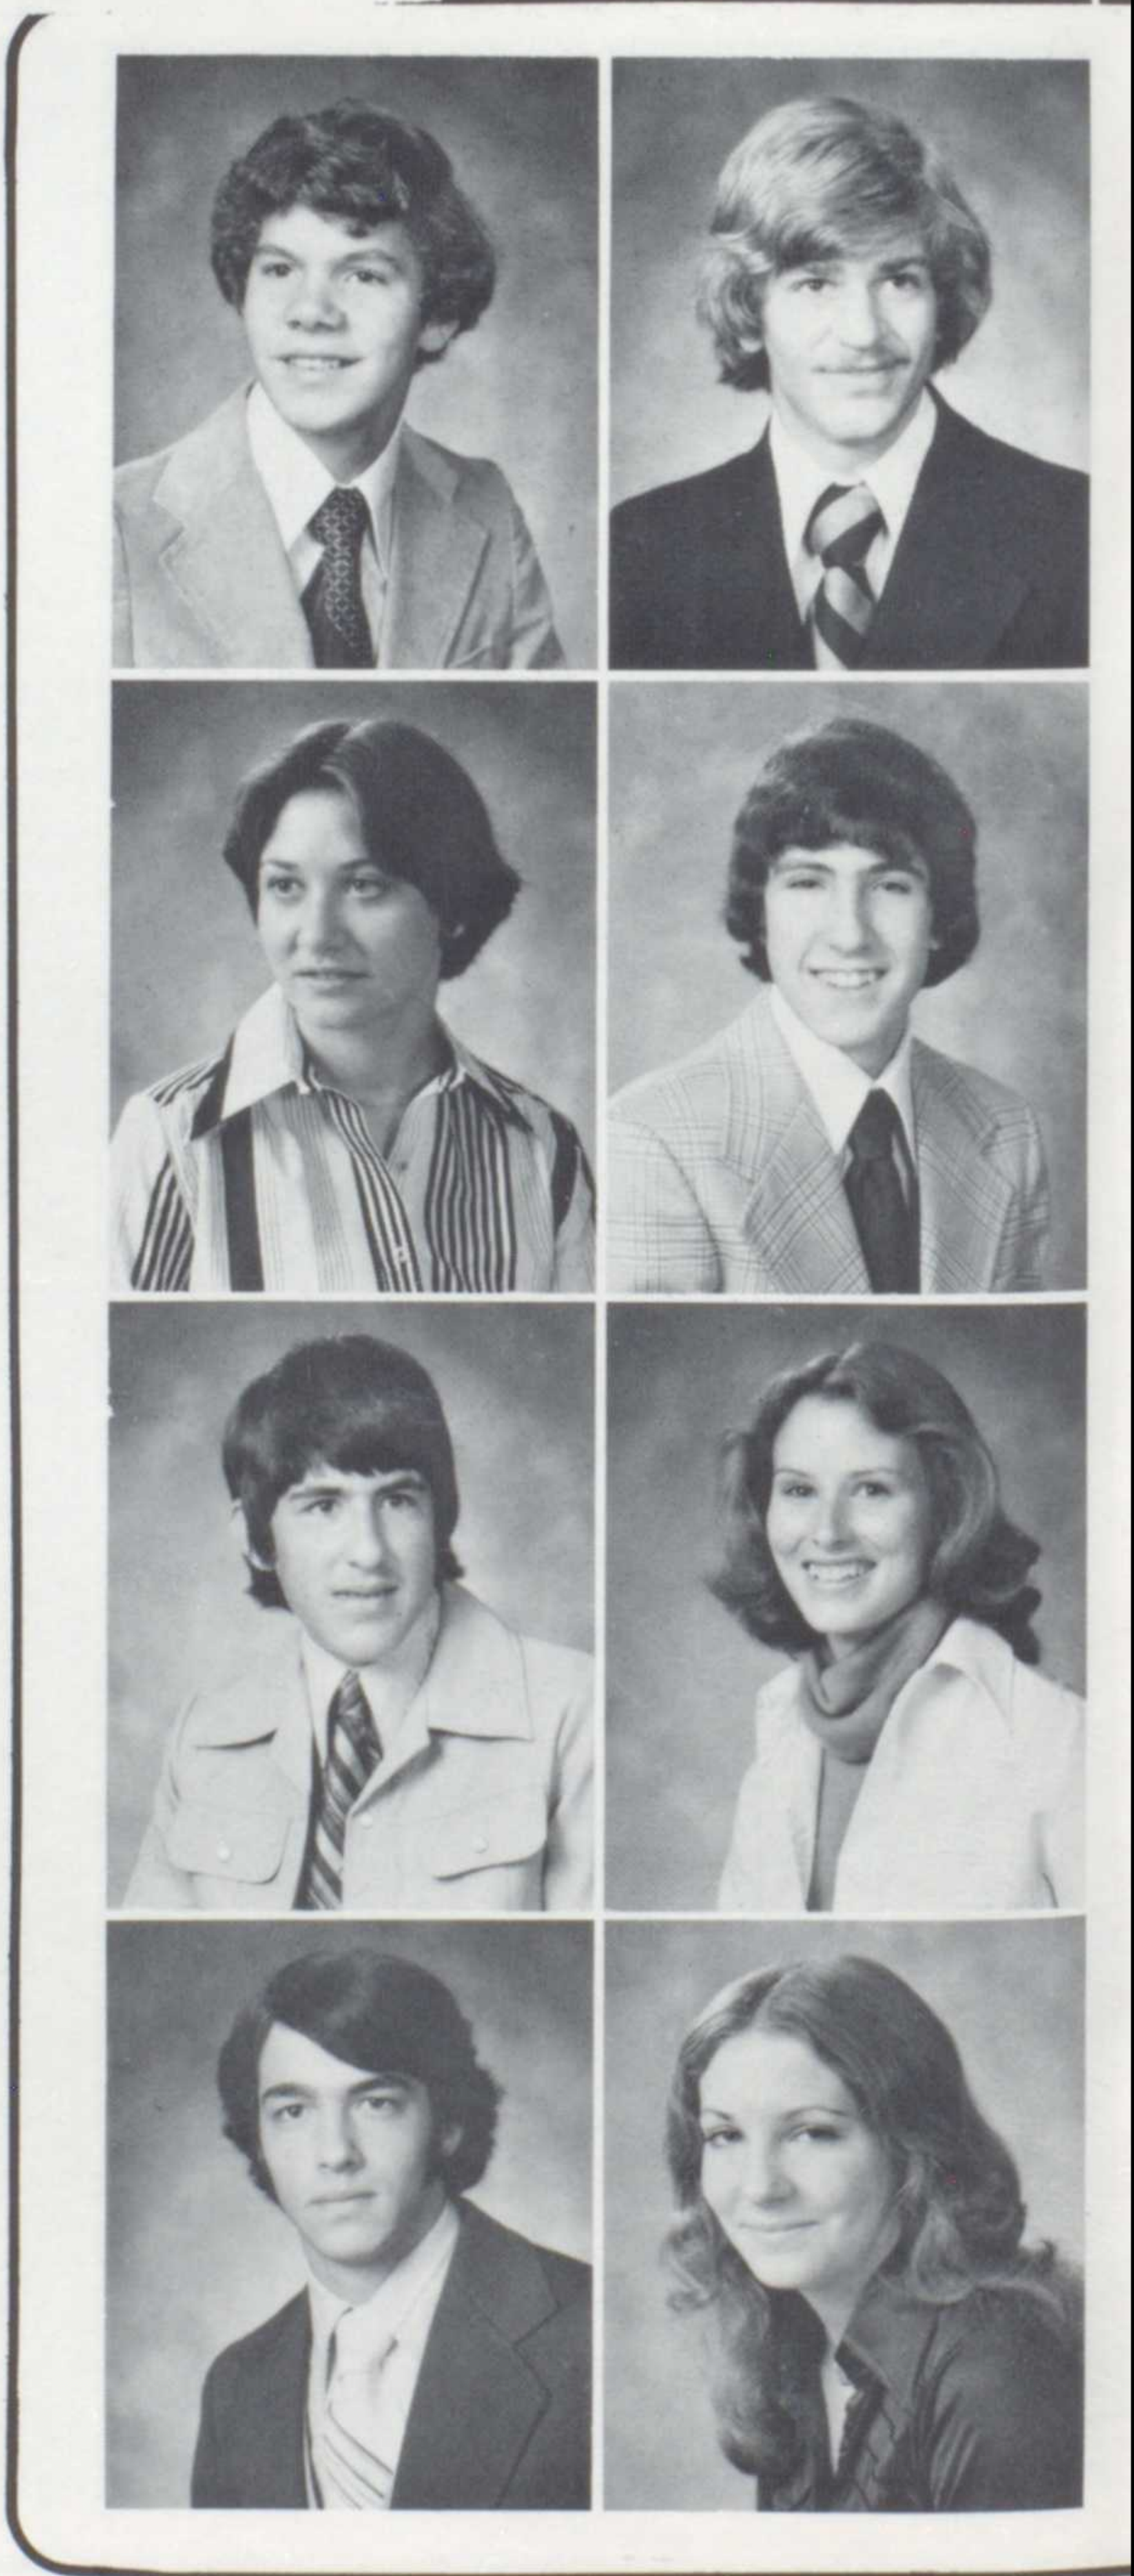

—J. Heiser

—J. Heiser

An ear-to-ear grin reflects John Steward's satisfaction on being named as a National Merit Semi-finalist.

—S. Ormsby

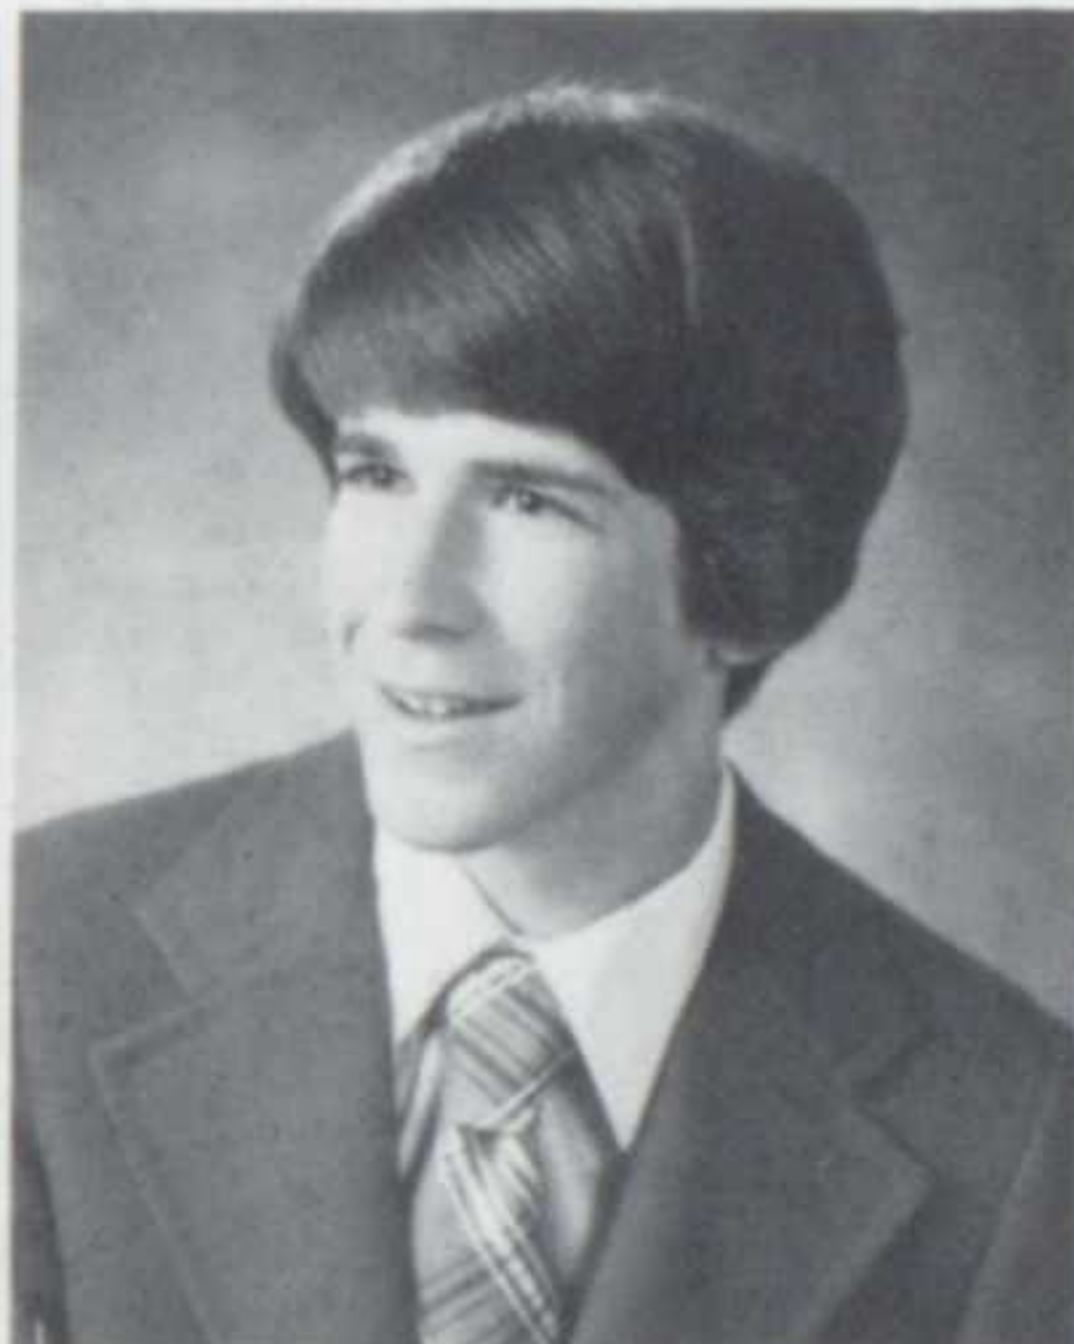

All right, so maybe we aren't as boring as we used to be. What's so interesting about this class then? Overshadowed by the "spirited", "intelligent" and "highly motivated" class of '77, the class of '78 seemed to have a difficult act to follow in making a name for themselves.

Each senior class is different though, and the senior class of '78 has its own strengths. Senior counselor Mrs. B. J. Hull said of the class of '78:

**The University of Toledo** supplies Liz Catone with information on their campus and curriculum. Liz is interested in majoring in theater.

"There is more diversity this year, and more widespread interest in different areas. Academically, overall, it is a strong class. Most of all I would say it is more cosmopolitan, or sophisticated, in its interest in higher education. I have never seen a class have such an interest in higher education, or be so knowledgeable about it. And I'm not just talking about the top students!"

A special class in its own way then, the class of '78 will be known for its academic depth rather than for a few outstanding students.

## Senior girls give sports a boost —J. Heiser

**In action,** Laura DuPerow runs ten laps to keep in shape for the girls' basketball team. Laura has been on the varsity team for three years.

**On the way back** from an afternoon run along Lake Rd., Gail Christofferson treks through the ice and snow.

—J. Heiser

One of the major contributions the class of '78 made during its four year visit at Bay High was in the area of girl's sports. The volleyball, basketball, track and swim teams all benefited from the talents of the seniors.

In the spring of '75, Mr. Joe Knap became coach of the girls' track team and turned their losing record around. The team was made up largely of freshman girls, including super runners Gail Christofferson and Sally Rush.

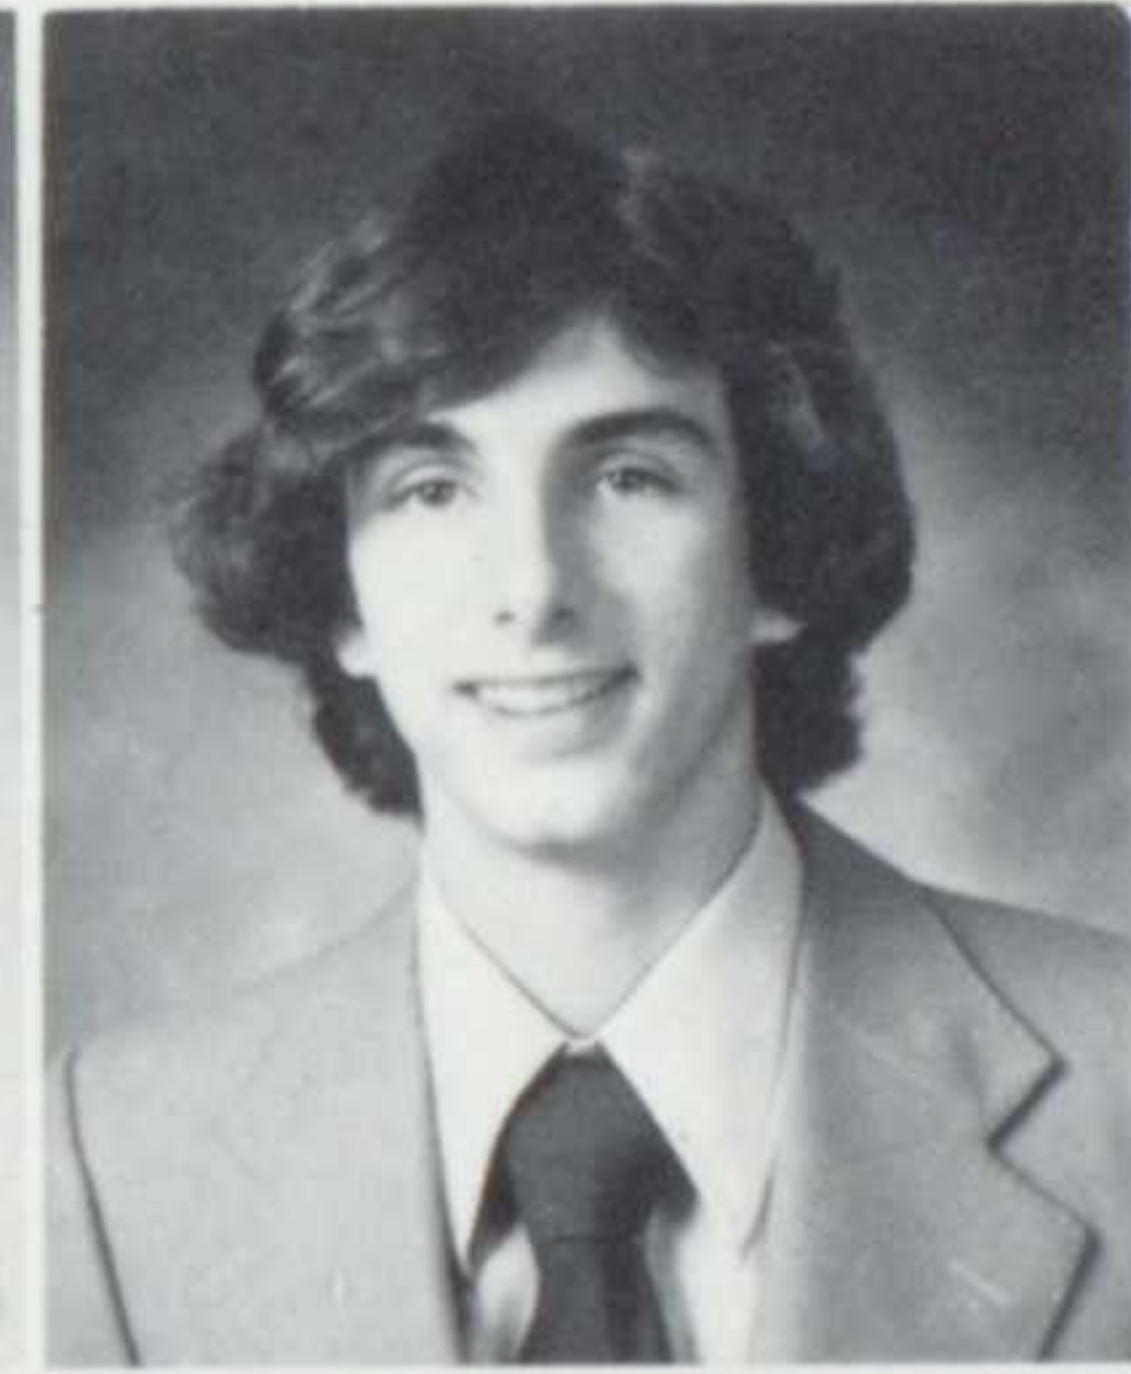

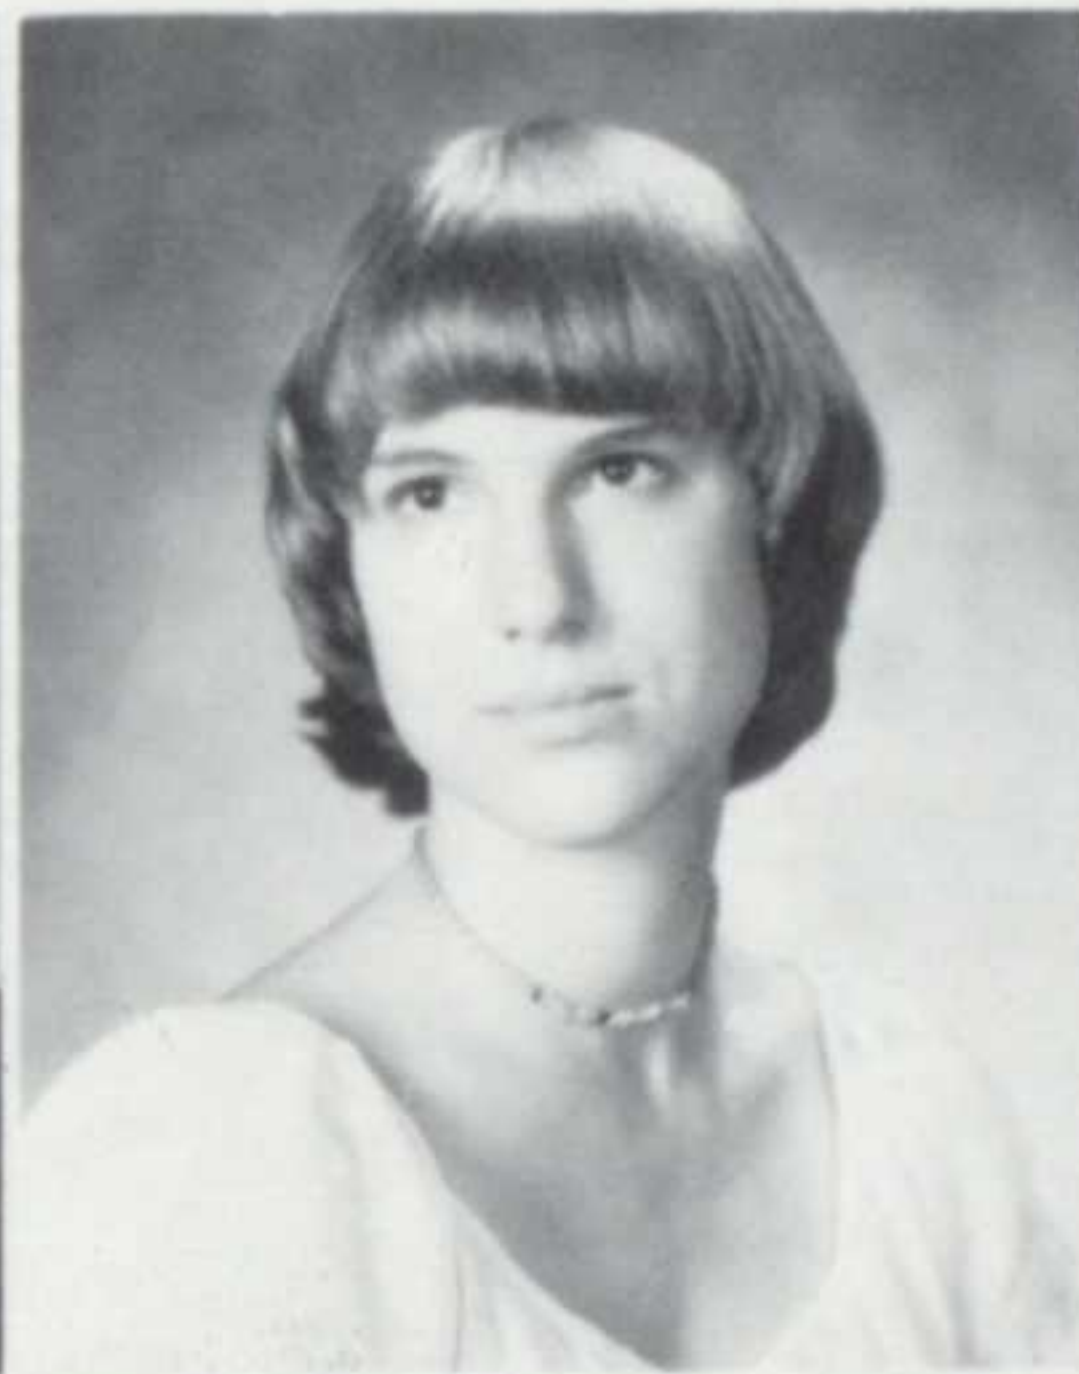

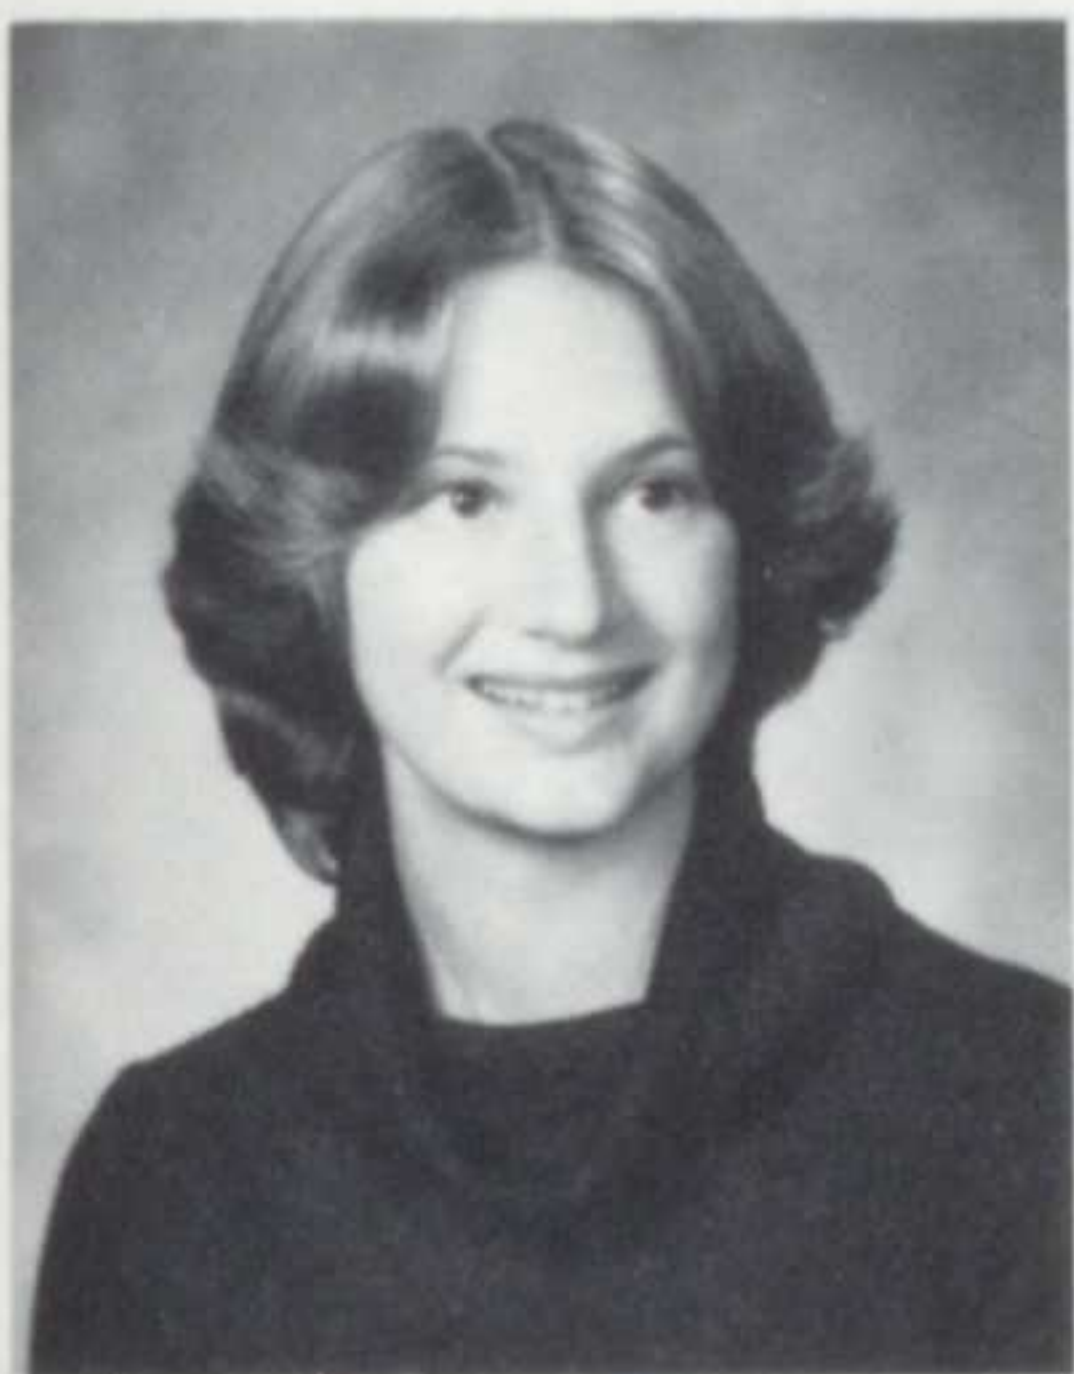

Bay High also boasted an excellent

girls' varsity basketball team. Led by high scorers Julie Seed, Laura DuPerow, and Judy Liberatore, this team won almost everything in sight during their 77-78 season.

The girl's swim team also got a boost from the participation of several senior girls, including breast-stroker Jodee Janda.

The class of '78 was dedicated in many areas and to many different activities, but one of the areas where it really shone has to be girl's sports. ■

HELP WANTED

EDUCATIONAL

HELP WANTED

EDUCATIONAL

Mr. Wilmot

—J. Heiser

### BOARD MEMBERS

Four responsible and knowledgeable individuals capable of setting definite policies for the education program in Bay Village. Accountable for organizing the selection of teachers to be on the public school staff. Also required to hire the superintendent and evaluate his work throughout the term of office.

(For instance, must support all results to the Board of Education involving the operation of the various administrative units.)

Members will have to act as a sieve for problems posed by the community. This encompasses both student and adult questions that relate to the school's procedures on teaching, athletics, textbooks, budgeting, weather conditions, etc. Thus, it is necessary that Board members keep up with all current events within the area. Efficiency is needed to adjust salaries and suspend or dismiss personnel for just cause.

Mr. Jamison

—J. Heiser

Ms. Graske

—J. Heiser

### CLERK-TREASURER

Male or female needed to hold position as clerk-treasurer for the Board of Education in Bay Village. Must have experience and knowledge in the field of accounting and auditing. Should have complete understanding of municipal fund accounting procedures as detailed by the State of Ohio. Duties would include complete pecuniary procedures: Payroll investments, general ledgers, financial statements and year-end closings. Will be responsible to keep records for the Board of Education.

school in Bay Village. Coordinates Physical Education program K-12 and supervises high school attendance record keeping. This person must be responsible to the building principal. Will also serve as chairman and secretary of Athletic Council and represents the Athletic Department on the High School Advisory Council. Prepares all athletic budgets and budget reports and delegates the keeping of all athletic financial records.

**FILLED**

**FILLED**

### SUPERINTENDENT

An experienced person capable of administering the planning and evaluation of the total operation of the school system. Chief executive officer of the Board of Education in its control of the schools and other facilities and activities under its control. Has over-all responsibility for supervising the school's administration.

Mr. Mengert

—J. Heiser

liability for physical plant and activities within the school. This person should be aware of duties needed to maintain good communications to community, such as interpretation of school policy. Prepare reports or provide high school personnel for special programs on local groups. Make recommendations necessary on special programs and graduation requirements as shown by Board Policy and minimum standards of State Department of Education. Finally, perform other duties assigned by superintendent of schools or his chosen representative. Must like teenagers!

Dr. Bauer

# More than just the faculty

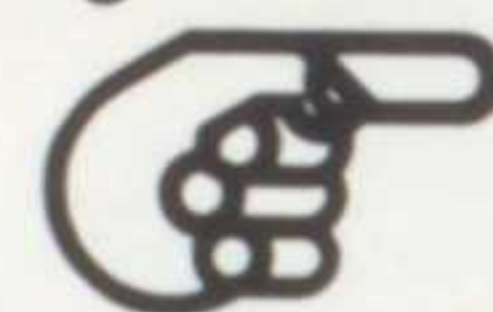

Hey!  
you look  
familiar

**W**ho would have thought that the teachers of Bay High led lives much like ours? In fact, we even have some that participated in extra-curricular activities during their four years of high school.

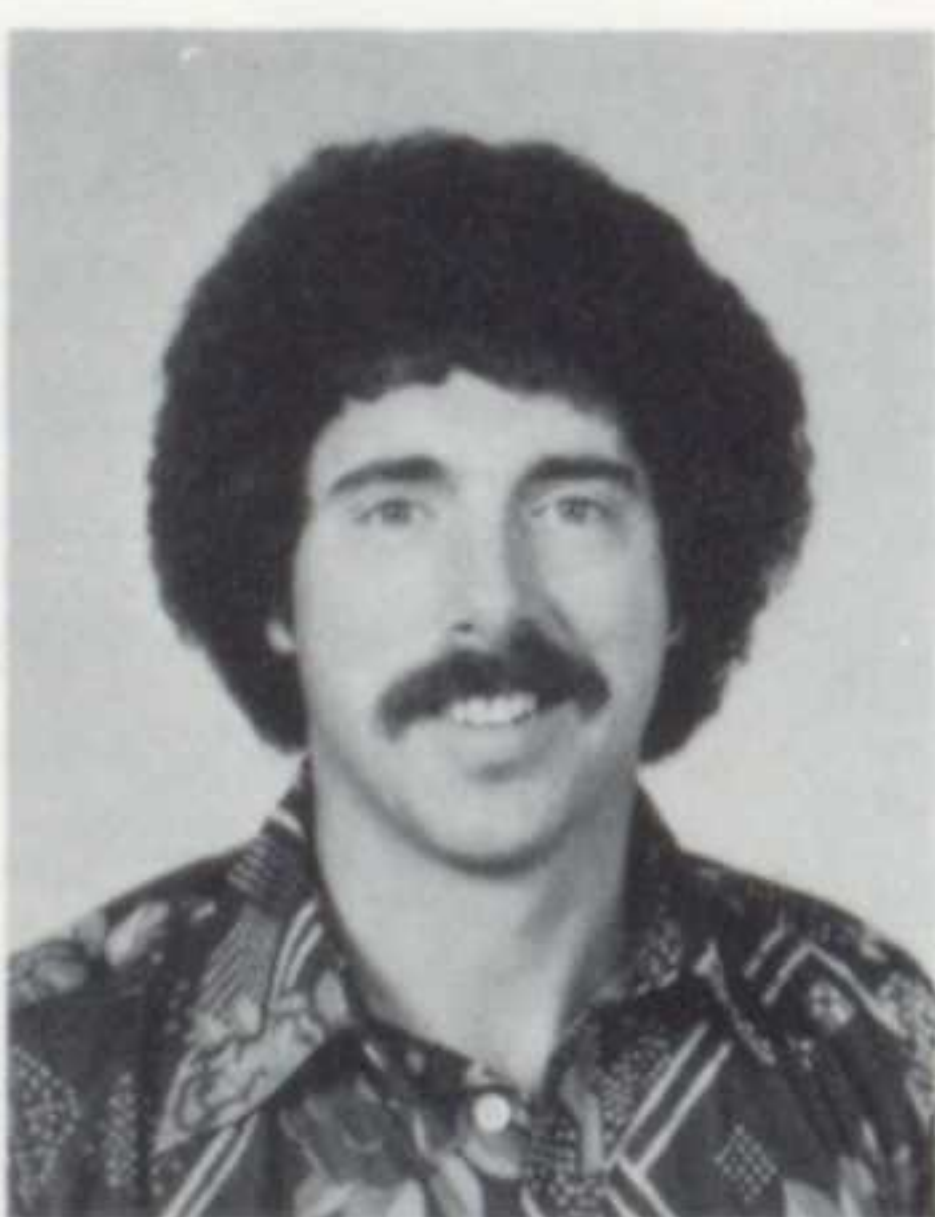

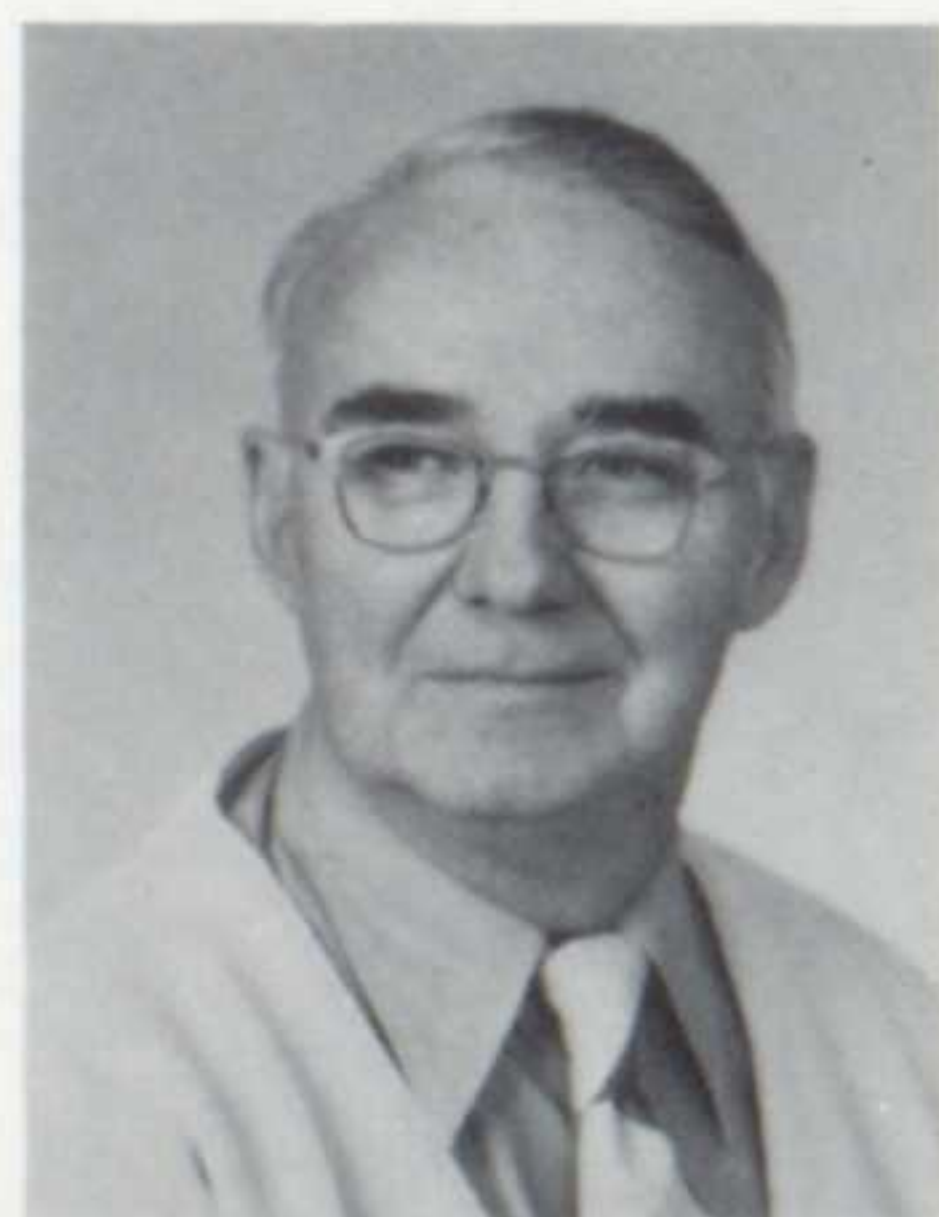

In most cases, the activities turned out to be as unique as the teachers themselves. Mr. Billman played guitar for a group called "The Amen".

"In the eighth grade I performed at one of our school assemblies. This was the period of time during the "Elvis rage" and I can remember playing one of his songs; "Hounddog," recalls Mr. Billman.

Along with the memories of the past, there are also those cherished moments with children that will never be forgotten.

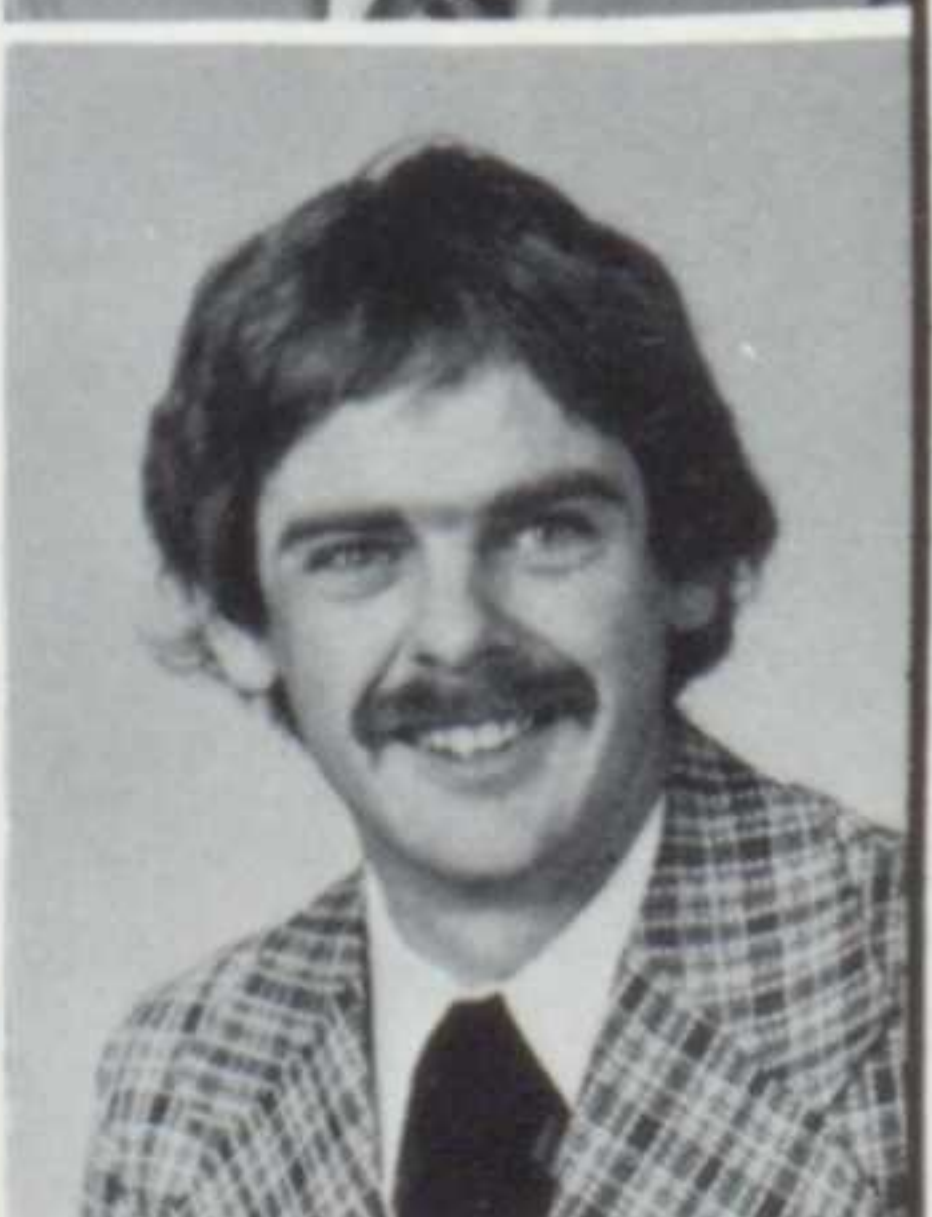

**Mr. Adams:** Alg. Trig., Alg. III, Math Anal.  
**Mr. Adler:** O.W.E. **Mr. App:** Chem. SM, Physical Science, Frosh Soccer Coach. **Mr. Assenheimer:** Expos. Para., Steinbeck, Arm. Adven., Death Pers., Poe Tales, Eng. I, Asst. Varsity Football Coach. **Ms. Backstrom:** Child Development, Clothing I, II, and III.

**Mr. Billman:** Grt. Books, Write Lit., Grammar, Md. Amer. Novel, Sat. Movies, Read. Pleas., Coll. Vocab., Expos. Theme, Cinema Shorts., Adv. Placement, European Lit. **Mr. Bobniz:** Earth Science, Science Club Adviser. **Mr. Brandt:** Psych., Social Liv., Amer. Religion, Colonial Amer., U.S. Hist. **Ms. Bush:** Death Pers., Liberated Woman, Group Dynam., Journal. 9-10 and 11, Mass Media. **Mr. Chadwick:** Alg. Trig., Alg. I.

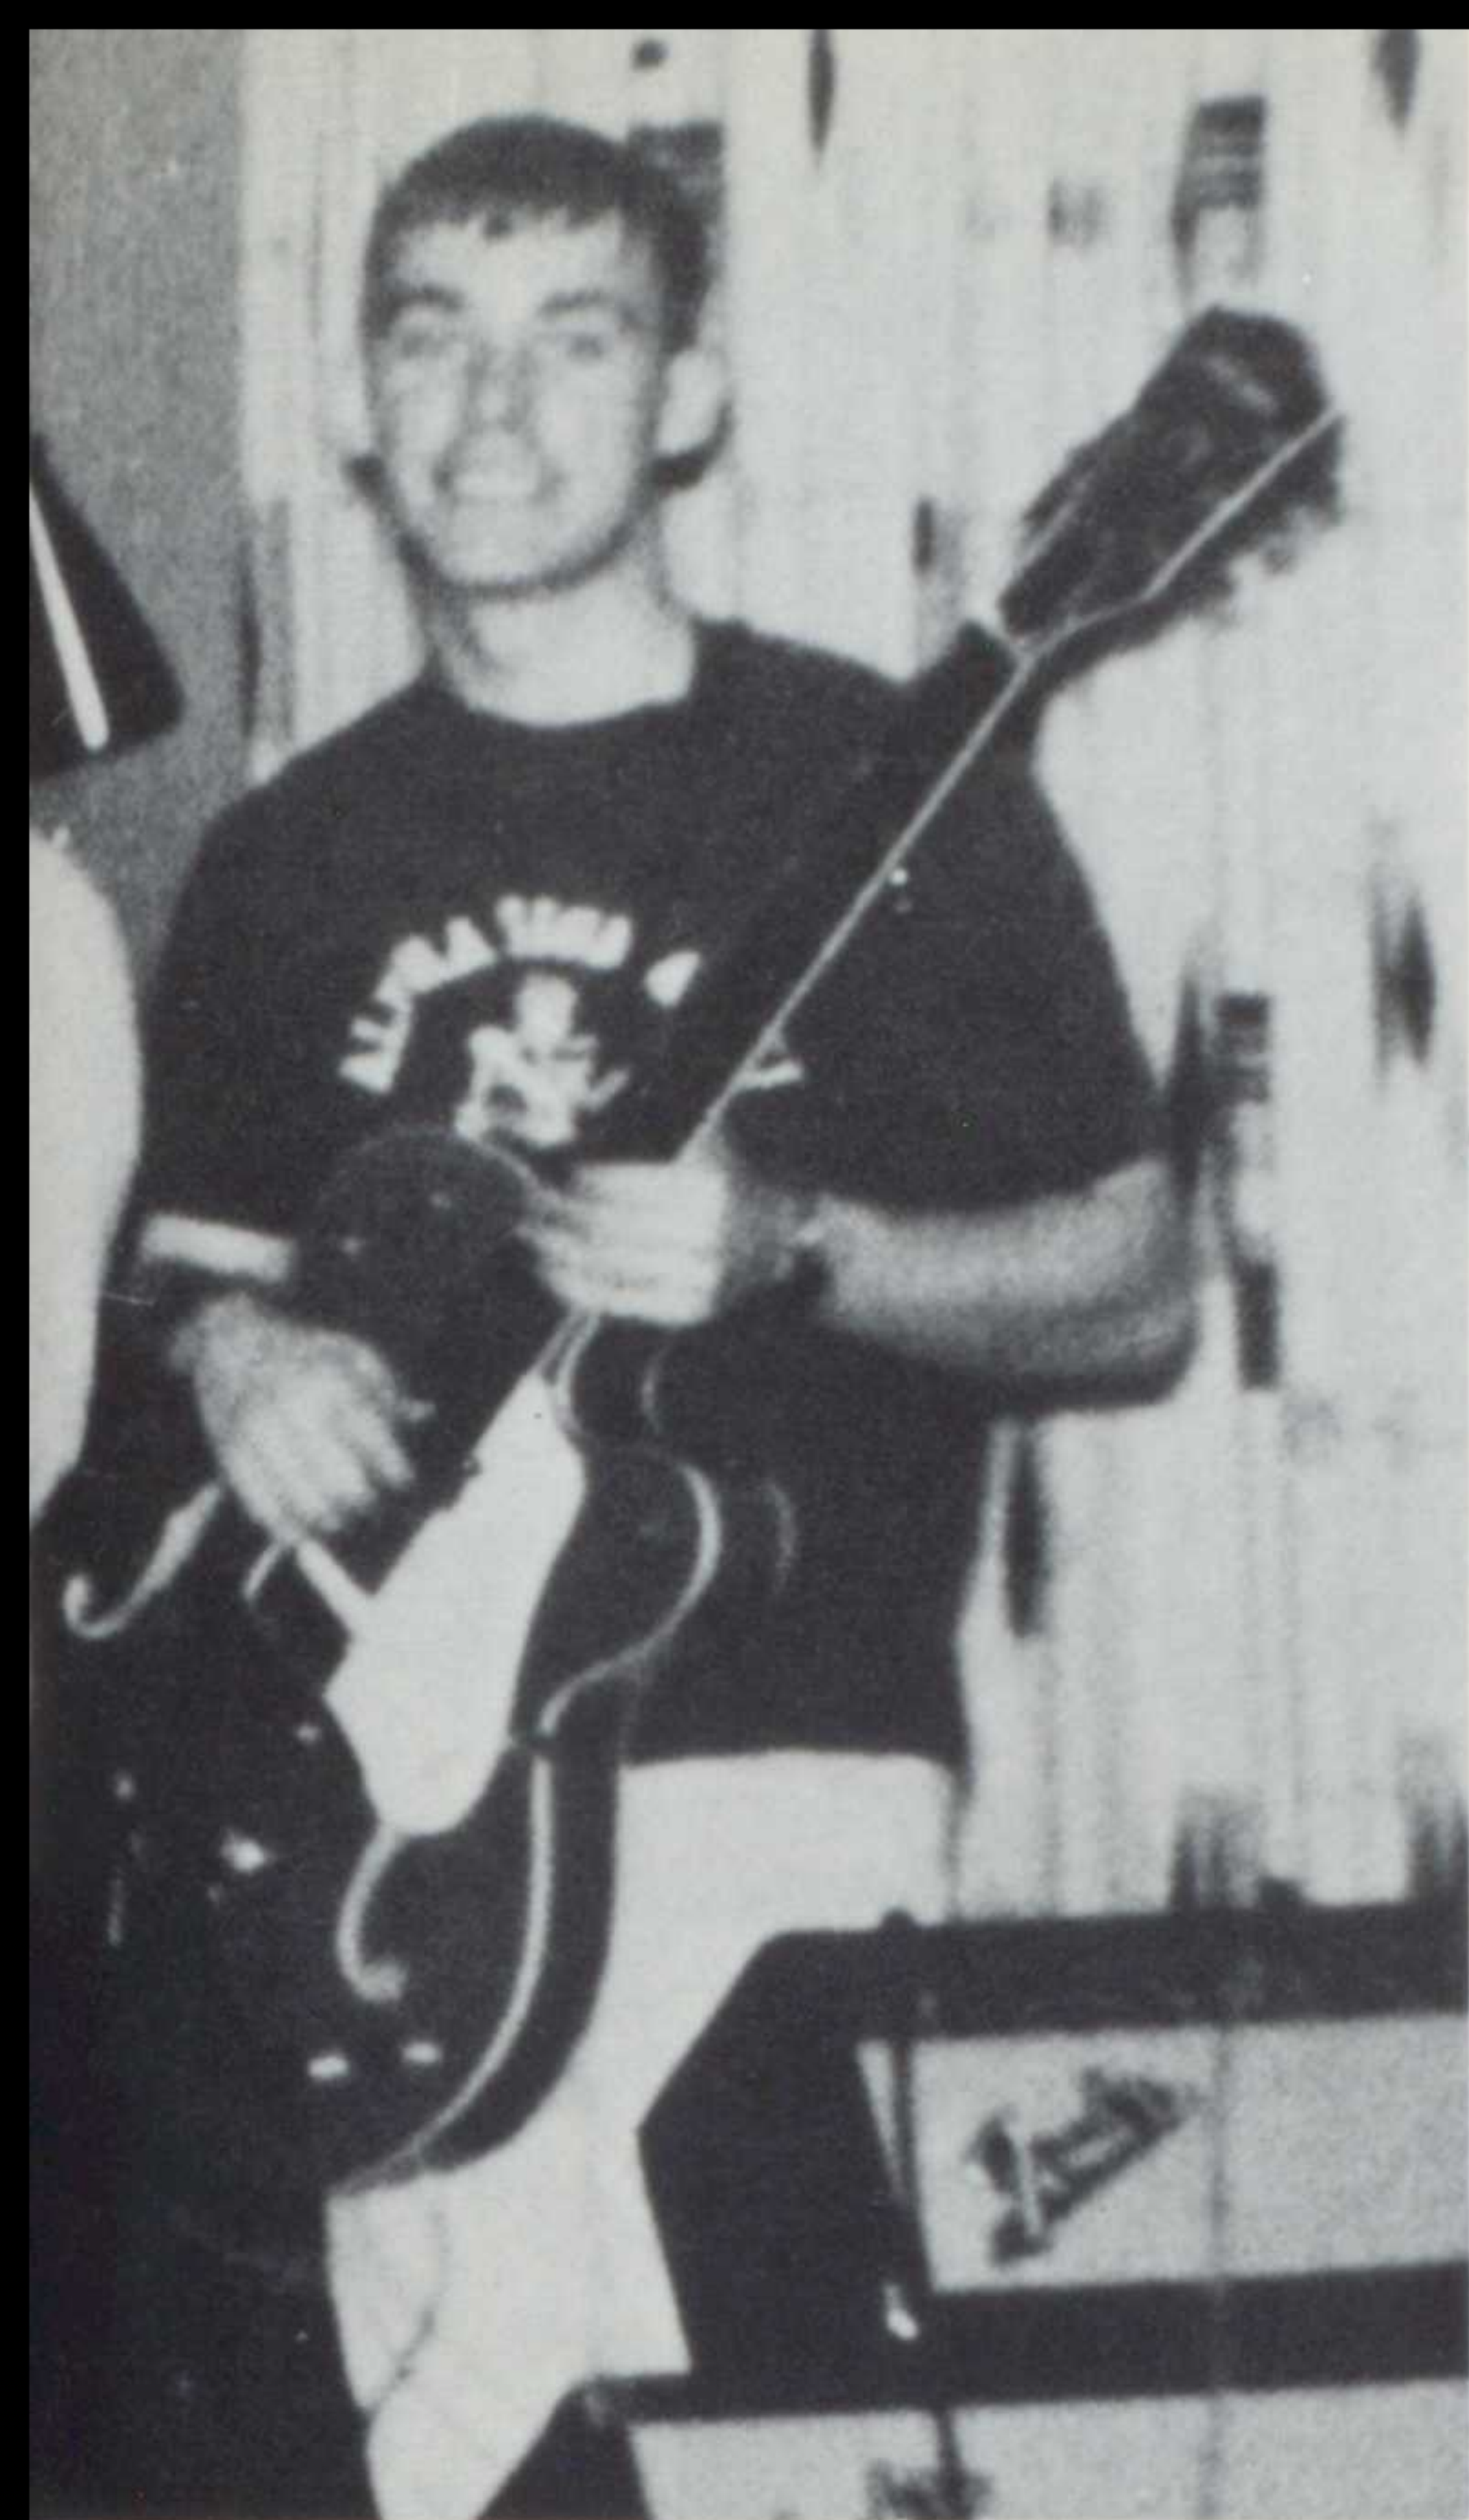

**Ms. Chiabotti:** Health, Archery, Badminton, Sllmastics, Mr. App., Girls Basketball, Bicycling. **Mr. Cook:** Acct., Gen. Bus., Varsity Baseball Coach. **Ms. Coolidge:** Expos. Theme, Growing Up Ain't Easy, Md. Amer. Poets, Reading Pleas., Write Poetry, Adv. Place., Coll. Voc., Yearbook Advisor. **Mr. Crews:** Glee Club, Choir, Cult. Events, Music Apprec., Chorus. **Mr. Day:** Music Theory.

**Ms. Delassus:** Amer. Govt., Create. Nation, Art View of Amer., News and Views. **Mr. Donaldson:** Spanish I, III and IV. **Ms. Frazier:** Everyday Speech, Theatre Hist., Mass Media, Act. I, Group Discussion, Debate I, Short Novel, Act. II and III. **Ms. Garrett:** Expos. Para., Amer. Comedy, Fict. Fantasy, Eng. I, Coll. Voc. **Ms. Gavin:** Math I, Alg. Trig., Alg. II, Kis Club Adviser.

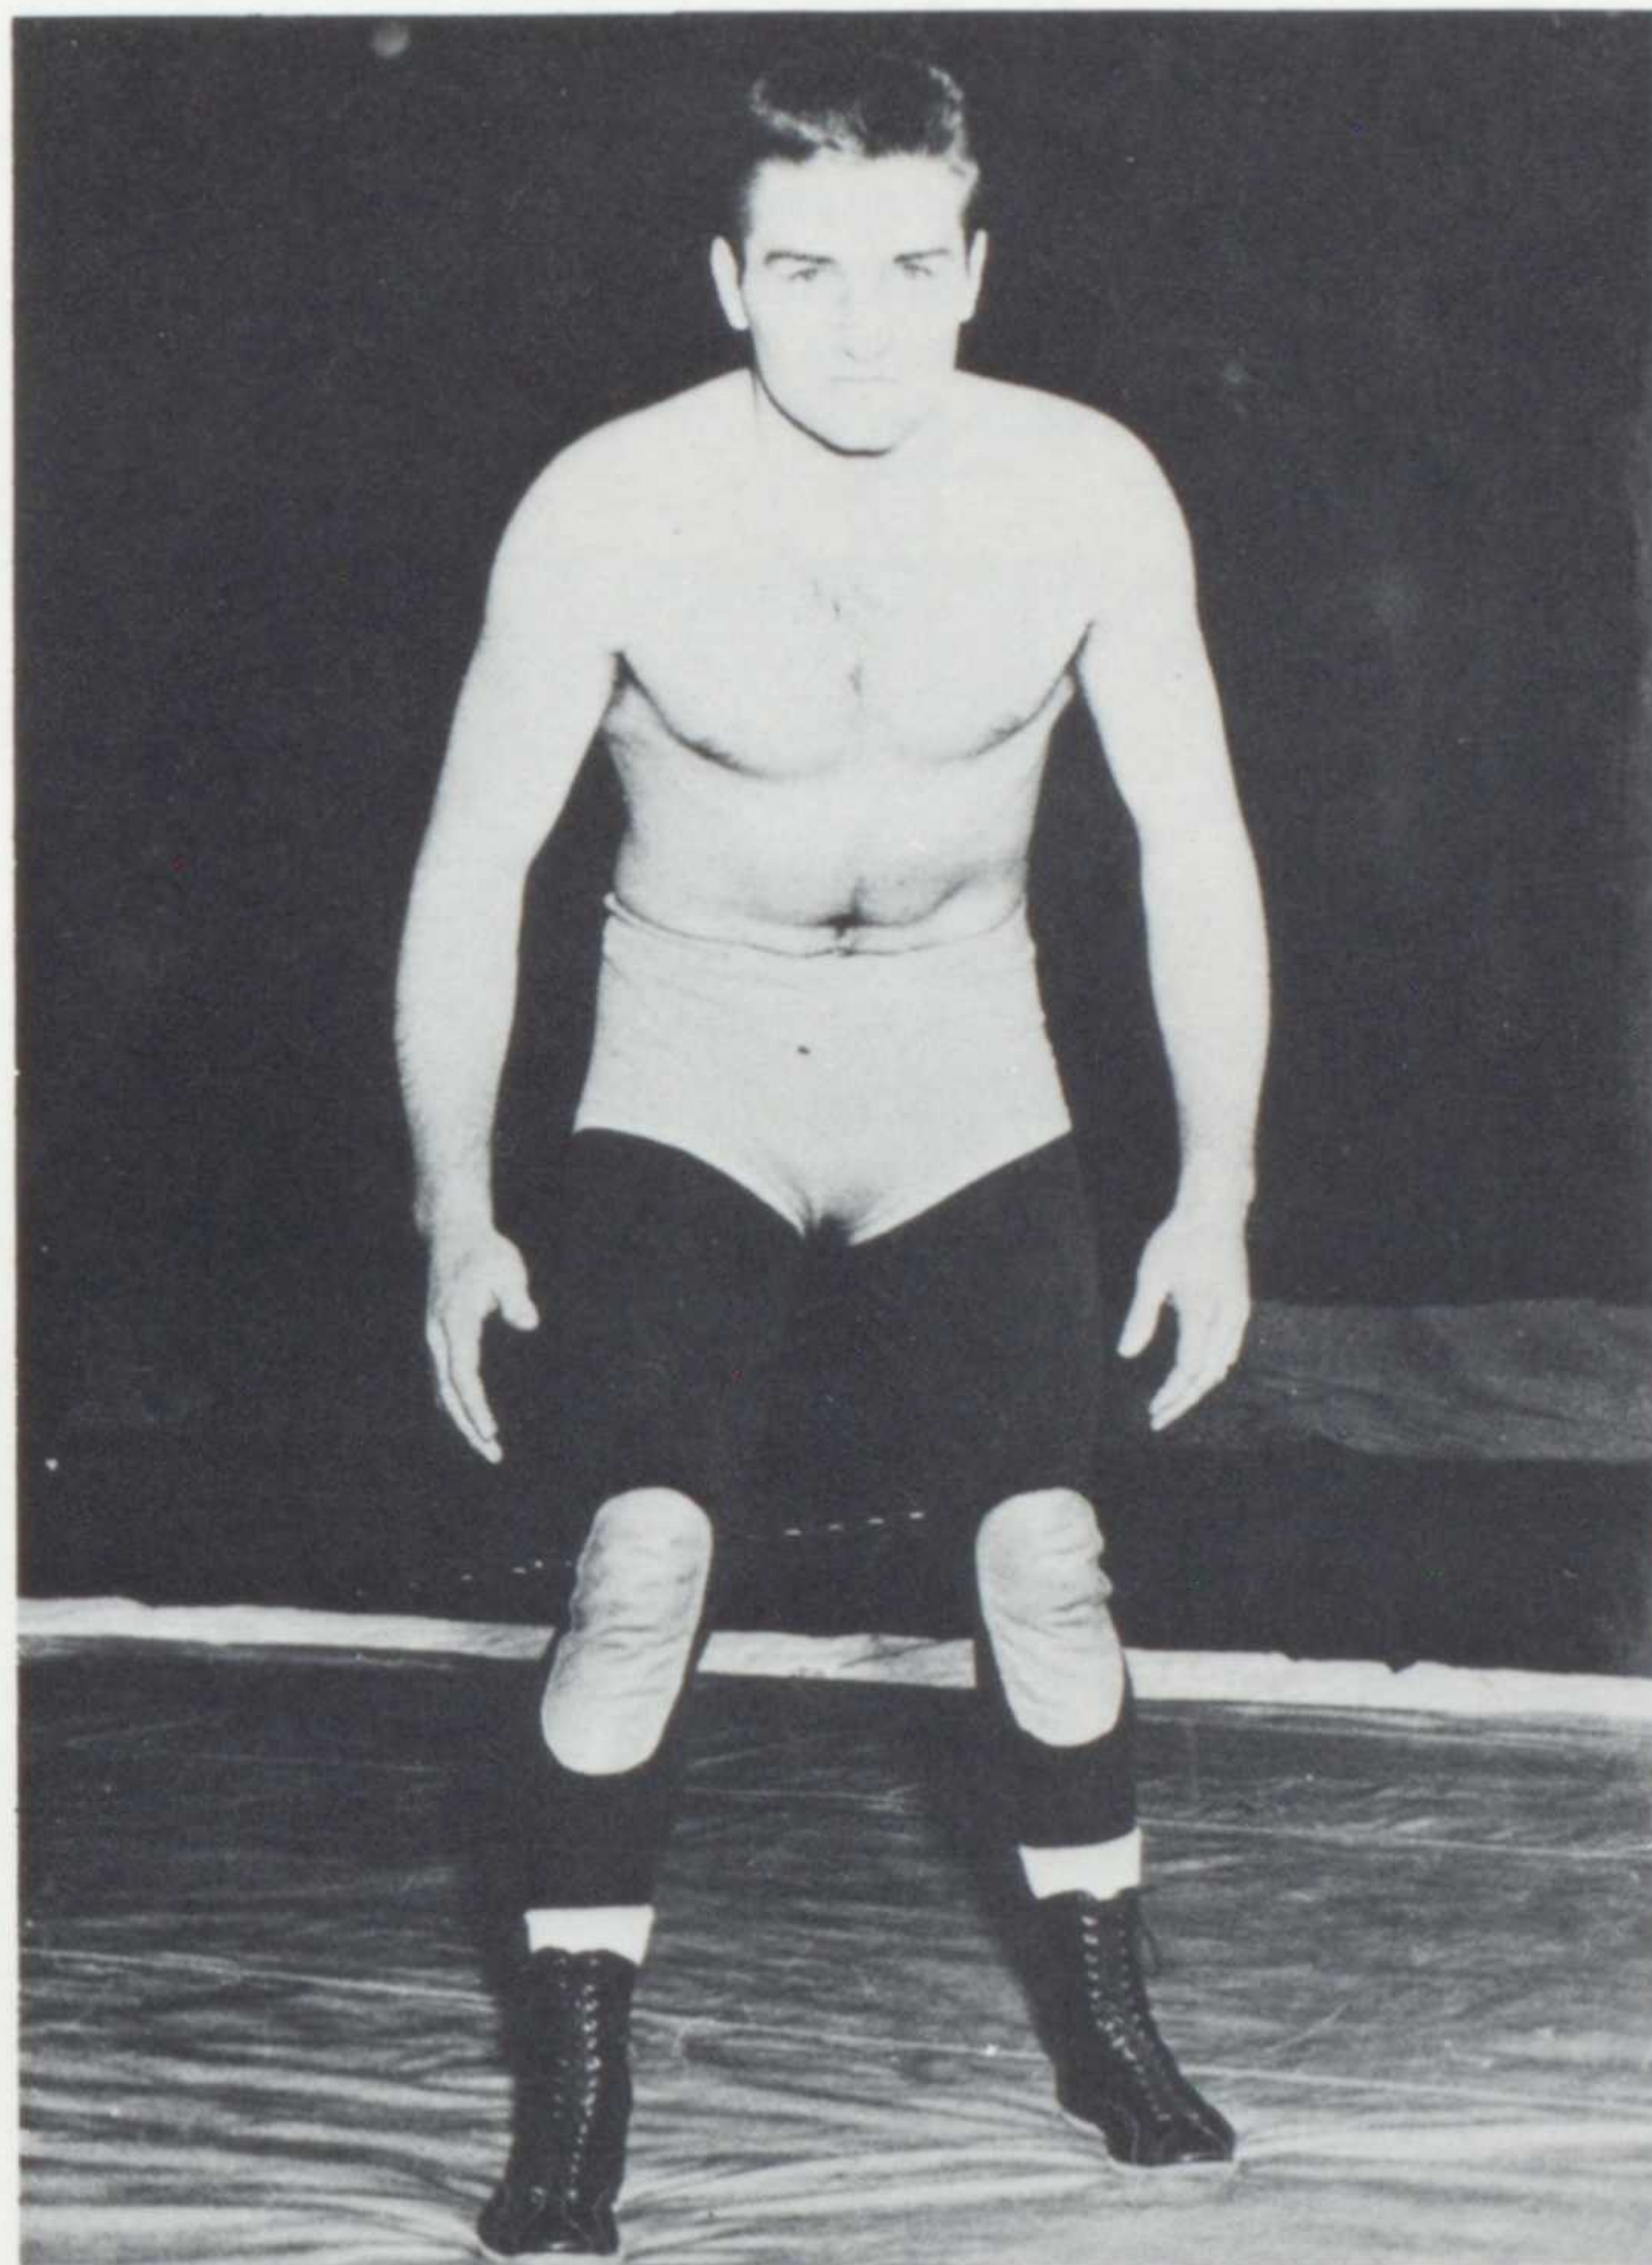

**One of the gang?** Mr. Billman (far right) played a Gruetch guitar in his musical group "The Amen."

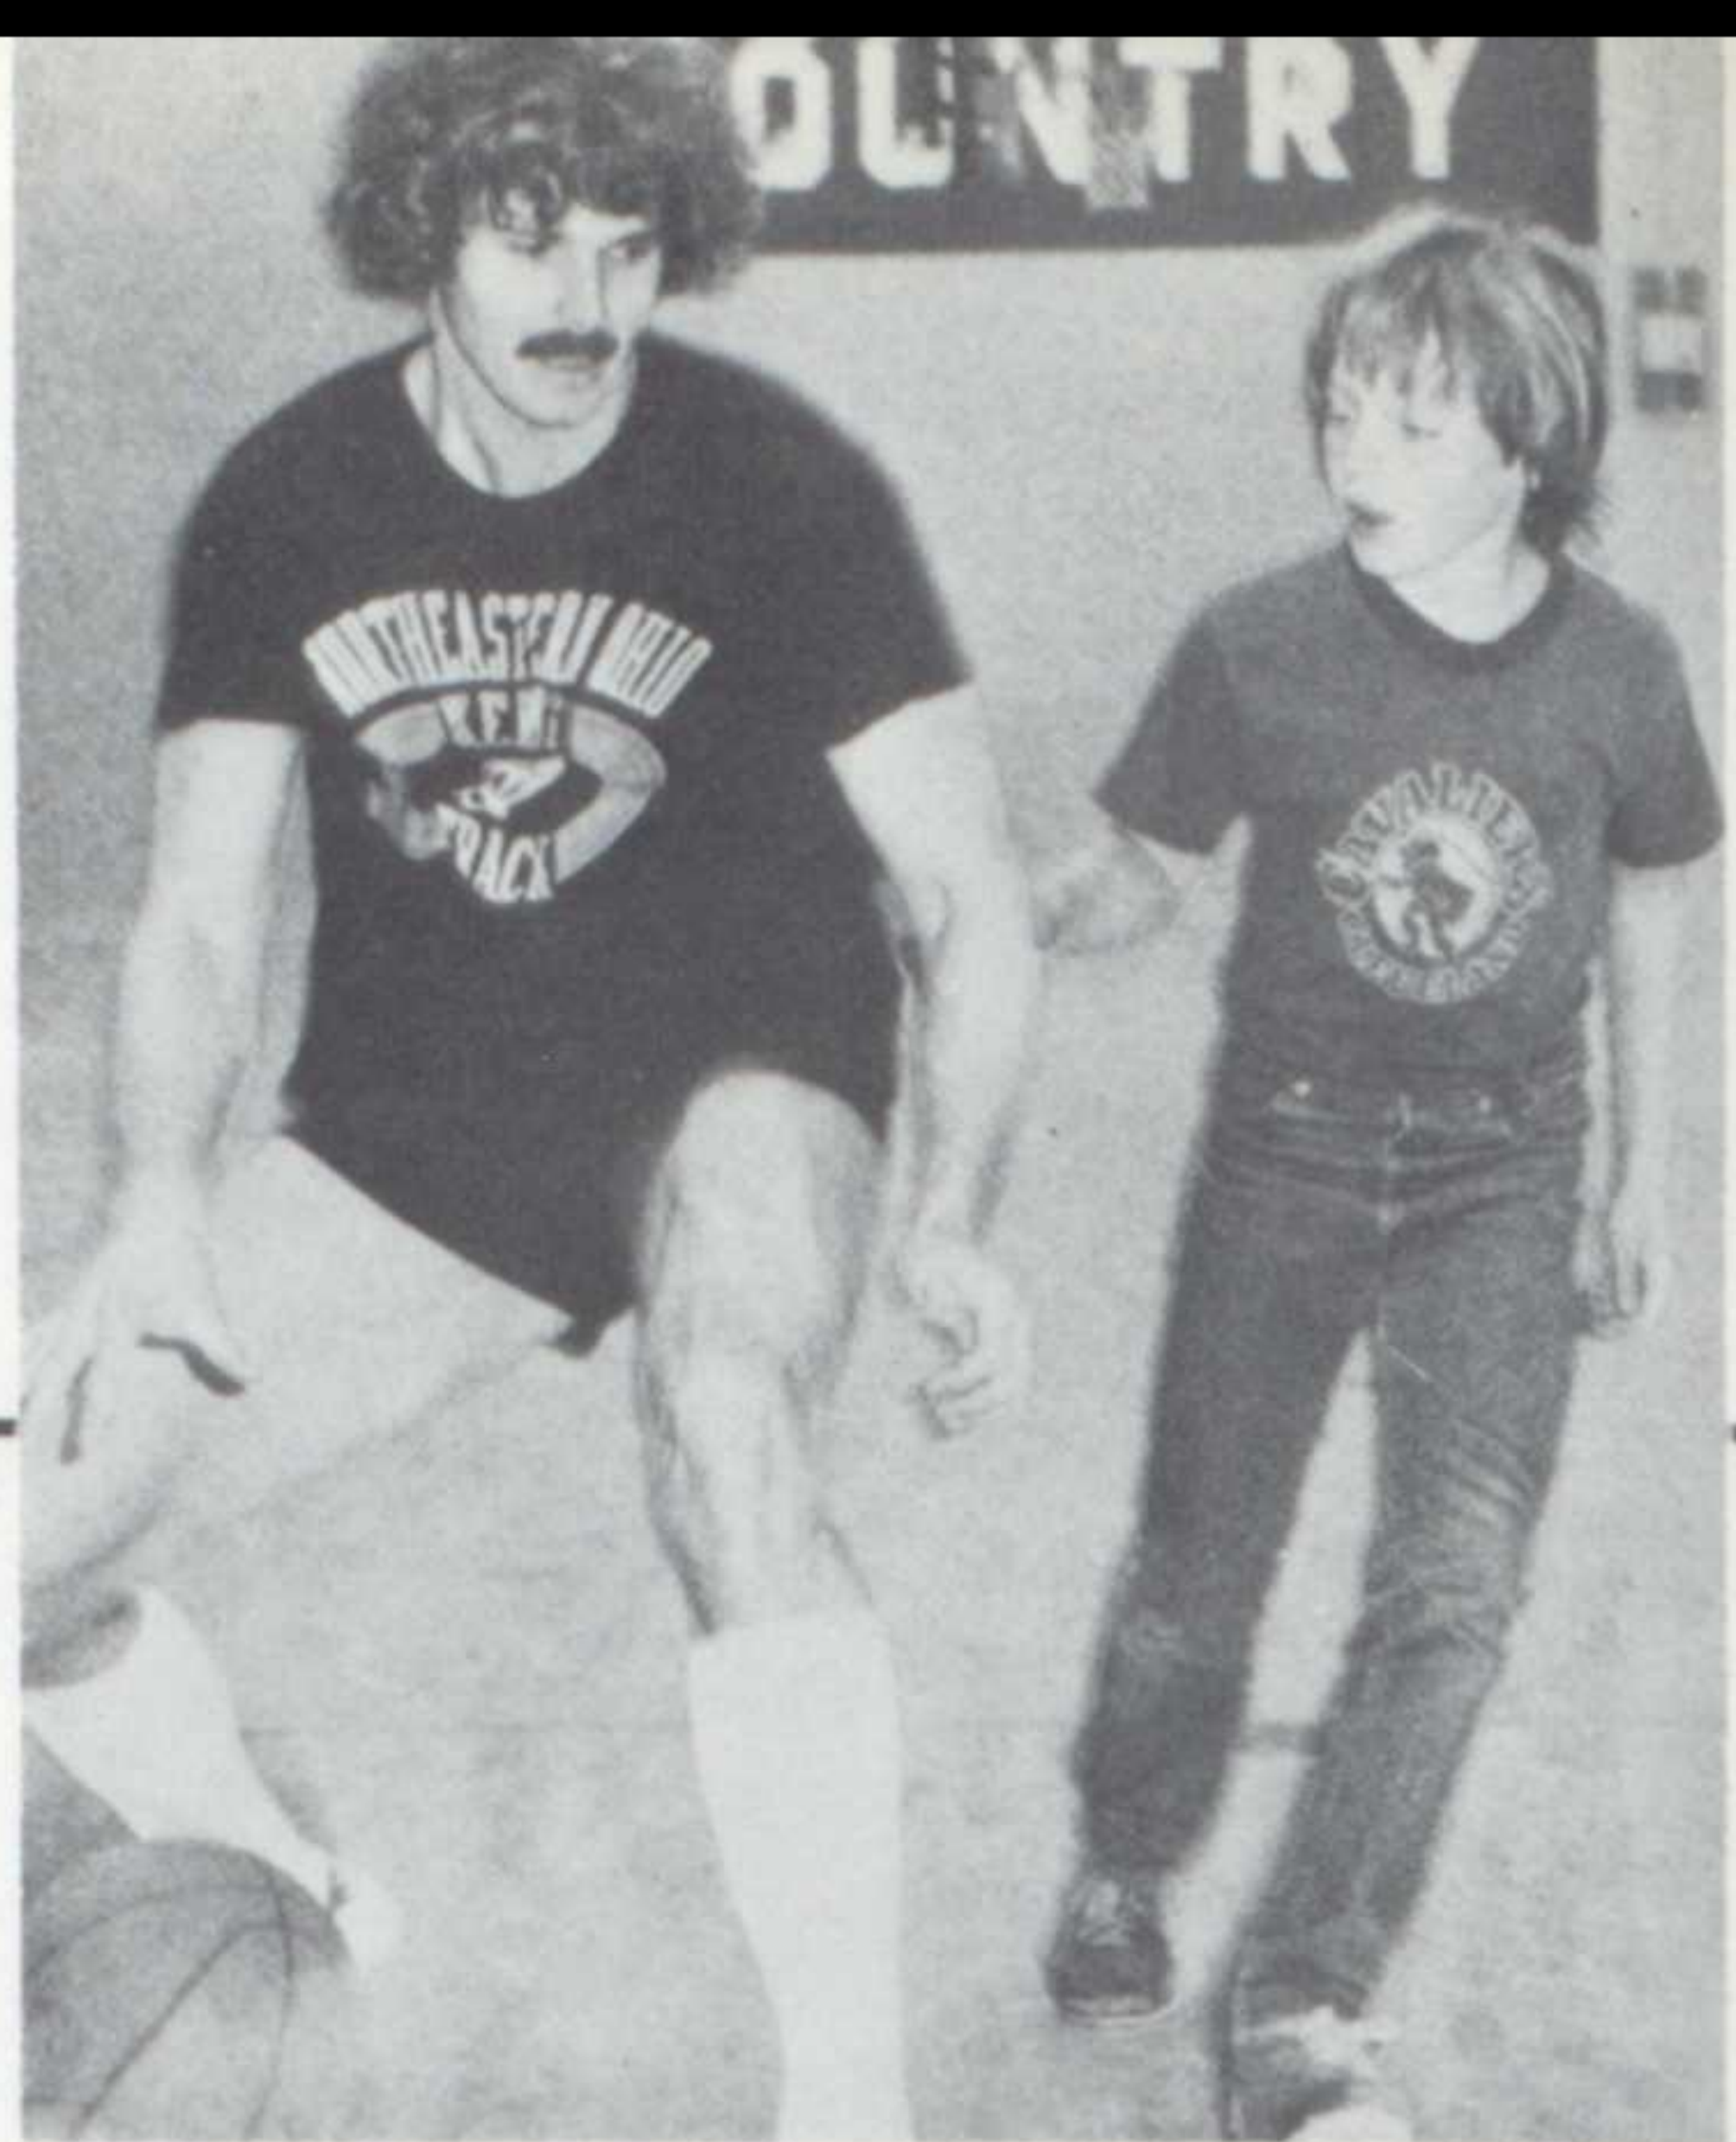

**154 lbs. of power** and ready for action, Mr. Chadwick took the State Wrestling Title for his area.

**What a discovery!** In Mr. Knap's second race he placed first with a high school record of 10:24.

**A new queen?** Ms. Kriaris reigned over the annual football game sponsored by the Plain Dealer.

**Two Points!** Mr. Gray and his nine year old son Troy shoot weekend baskets at the school.

**With learning and pleasure combined,** Mr. Siller makes the most of his English degree to teach Kirsten her ABC's.

—S. Saunders

—J. Heiser

**Hit or Miss,** Strategic, "Battleship" moves by Chris Assenheimer keep his dad busy over the weekend.

**With hotels on Park Place and Boardwalk,** Mrs. McDermitt commands a game of Monopoly with her children Debbie and Bob. Onlooker Star watches for the next exciting move.

—B. Calmus

—J. Heiser

It was always a wonder to me how a teacher could have children. I know that all of us at one time or another, dreamed of our teachers locked in the classroom closet waiting for the principal to come and wind them up for the day. Well! The theory has been proven wrong! We found that not only do the faculty have children, but they also spend a great deal of time with them.

"The best time we had as a family was when we spent the summer out West five years ago. We had a great time together," explained Ms. McDermitt. We found Mr. Siller and his three year old daughter Kristen, quietly reading. When asked what one of his most cherished moments with Kristen was, he answered quite

hesitantly.

The next day, Mr. Siller stopped us in the hall and exclaimed, "Talking about treasured moments! Yesterday after you guys left, Kristen sat down and read a book from cover to cover."

With all of the time spent with their children, how do they manage to get them ready for school each morning and yet, faithfully continue to arrive on time themselves?

**A nine lb. bundle of joy?** Christopher Montgomery Robertson arrived at 8:11 on November 9, 1977.

Get to school on time? Why that's easy! If you have long legs and great stamina like "Boo" Scott, you have the answer to your problem.

"I run because I like to. Until we moved closer to the school, I ran three miles every morning. Now that I don't run as far, I bring a change of clothing and run before classes start," explained Coach Scott.

Mr. Millheim and Mr. Lehman are partners on their daily jaunt to and from school.

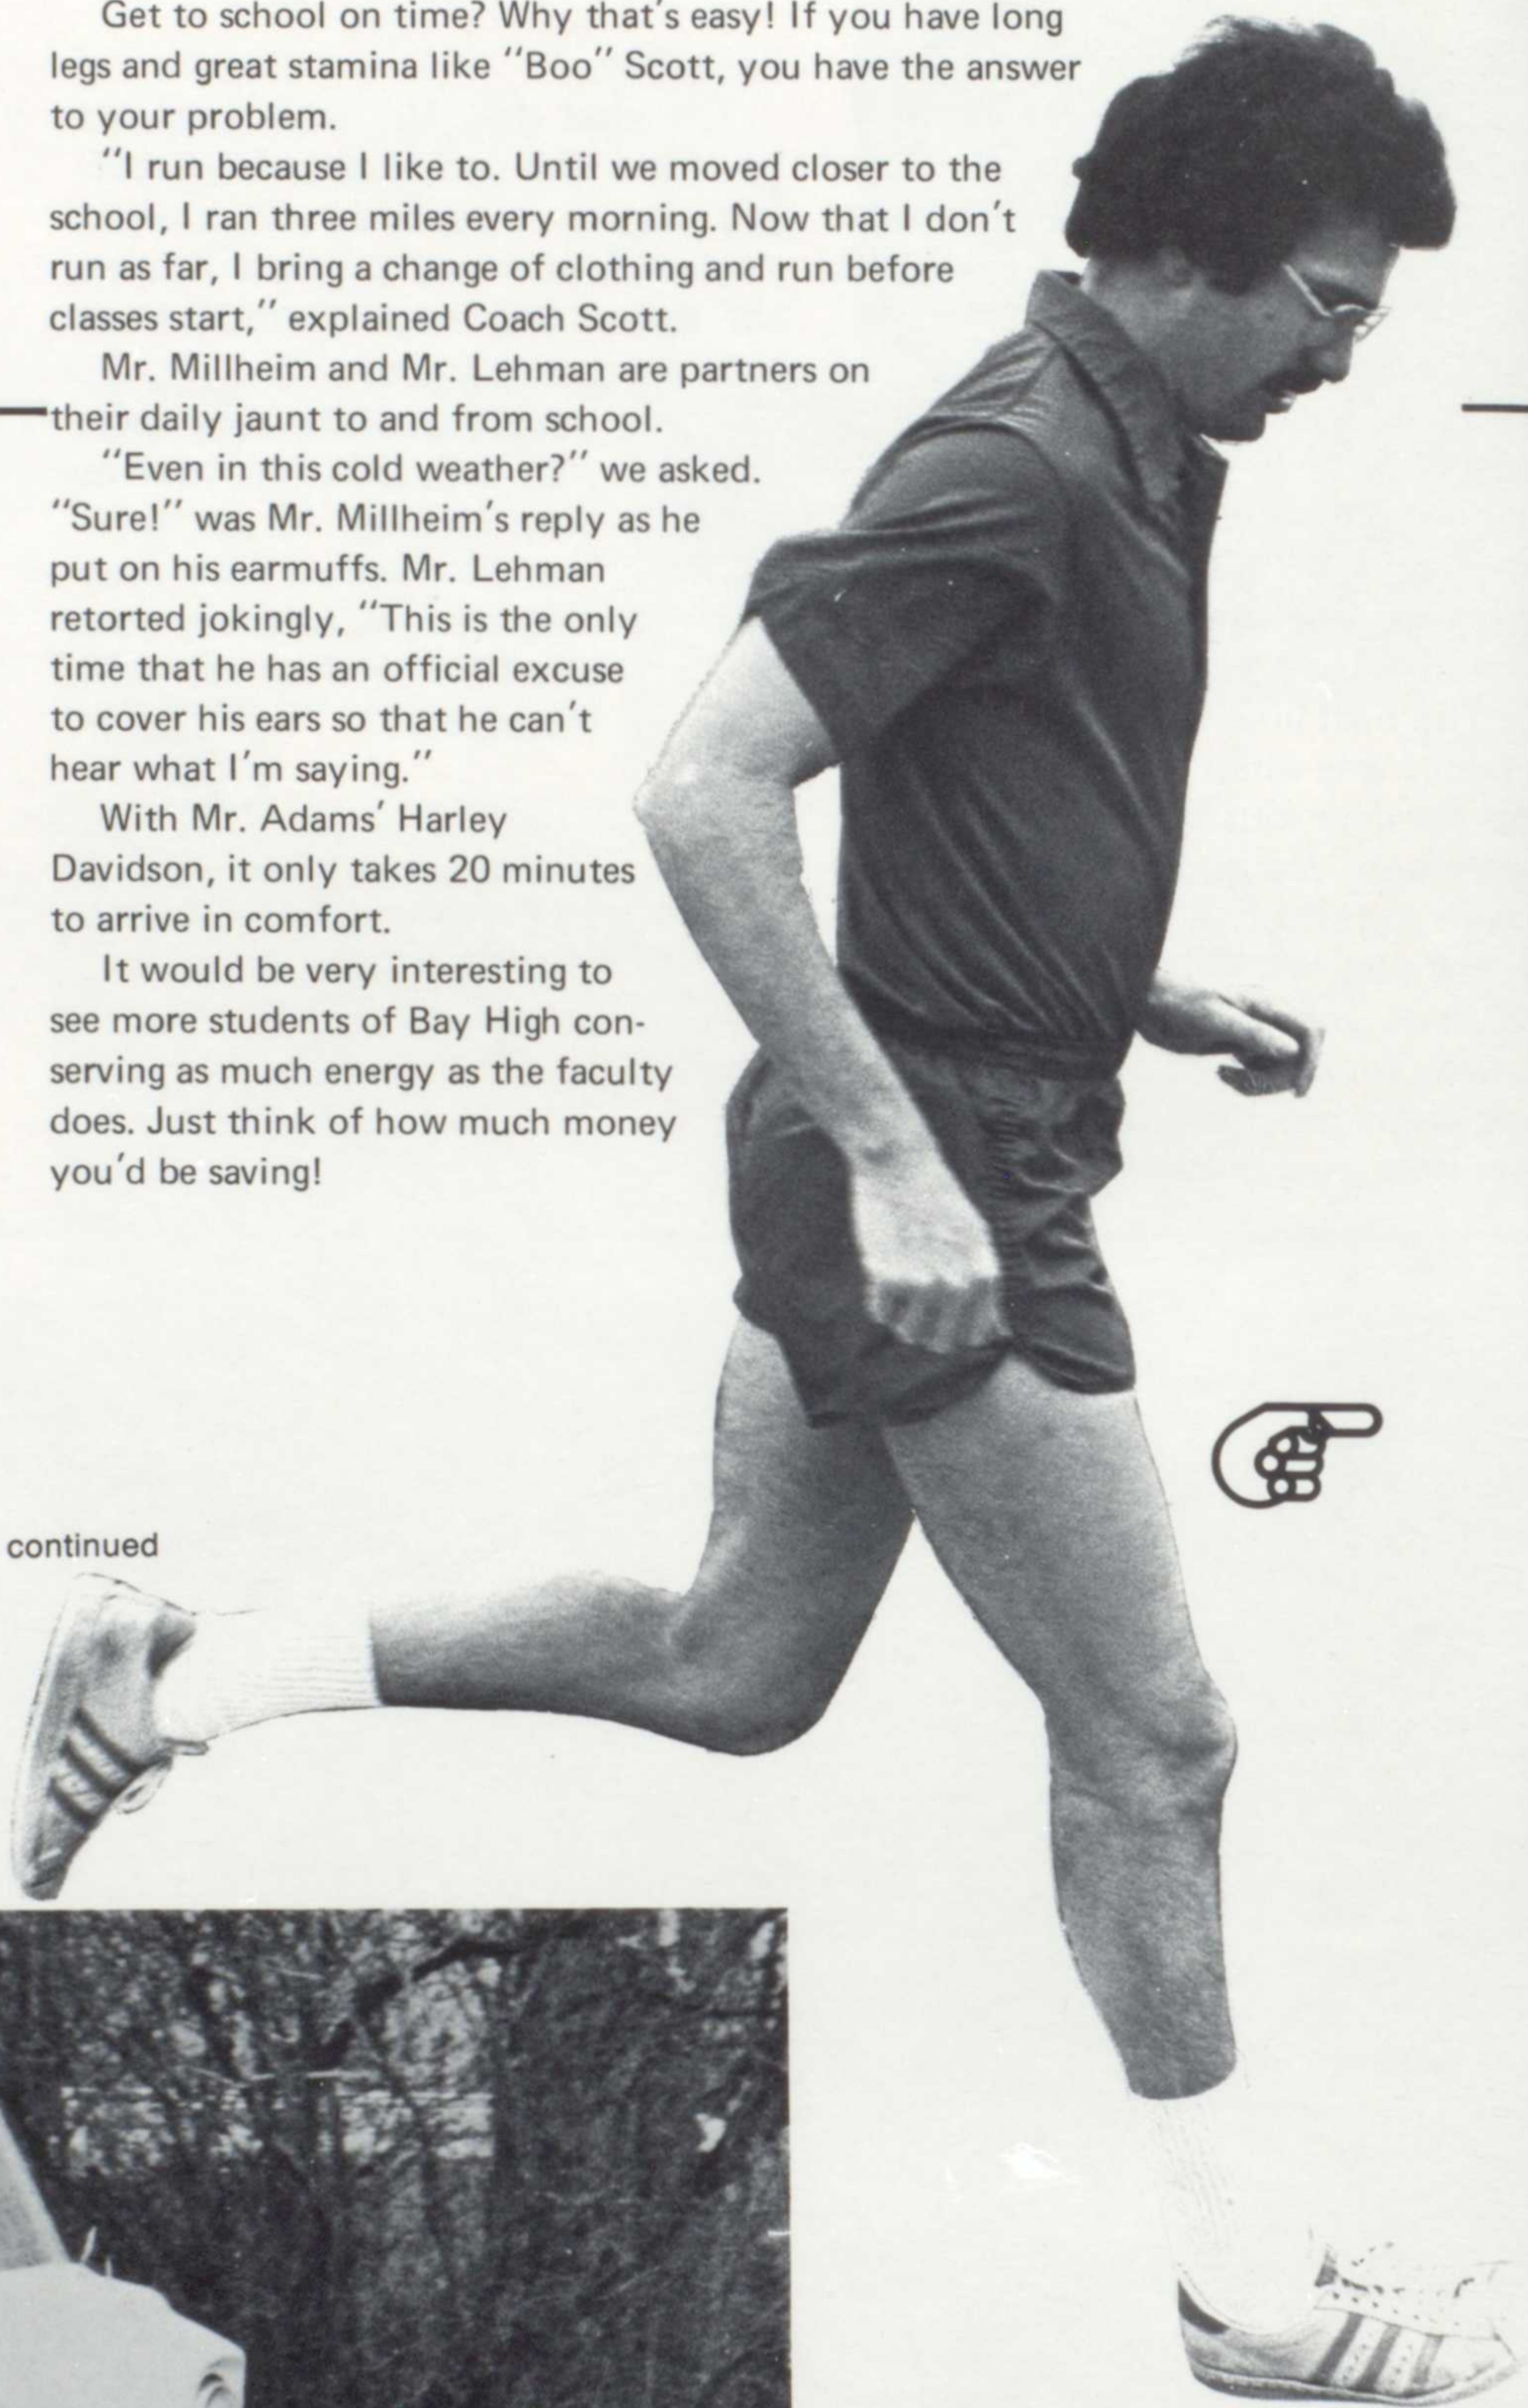

"Even in this cold weather?" we asked. "Sure!" was Mr. Millheim's reply as he put on his earmuffs. Mr. Lehman retorted jokingly, "This is the only time that he has an official excuse to cover his ears so that he can't hear what I'm saying."

With Mr. Adams' Harley Davidson, it only takes 20 minutes to arrive in comfort.

It would be very interesting to see more students of Bay High conserving as much energy as the faculty does. Just think of how much money you'd be saving!

Step aside  
, cause  
here they  
come...

More than just . . . continued

—J. Heiser

**Run! Don't Walk!** "Boo" Scott ran three miles to school before he made his move. Now it takes 3 min.

—B. Calmus

**Even through sleet and snow,** Mr. Adams makes it to school in ten minutes on his Harley Davidson.

**Five minutes** is all it takes for Mrs. O'Donahue to pedal to school. Preferring a bicycle to the car, she accomplishes two goals; exercise and transportation.

—J. Heiser

—J. Heiser

**In all kinds of weather**, Mr. Millheim and Mr. Lehman have ample time for conversation on their daily trek to school in the morning.

# The Pet Set

More than just . . .

| continued

What do you do if you don't have the time or money to spend on a pet? Mr. Kunes came up with the answer to the problem . . . snoids. Yes! You heard right! S-n-o-i-d, snoid. In response to the many inquiries, Mr. Kunes has offered an explanation . . .

"Snoids are indigenous to Bay. They live in sewers and feed upon the dead fish that are washed up on Huntington's beach. They are small furry animals with gray-pink eyes and long tails which closely resemble that of a rat."

For those of you that wish to view this rare species, it is perched on Mr. Kunes' overhead screen in room 210.

So! Is it possible for you to believe the rumor now? Has there been enough evidence to support the theory that teachers are human? We've seen them with their families and pets. We found they participated in high school events, and arrive at school each morning on time. We hope this information has changed your opinion to affirmative. ■

**Perched on the finger** and shoulder of Mr. and Ms. Townsend, Tommy spends much of his time out of his cage. His own playground generates hours of swinging and bell-ringing fun for the parakeet.

**Amid his dog** and three stray cats, Mr. Scaletta checks the condition of his pets at his country home.

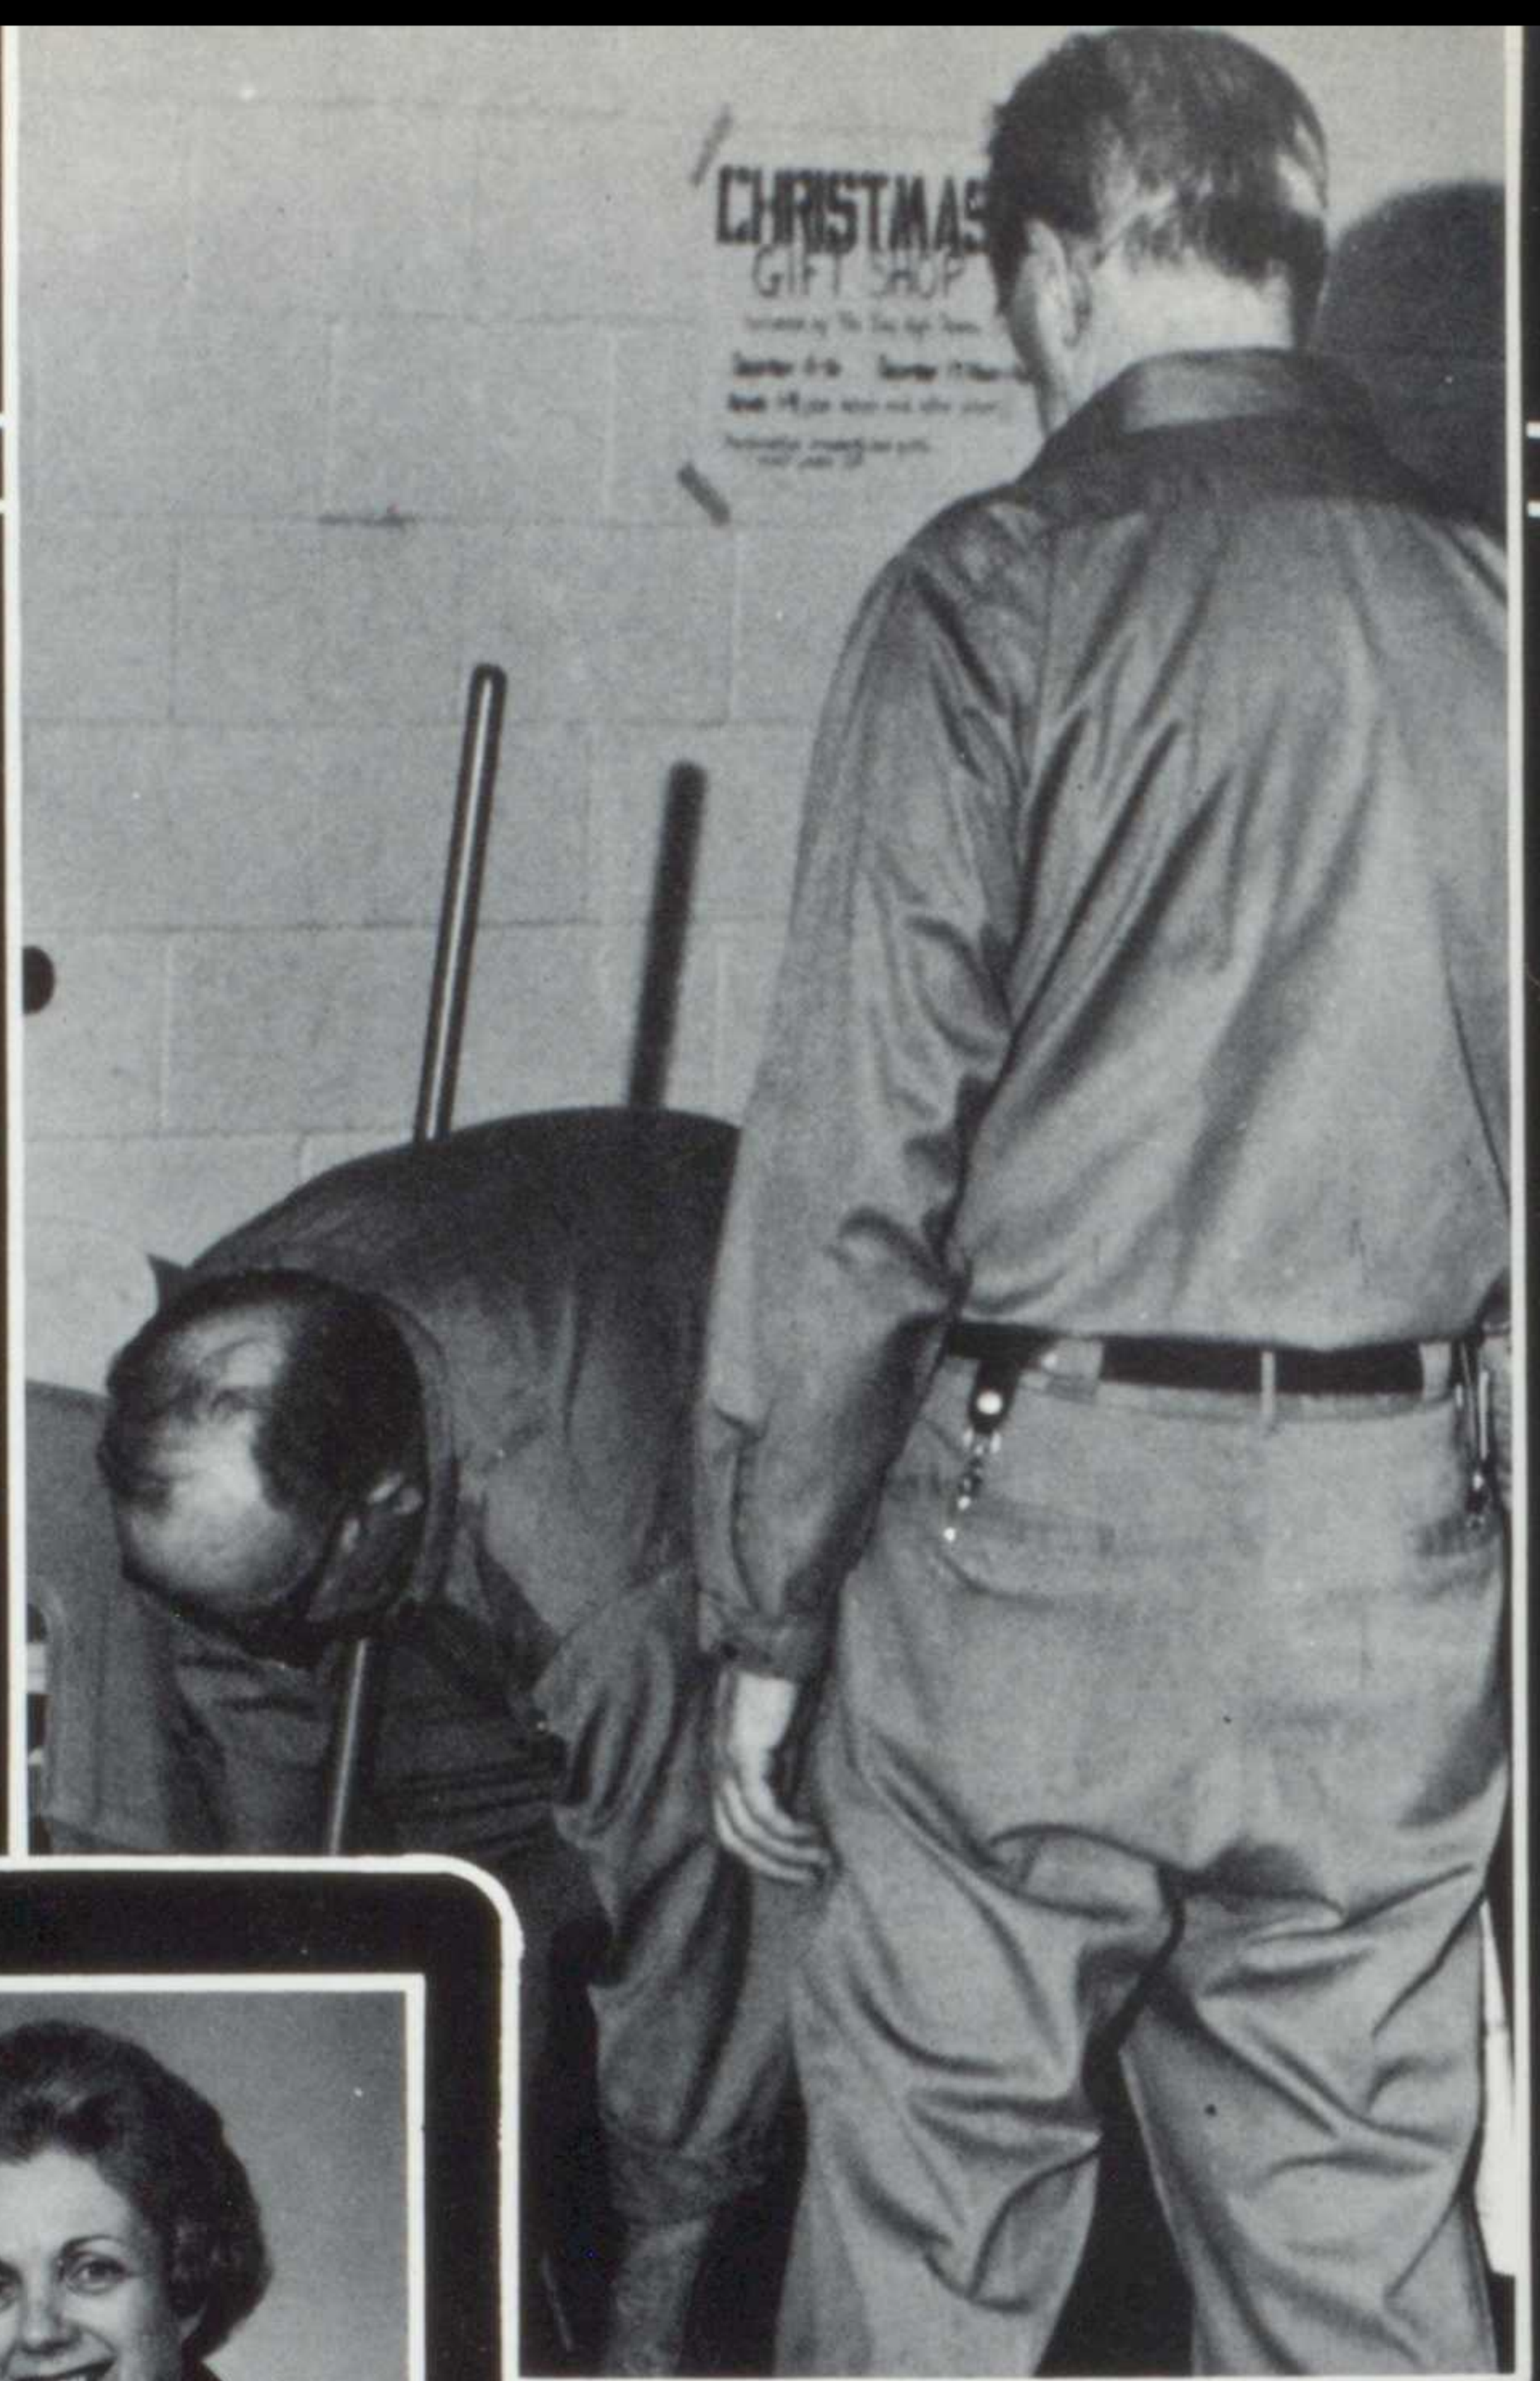

—B. Calmus

In a dual effort to finish things up after an early morning start, Ms. Solomon provides paper and pen for Ms. Heldt's telephone message.

—H. Briggs

—J. Heiser

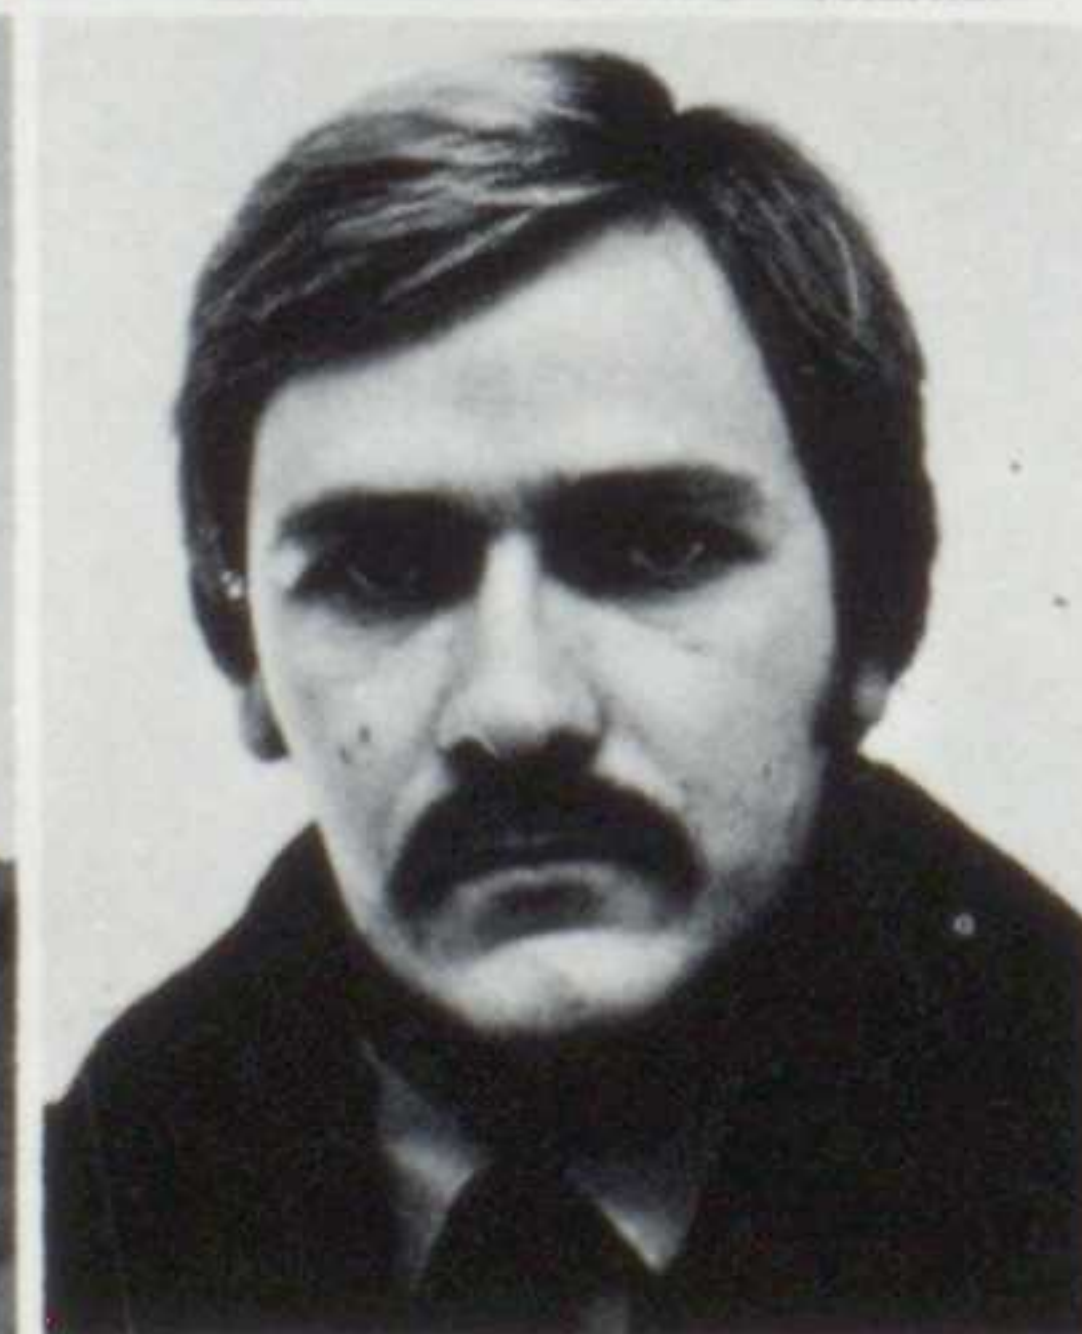

Ms. Grant: Secretary  
Ms. Heldt: Secretary

Ms. Nelson: Secretary  
Ms. O'Hara: Secretary

Ms. Sams: Secretary  
Mr. Sams: School Guard

Ms. Solomon: Secretary  
Ms. Voiers: Secretary

In effort to get the place clean, Harold Hardgrove and his assistant sweep and pick up trash for a minimum of three hours before the next shift arrives.

Webster's Dictionary defines the word overtime as: Time beyond an established limit, especially working hours in addition to those of the regular schedule.

Well! We looked around, turned over a couple of stones and sure enough, we were able to find some after-hour workers. Take secretaries for example; they type and cope with office problems long after the crowd has surged through the main doors.

But we wanted something really bizarre. We hunted a little bit further and this time discovered some very special people. Did you know that there is a janitor that has a shift from 6:00 p.m.

until 11:00 a.m. the next morning? Talking about spending a great deal of time in the school! Well! What about the hours spent at home working on special interests?

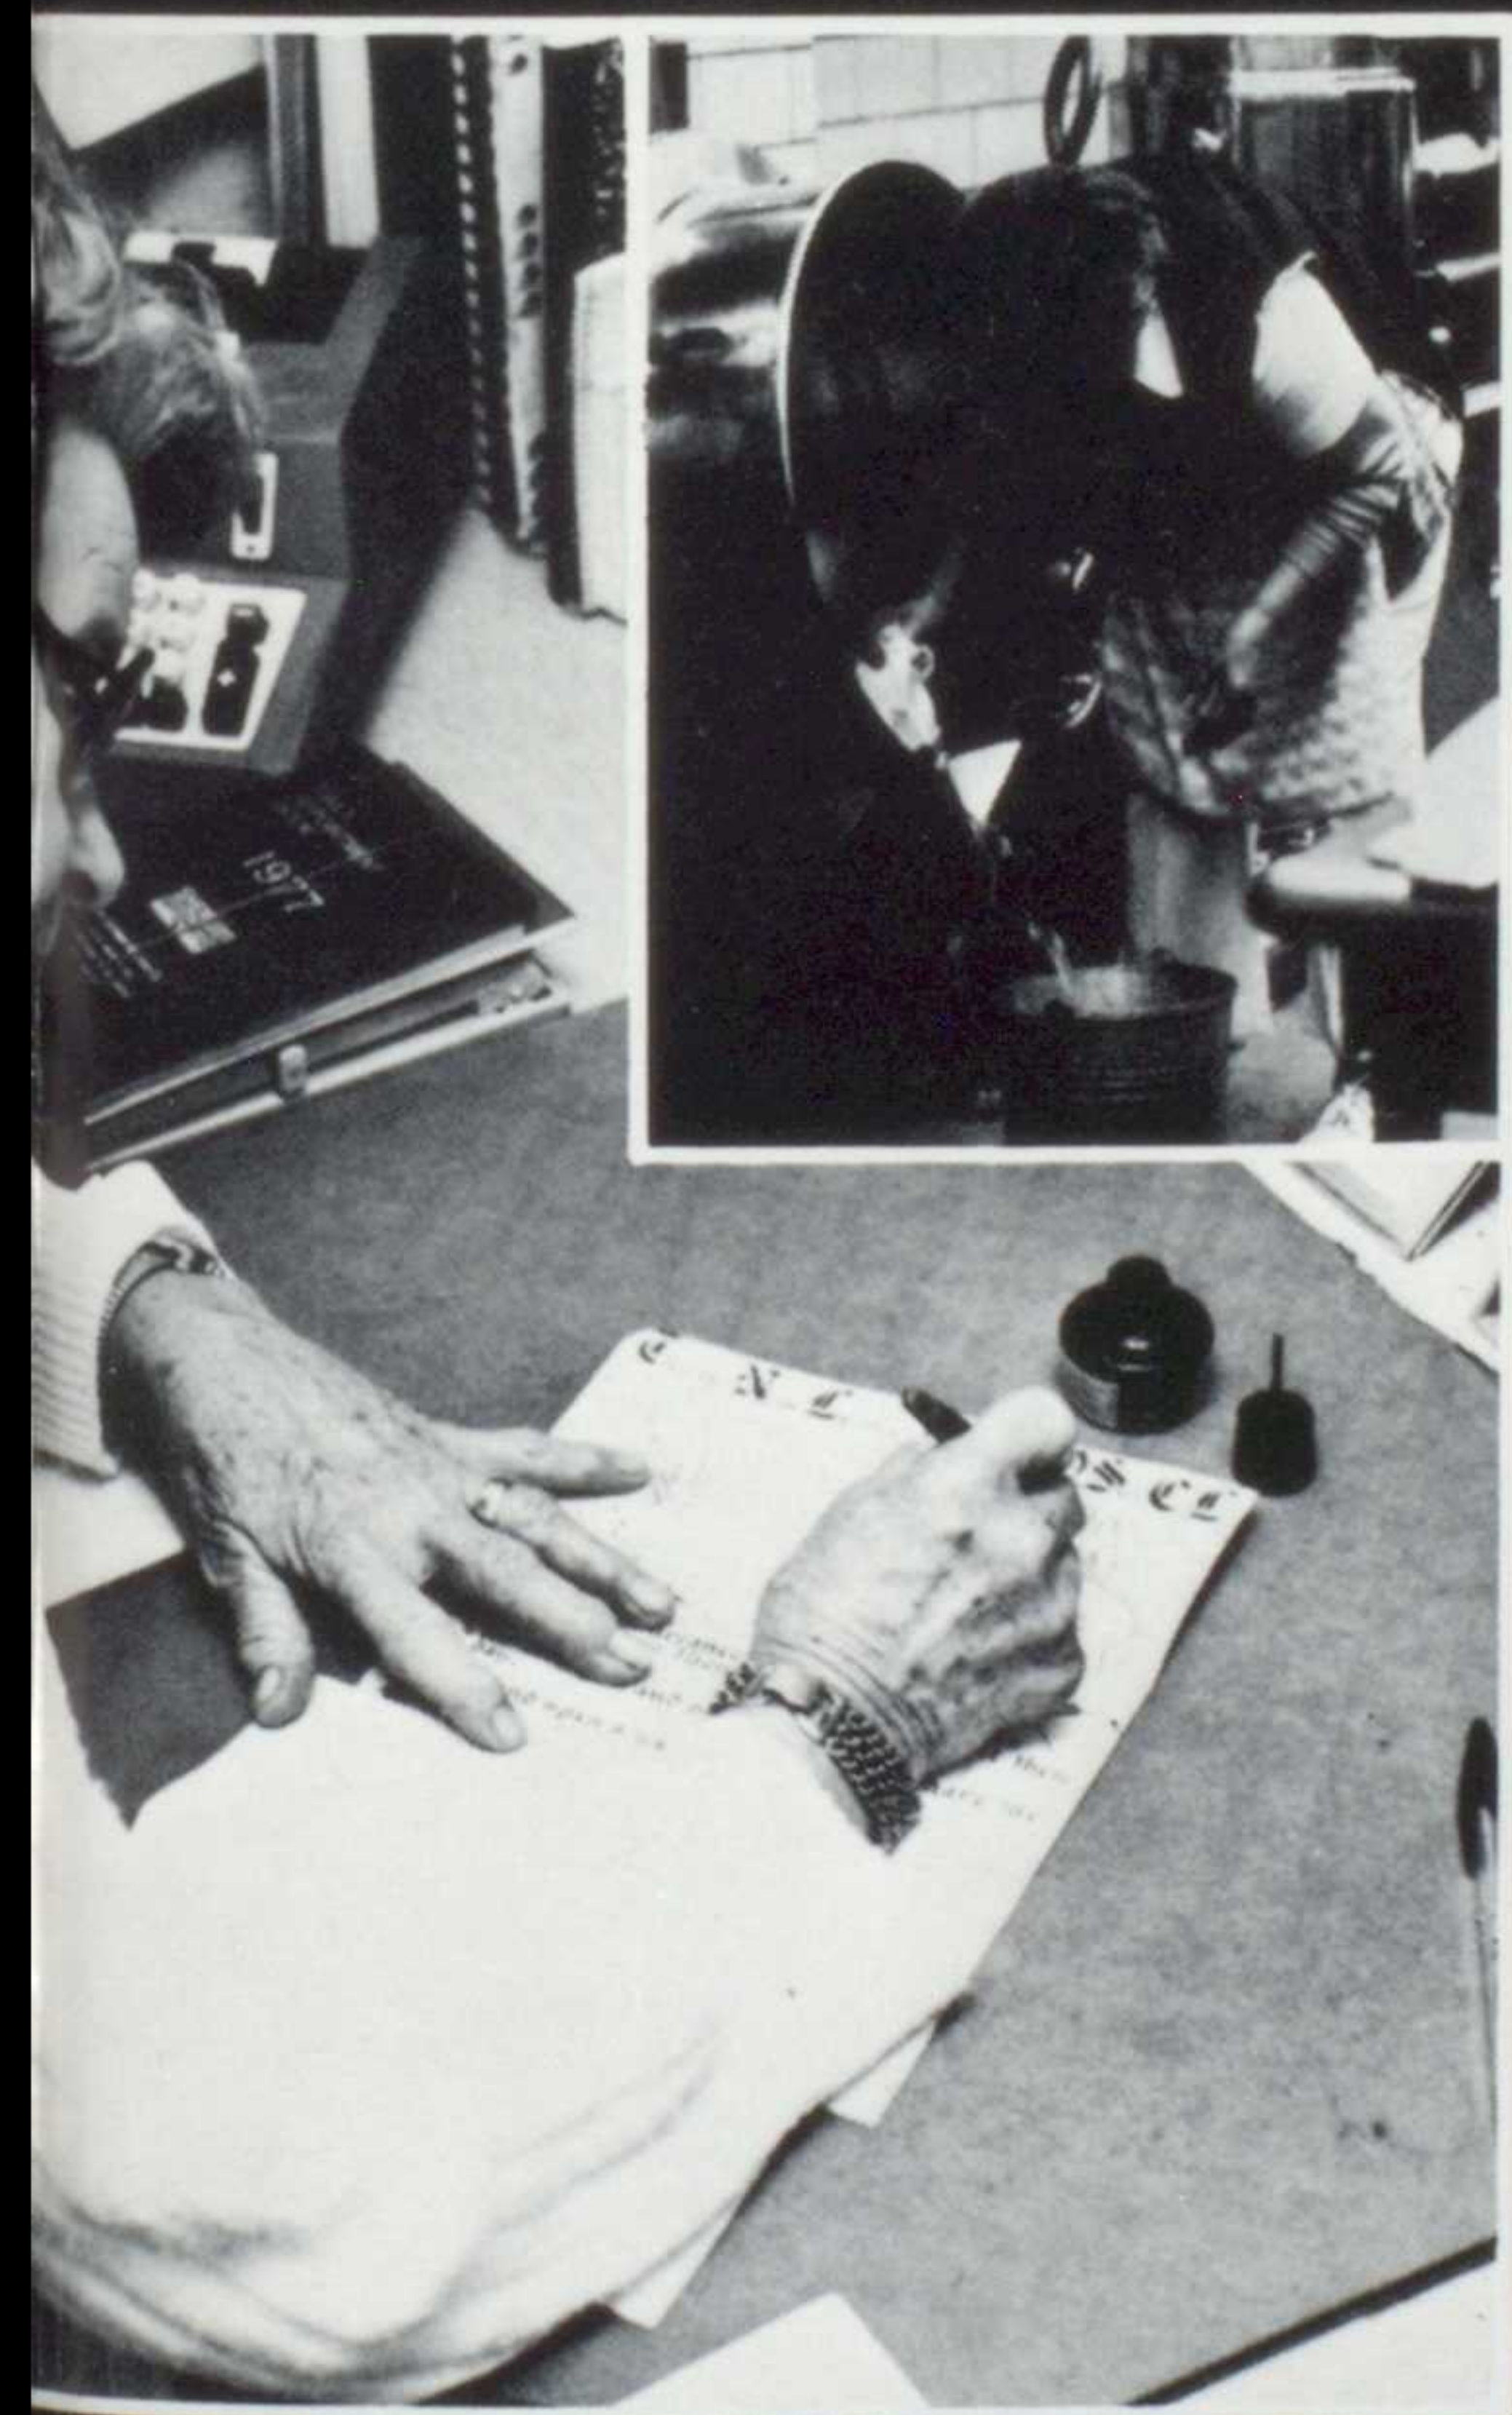

Ms. Kirk practices script writing in her spare time.

"I learned from the late Mr. Huntsinger, the only calligrapher in greater Cleveland. When he moved from Bay, he gave me his pens as a present."

Though these people are very unique, they feel that they shouldn't be the only ones singled out. As Ms. Kirk explained,

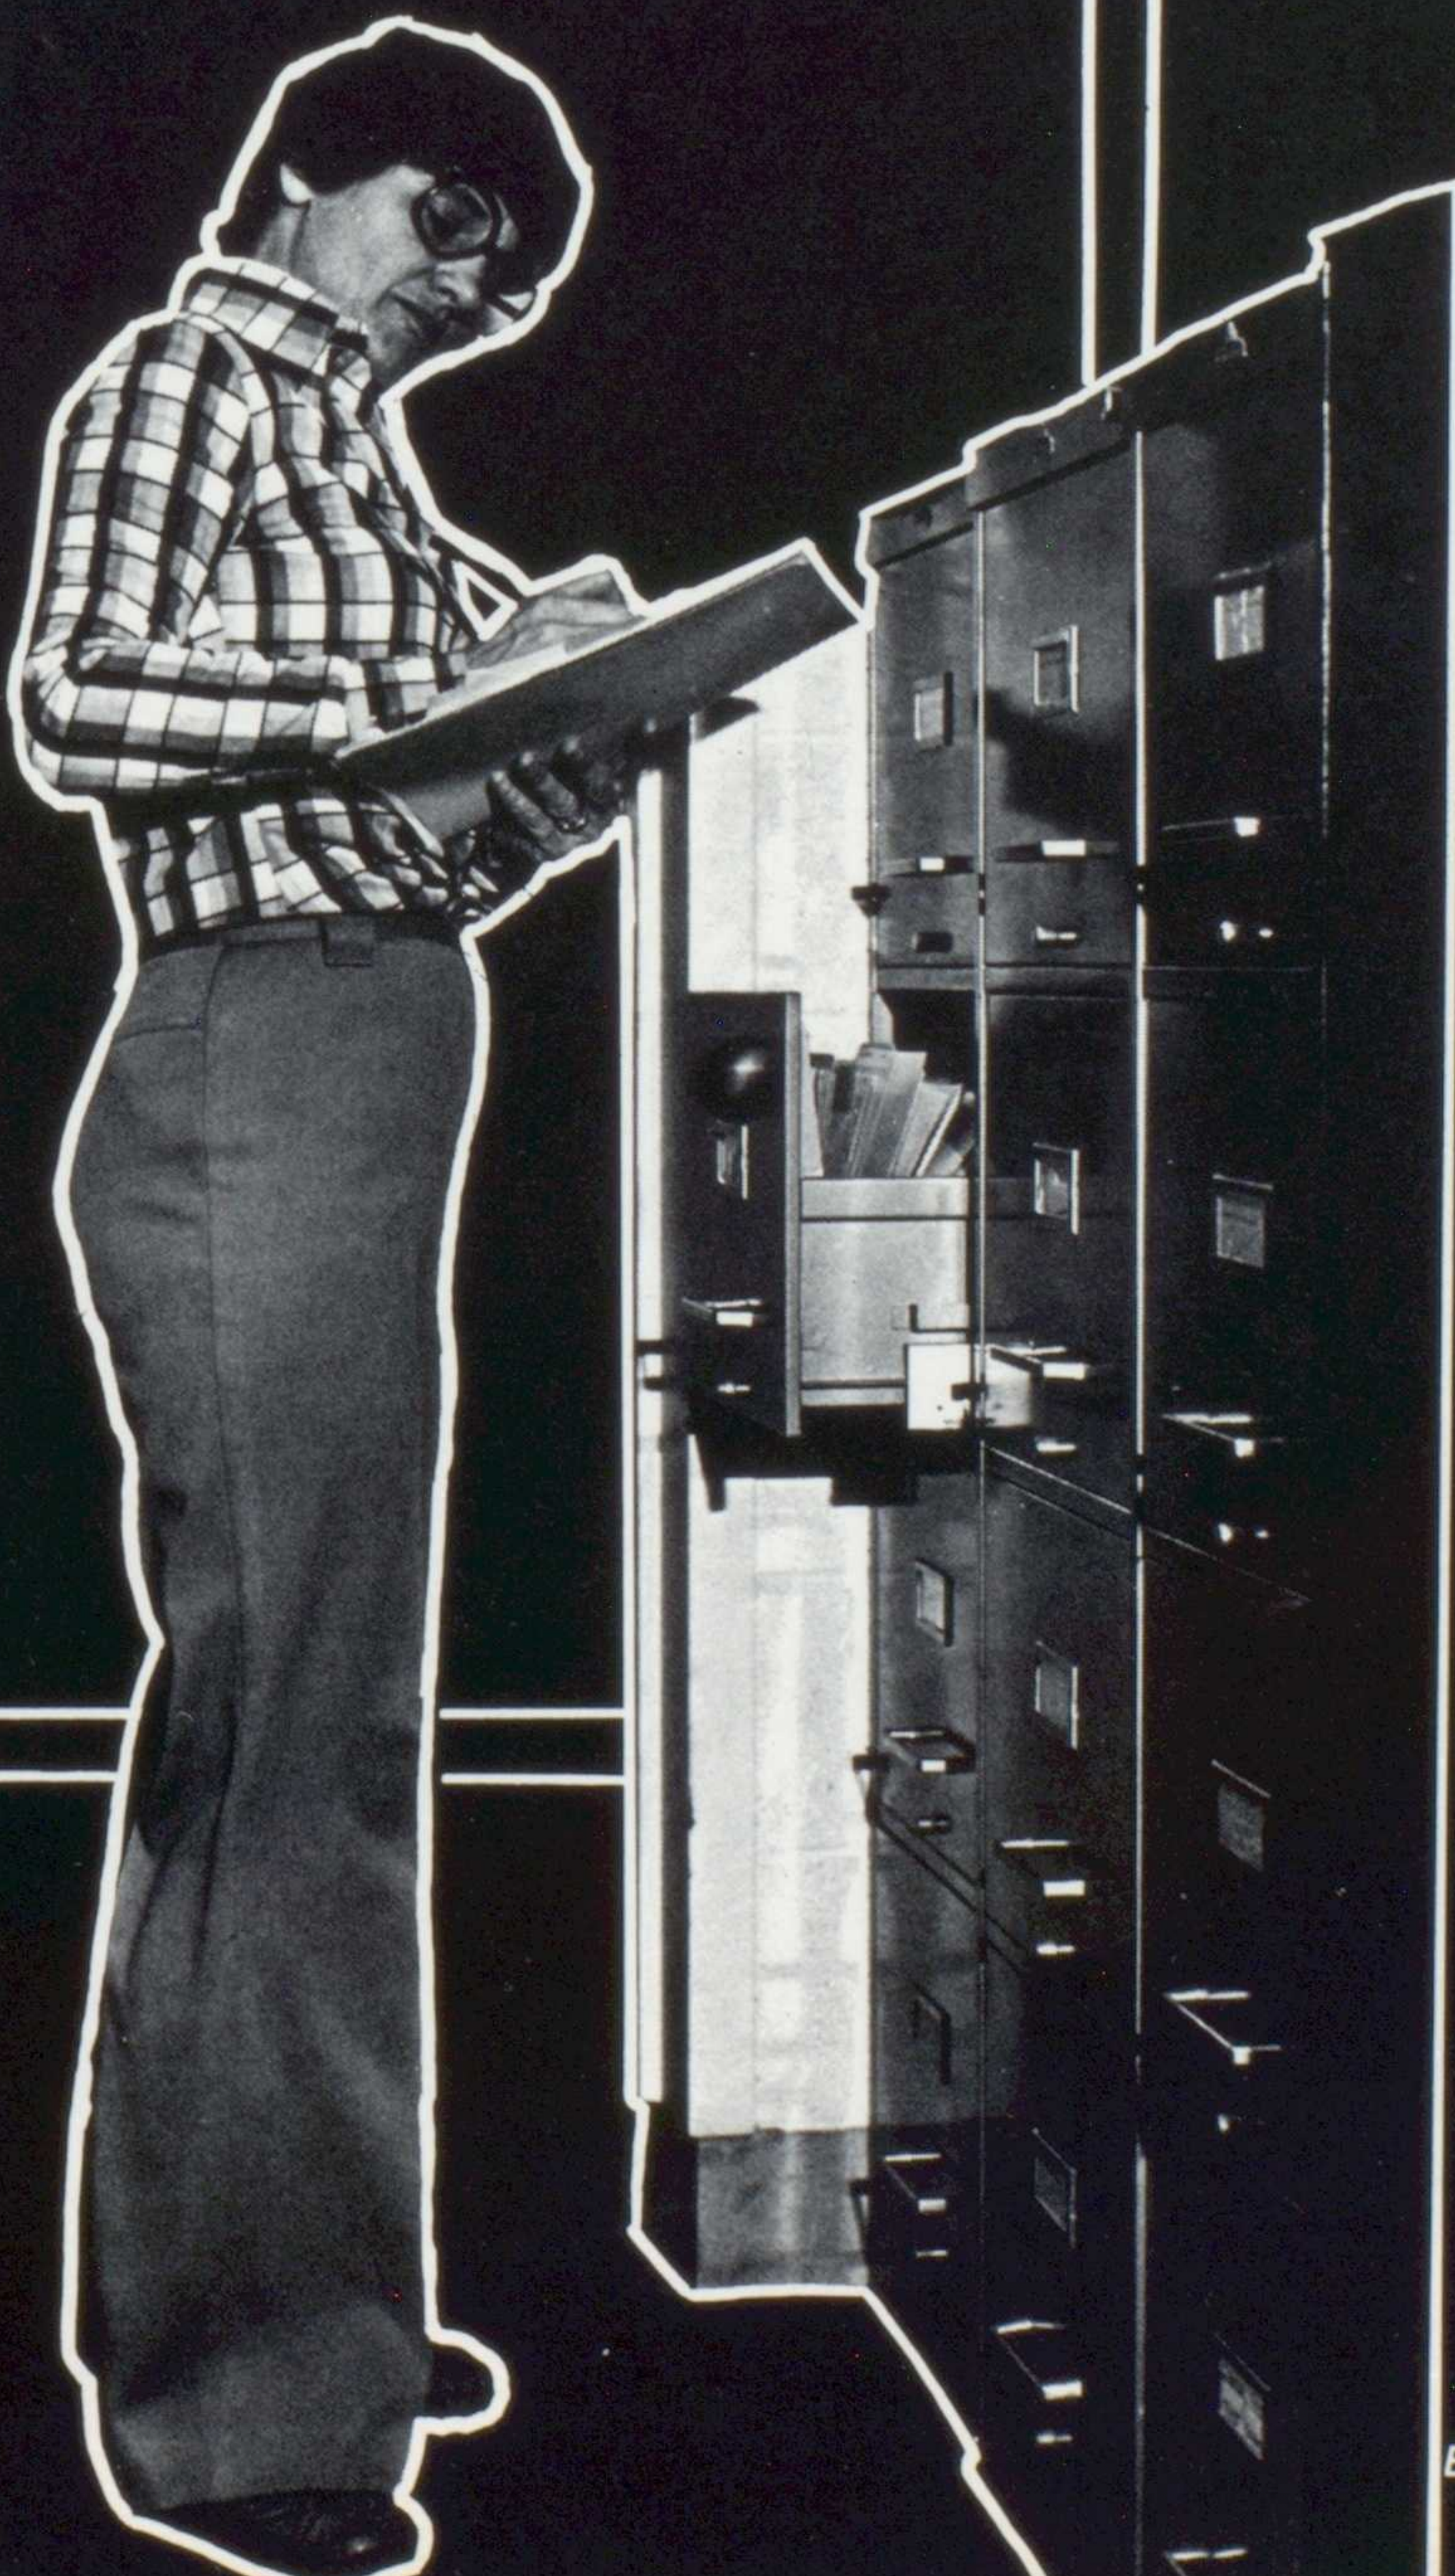

"Each of my girls have hobbies that they do in their extra time." ■

When everyone else is gone...

With the combined hours of being Head Dietician and practicing her skills of script writing, Ms. Kirk finds her time extremely limited.

Simply a matter of time, Ms. Voiers tries to compile transcript forms for seniors going to colleges which require early application.

# HELP: IT COMES IN HANDY

"Can I have a band-aid?"

"Where's the dictionary?"

"Could I change my 7th period gym class to 5th period so that I can have lunch every day 6th period?"

"I have a headache. Can I have two aspirin?"

Questions, questions and more questions. Hellppp!!! What would the students of Bay High ever do without it? Help. We should be glad that there are people in the school that **can** help! Where do you go when you aren't feeling well? Most of us end up at the clinic talking our way out of classes because we don't "feel so good."

Ms. Pritchard has a different idea, "When you go to a counselor, so many times it's because you just don't feel good about yourself."

Well! Whatever your problem, one thing's for certain, help's just around the corner. ■

**Caught unaware**, Mr. Buttermore selects one of the ten Bell & Howell film projectors for the routine shuffle between teacher's scheduled requests.

—H. Briggs

**Even with her other jobs** at the Middle School and St. Raphael's, Ms. Lipaj still has the patience to carefully remove a splinter from Martha Saltis's finger.

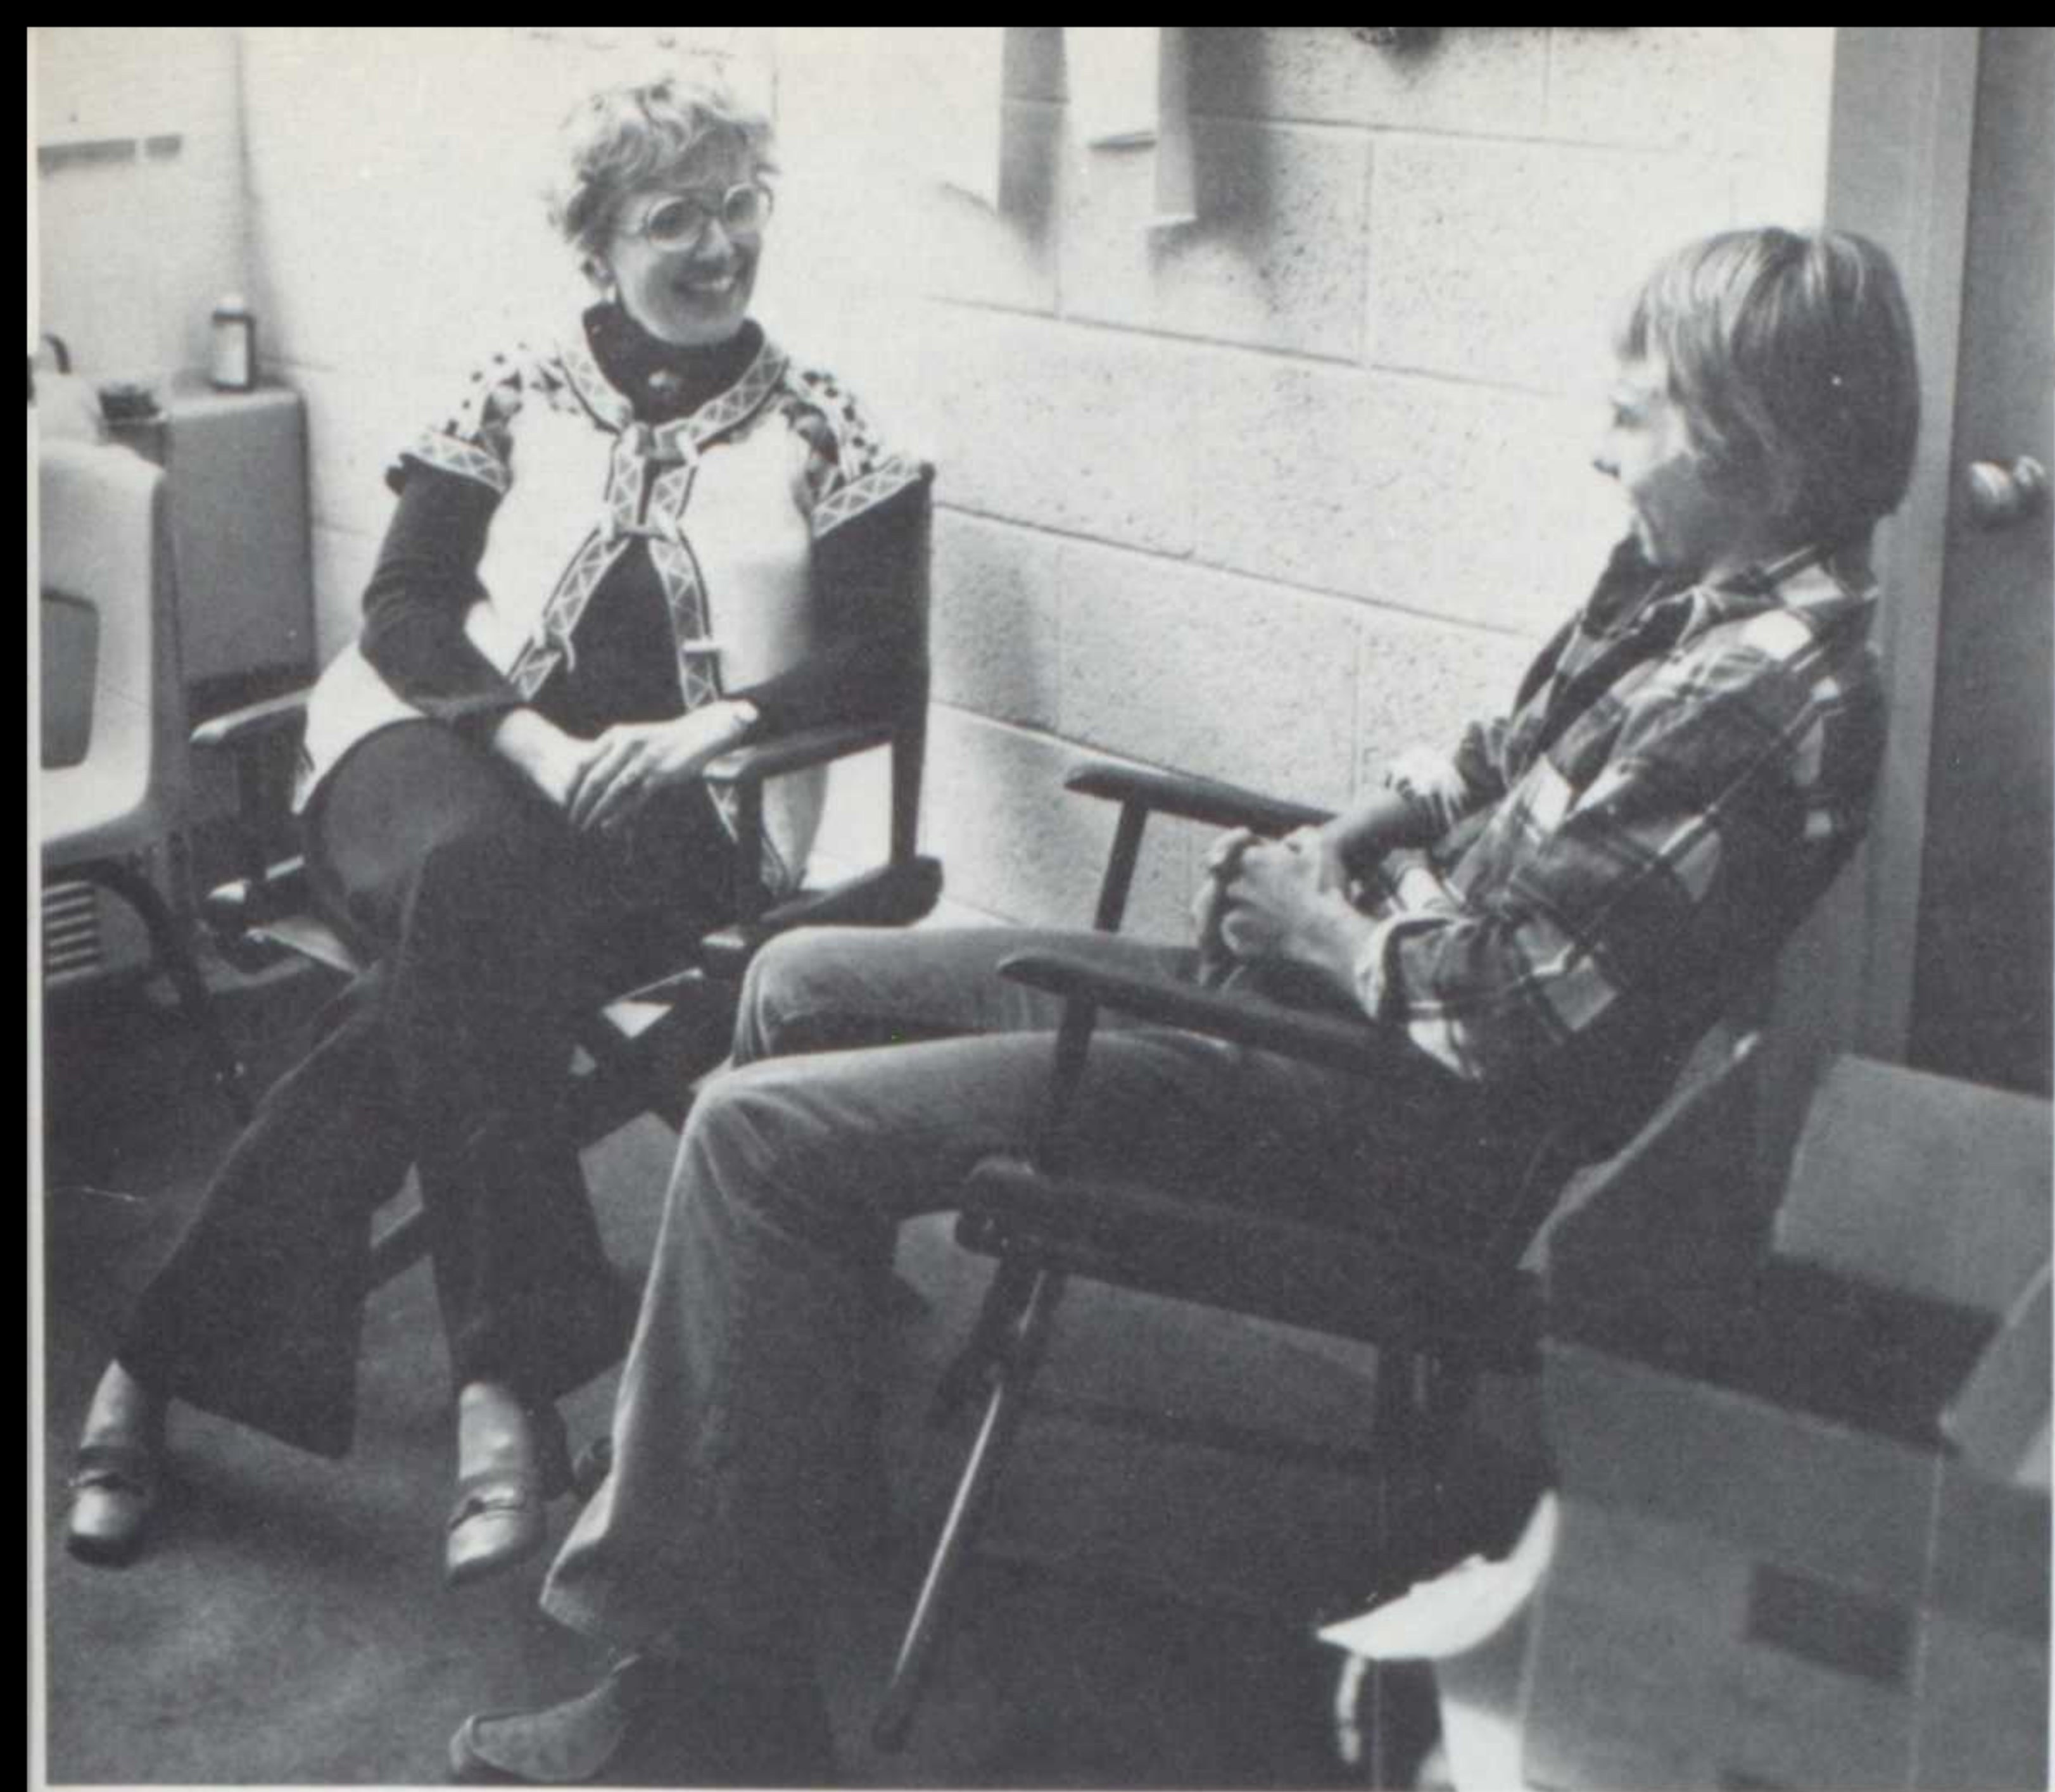

—H. Briggs

—H. Briggs

**Just a little bit of know-how** makes it easier for Ms. Seed in helping Leah Neel find the call number of her Shakespearean Tragedy research book.

## Note:

O.K. folks, we're going on a shopping spree! But wait a minute. With all the stores and firms in the Cleveland area, we'll be running around forever trying to locate a certain store.

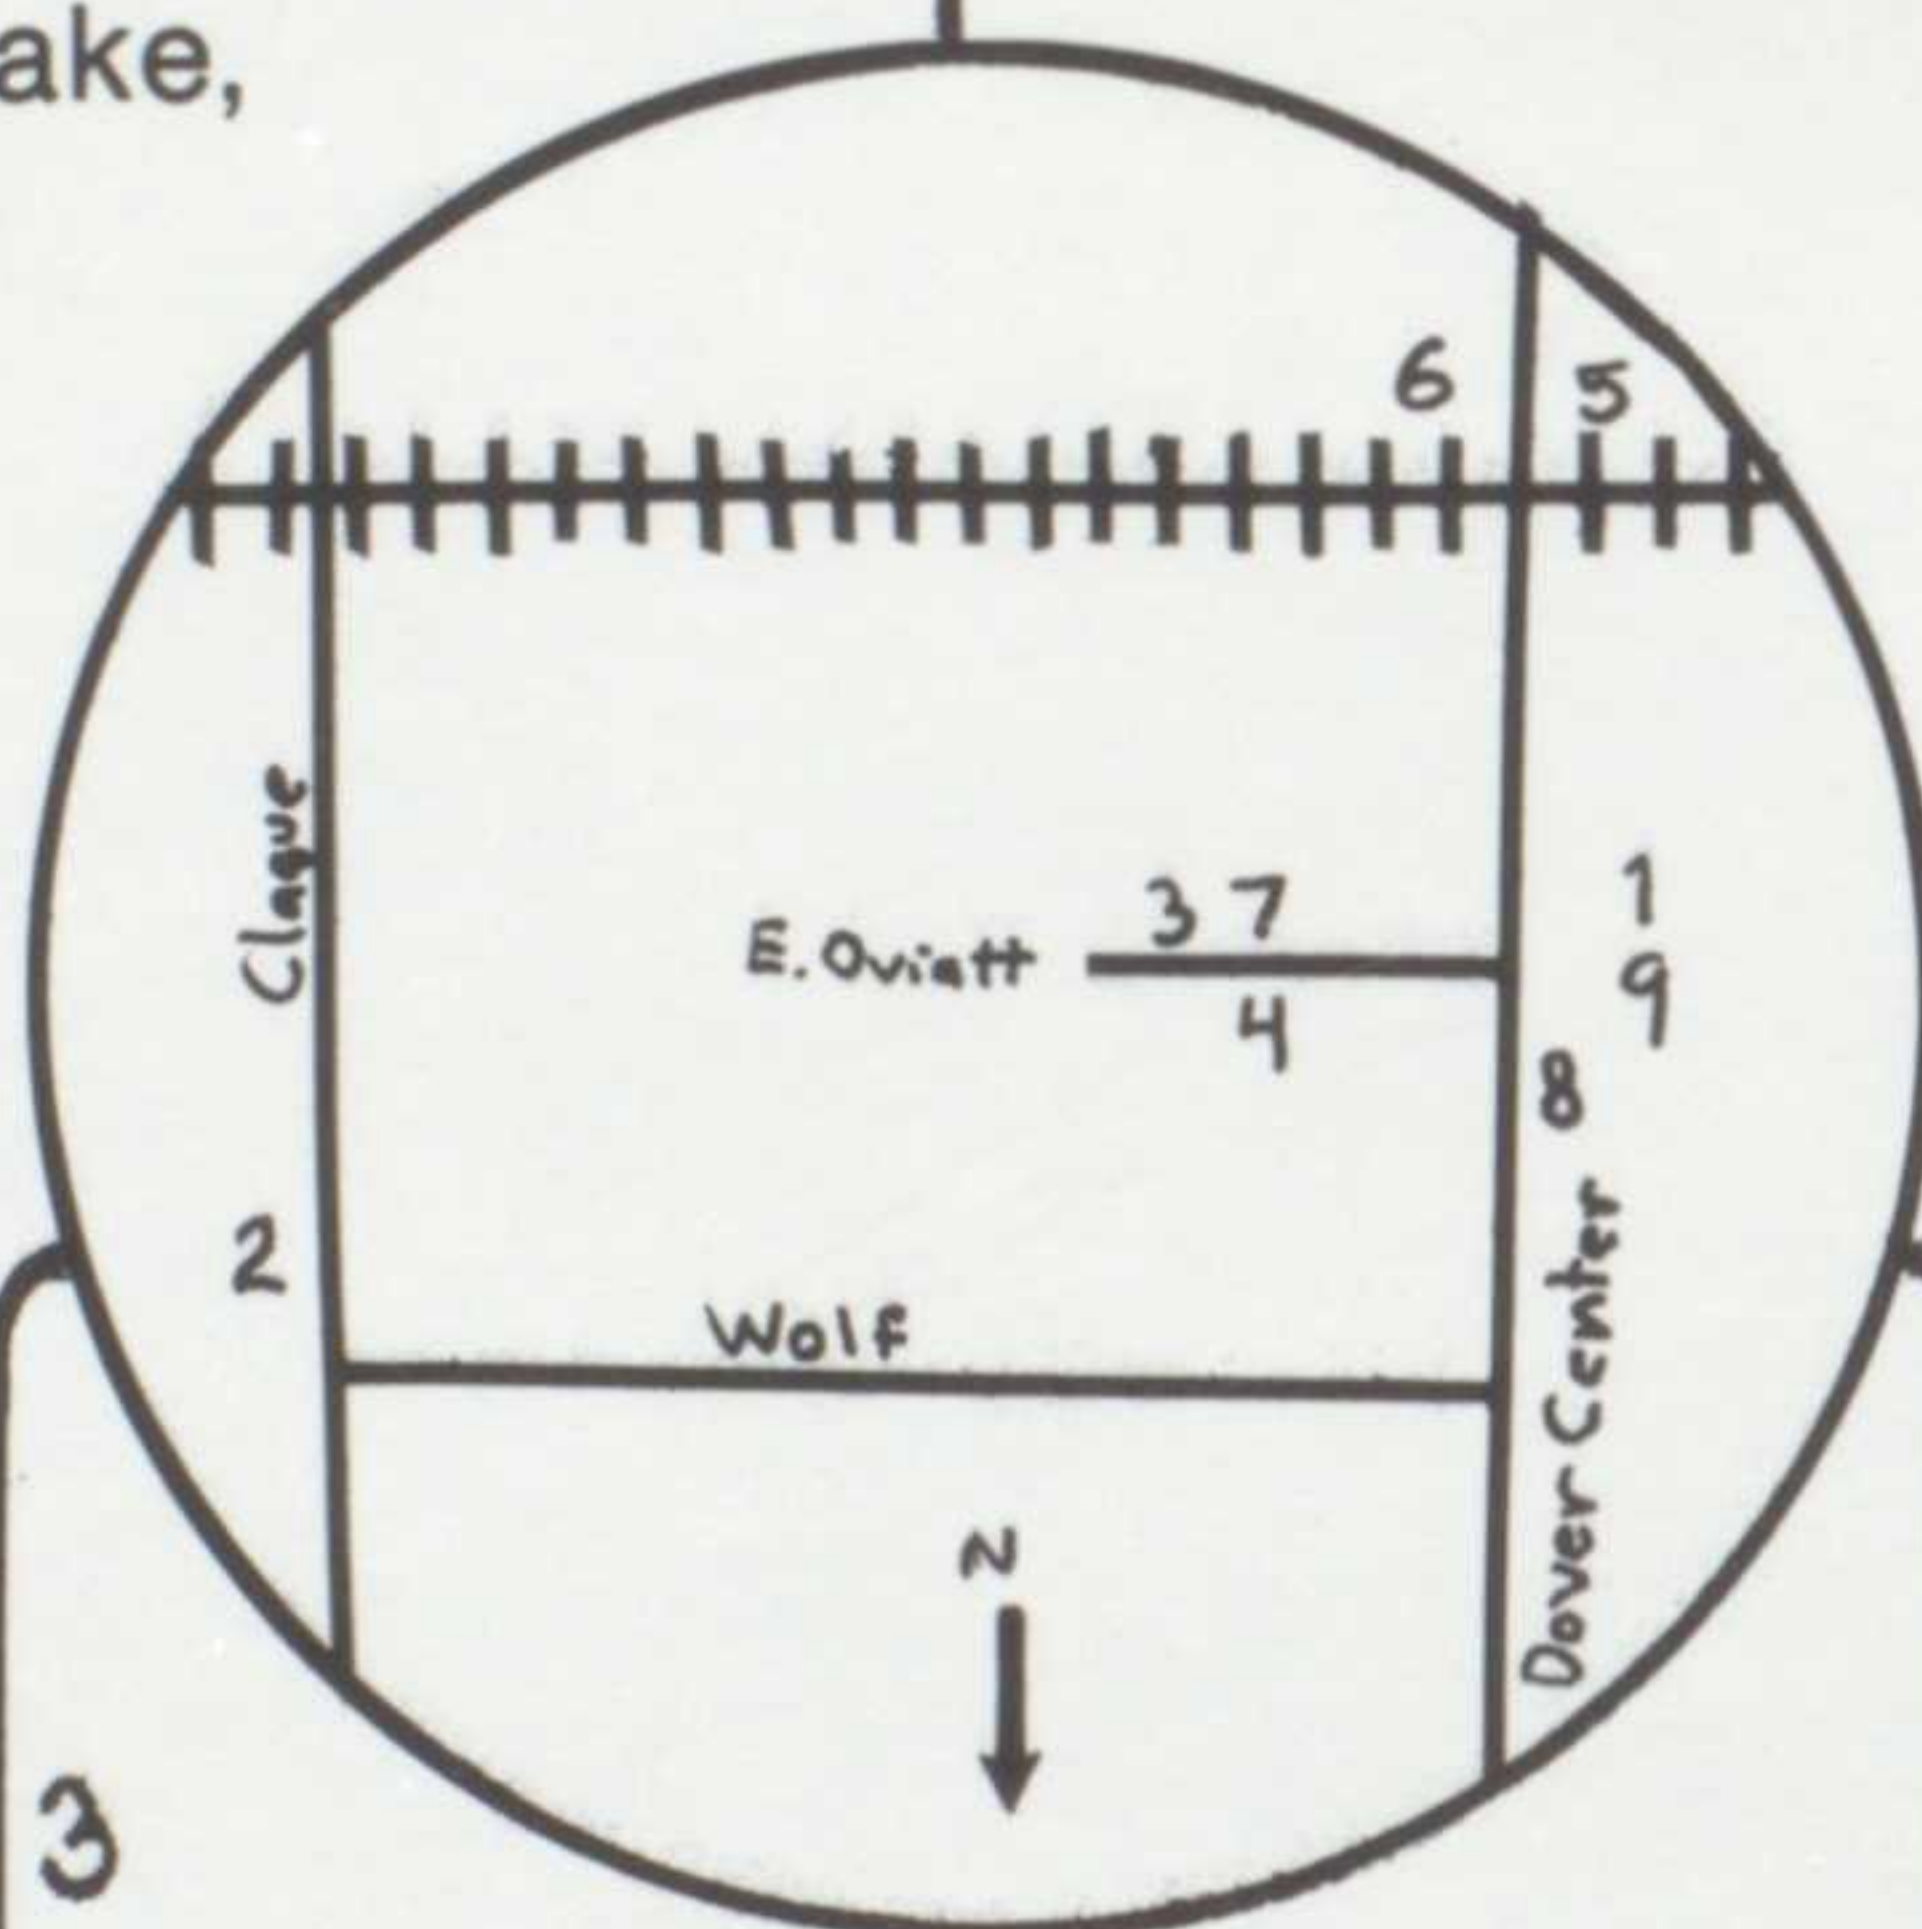

Ah ha! Not so with this ad section. All the firms have been placed in a geographical order starting from the east side of Bay Village and ending up in East Cleveland.

Maps have been provided for reference. As a result, a clear, concise tour containing different geographical sections has been instituted. They include: South Bay, Central Bay, Bay Shopping Center, West Bay, The Landings, South Suburbs, Lorain, Westlake, Westgate, Southwestern Suburbs, Fairview Park, Rocky River, Lakewood, Cleveland, and East Cleveland. Have fun!

Jay . . . . .  
 . . . . . Mom & Dad

**Where do you go to find . . . ?**, volume 49 of the Bay High School yearbook was printed through offset lithography in a 9 x 12 volume with 288 pages and 1,200 copies. The printer was Inter-Collegiate Press, Inc. of Shawnee Mission, Kansas with John Fowley serving as company representative.

The cover employed embossing, debossing, and hot stamping processes on standard blue, Mission grain material. The end-sheets are 100 lb. enamel paper printed in percentages of process blue. The body of the book employs 80 lb. enamel paper. The 16 pages of the Side Streets section utilize 80 lb. white Heritage Parchment.

Eight flats of spot color, three of process blue, three of cherry red, and two of lime green were used in the book.

Body type consisted of 6pt., 8pt., 10pt., and 12 pt. Newton Medium, boldface and italics. Headline types included 18pt., 24pt., 30pt., and 36pt. Newton Medium, as well as Letraset, Formatt, Chart-pack and Geotype transfer types.

Page numbers are 30pt. Avant Garde Extra Light, reproduced by Mr. Phil Vedda of Vedda Litho Co. They were hand set by staff members.

Photography was basically student work, with assistance from Hal Briggs and Lynn Mead. Senior, underclassmen and faculty portraits and index group shots were taken by Hal Briggs Photography.

**The 1977 Whole Bay Catalog** received the following awards: Medalist and three All-Columbian Honors in layout and design, creativity, and content from Columbia Scholastic Press Association; 1st Place and two Marks of Distinction in coverage and content from National Scholastic Press Association; A+ from National School Yearbook/Newspaper Association; Buckeye from Northern Ohio Scholastic Press Association.

The staff would like to thank the parents, teachers and students whose cooperation has helped in the production of **Where do you go to find . . . ? , Handbook, '78.**

**Staff:** Rhonda Clark, John Davis, Susan Fain, Martha Raymond, Editors-in-chief; Emmy Diedrick, Copy Editor; Pam Clark, Sue Coffin, Underclass Editors; Jeanne Liberatore, Donna Shore, Organization Editors; Karla Mayock, Becky Rothfus, Senior Editors; Laurie Meeks, Activities Editor; Tracy Priest, Academics Editor; Mary Ellen McDonough, Stacy Saunders, Faculty Editors; Janet Durfey, Shari Monson, Index Editors; Carol Maher, Advertising Manager; Gay White, Business Manager; Ms. Coolidge, Adviser.

**The Editors-in-Chief—Front Row:** John Davis, Susan Fain. **Back Row:** Martha Raymond, Rhonda Clark.

# We found: The best...

*I almost thought you were sane until you came up with this one. The best what?*

We're not picky; we'll take anything.

*Now, wait a minute. Let's establish why you are even taking anything.*

OK, since the theme of the book is where do you go to find, we decided we would give you a little last minute assistance.

*I really appreciate that.*

Well, anyway, here goes . . .

The best... 

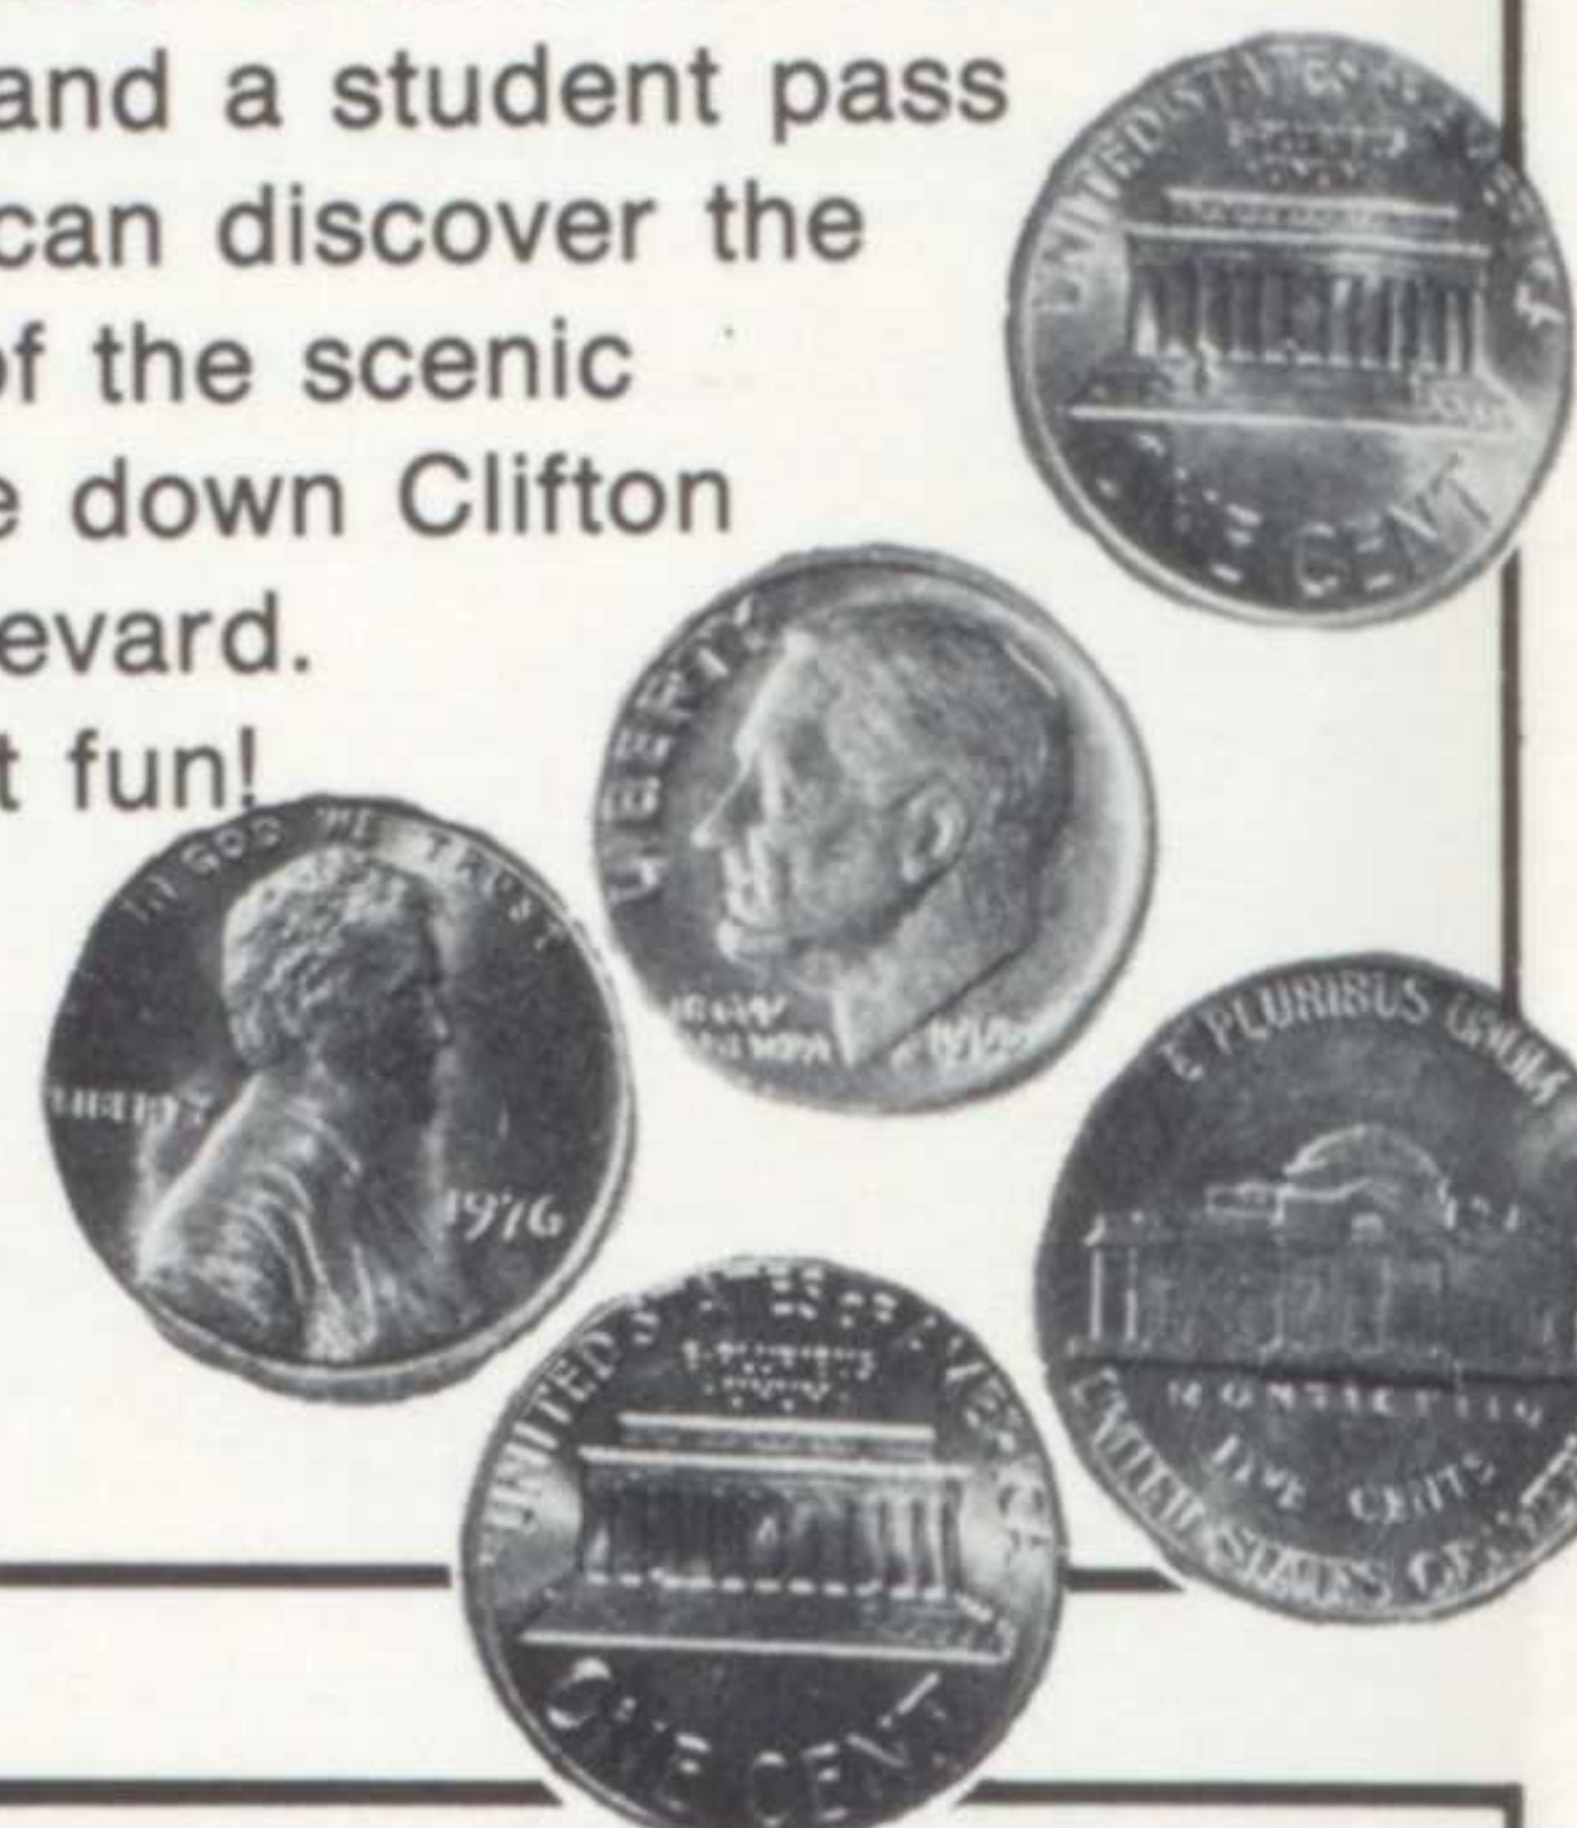

## Greeting in the hall

# HI

Commonly corrupted from hey.

## Cheap bus route

The 55C downtown. For 18¢ and a student pass you can discover the joy of the scenic route down Clifton Boulevard. What fun!

Bay Pastry's eclairs. Melt-in-your-mouth-shells stuffed to oozing with custard. While you're there, check out the strawberry birthday cake, a great investment for a food orgy.

## Donut

## Small door

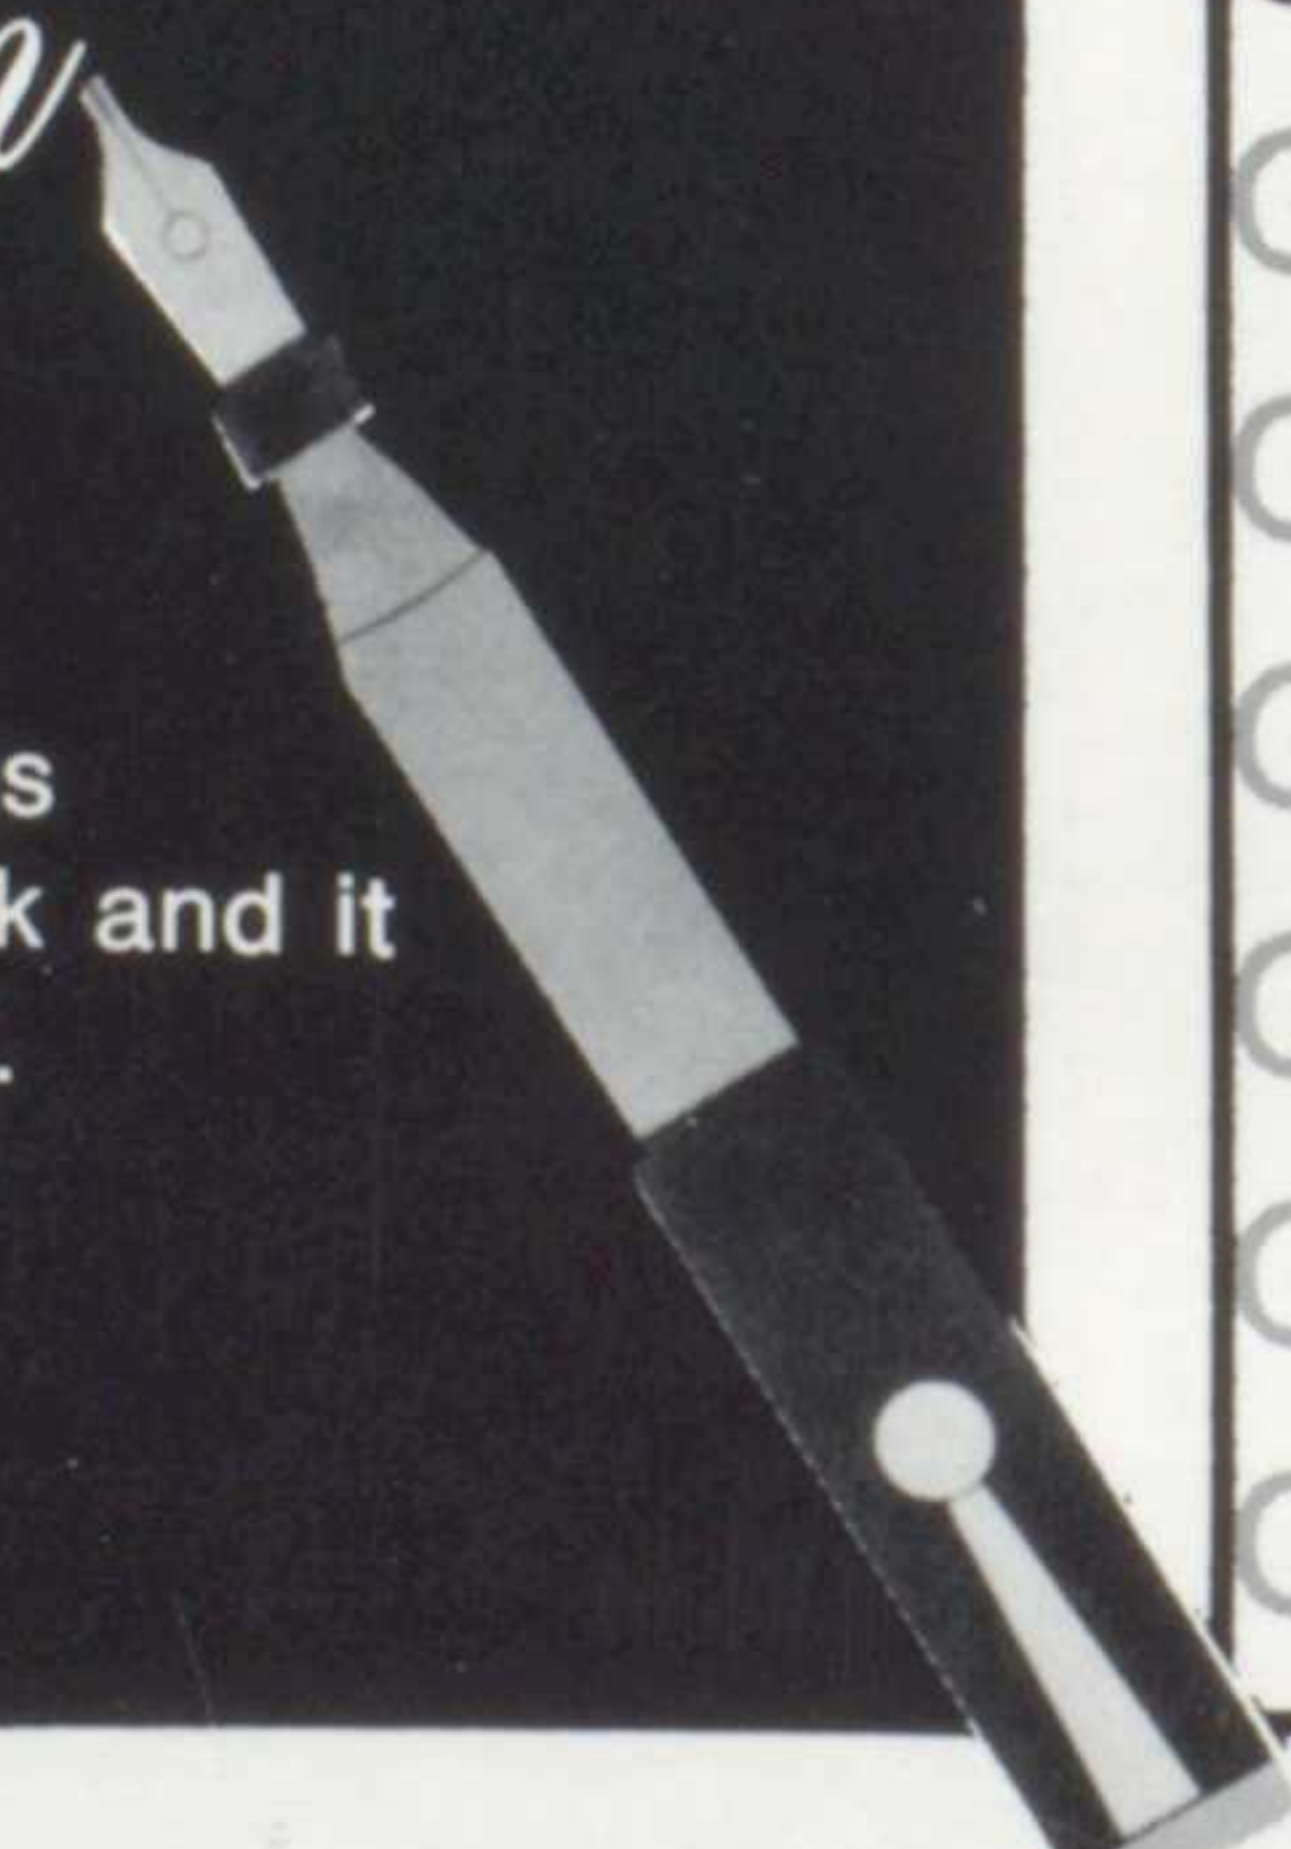

In the basketball concession stand,

across from the west gym. If you are under three feet, you can enter standing up. Otherwise, forget it; crawl through.

# Pen

Mrs. Waltz's black-list pen. It hangs around her neck and it definitely works. Mrs. Fredrickson brought it back from a cruise.

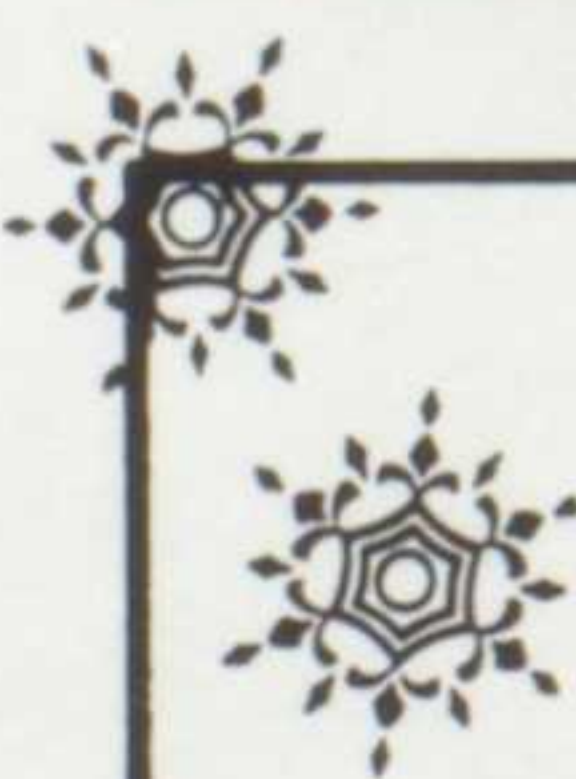

## GossipGossipGossip

# WESTLIFE

Mary Slama's "Police Beats" column in the **Westlife**. Everything you've ever wanted to know about anybody's criminal life.

## Snow piles

The school's back parking lot. Eight deep feet of beautifully dirty peaks. Beware of pre-explored holes and hibernating bodies while practicing mountain-climbing skills and bobsledding runs.

## Threat

Grounded for life. Don't laugh; it's happened.

Get dressed up and drive around. Jodee Janda, Becky Rothfusz, and Stacey Minium do it all the time.

## Thing to do on a dead Friday night

## Quasi-lighthouse

The wooden monstrosity in Huntington. Actually, it is a water tower, so much for the power of naked eye observation.

Place to wander through for atmosphere on a Sunday afternoon

Baycrafters. Oodles of neat hand-crafted items to stimulate the imagination.

The old caboose in front is great for climbing.

## Place to find unique people

In front of the May Company, downtown; home of Resurrection Mary. Bring a sack lunch and binoculars and stay all day.

## Concert

Fleetwood Mac at the Coliseum. Wow.

## Defunct Detention Room

108. Nice, windowless, atmosphere, perfect for staring at the ceiling for a few hours. Incredible electric-blue walls. A totally fun experience.

## Place to pick a fight

Westlake High School during lunch. Sing the Bay Fight Song at the top of your lungs in front of the cafeteria. Watch out for the football team.

## Black market potato chips

Pringle's from Mom. The only way to get chips since their ban is to bring them from home.

## Relevant comic strip

Funky Winkerbean!!

Even though Tom Batiuk taught in Elyria, his strip could very well be set in Bay. Bay High and funny, what more can you ask?

## Fur on the hoof

Lake Erie Junior Nature and Science Center. Every kind of fur from raccoon to Guinea pig. Bring your own seamstress.

## friend

Varies according to sources. Could be soc notebook, teddy bear, favorite pencil, gold fish, conventional buddy.

*That was pretty funny.*

I'm glad you thought so, but what did you think about the rest of the book?

What?

# Well, did you find anything interesting?

**Y**eah, that piece on the treehouses was simply fascinating.

Don't be snide. Was it worth your while to read this book?

*You know something, as much as I hate to admit it, this book was rather unique. Besides the telephone book, where else can you let your fingers do the walking? I had fun trying to find things I never thought were lost.*

Very cute, Now, honestly, did you have any trouble finding anything?

*The more I think about your system, the more logical it sounds. If you're looking for something, half the battle is finding the right place. I must confess your lost shoe approach did help.*

Great, you suffered through 286 pages of the lost shoe approach.

*There's only one thing I don't really understand. Where do I go to find the things I can't find here.*

Obviously, it was impossible for us to include everything about the school year in the book. We never pretended to. There are things you have to discover for yourself. Use the book as a guide, a sort of reference tool. We found what we could, but now it's your turn. Apply the contents to your personal experiences.

*What do you mean, personal experiences.*

Well, Bay High is a big place with many individuals. Yet, Bay High means something different to each one. Granted, some people hate it, even to the point of putting for-sale signs in front of the school in early morning hours, or a moustache on Mr. Brandt's portrait

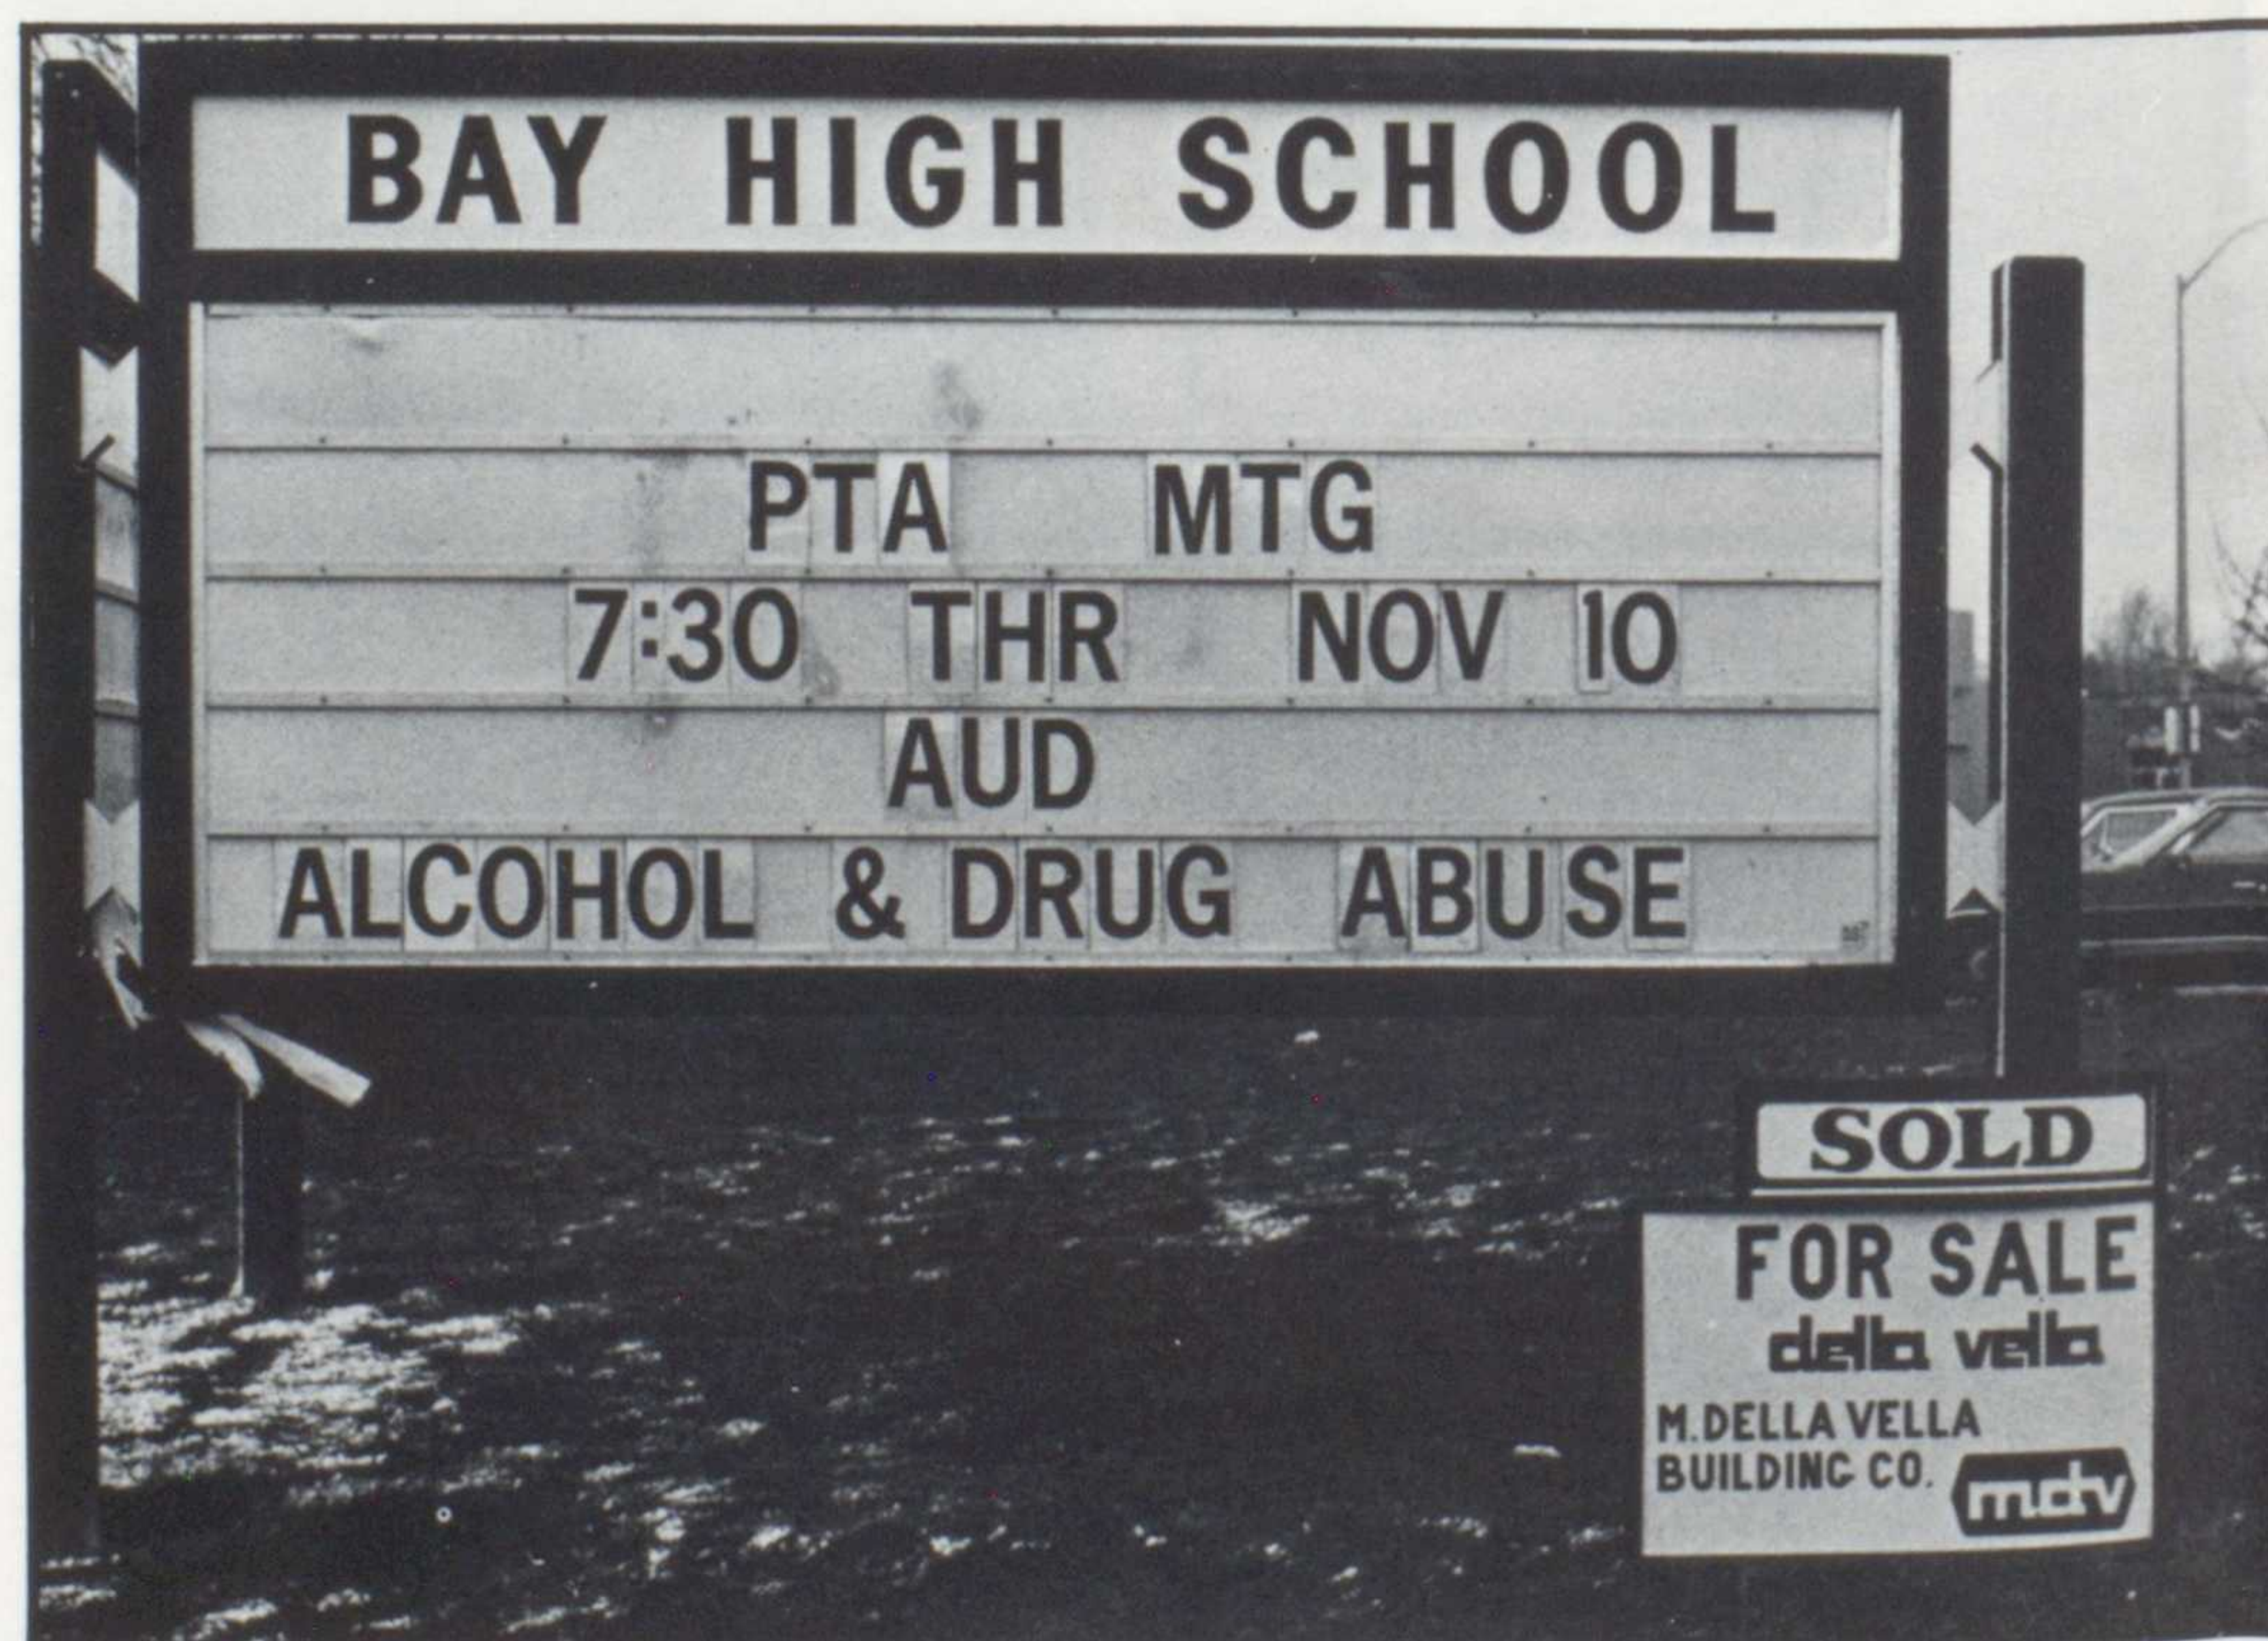

of Lincoln, but, in general, it's not that bad of a place. A few people even like it here, or are simply making the best of compulsory education.

*So, get to the point.*

Well, these people make the whole Bay High experience fun. If you enjoy something, that something is worthwhile. For example:

-J. Heiser

—J. Heiser

OK, try this; at the late summer get-to-know your-AFS-students-party, Mike von Glahn and Jeff Tiefermann were trying to describe snow for Tess, who had never seen it. How about that?

*Ah, I see. It's not so much what is here in black and white, it's the memories that ink gives me. It's all in my mind.*

—J. Heiser

Dave Sankey, Ned Koster, Dave Dye and John Gross built a snowman in the library courtyard during the first December blizzard. Three days later, it melted in the first December heat wave. Do you remember that?

*Not really.*

—J. Heiser

*Let me flip through the book again,*

*Maybe...* 

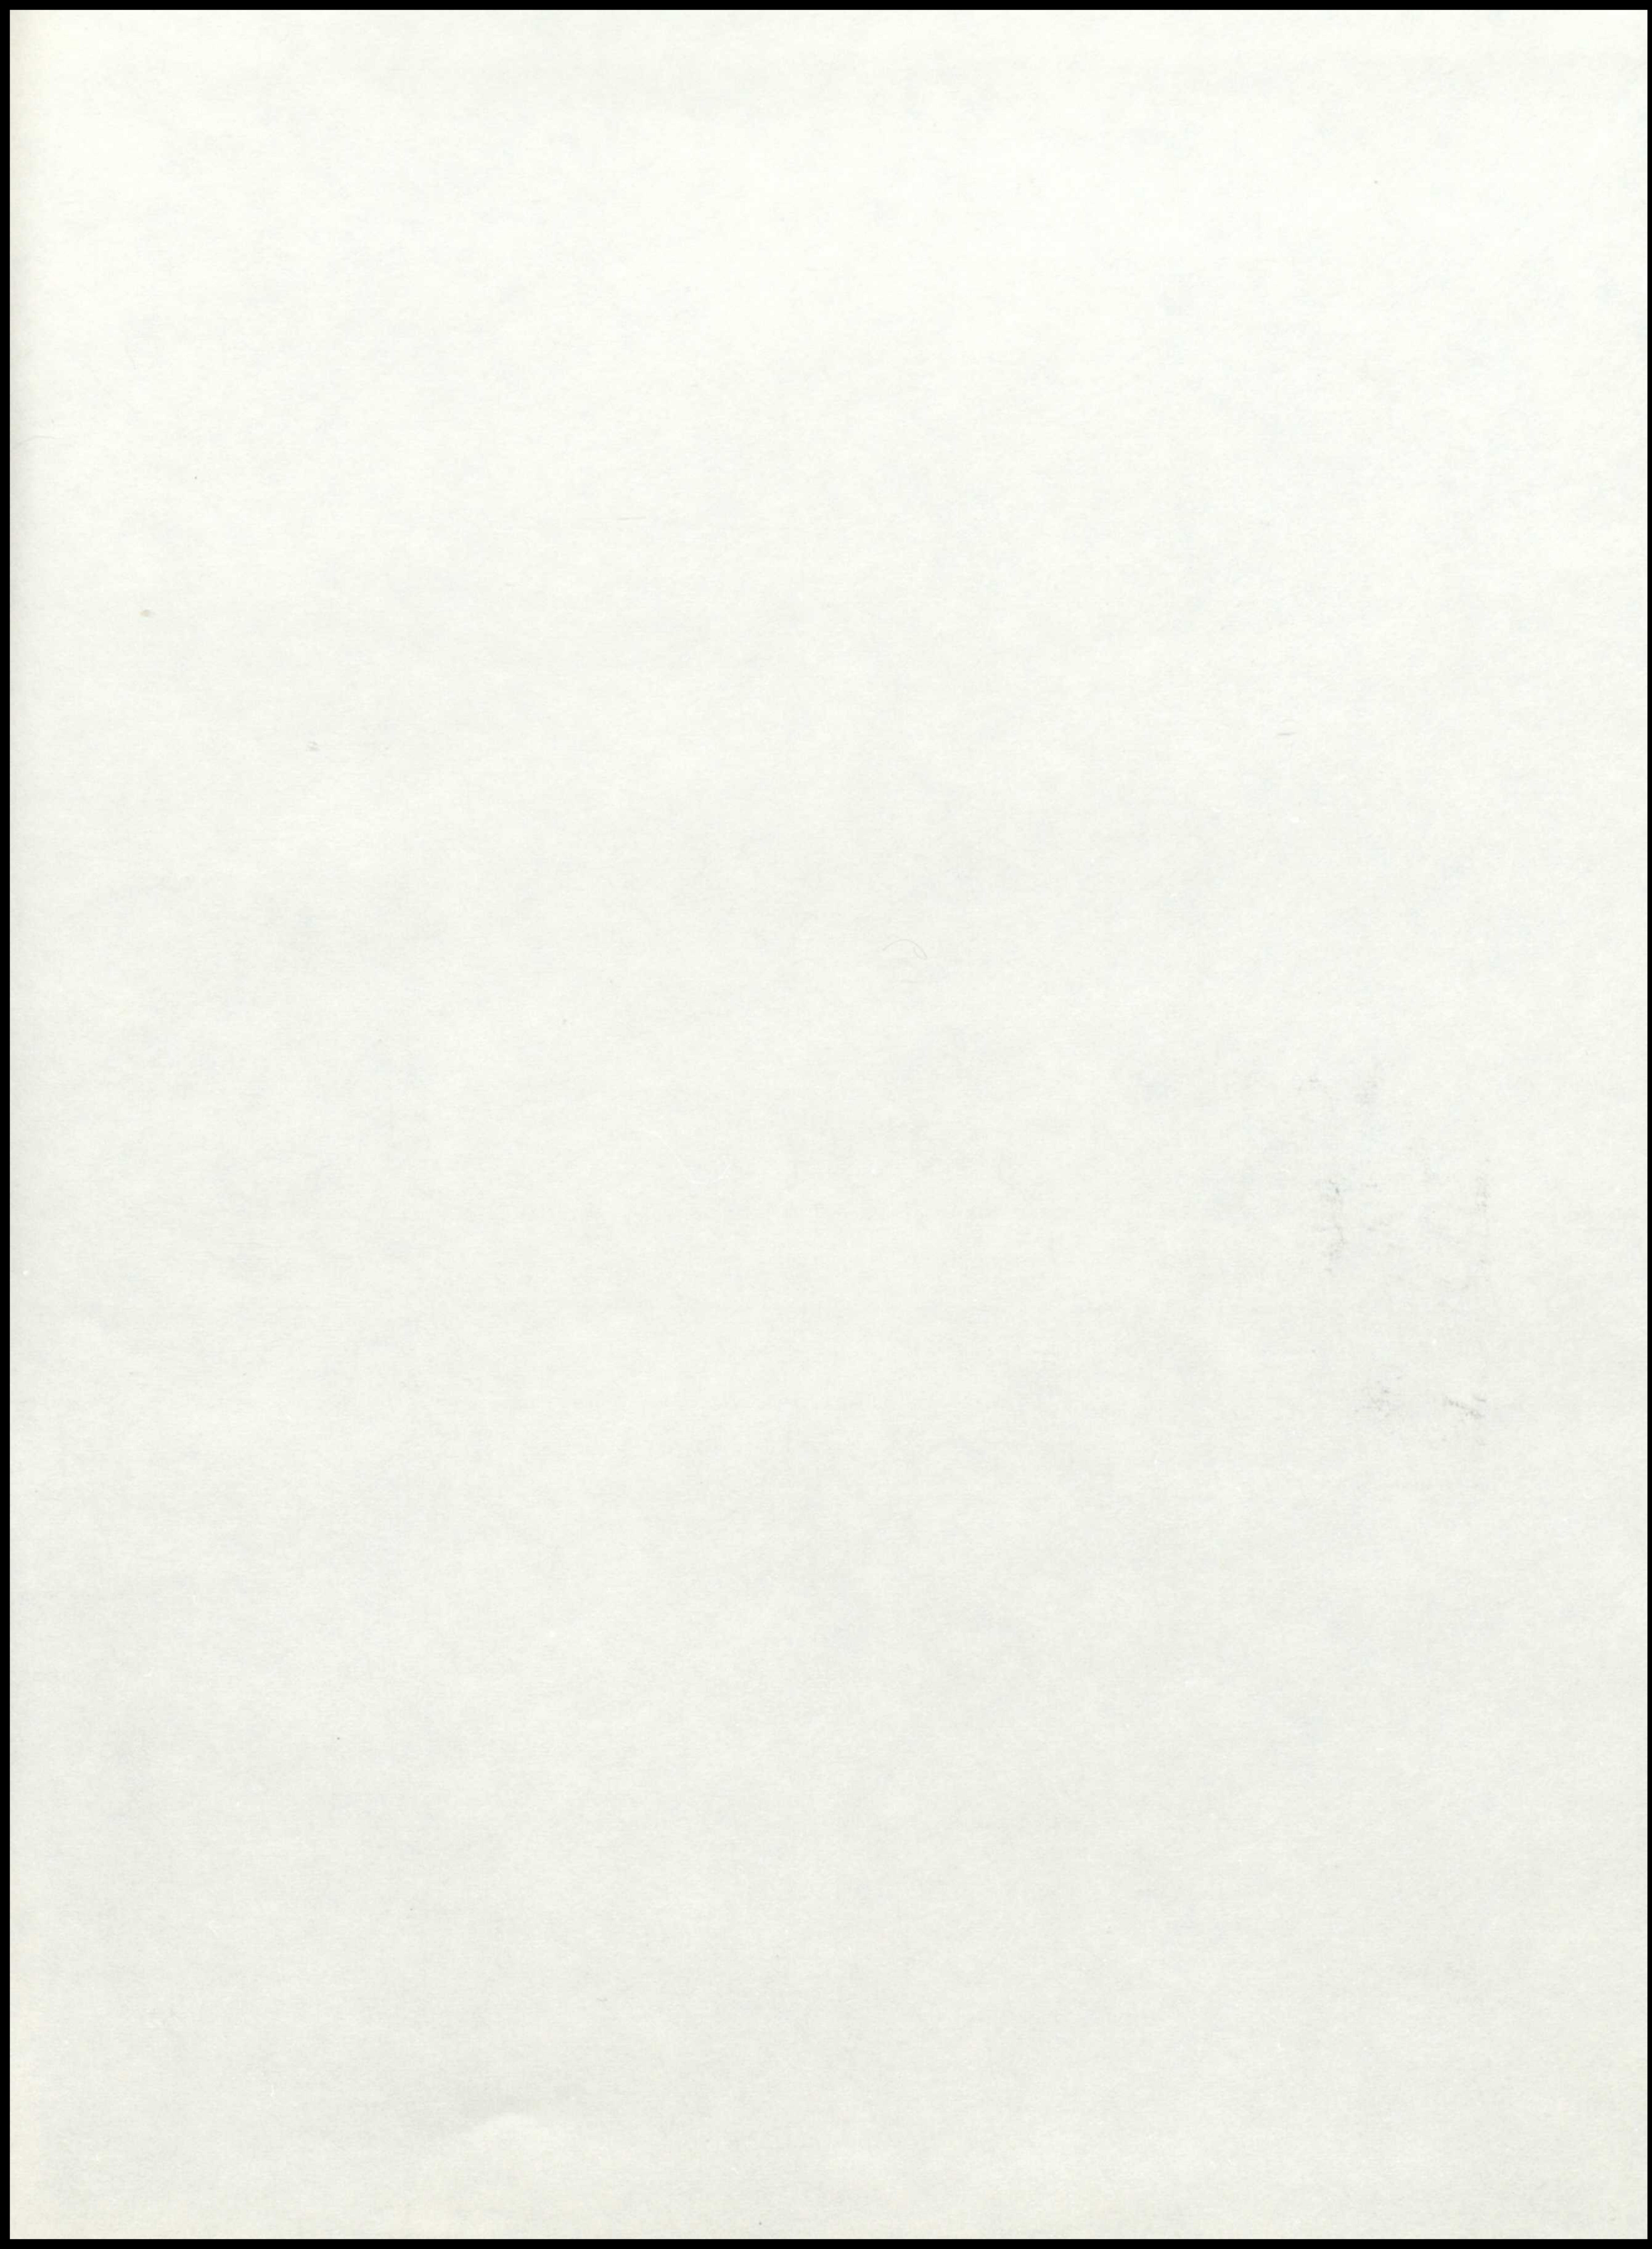

You can find something you didn't find before.

-J. Heiser

Yes, like Mark Gillespie. He was standing at a bus stop, and just happened to spy a stray 10 dollar bill. What luck!

*I guess the second look pays.*  
Yea, finders keepers.
